The United States sees INFCE as a cooperative international effort to evaluate the role of nuclear power technology in an international context and help develop an objective appreciation of the non-proliferation, economic, and other implications or different fuel cycle approaches. INFCE provides a two-year period in which nations can re-examine assumptions and find ways to reconcile their overlapping but somewhat different emphasis on the use of nuclear energy. While INFCE has a technical cast, it is part of the political process of laying a basis for a stable international regime to govern nuclear energy through the end of the century.

A stable international regime should build upon and reinforce the previous accomplishments of the Atoms for Peace Program, the IAEA and the NPT. Even if all new institutions are not under the jurisdiction of the IAEA, they should be consistent with it, and help to reinforce the safeguards system that has separated peaceful and military uses of nuclear energy in the past. The IAEA should be envisaged as the center of the institutional system.

A stable regime should be designed to minimize the global distribution of weapons usable materials and vulnerable points in the fuel cycle, while adequately meeting the energy security needs of all countries. One can visualize five basic norms for a strengthened international regime: (1) full scope safeguards; (2) avoidance of unnecessarily sensitive facilities; (3) use of diversion resistant technologies; (4) joint control of sensitive facilities; and (5) institutions to insure the availability of the benefits of nuclear energy.

The first norm—full scope safeguards—is basic to the existing international regime that we are trying to reinforce. It is increasingly accepted that full scope safeguards provide a credible assurance of peaceful intent, without interference with research or power programs. The second norm says countries should avoid sensitive facilities that involve weapons-usable materials unless they can be shown to be economically necessary. While allowing a range of interpretation, this norm rules out certain activities when they are clearly economically indefensible. This does not reserve sensitive facilities only to existing sites, but it does emphasize the shared interest of members of the international community in minimizing the vulnerable points in the global fuel cycle, and thus reducing

the burden upon the international safeguards system.

The third norm—use of technology that is as proliferation resistant as possible or appropriate in a particular institutional situation—appears to be attracting support. A number of interesting ideas have been suggested in the past years. While still too new to judge fully, such ideas indicate the value of continuing the search. At the front end of the fuel cycle, France has been investigating chemical enrichment techniques that ideally could increase the difficulty of producing weapons-grade material. The proponents of CIVEX reprocessing for a breeder system have suggested processes and stipulated a useful set of criteria for terrorist proofing against which their technical suggestions can be judged.

These criteria are:

1. No pure plutonium in storage.
2. No pure plutonium at any intermediate point.
3. No way to produce pure plutonium by simple process adjustment.
4. No way to produce pure plutonium without equipment modifications.
5. No way to carry out equipment modifications with facilities and components normally on site.
6. No way to carry out the required equipment modifications without plant decontamination or entry into extremely high radiation fields.
7. Length of time required for successful diversion should be such that adequate time is available for national and/or international responses.

In the area of research reactors, both France and the U.S. are developing high density fuels that will provide sufficient neutron flux at lower levels of enrichment to cover nearly all experiments for which most research reactors are used. In short, developments and explorations in technology can help to create an environment for a stable regime, though it should be remembered that technical fixes alone do not solve the problem of proliferation.

The fourth and fifth norms suggest the need to develop two types of institutions, both of which are included in the INFCE terms of reference. First we need to explore the characteristics of institutions to deal with the possibilities of effective joint control. Where sensitive facilities are economically essential and difficult to safeguard nationally, we should examine together forms of multinational ownership and management which might help to reinforce the effect of international safeguards. The political costs of abrogating an arrangement that involves a number of states would be added to the costs of dismissing IAEA inspectors. Criteria and procedures can be developed for "effective multinationality" which requires the involvement of a number of states while inhibiting replication or dissemination of the sensitve technology to national facilities.

Finally, we need to develop institutions to implement the principle of assurance of benefits. Supply assurances, fuel trusts and international spent fuel repositories are good examples. We are already making progress in discussions of a fuel trust, and President Carter has announced wilingness to make a substantial commitment. Essentially this could be a stockpile of fuel to be released to countries which have all their facilities under safeguards, have a clean safeguards record, and have chosen not to develop sensitive facilities on a national basis. By relieving the burden on the world safeguards system, these actors deserve special recognition and help with their potential energy security problem. Such a fuel trust need not be unduly large to accomplish its purpose of reinforcing the reliability of the uranium market by reducing political risks. Complementary bilateral and multilateral assurance measures can also contribute to this goal.●

MILLER INVESTIGATION OF IMPACT OF LONGSHOREMEN ACT ON SMALL BUSINESS

HON. GEORGE MILLER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MILLER of California. Mr. Speaker, a great crisis has been brewing over the last several years in the recreational boat and marina industry which threatens not only the future of these small businesses, but also the millions of boat owners who utilize them. In my own district, the cities of Richmond, Martinez, and Pittsburg have all constructed new marinas for use by the citizens of Contra Costa County, and throughout the country. Other cities and private interests have similarly invested large amounts of money into such projects.

Now, the future of these marinas, and the future of the small, recreational boat business in general, is in serious jeopardy. This crisis has been precipitated by the decision of a Department of Labor bureaucrat who, without any justification in law, decided to apply the Longshoremen and Harbor Worker's Act to the small boat industry. Overnight, insurance rates skyrocketed without any corresponding increase in injuries among employees. In some areas, rates rose by as much as 400 percent, forcing businesses either to pay the higher rates—and correspondingly increase their prices to boatowners—or close down.

Working conditions in the small boat business, and at marinas, make wholly inappropriate the application of insurance rates which were designed for large scale, injury-prone shipbuilding and repair yards. Assistant Secretary of Labor, Daniel Elisberg, who as a Senate staff person participated in the drafting of the 1972 amendments to the Longshoremen's Act, recently acknowledged this disparity before the Subcommittee on Compensation, Health, and Safety, of which I am a member. Mr. Elisberg told the subcommittee:

> There have been relatively few injuries reported by this industry. During the three months July–September, 1977, when we conducted a survey, only 158 such injuries were reported nationwide, of which only 62 involved lost time from work. In February, there were 24 lost time injuries reported; in March, 44; and in April, 28.

For the sake of comparison, I would like to point out that there were 171,300 injuries in all occupations covered by the Longshoremen's Act throughout the Nation in 1976. Given the infinitesimal injury rate in the recreational and marina businesses, it strikes me as nothing short of preposterous to impose the high rates of the LHWA, which were designed for hazardous occupations, to these small scale firms.

The U.S. District Court for the Northern District of California reached a similar conclusion earlier this year. In the case, Boating Industry Associations, and others, against Ray Marshall, the court found no legal justification for applying the 1972 amendments to recreational boat builders and marinas. The court ordered the Department of Labor to rescind notice 21 and instructed the Federal Government to declare—

> That it is no longer the official position of the Labor Department that the LHWA applies to recreational boat builders and marinas.

Together with 31 House and Senate colleagues, I wrote to the Secretary of Labor and requested that he accept the ruling of the district court and not file an appeal. Unfortunately, the Labor Department has decided to pursue the appeal.

It was because of the obvious failure of either the courts or the bureaucracy to address the concerns of small businessmen and their millions of affected customers that I introduced H.R. 8878 last year. This bill would remove small boat builders and marinas from coverage under LHWA if the workers do not work over the navigable waters of the United States, and if the workers are covered by State workman's compensation laws. Despite a great deal of testimony before the Subcommittee on Compensation, Health and Safety, it now appears unlikely that H.R. 8878 will be enacted this year. For boatmen in California, the problem will take on even more serious overtones because the State legislature has not renewed the coverage of these yards under the State fund. For many builders and marinas, the future appears extremely bleak.

I am very disappointed that enactment of H.R. 8878 will have to be delayed. For many months, I discussed this legislation with business and labor organizations, Members of Congress, representatives of the Department of Labor, and others. I do not believe that the specific provisions of this bill would cause any of these interests any significant problems. Yet promises of cooperation and good faith have apparently gone by the board, and the penalty will be unjustifiably paid by small boatmen.

In order to establish a sound empirical base for next year's action on this legislation, I intend to request the General Accounting Office to begin immediately an investigation of the legislative history and fiscal impacts of notice 21 on small recreational boat builders and marinas. I also am requesting the GAO to investigate the ripple effect of notice 21 with respect to the closure of yards increases in mooring, launching and storage fees for boatowners, and other related cost increases which are passed along to those who patronize marinas and recreational boat yards. GAO will, in addition, be asked to compare the injury rates in small businesses with the rates in larger shipbuilding establishments in order to determine whether there is any rational basis for imposing the high LHWA rates on small employers.

In addition, I will ask the GAO to investigate whether evidence exists to determine if insurance companies are exploiting notice 21 in order to impose unjustifiably high rates for recreational boat makers and marinas.

Mr. Speaker, this investigation will lay important groundwork for legislative action in the next session. I intend to pursue the policy of H.R. 8878 because it is

evident to me that the Longshoremen and Harbor Worker's Act has been seriously misinterpreted and misapplied by the Department of Labor. The effects of notice 21 are being felt by employers, workers, and customers alike. This unreasonable, and legislatively unjustified policy, represents a very serious sword over the heads of the entire recreational boating industry which must be corrected. I am hopeful that, armed with additional evidence of the ill-wisdom of this interpretation, the Congress will move more expeditiously next year.●

BOSWORTH MUZZLING

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, yesterday the chairman of the Economic Stabilization Subcommittee (Mr. MOORHEAD of Pennsylvania) sent me a copy of a letter he received from the President's principal economic adviser, Charles Schultze, in response to charges that the director of the Council on Wage and Price Stability, Barry Bosworth, had been muzzled by the administration. Chairman MOORHEAD also placed a copy of the Schultze letter in yesterday's CONGRESSIONAL RECORD at page 26561.

Both Mr. Schultze and Chairman MOORHEAD insist that the Council on Wage and Price Stability continues to be free of "all political and bureaucratic pressures," even though any future comments by Mr. Bosworth on pending wage negotiations must be cleared by a new "coordinating committee" on wage negotiations, to be chaired by Labor Secretary Marshall. How now downed COWPS can be free of political and bureaucratic pressures when its findings are filtered through a political-bureaucratic censorship board is beyond me.

At this point in the RECORD I include the text of a letter I wrote yesterday to Chairman MOORHEAD raising certain questions which have not been satisfied by the Schultze letter. I seriously hope the Economic Stabilization Subcommittee will take a hard look at this rather than simply swallowing whole the administration's weak defense. The letter follows:

HOUSE OF REPRESENTATIVES,
Washington, D.C., August 16, 1978.

Hon. WILLIAM S. MOORHEAD,
Chairman, Subcommittee on Economic Stabilization, Committee on Banking, Finance and Urban Affairs, Washington, D.C.

DEAR BILL: Thank you for showing me the courtesy of sending me a copy of Charles L. Schultze's letter to you on the Bosworth muzzling charge along with an advance copy of your press release.

I certainly would not presume to suggest any changes or additions to your press release. I would, however, be interested in knowing whether your apparent acceptance of and agreement with the Schultze explanation indicates that you consider your inquiry closed.

I ask this because it seems to me a number of facts have yet to be ascertained and a number of questions answered. Have you asked for and received a copy of the specific instructions, if any, given to Bosworth and others regarding their future statements on pending wage negotiations? Have you received from Secretary Marshall, who will be chairing the new "coordinating committee," any written information on the specific responsibilities of the committee and how it will operate? Have you asked Director Bosworth whether he thinks the required clearance of his statements on pending wage contracts with the "coordinating committee" will in any way undermine his ability to function as intended? What, for instance, would happen if the COWPS staff studied a pending wage matter and found it had great inflationary potential, and yet the "coordinating committee" refused to permit COWPS to make this finding public? Why has the Administration's top liaison with labor, Landon Bulter, been placed on the "coordinating committee?" Does his presence indicate that all future statements on pending wage negotiations must also be cleared by organized labor as well as the coordinating committee? How can Chairman Schultze (and you in your release) insist that COWPS will continue to be free of political and burcaucratic pressures when it is at the same time conceded that future COWPS statements must be approved by a political and bureaucratic "coordinating committee?"

In reading Chairman Schultze's letter I have no problem with the Administration attempting to "coordinate" its policies with respect to pending wage contracts. Obviously, the Administration should speak with one voice on its approach, strategy, and role, if any, on specific negotiations. But policy must be distinguished from economic findings. To subordinate the findings to the policy and, if they're not consistent, to suppress the findings, would be dishonest. To take an example closer to House and home, it would be like asking the Congressional Budget Office to report on the inflationary impact of a particular bill, then concealing that report if it were not consistent with the policy embraced by the committee in reporting that bill.

I would again remind you that the chief justification for creating the Council on Wage and Price Stability was to have an "independent" inflation monitoring capability within the Administration that could serve as an early warning system and focus government and public attention on inflationary situations. It was never intended to be an economic policy-making or policy advisory board in the sense that the Council on Economic Advisers is. It is essentially an inflation fact-finding and whistleblowing board and, to the extent that its findings are filtered through a political/bureaucratic "coordinating committee," its principal mission is jeopardized if not destroyed.

In view of the above comments and questions I hope you will see fit to pursue this matter further through public hearings and additional inquiries of the Administration on the matters I have raised.

With warm personal regards, I am

Very truly yours,

JOHN B. ANDERSON,
Member of Congress.●

IMPROVING THE CLIMATE FOR INVESTMENTS, ESPECIALLY FOR SMALL BUSINESS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. LAFALCE. Mr. Speaker, one of our most deeply troubling economic problems is the inadequate level of investments in the private sector. This is certainly not a new phenomenon, but it has been worsening in recent years.

Investment decisions are made on the basis of many considerations, including labor costs, transportation possibilities, communications, energy supplies, and local taxes. However, the general trend of investments is less flexible and is dependent on fewer variables. Among these, one of the most crucial is Federal tax policies for businesses; and it is quite clear that existing Federal business taxes have not been encouraging investments in the private sector. I might add at this point that it is all too often forgotten that without investments, the private sector may dry up and wither away.

The House's passage on August 10 of H.R. 13511, the Revenue Act of 1978, is a welcome first step toward rectifying this lamentable situation. This bill contains a number of provisions which will directly affect the supply of equity capital and will indirectly induce more investments in the private sector. They should form the basis of future measures which could further improve the climate for investments in this country.

The Revenue Act has four provisions which provide investment-related tax relief to industry. First, it lowers the corporate normal tax rate on taxable incomes above $100,000 from 48 percent to 46 percent, which could free hundreds of millions of dollars for reinvestment in corporations and industries. Second, it allows more flexibility in the use of the investment tax credit by businesses, makes the 10 percent credit permanent (under current law, it would revert to 7 percent in 1981), and extends the credit to rehabilitation expenditures for existing buildings used for business activities. Third, it allows use of the full credit on pollution control facilities which are amortized over 5 years and have actual useful lives of at least 5 years. Presently, only one-half of the investment may be covered. Fourth, it increases from $5 million to $10 million the limit on capital expenditures made over a 6-year period financed with industrial development bonds.

This bill also contains a number of provisions that are of special interest to small businesses. First and foremost, it introduces the long-overdue concept of a progressively graduated corporate income tax for incomes below $100,000. The following chart shows the new system and compares it to current tax rates:

Taxable income	New rate (in percent)	Current rate (in percent)
Less than $25,000	17	20
$25,000–$50,000	20	22
$50,000–$75,000	30	48
$75,000–$100,000	40	48

This momentous change is directly targeted at the equity problems which many small business owners have been confronting.

Further, certain changes have been made to the subchapter S provisions of the tax code. The subchapter S election permits owners to utilize the corporate form for business purposes, while still being taxed as if they had not incorporated. This election has been used by

many small businesses, but certain technical problems have caused a great deal of confusion and litigation, which has increasingly limited the effect of this provision. This bill corects some of these problems by: First, increasing the number of permitted shareholders in the companies; second, changing the eligibility rules with respect to shareholders who are husband and wife; and third, greatly simplifying the manner of making the election.

Another provision liberalizes the provision which allows individuals to deduct capital losses on certain venture capital investments against ordinary income. Finally, it expands the additional first-year depreciation allowance for both the percentage and the maximum dollar amount. This last change is specifically and solely targeted to small businesses.

The bill contains numerous provisions that will be of considerable assistance to owners of small businesses. As chairman of the Small Business Subcommittee on Capital, Investment, and Business Opportunities, I strongly applaud these changes which I have long backed; and I will work along these lines to further assist small businesses in retaining their very noteworthy and indispensable place in the American economy.

The Revenue Act affects the amount of equity capital available for new investments by cutting taxes on capital gains by $1.9 billion and setting a maximum tax rate on capital gains of 35 percent, instead of the present 49 percent. In addition, the bill employs the concept of indexing the capital gains tax, which means that the capital gains to be taxed would be those realized after the cost of an asset is adjusted for increases in the rate of inflation. These represent the first step in a complete reappraisal of the complicated relationship between the level of taxation on capital gains and the level of investments.

Mr. Speaker, all of these provisions can only work to improve the presently mixed climate for investments which are vital for the continued health of our economy.●

ENCROACHMENTS ON FREEDOM OF THE PRESS

HON. PHILIP M. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. CRANE. Mr. Speaker, "were it left to me to decide whether we should have a government without newspapers or newspapers without a government, I should not hesitate for a moment to prefer the latter." Though Thomas Jefferson declared his choice close to 200 years ago, he could very easily be standing here today addressing you, my distinguished colleagues. M. A. Farber sits in jail today, the victim of the latest judicial trespass into constitutionally protected areas. Twenty-six States boast shield laws, yet many have been weakened by interpretation and provide little or none of the thrust originally intended; in the Farber case, the judge required the production of privileged information, the New Jersey shield law notwithstanding. As a result of the recent Zurcher decision, law enforcement officers, armed with search warrants, can make surprise searches of newsrooms looking for information on possible crimes by third parties. In regard to freedom of the press, judicial restraint is foreign indeed, and we the citizens stand to lose the most should this trend not be halted.

Because of the recent encroachments on the freedom of the press, specifically the Farber affair, and the accompanying threats to our individual liberties and well-being, I am introducing today a bill to protect this constitutionally enumerated freedom. By prohibiting the courts from issuing search warrants and subpenas on journalists, this bill insures that their right to pursue their profession, the gathering of news information, shall not be abridged.

That the Founding Fathers recognized the need for a vital press is well-documented, and Thomas Jefferson's devotion to this principle needs little expansion. Others joined the cry. In the Annals of Congress, James Madison asserted:

> If we advert to the nature of republican Government, we shall find that the censorial power is in the people over the Government, and not in the Government over the people.

Even so Federalist a leader as Alexander Hamilton recognized the rightness of this cause. In the oft quoted People against Croswell case, he affirmed:

> The liberty of the press is the right to publish with impunity, truth, with good motives, for justifiable ends though reflecting on government, magistracy, and individuals.

The message set forth was clear: An adversary relationship between the press and the Government is not only acceptable, it is absolutely necessary in a democratic system of Government. The ballot box demands a knowledgeable electorate; no more reliable source of information exists than a free press.

Recognizing the essentiality of free speech, members of the court have echoed these sentiments in more recent times as well. In the late 1930s, the court elevated freedom of the press and freedom of speech to a "preferred position," with the burden of proof clearly laid upon the Government to show the unconstitutionality of an utterance or printed word. In the 1961 case of Konigsburg against State Bar of California, through a dissenting opinion that would prevail with time, Mr. Justice Hugo Black declared that he—

> . . . did not subscribe to the doctrine that permits constitutionally protected rights to be "balanced" away whenever a majority of this Court thinks that a state might have interest sufficient to justify the abridgement of those freedoms . . . I believe that the First Amendment's unequivocal command that there shall be no abridgement of the rights of free speech and assembly shows that the men who drafted our Bill of Rights did all the "balancing" that was to be done in that field.

Those who doubt the desirability of such a bill are likely to raise two concerns. First, what empowers the national Congress to place such restrictions on courts at the lower levels of Government? Clearly, the very authority Congress exercised in the 1964 Civil Rights Act limiting the States' powers to set qualifications for voting and the 1965 Civil Rights Act limiting the powers of the States to discriminate on the basis of sex and race in employment allows the National Legislature to step into his realm. Freedom of the press involves dissemination of information and necessitates a marketplace of ideas involving interstate exchange—interstate commerce. To fetter such intercourse to State boundary lines prevents the free and general discussion of public matters absolutely crucial to prepare the people for intelligent exercise of their responsibilities and rights as citizens.

The second concern is still more fundamental. People, especially those in public office, are likely to describe the dangers of press abuse. Indeed, the fear of a zealot press has been present throughout history. Many can cite example of misrepresentations, reports of less than the whole story, and outright lies. I have been the victim of such print at times. However, I return to the Constitution and Thomas Jefferson to explain that this risk is one that must be taken to insure that our basic liberties are not usurped. Only in the cases of freedom of the press and religion does the Constitution specify that Congress shall make no law to abridge. The press is the only constant and vigilant watchdog of the Government, the overexpansion of which our Founding Fathers so feared. Yes, the abuses by the press have occurred, yet I would argue that abuses by the Government have been more numerous and more egregious in nature.

In my own lifetime, in fact, in my children's lifetimes, those events called to mind by the key words "Watergate" and "the Pentagon Papers" brought to light the dangers of uncircumscribed power in the hands of those in office. Without a press free to disseminate information and expose wrongdoing, there is no restraint. Those who look to the Supreme Court for guidance and support in a clear interpretation of the Constitution come back with a list of decisions that caused the Wall Street Journal to dub it "the imperial Court." it is clearly time for Congress to get actively involved in this debate.

The legislation that I introduce today reflects the pure, straightforward, and absolute terms found in the first amendment. No journalist must respond to search warrant or subpena regarding the production of journalistic property. Essentially, this bill insures him the absolute confidentiality of sources, the unqualified freedom to gather news, and the uncircumscribed ability to distribute this information.

The essentiality of a free press to the control of Government interference in our lives is absolute. This need transcends the problems that have arisen in the past and those likely to occur in the future. As the rights of the press are usurped, so endangered are those very liberties which are the lifeblood in our American society. Without full exchange of information, our actions as citizens become shallow and we risk being mis-

directed. Examine the tenuous situation created by recent restrictions on the freedom of the press and the ramifications in our democratic society. After such study, I urge my colleagues to join me in this effort to insure that we travel no further down the path to restricted press and expanded Government.●

THE COMMON HERITAGE ON LAW OF THE SEA

HON. ROBERT W. EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. EDGAR. Mr. Speaker, at the recent meetings of the United Nations Conference on the Law of the Sea in Geneva, the Nepal delegation introduced a most interesting proposal. It took the form of 10 treaty articles, which would establish a "Common Heritage Fund" as part of the comprehensive Law of the Sea treaty on which the Conference has been working for 4½ years. On August 11, I introduced a resolution, House Resolution 1312, which would put the House on record as supporting the establishment of a common sense heritage fund. I am inserting below the text of the resolution for the benefit of my colleagues. To help explain the proposal, I am also inserting an article written by Dr. John J. Logue which appeared in the March issue of WORI Report entitled "Nepal 'Common Heritage Fund' Proposal Aims to Revive Sharing in Sea Conference." Dr. Logue is director of Villanova University's World Order Research Institute.

I believe that Nepal's proposal deserves our attention. For with it, Nepal is trying to revive the concept which inspired the calling of the giant Law of the Sea Conference, the concept that a substantial portion of the oceans and their resources should be regarded as "the common heritage of mankind."

What Nepal proposes is that a substantial amount of ocean mineral wealth, as much as $3 to $5 billion a year in the near future, be paid into a common heritage fund and used for four purposes. At least 70 percent of the revenues would be used to assist Third World development. The remaining revenues could be used to protect the marine environment, to assist in the transfer of marine technology to Third World countries, and to help the work of the United Nations, especially in the area of peacekeeping.

Nepal proposes that the source of the fund's revenues would be specified contributions from the exploitation of seabed mineral resources by coastal states. The seabed minerals in question would include those offshore as well as those in the deep ocean. In his background paper, Upadhyay argued that some offshore sharing was essential. He said that this was so because the overwhelming proportion of presently exploitable seabed mineral wealth is within the proposed 200-mile exclusive economic zone (EEZ) and because most of that offshore wealth will go to a very few nations, most of them rich.

I think Members will find Dr. Logue's article of considerable interest. They may be especially interested in his statement that, in his view, a generous common heritage fund would make it easier to secure agreement on other issues which have been troubling the Conference, especially the issue of the nature and powers of the International Seabed Authority. I might add that Dr. Logue is a close student of the law of the sea and has attended all seven sessions of the Law of the Sea Conference.

NEPAL COMMON HERITAGE FUND PROPOSAL AIMS TO REVIVE SHARING IN SEA CONFERENCE

The landlocked country of Nepal had introduced a major proposal for revenue sharing in the deadlocked United Nations Conference on the Law of the Sea. It is an attempt to revive the concept which inspired the convening of the giant Conference, the concept of ocean mineral wealth as "the common heritage of mankind." It comes at a time when there is pessimism about the future of the four-year old Conference as it moves toward its seventh working session to be held in Geneva from March 28 to May 12 (or 19).

The Nepal proposal would establish a generously financed "Common Heritage Fund" (CHF) as a key part of the comprehensive law of the sea treaty on which the Conference is working. The Fund's revenues, which might reach as much as three billion dollars a year in the near future, would be used principally to assist the development plans of low income states. Smaller amounts could be used to protect the marine environment, assits the transfer of marine technology to developing countries and to assist the work of United Nations, especially in peacekeeping.

At the Conference's February 6–17, "intersessional" meeting in New York, Nepal's UN Ambassador, Shailendra K. Upadhyay, circulated the text of ten treaty articles concerning the Fund. Carefully drafted, the Nepal proposal would require coastal states to contribute a certain percentage of the net revenues from their 200-mile "exclusive economic zones" (EEZ's) to the Fund. The amount contributed would depend on the size of those revenues and on the per capita income of the coastal state. The largest per capita payments would go to the poorest states. (Some sample figures are given below.)

Upadhyay believes that his country's proposal might make it easier for the delegates to reach agreement on the question which has stalled the Conference for more than two years, the nature and powers of the proposed International Seabed Authority (ISA). He feels that best way to revive the Conference is "to bring the Common Heritage back to life." In a background paper which he circulated with his CHF proposal he said:

"Future generations will judge the Law of the Sea Conference by its success or failure in implementing the Common Heritage principle. They will judge it especially by its success or failure in seeing that a substantial portion of ocean mineral wealth is used to build a just and peaceful world society.

"Unfortunately in the more than ten years since it was enunciated by Ambassador Pardo in the fall of 1967, the Common Heritage principle has suffered from misinterpretation, from attrition and from neglect. As the concept of the economic zone increased in popularity son.e nations insisted, wrongly and tragically in our view, that the economic zone and the Common Heritage were mutually exclusive. That idea makes a cruel hoax of the concept of the Common Heritage. For the overwhelming proportion of ocean mineral wealth and of marine species are found within the economic zone. And under traditional international law all that area, except for a narrow territorial sea, was traditionally regarded as res nullius, no one's property or as res communis, i.e. common property."

Upadhyay stressed that a very few nations would get most of the world's economic zone: ". . . only twenty-five nations would gain control of 76 percent of the world economic zone Out of these twenty-five nations, thirteen are developed nations like U.S.A., Australia, New Zealand, Canada, U.S.S.R., Japan, Norway and South Africa. These thirteen developed nations will acquire 48 percent of 76 percent of the world economic zone, while the developing twelve among the lucky twenty-five will only get 28 percent of the same. It will make the rich richer and the poor poorer, thus making the task of the establishment of the New International Economic Order well nigh impossible."

SOME DETAILS OF THE PROPOSAL

The Nepal proposal establishes institutions to govern the Fund and provides guidelines for determining the revenue to be paid into the Fund and the way in which those revenues are to be disbursed. (The following outline borrows to some degree from Richard Hudson's excellent study, 'Three Scenarios Revisited: The Law of the Sea, Ocean Mining and the New International Economic Order," available from the Center for War/Peace Studies, 218 E. 18th Street, New York, N.Y. 10003 for $1. That study includes the text of the Nepal proposal and a very valuable table indicating how much each of 129 nations and territories can expect from each billion dollars of development revenues disbursed by the Fund.)

Governance of the Fund.—A 36-member CHF Board of Governors would be the Fund's executive. Key decisions would require the consent of the one nation-one vote Assembly of the ISA. The Board would, in effect, have three chambers. The first, with eighteen members, would be based on geographical regions. The second, with nine members, would be drawn from "net contributors." The third, also with nine, would be elected from "net recipients." Substantive resolutions would need the votes of two-thirds of the Board to succeed. They would also require a majority within each of the three chambers.

Income of the Fund. This would come from three sources: revenues earmarked by the ISA from the international area; revenues from the continental margin where it extends beyond 200 miles; revenues from the EEZ itself. However the EEZ would be the major source of revenues and it is the major concern of the Nepal proposal. Two alternative plans, A and B, are offered for determining the amount the coastal state is required to contributed from its EEZ. Each would depend upon the per capita income of the coastal state as well as on the amount of the net revenues from mineral exploitation within the zone. ("Net revenues shall be defined as the difference between the cost of bringing the minerals to the surface and their selling price. The term cost shall include operating costs and amortization costs but not national royalties and taxes.")

Plan A developed out of the August 1976 *Barba Negra* proposal by which Ambassador Upadhyay was an original sponsor. That proposal was subsequently endorsed by leading internationalists such as Thor Heyerdahl, Jan Tinbergen, Maurice Strong, Lord Wilberforce, Charles Yost and Congressman Don Fraser. In the first five years of its operation the percent of net revenues required would vary from ½ to 10 percent, depending on per capita income, and, after that, from 1 to 20 percent. In hardship cases the Board and Assembly could reduce the required contributions of individual states by as much as one half. The great majority of Third World nations would "pay in" only ½ percent the first five years and one percent after that. And the great majority of them would receive much more than they would pay in.

Plan B tries a different approach. It focuses on this situation at the time the treaty comes into force. Production which is ongoing at that time will be required to make a very small contribution (0.1 percent-1.0 percent depending on per capita GNP) to the Fund. The contribution from areas under lease but not yet in production will be much higher (1 to 10 percent) once production starts. The contribution from deposits undiscovered at that point will be even higher (2 to 20 percent) once those deposits come into production. (See below "A Note on Amounts to be Contributed.")

Disbursement of Revenues from the Fund.—The ingenious system for disbursing the Fund's development revenues insures that the poorest states get the largest per capita amounts from the Fund. Roughly speaking, the nations which include the lowest tenth, in per capita income, of the world's population would get forty percent of the annual disbursement, the next lowest tenth would get thirty-two percent, the next lowest tenth would get sixteen percent, then eight, then four percent. Naturally the amount received would depend on population as well as on per capita income. However no state could receive more than fifteen percent of the total annual disbursement of the Fund for development purposes. The following figures (from Hudson's table) illustrate what certain countries might expect as their share of each billion dollars disbursed by the Fund.

AMOUNT TO BE RECEIVED FROM EACH BILLION DOLLARS OF CHF DEVELOPMENT FUNDS BY REPRESENTATIVE NATIONS

Country	GNP/cap	Population (millions)	Disbursement (millions)
Bangladesh	$70	72.5	$77.6
Mali	80	5.3	5.7
Burma	90	28.9	30.9
Zaire	100	22.9	24.5
Tanzania	108	14.0	15.0
India[1]	110	610.1	[1] 150.0
Kenya	151	12.1	5.9
China	170	852.1	[1] 150.0
Bolivia	200	5.2	1.1
Egypt	240	34.9	7.7
Philippines	262	39.0	8.6
Honduras	282	2.7	.6
Syria	320	6.7	1.5
Peru	335	14.5	3.2
Angola	390	5.8	1.3
Colombia	426	22.5	5.0
Turkey	435	36.4	5.4
Jamaica	741	1.9	.2
Mexico	750	52.4	5.8
Singapore	1,268	2.2	2

[1] As indicated above, no nation may get more tham 15 percent of total annual disbursement.

A NOTE ON AMOUNTS TO BE CONTRIBUTED

It is more difficult to give precise figures for the amount which representative countries would be required to contribute to the Fund each year. The following are examples of these difficulties. First, no contribution would be required from the revenues from the first twelve miles offshore, i.e. the territorial sea. However we are not aware of studies which indicate, country by country, the percent of production outside 12 miles. It would certainly vary widely. Second, it is clear that net revenues would be substantially higher in some areas, e.g., the Persian Gulf, than others, e.g. the North Sea. Third, where, as in the United States, price controls keep prices below the world market there would tend to be lesser net revenues. Fourth, relevant to Plan B, whether an oilfield is in production, or leased but not in production, or undiscovered will depend on just when the treaty becomes operative.

During the first 5 years the basic yardstick for contirbutions would be one percent for every $300 of per capita annual income or major fraction thereof. However those with per capita incomes of more than $6000, a handful of states, would pay the same rate as those with $6000, i.e., twenty percent. It bears repeating that during the first five years that the treaty is operative the contribution percents would be cut in half. And they could be cut in half again for hardship cases.

The following are very rough estimates of the annual contributions of major contributors under Plan A. While they are based on Hudson's data, they have been adjusted, rather arbitrarily, to reflect some of the factors indicated above. They are, to use American slang, "guesstimates."

Plan A: Rough Estimate of Annual Contribution to CHF Revenues by Leading Producers During First Year of Treaty

(In millions of dollars)

Saudi Arabia	$500
U.S.A.	500
United Arab Emirates	140
Norway	90
Qatar	80
Australia	80
United Kingdom	80
Iran	8
Nigeria	5
Egypt	3

Note that the first six are very high income nations and the last two low income nations. It is assumed, arbitrarily, that the U.K. may qualify as a "hardship case" because of balance of payment and other difficulties and the figures are therefore 50 percent less than they would otherwise be. We do not have a table for Plan B. However it appears that the average required contribution of the states listed above would be about one-eighth of the above figures, with some above and some below that amount.

It will take further studies to have good rough estimates of what future years may bring from the two categories where the contribution would be high: Areas under Lease but not yet in Production (high income U.S.A. would have to contribute 10 percent of these net revenues); Deposits Undiscovered at Time Treaty Comes into Force (high income U.S.A. would have to contribute 20 percent of these net revenues). However the contribution required from Ongoing Production is quite low (high income U.S.A., though in the highest bracket, would only have to give one percent of these net revenues. And low income Bangladesh (see below) would only have to give one tenth of one percent of revenues in this category.)

SOME REFLECTIONS ON THE NEPAL PROPOSAL

In our view Nepal is to be congratulated for launching this bold and imaginative proposal. The first reactions to it within the Conference have been cautious but "interested." Ambassador Upadhyay hopes to have it on the agenda of the spring session in Geneva and of the meeting of the Group of 77 (developing nations) which precedes that session.

Because the proposal is a detailed one it should be relatively easy for states to calculate how it will affect them. The studies it has—or will—give rise to should be very helpful in this regard. (See especially the Hudson study referred to above.) Third World countries may be pleasantly surprised not only by how much they get under the plan—and get by right rather than by charity—but also by how little, if any, most would have to contribute.

A rich nation like the United States may at first consider half a billion dollars a heavy burden—but is it? It is about one tenth the 1948 appropriation for the Marshall Plan, one of the best investments in peace and prosperity the United States ever made. Indeed it is closer to one twentieth (or one thirtieth) that appropriation if one remembers the toll that inflation has taken in the last thirty years. And the resulting Common Heritage Fund would make a major contribution not only to Third World development but also to peace and the preservation of the marine environment. It should also be remembered that in exchange for this relatively small contribution coastal states, including the United States, will be getting clear title to immense mineral riches, i.e. thirty trillion dollars, minus these required contributions. The United States gets by far the largest economic zone—and probably the richest as well.

The authorization of some seabed funding for the United Nations and for UN peacekeeping is important practically and symbolically, especially as the UN approaches its very important Special Session on Disarmament. And, within the Law of the Sea Conference, this imaginative attempt to revive the common heritage principle could have a very positive effect. It is hard to find a delegate in the Conference who is not distressed by the undercutting of the common heritage principle by "realism." Perhaps we are naive, but we believe the delegates when they tell us they are disappointed and they wish that something could be done. The Nepal proposal offers them an opportunity to put new wind into the sails of the Conference.

Let us hope they will grasp it!

RESOLUTION

Whereas the vitally important United Nations Conference on the Law of the Sea is now well into its fifth year; and

Whereas impatience with the progress of the Conference has helped precipitate further unilateral claims to ocean resources and jurisdiction by a number of coastal States; and

Whereas recent marine disasters have underlined the need for an international treaty to protect the oceans' ecological system, to preserve marine species and to reconcile the many competing uses of the marine environment; and

Whereas the development of effective international institutions to deal with important aspects of the ocean problem will help build experience in and sentiment for world community and world peace; and

Whereas the trillions of dollars of ocean mineral wealth, almost all of which was traditionally regarded as "common property" or as "no one's property" could provide a major source of assistance to Third World development, to peacekeeping, and to the protection of the oceans against the growing menace of marine pollution; and

Whereas the Delegation of Nepal recently introduced a proposal into the Law of the Sea Conference which would establish a Common Heritage Fund which would use a significant share of those revenues for those very worthwhile objectives: Now, therefore, be it

Resolved, That it is the sense of the House of Representatives that—

(1) the United States should continue to work to achieve agreement on a comprehensive and broadly supported law of the sea treaty;

(2) such a treaty should assure the protection of such traditional law of the sea freedoms as freedom of navigation and freedom of research while, at the same time, providing protection for the marine environment and for marine species threatened with depletion;

(3) an international seabed or ocean authority should be established to regulate the exploitation of deep ocean minerals in an equitable manner, with appropriate roles for private, national, and international entities;

(4) a significant portion of ocean mineral revenues, both offshore and in the deep ocean, should be regarded as "the common heritage of mankind" and used in a "Common Heritage Fund" to assist developing nations, to fight pollution and to assist in some measure, the work of the United Nations, especially in the area of peacekeeping; and

(5) the House of Representatives welcomes the recent initiative of Nepal in proposing the establishment of such a fund.●

CIVIL SERVICE REFORM AND THE HATCH ACT CONTROVERSY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DERWINSKI. Mr. Speaker, I regret that we have run into a delay in the passage of civil service reform legislation. This is certainly a long overdue step that we must take on behalf of the general public.

The bill, which may be brought to the floor early in September, possesses a sound, basic structure of civil service reform, but is encumbered by provisions to repeal the Hatch Act.

I wish to insert a letter I received from Prof. Dwight A. Ink, director of the office of sponsored research and continuing education of the college of public affairs/school of business administration at American University here in Washington. His letter focuses on the subject of civil service reform in relation to the Hatch Act controversy:

THE AMERICAN UNIVERSITY,
Washington, D.C., August 16, 1978.

Hon. EDWARD J. DERWINSKI,
Speaker of the House of Representatives, U.S. House of Representatives, Washington, D.C.

DEAR MR. DERWINSKI: As a long time careerist in the Federal government and Executive Director of President Carter's Personnel Management Project, I would like to personally urge most strongly that revision of the Hatch Act not be added to the Civil Service Reform Legislation.

If one were supportive of the Hatch Act revision, it would be a poor strategy because this action would combine both the opposition to changing the Hatch Act and the opposition to Civil Service Reform, thus jeopardizing any action.

However, many of us who have devoted our careers to public service see a more basic set of problems. We believe that in practice this rider would result in the following:

1. Weakened protection of the careerist from many types of subtle political pressures, against which the bill's safeguards are largely unenforceable.

2. Increased careerist political activity, undermining our merit principles. One recalls the resourcefulness of a recent Administration attempting to politicize the career service, and how the Watergate leaders chafed under the Hatch Act restrictions.

3. Increased partisan activity permitted under the Act, causing incoming political leaders to question whether an employee can campaign or run for office in the opposite party and yet energetically carry out Administration policies.

4. Weakened presidential accountability because he must depend upon large numbers of employees who have actively and publicly campaigned against him.

5. Increased danger of federal programs, particularly grants and contracts, being maladministered by partisan employees to influence elections.

6. Temptation for some union leaders to shift attention from the welfare of public employees to the use of employees as pawns in political campaigns.

In summary, I believe this proposed change fails to consider adequately the employee's right to be protected from political pressure and it fails to meet the public's right to impartial execution of the laws.

Sincerely,

DWIGHT A. INK, *Director.*●

TEACH THE EXPENSIVE COLLEGE A LESSON

HON. MARJORIE S. HOLT

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mrs. HOLT of Maryland. Mr. Speaker, it is no secret that the costs of higher education have soared in recent years. Parents and students are alarmed at the situation, but may not completely realize that inflation is not the sole cause of the rising costs of post-secondary education. A concurrent problem is the steady decline of the quality of education at our colleges and universities. We are simply not preparing our young adults for managing their own lives. In a recent column in the Washington Post, Nicolas von Hoffman cites the program at St. John's College, in Annapolis, as a good example of what a nonelective college can do to provide a well-rounded education. He also examines reasons, other than inflation, that are causing the spiralling expenses of higher education:

DON'T RAISE THE MONEY—TEACH THE EXPENSIVE COLLEGES A LESSON

(By Nicholas von Hoffman)

This summer the Advertising Council is putting on a vehement scare campaign to get people to give to the college of their choice. Our colleges and universities are broke, or so the message goes, and unless they get mucho dinero, great thoughts will go unthunk with a concomitant drop in our exports and our life expectancy. No commercials are to be heard imploring colleges and universities to do their part.

Yet even the extravagant medical industry doesn't run its hospitals on a nine-month year. The nine-month school year originally came about so that students could work on the family farm. With less than 5 percent of our population engaged in agriculture, pots of money could be saved for parents and public if our colleges were to adopt the normal work calendar of this society. It would mean that college might take three years instead of four. No small saving when a year's study at a local multiuniversity can cost $5,000 plus.

A year's work for a year's pay has always been resisted by higher education, just as it has ignored its own proclivity to offer too many courses. "Despite the drop in enrollment on many campuses the size of catalogs virtually doubled and the number of courses with less than five students in them also proliferated," writes Gerald Grant and David Riesman (see "The Perpetual Dream: Reform and Experiments in the American College," University of Chicago Press 1978, $15, and worth it.)

Nor after decades of complaint and ridicule has our higher education disciplined itself out of offering the most costly diddleybop to indolent students looking for gut courses. Thus Grant and Reisman have caught some of the profs teaching "such hobbies as Chinese gourmet cooking, harpsichord making, and indeed, astrology."

Such nonsense isn't new, but it expanded enormously during the 1960s Gold Flow into higher education. New colleges were founded and old colleges changed so that students could do anything they wanted and it was called learning, just as faculty could do anything they wanted and it was called teaching.

"The most important change was the virtual or complete abolition of fixed requirements in many departments and of mandatory distribution requirements, including class attendance and the time, mode, and kinds of credits needed to secure a baccalaureate degree," is how the two sociologists in education sum up what happened.

In due course there were complaints from dissatisfied customers. "I have never read anything by Sigmund Freud or Karl Marx. I know nothing about the history of Africa, the history of Latin America or the history of Asia. I have not come within a quarter mile of a test tube since I took chemistry in my senior year in high school," writes Jonathan Kaufman, who graduated from Yale in June.

In practice there is no waiting line to get into St. John's College, Annapolis, where Mr. Kaufman would not only have been required to learn chemistry, but also to read Plato in Greek. There are no electives at St. John's. There it is supposed that the teachers know more than the students and therefore should prescribe the course of studies.

It's a buyer's market of higher education where there are more places than there are students to fill them. Colleges like St. John's lose out to schools where you can get a B.A. by spending four years in a TM group and graduate summa cum laude by cultivating organic radishes. But even schools with sufficient fame and prestige so as not to have to fish for customers have not been able to save money and improve quality by offering fewer and better courses to bring forth from adolescent flesh the fully rounded educated person promised in so many college brochures.

Harvard and Yale both are cutting back on electives and insisting their students take at least a few classes leading to that much talked-about condition of well-roundedness. It won't be the first time efforts have been made to reverse higher education's adherence to the fragmentation and miscellany of the elective system. But it's not just the student-customers who oppose significant change; the specialized departments and their competition for the same students make any general, core curriculum impossible.●

DOMESTIC SUGAR PROBLEMS

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DE LA GARZA. Mr. Speaker, since the President signed the Food and Agriculture Act of 1977 on September 29, 1977, section 902 has not been implemented accordingly with the intent of this Congress. There have been numerous delays and administrative problems that have occurred in the sugar price support program.

Today I am submitting this bill to require the administration to make storage space available for 1978 crop sugar.

Millions of tons of foreign sugar have been dumped into this country since the passage of the Food and Agriculture Act of 1977 because of the faulty administration of the law. This has depressed the domestic price of sugar to such an extent that domestic sugar has gone under loan rather than move into the marketplace.

This bill would do two things. First, it would accelerate the maturity date on 1977 crop sugar to August 31, 1978, or the date of enactment of this bill, whichever is earlier. Second, it would require the Secretary to move this sugar out of producing areas within 30 days so that

producers will have a place to store the sugar that will be produced by the current crop of cane and beets.●

SEUFFERT BAND CELEBRATES 80TH ANNIVERSARY

HON. JOSEPH P. ADDABBO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. ADDABBO. Mr. Speaker, on August 20 the Seuffert Band will celebrate its 80th anniversary, having been founded by George Seuffert, Sr., in 1898. That date also marks the 50th anniversary of George Seuffert, the son of the founder, as its conductor. George F. Seuffert joined local 802 of the American Federation of Musicians on his 16th birthday, and shortly thereafter conducted his first free concert with the Seuffert Band.

The Seuffert Bank, consisting of 48 of New York City's finest professional musicians, has provided the people of New York with a continuing series of the finest free concerts in the United States. During the past 50 years, Dr. Seuffert has conducted an average of 30 free public concerts a year—for a total of at least 1,500 programs. As audiences range from 8,000 to 12,000 people for each concert, an aggregate of 1,500,000 people have heard the Seuffert Band under George's baton.

George served in the USMC during World War II. He returned home to teach in the public schools of New York City for 36 years. He is still a member of the faculty of Fordham University, where he has directed the Fordham Band for the past 27 years.

During George's tenure with the board of education, he developed an enthusiasm for the All City High School Chorus. As music consultant to the then mayor, John Lindsay, he prevailed upon the mayor to use their services at all important city functions. Since that time, this great chorus, under the inspired direction of John L. Moltey, director of music for the board of education, has musically greeted all distinguished visitors to New York City. Its most recent appearance at city hall marked the occasion of President Carter's historic visit on August 8, 1978.

The city of New York has presented George with its highest cultural award, the coveted Handel Medallion; the National Arts Club presented him with their Medal for Music; and the West German Government awarded him the Officer's Cross of the Order of Merit.

The Seuffert Band and its conductor, George F. Seuffert, have provided the people of the city of New York an outstanding service and are to be commended on the band's 80th anniversary, and George F. Seuffert's 50th anniversary. If any of my colleagues are in Queens, N.Y., on this Sunday, August 20, come to Forest Park for an enjoyable afternoon of wonderous music.●

FISHER-CONABLE BILL DESERVES PROMPT CONSIDERATION

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MAZZOLI. Mr. Speaker, currently, taxpayers may not receive tax deductions for their charitable contributions if they do not itemize deductions on their income tax returns.

Increases in the standard deduction in the past several years have drastically reduced the number of taxpayers who itemize their deductions. Consequently, there has been a substantial reduction in charitable giving in these same years.

Charitable and nonprofit organizations estimate that their contributions have declined $5 billion because of the reduction in the number of persons now itemizing their deductions.

Our distinguished colleagues, the Honorable BARBER CONABLE and the Honorable JOSEPH FISHER, have introduced legislation to correct this serious problem. Their bill, H.R. 11183, would allow taxpayers to receive a tax deduction for their charitable contributions whether or not they itemize their deductions.

I had hoped that the House Ways and Means Committee would include the Fisher-Conable proposal in the Revenue Reform Act of 1978. Unfortunately, that was not the case.

The Senate can still add this laudable proposal to its version of the Revenue Reform Act. However, the outlook for Senate approval of the Fisher-Conable measure is uncertain at best.

Americans can ill-afford to forego the good work done by American charitable organizations. It is, therefore, imperative that H.R. 11183 be expeditiously ushered into the statute books.

I commend to the attention of my colleagues the following articles which appeared, respectively, in Time magazine and the Washington Post. These articles offer a good explanation of the need for the enactment of the Fisher-Conable bill.

[From Time Magazine, May 22, 1978]

THREAT TO AN AMERICAN TRADITION

(NOTE.—John W. Gardner, the founding chairman of Common Cause and formerly Secretary of Health, Education, and Welfare, sees danger in certain proposals that have come forth lately from various tax reformers to eliminate or reduce the charitable contributions that Americans can deduct from taxable income. He stated his case recently at a United Way conference in a speech on which this essay is based:

"These Americans are a peculiar people. If, in a local community, a citizen becomes aware of a human need which is not being met, he thereupon discusses the situation with his neighbors. Suddenly a committee comes into existence. The committee thereupon begins to operate on behalf of the need and a new community function is established. It is like watching a miracle, because these citizens perform this act without a single reference to any bureaucracy, or any official agency.")

Just so, 150 years ago, Tocqueville described a unique feature of the American system. It is the spontaneous working of a creative public spirit. Out of this fundamental national trait have come such vitally important institutions as libraries, museums, civic organizations, great universities, the United Way, the Little Leagues, the Salvation Army, symphony orchestras, garden clubs, historical societies, adoption services, hospitals, religious organizations, Alcoholics Anonymous, the 4-H clubs. Indeed, this American spirit reaches into almost every field of human interest. Tied to another powerful American tradition—that of private given for public purposes—the volunteer spirit has released incredible human energy and commitment in behalf of community all over the country.

Yet in the next two or three years the Federal Government may destroy this feature of the American system. The destruction could be accomplished silently and invisibly—in the name of tax reform. The threat lies in proposals that would reduce directly and indirectly, the charitable contributions Americans itemize as deductions from taxable income. And there are even those who, with the intent of simplifying the tax code, would eliminate such deduction entirely. With due respect to the reformers, the alarm should be shouted: Our tradition of private giving for public purposes is endangered by some of their good intentions.

Up till now, Government tax policy has deliberately fostered that tradition. The deductibility of charitable gifts is based on the idea that it is good for a great many people, independently, privately, to contribute to charitable, religious, scientific and educational activities of their choice. Such giving supports the American pluralism that allows all kinds of people to take the initiative in all kinds of activities. In reality, the tradition that has produced the innumerable institutions that are sometimes called the nonprofit sector lies at the very heart of our intellectual and spiritual strivings. The deductibility of charitable donations has been only an expression of that larger philosophy.

Now there is a new school of thought with a very different view. It holds that a deductible dollar donated, say, to a school for blind children, would have found its way into the federal treasury—if it had not been deductible. That dollar is therefore to be regarded as Government money—and labeled a "tax expenditure." This new doctrine began innocently enough with a concern about the multiplicity of existing tax loopholes. It made sense to calculate the amount of benefits granted by the Government through allowable deductions—as, say, certain industrial tax credit.

So the term "tax expenditure" was invented as a convenient way to describe such an amount. Some tax-simplification theorists just have not given much thought to the implications of applying that term to voluntary charitable donations. But there is another type of theorist we have to cope with: the Government-knows-best type, who positively resents the freedom of the tax-deductible gift. His argument is to eliminate the deductibility of that dollar given to the school for the blind, take the money into the treasury and, if the school needs money, let Congress and the federal agencies appropriate it.

Such a doctrine makes the head ache. The American people have been remarkably resourceful in launching activities to serve their communities. They freely give $30 billion a year and contribute God knows how many billion more in nonmonetary services. Now Americans are told that Congress and the Government bureaucracies could do a better job.

Somehow the available evidence on Government efficiency (speaking with the respect of one who served two tours of duty in Government) does not drive one toward that conclusion. But apart from the question of efficiency, if Government pre-empted "charitable" functions, what outlet would be left

for personal caring and concern? Can anyone believe that a manual of regulations from Washington would unlock the miraculous energy which has been so impressive since the days of Tocqueville?

The truth is that the present charitable deduction is not adequate to bring out the best of which Americans are capable. Even recent increases in the standard deduction—five in the last eight years—decreased the number of taxpayers itemizing deductions from almost 50 percent in 1970 to less than 25 percent today. The result damaged the voluntary sector. Contributions to public charities decreased, with losses recently estimated at $5 billion. In 1977 alone, greater use of the standard deduction could cost voluntary American institutions some $1.3 billion. It is estimated that only 16 percent of taxpayers will itemize deductions (and thus have an added incentive to make charitable donations) if the Carter Administration's tax reform proposals are enacted.

What would result if the new antideduction doctrine ever were in force is not pleasant to contemplate. As it is, the trend is already running against voluntarism. The only way to reverse this trend is to amend the tax code to allow all taxpayers to deduct charitable gifts whether they itemize or not. This change alone would eliminate a twofold danger: first, that denying most Americans any encouragement to give will bring more Government into their lives; second, that charitable giving will become the province of only the wealthy.

The Government will best contribute to the health of the society if it actively furthers the vitality of the private, voluntary sector. We must wake up to the fact that the government of a gigantic, tumultuous society cannot be administered entirely by a conventional, centralized, top-down governmental hierarchy. Local levels of government and local private institutions are going to have to figure out how they can collaborate to make things work in the community. The old American trait of voluntary activity and giving is indispensable to that end.

Finally, it is not easy to make a blanket defense of private giving; after all, it consists of so many unrelated, unofficial, unclassifiable activities. Yet that diversity is one of the qualities that make it beautiful. It is an area in which freedom survives and flourishes. Let's keep it that way.

[From the Washington Post]

TAX BREAKS, WITH CHARITY

(By George F. Will)

Reps. Barber B. Conable Jr. (R-N.Y.) and Joseph L. Fisher (D-Va.) want to allow taxpayers to deduct charitable contributions even if they take the standard deduction. Like much tax legislation, this proposal to extend the charitable deduction to the large majority of taxpayers who do not itemize deductions seems, on the surface, dry as dust. But it touches fundamental political issues.

It would mean a revenue loss to government. But recent tax changes have meant an even larger loss to institutions dependent on contributions. And the administration's tax-reform proposals would mean new losses.

The standard deduction has been increased five times in eight years and the percentage of taxpayers itemizing deductions has been halved. Thus, charitable giving has fallen substantially short of what otherwise would have been expected. Organizations estimate they lost $5 billion in contributions in eight years.

In 1970, only 52 percent of taxpayers took the standard deduction. The 1977 increase in the standard deduction increased from 69 to 75 the percentage of taxpayers who would benefit from using it. And the administration's proposals to decrease deductions would increase to 83 the percentage of taxpayers who would benefit from taking the standard deduction.

Government usually does not intend some of the significant consequences of its actions. The government had no intention of penalizing the charities when it raised the standard deduction. It has raised the standard deduction primarily to simplify the task of paying taxes for more and more citizens. If the administration's tax proposals are enacted, only 17 percent of taxpayers would itemize deductions and, therefore, have a deduction incentive for charitable giving.

This would injure some kinds of organizations more than others, because wealthy people and less affluent people tend to contribute to different kinds of organizations. The wealthy favor cultural institutions such as universities, museums and orchestras. Less affluent people tend to favor churches and United Funds, and those are the organizations that will suffer most if the Conable-Fisher plan is rejected.

Professor Martin Feldstein, a Harvard economist, estimates that the proposal would increase charitable giving 12 percent ($4.1 billion) annually over giving under present laws. The revenue loss to government would be less than that ($3.6 billion). And the money would be directed to worthwhile social purposes more surely than if it had been put at the government's disposal.

In addition, there is strong evidence of a correlation between the level of charitable giving and the level of participation in charitable activities . . . Conable-Fisher proposal would have a multiplier effect on contributions of time and energy to the voluntary associations that do much of society's work.

In 1835, de Tocqueville noted that Americans "are forever forming voluntary associations. . . . At the head of any new undertaking, where in France you would find the government or in England some territorial magnate, in the United States you are sure to find an association." The expansion of the welfare state has altered the role of such associations. But because of the remoteness, clumsiness and other shortcomings of the modern state, voluntary associations are especially important today as sources of experiment, free choices and personalized caring.

The Conable-Fisher proposal is evidence of a new political division, a division less along party lines than along institutional lines. On one side are antistatist legislators and voluntary associations. On the other side are executive branch bureaucracies and dependent constituencies that have a stake in the expansion of statism.

The Conable-Fisher proposal resembles the proposal to permit families to subtract from tax payments the amount paid in tuitions, up to $500 per student. This tax credit would stimulate private competition with state education. Hence it is opposed by statists within government, such as Joseph Califano, secretary of health, education, and welfare, and statists outside of government, such as Albert Shanker, head of a teachers union, who says the proposal would engender conflict "of the kind created by the Civil War."

Such hyperbole indicates the fear and loathing that statists have for measures that would mitigate the tendency of government to expand at the expense of private voluntary associations. The Conable-Fisher proposal, like the tuition tax credit, would cause government to nurture, for a change, the pluralism that governments tend to diminish. It is a timely example of how to enhance the stature, without expanding the size, of government.●

POLITICAL REFORMS

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, although our legislative session is drawing to a close, I believe Members always seek to be as aware as possible of public sentiment on various issues. A concise summary of public opinion on six political reforms was presented in the August edition of the Reader's Digest. Although the congressional public financing proposal which the Gallup poll presents to the pubic differs from the idea recently debated by the House, I believe it shows that the concept of congressional public financing is supported by well over half of the American people. I feel even more would be supportive if a survey would ask if they favored a proposal which matched some small individual contributions with money from a voluntary check-off fund.

The article follows:

[From the Reader's Digest, August 1978]

SIX POLITICAL REFORMS MOST AMERICANS WANT

In conducting thousands of surveys on almost every conceivable issue for nearly half a century, I have learned three significant things about our fellow Americans. One is that the judgment of the American people is extraordinarily sound. Another is that the public is almost always ahead of its leaders. The third is that the electorate has become better educated and more sophisticated politically than ever before.

This is why I am so disturbed by the disillusionment Americans have expressed, through our surveys, with the workings of the political system. Too many Americans regard politics as a "dirty business." In a poll last year evaluating honesty and ethics in 20 occupations, U.S. Senators and Congressman stood 10th and 13th, respectively, on the list. In an earlier poll, two out of three persons interviewed believed that some legislators had won election by employing "unethical and illegal methods" in their campaigns; even today, only one third of those polled approved of the way Congressmen were doing their jobs. Two out of three American parents would not like to see their children enter politics as their life's work.

Disgust with politics has not, however, diminished Americans' faith in their country. In the latest Gallup surveys, three citizens out of four give the United States a "highly favorable" rating, with only about 2 percent rating it unfavorably; and 68 percent expressed, in an earlier poll, confidence in the nation's future. But what the surveys also make abundantly clear is that the public wants the political health of the nation improved. Here is what the polls show on six major proposed political reforms:

Reform 1. By 60 percent, with 30 percent opposed and 10 percent undecided, Americans favor a resolution offered by freshman Senators John Danforth (R., Mo.) and Dennis DeConcini (D., Ariz.) that would limit the tenure of representatives in Congress to a maximum of 12 years. That means no more than two six-year terms for Senators and six two-year terms for members of the House.

U.S. Presidents have been limited to two terms since 1951, and a 12-year restriction for U.S. legislators was advocated by Harry S. Truman and Dwight D. Eisenhower. Stated

Eisenhower: "Each man so serving would tend to think of his Congressional career as an important and exciting interlude in his life, a period dedicated to the entire public rather than as a way of making a living. The members would probably give more attention to national good and less to their personal political fortunes."

One major advantage of the plan is that it would tend to make ability, rather than length of service, the criterion in filling committee chairmanships. Another is that it would bring in younger men and women, perhaps more in tune with the will of the people than those who have been following the same mental routines for decades. There are those who argue that it might deprive the nation of the services of individuals of extraordinary talent, and government is so complex that years are required for a legislator to familiarize himself with it. But room would also be made for individuals of equal, or greater, talent, who might otherwise never get to Congress.

Reform 2. Sums spent on election campaigns average at least $100,000 for those seeking seats in Congress. A candidate must either be wealthy or look for contributions, which may come from those seeking legislative favors. In a poll last year, 57 percent (32 percent opposed and 11 percent undecided) of Americans advocated that the government provide a fixed amount of money for Congressional election campaigns, and contributions from all other sources be prohibited (the ban to include use of the candidate's personal funds). The additional cost to taxpayers would be an estimated $2 per adult citizen. It could be the bargain of the century.

Would government funding of campaigns encourage a horde of minor, frivolous candidates? Perhaps, but the problem has been dealt with successfully in Great Britain. There, candidates must put up a substantial money deposit, which must be forfeited if they do not draw at least 12.5 percent of the vote.

Reform 3 would end the chaotic system of nominating Presidential candidates in state-by-state primaries or by state and national conventions. Sixty-eight percent of the voters favor (with 21 percent opposed and 11 percent undecided) a nationwide primary, to be held on the same day in all 50 states, in which voters would choose the Presidential candidates for their parties by popular vote.

This proposal has had overwhelming support for nearly a quarter-century. Under the present system, many citizens are denied the opportunity to vote for the candidate of their choice because not all candidates enter all state primaries. And at political conventions the party "pros" often pay little attention to the popular will.

Reform 4. The seemingly interminable Presidential campaigns, which stretch over the better part of a year (from the first primaries in January to the November elections), exhaust the candidates, thoroughly bore the electorate—and end up changing few votes. By a majority of 68 percent to 21 percent (with 11 percent undecided), Americans would like to shorten the campaign period. They favor advancing election day to September, and holding the inauguration in November of the election year to allow an incoming President more time to prepare his recommendations for the opening of Congress in January.

Reform 5. Probably the least popular political institution in America is the Electoral College, with its "unit rule" whereby a candidate who wins a plurality in a state gets all of that state's votes. The public has favored doing away with the Electoral College since the first survey was taken on this issue in 1948. In a 1977 poll, 75 percent approved amending the Constitution to provide direct popular election of the President (14 percent were opposed and 11 percent undecided).

Such a bill actually passed the House of Representatives by a lopsided margin in 1969—only to be filibustered to death by Senators who felt that it would diminish their states' power. But the Electoral College system makes possible the election of a President who receives fewer popular votes than his opponent. This has occurred three times (John Quincy Adams, Rutherford B. Hayes and Benjamin Harrison), and almost happened again in 1968 and in 1976.

Reform 6. Perhaps the most controversial innovation Americans advocate is the right to be consulted on important legislation. By a majority of 57 to 21 percent (with 22 percent undecided), in a recent Gallup poll, they supported a proposal introduced by Senators James Abourezk (D., S.D.) and Mark Hatfield (R., Ore.) that would allow Americans to initiate federal legislation when a group of voters equal to three percent of the number who voted in the last Presidential election sign a petition requesting such a vote. Although the procedure would be new to the federal government, it is a familiar practice in almost half the states.

The initiative—or the threat of invoking one—should expedite passage of legislation bottled up in Congress for years. Were the measure in effect now, our Gallup surveys indicate that:

Mandatory busing to achieve racial balance in schools would be abolished by 65 percent of the voters.

The Equal Rights Amendment for Women (ERA) would be approved by a majority of 57 percent, including more men than women.

Tough gun-control laws requiring the licensing of all firearms carried outside the home would be enacted by 77 percent, including a large majority of gun owners.

Achieving the reforms referred to in this article would necessitate amending the Constitution in some cases. The customary procedure requires passage of each amendment by two thirds of each House of Congress, then three fourths of the states must approve. It is unlikely, however, that many Congressmen or Senators would approve legislation diminishing their powers and curtailing their continuance in office.

A surer way to get the proposals considered by the nation, as President Eisenhower pointed out, is through the alternate method of amendment prescribed by the Constitution—a constitutional convention, which can be assembled at the request of two thirds of the states. (The amendments would also have to be ratified by the legislatures of three fourths of the states. However, they require only a simple majority vote to be passed at the constitutional convention itself.)

Amending the Constitution that has served the nation so well is not a step to be undertaken lightly, and some suggest that a constitutional convention might itself carry risks. But the measures described here, in my opinion, would help restore the kind of government that the framers of that document actually had in mind—a government that owes nothing to political bosses, pressure groups or campaign contributors, guided by the will of the people.●

NEW MEXICO MEN CROSS ATLANTIC IN BALLOON

HON. MANUEL LUJAN, JR.

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. LUJAN. Mr. Speaker, it is with a great deal of pleasure that I rise to inform my colleagues of a victory in mankind's quest to conquer nature and the unknown.

Three New Mexico men, all of whom I am lucky to count among my friends, have accomplished something which for 119 years has defeated every attempt. These three have crossed the Atlantic in a balloon.

The names of Maxie Anderson, Ben Abruzzo, and Larry Newman will now join the likes of Sir Edmund Hillary, the Wright brothers, and Neil Armstrong.

The accomplishment of a goal which has been a dream in the minds of men for many decades serves as a glimmer of hope during times which tend to dampen the human spirit. Whenever human beings overcome great odds through determination and hard work we all win because we all feel a sense of elation and sharing in the victory. It helps us to realize that even in our mundane worlds there is the possibility to reach out and grab the gold ring.

To these brave adventurers who have given us an opportunity to smile during the dog days of August I say congratulations and thank you. And, I ask my colleagues to join me in raising three cheers for the victors.●

BALTIMORE VARIETY CLUB GROUP RAISES FUNDS FOR PEDIATRIC CANCER CARE

HON. CLARENCE D. LONG

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. LONG of Maryland. Mr. Speaker, on September 11, the Ladies' Auxiliary of Tent 19 (Baltimore) of Variety Clubs International will present a fashion show and luncheon.

Special guests will include award-winning fashion designer Oscar de la Renta, actor Tony Randall, and Variety Clubs' International President Eric Morley.

The dedicated efforts of Chairwoman Shirley Howard and the auxiliary indicate that this event will be a sell-out, with over 600 in attendance, to raise funds for a pediatric oncology isolation unit at the Johns Hopkins Hospital. This luncheon is the first in a series of major fund-raising events planned by Tent 19 to finance construction of a special isolation unit for children undergoing chemotherapy and other treatments to combat cancer.

The fashion show will honor Mr. de la Renta for his contributions to American couture. Mr. Morley and Mr. Randall are widely known for their active role in supporting the charitable activities of Variety Clubs International.

The outstanding work of Variety Clubs International's 15,000 men and women is well known. Their aid, focused on the needs of children, supports birth defects research, pediatric cancer research and care, services for the physically and mentally handicapped child, and childhood nutrition programs throughout the world.

My best wishes go to the Ladies' Auxiliary and Tent 19 for a successful fund-

raising effort for their most worthy cause, and my congratulations to the many private citizens and businesses who have contributed time and energy toward the success of this event. The Baltimore community thanks Mr. de la Renta, Mr. Randall and Mr. Morley for their support.●

END OVERREGULATION OF INDUSTRY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DERWINSKI. Mr. Speaker, if we are to achieve such noble goals as a balanced budget, reduction in taxes, and the diminishment of the bureaucracy, one of the steps that we must take is deregulation of overregulated industries.

The Chicago Sun-Times, in their lead editorial of August 15, directs attention to the over regulation of the trucking industry. The editorial follows:

FREE THE CHAINED TRUCKERS

In the business community at large, it's always open season for taking potshots at government regulation. Not so in the trucking industry. The American Trucking Assns. and the 2.3 million-member teamsters union positively revel in the embracing security of their federal chains.

And why not? Under solicitous laws and the mollycoddling of the Interstate Commerce Commission, the $30-billion-a-year trucking industry is free to prosper through restrained competition and the power to set its own rates immune from antitrust law.

At the public's expense.

Jerry Ford tried to change all that by lifting some of the regulations, but he was beaten around the curve by congressional friends of the truckers and teamsters. Now, in the next few weeks, Jimmy Carter will be called upon by his staff to decide whether his White House should submit similar legislation to the next Congress.

We say he should.

Our argument was spoken for us by Stanley E. Morris of the President's budget office, who said: ". . . the past regulatory practices of the ICC have been carried out in an unfair, highly costly and highly litigious fashion. This administration is a firm believer that in cases such as this, competitive principles can be a better regulator than the government."

And a current proof of that is the ongoing deregulation of the airline industry, which is thriving under unprecedented passenger loads stimulated by liberated and, thus, reduced fares. It's the best kind of treatment for an inflation-bedeviled economy.

The laws protecting truckers were born in the chaos of the Great Depression to protect a young industry. They authorize the ICC to regulate truckers' entry into the business, the routes to be served, the commodities to be transported and the rates to be charged (in co-operation with the truckers' own regional rate bureaus).

Foes of deregulation say the existing rules ensure security and stability in the industry, that loosening them would cause excessive competition, leading to bankruptcies that would reduce service.

But the American economic system did not acquire its muscle under a security blanket. It grew strong by the tug and shove of competition, which enforced the delivery of the best service at the lowest cost. That kind of market rewards the deserving consumer as well as the deserving entrepreneur.

We can't know what kind of specific legislation Carter might propose, if indeed he proposes any. But, in principle, we're in favor of a strong dose of free enterprise for the captains of the wheeled fleets. The best of them will like it.●

CONGRESSMAN RUDD VERSUS THE METRIC CONVERSION ACT

HON. HENRY J. HYDE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. HYDE. Mr. Speaker, our distinguished colleague from Arizona, ELDON RUDD, has introduced legislation to repeal the Metric Conversion Act. In so doing he has performed a most valuable service in alerting us to the problems inherent in this entire concept. Columnist Bob Greene has written an interesting article in the August 16, 1978, Chicago Tribune about our colleague and this issue, and I commend it to the Members' thoughtful consideration:

REPEAL BILL COULD PUT METRICS 6 FEET UNDER

(By Bob Greene)

WASHINGTON.—There is wonderful news for all you members of WAM!, and that news is right here in Washington.

WAM!—which stands for We Ain't Metric!, the vigilant anti-metric organization founded by this column—has found a true national hero.

He is a Congressman. His name is Eldon Rudd, and he is a Republican from Arizona.

Rep. Rudd has introduced legislation in the House of Representatives that would repeal the Metric Conversion Act. The Metric Conversion Act is the horrible law passed by Congress in 1975—the law that brought the foreign and unwanted metric system to our shores.

And now, hand in hand with WAM!, Rep. Rudd is trying to send that sinister system back where it belongs.

"It is wrong to impose the metric system on America," Rudd said. "Our system of measures has never been a problem in the history of this country. We already have a system that has done a magnificent job for us. My bill is intended to preserve that system that has worked so well."

A word of explanation for those who are unfamiliar with WAM!:

WAM! was started by this column because we believe America does not want the metric system. WAM! is a voluntary organization; there are no dues, and anyone who hates the metric system is automatically a member. Our reasons for opposing the metric system are simple: We don't like it; we don't want to learn it. We Ain't Metric!

Since the founding of WAM! was announced here, thousands of persons from all over the United States have written to express their support and approval. But to be a member of WAM!, you do do not have to write. All you have to do, as already stated, is hate the metric system.

That surely makes Rep. Rudd a member in good standing. And Rep. Rudd surely makes the hearts of all other WAM! members glad.

"I first got interested in this whole question fairly recently," Rep. Rudd said. "I looked at my mail, and a great many people were very much against the idea of this country going metric. And after thinking about it, I decided that I was against the idea too."

Rep. Rudd, of course, was going through the phenomenon that all WAM! members have gone through at their moment of truth—the seething anger and bitter resentment at the thought of the metric system being crammed down our throats.

But the congressman was in a better position than the rest of us. He could do something about it.

"I have introduced House Resolution 12881—the Metric Repeal Bill," Rep. Rudd said. "The focus of this bill is to repeal the Metric Conversion Act, an act that is not needed or supported by the American people."

Rep. Rudd said that support for his bill in Congress has not been overwhelming.

"There are so many congressmen trying to pass so many bills," he said, "and it doesn't look as if we may get this bill into law this session."

Well, maybe. But with WAM! behind a plan, great things can happen. Last year WAM! members were so outraged by plans for highway traffic signs to be converted to metric that we barraged the Department of Transportation with protest letters—and as a result, the Federal Highway Administration backed down and announced that the road signs would remain miles-per-hour.

And now is our chance to do it again.

"I will welcome any support I can get on this bill," Rep. Rudd said. "Anyone who is in favor of getting the Metric Conversion Act repealed should write to his or her senators and representatives in Washington, and ask their congressmen to support H.R. 12881, the Metric Repeal Bill."

Rep. Rudd was an agent for the Federal Bureau of Investigation for 20 years before going to Congress, and said that his travels around the world convinced him of the futility of the metric system.

"I spent a good deal of time in countries that used the metric system, and I never did get the hang of it," he said. "There is nothing wrong with the system we have.

"The people who are standing up for the metric system are people who want to impose a European culture on our Nation. Many of these people were born and raised in European nations, and they think that the system they lived by is the system we should have here. But they are wrong.

"Those who favor the metric system say we need to have it to keep up with the rest of the world. But the United States has never had any problem keeping up with the rest of the world. We've led the world for at least 150 years. We've accomplished all the great things we have for all these years because people in this country have freedom of choice."

And now, Rep. Rudd said, we have the opportunity to exercise that choice.

"I will keep introducing this bill as long as I am in Congress," he said. "If it doesn't pass this session, I'll introduce it again next session. As long as people want to get rid of the metric system, I'll keep this bill going.

Brave words. Strong words. WAM! members, your duty is clear. Write to your senators and representatives. Tell them that if they don't vote for H.R. 12881, they won't be going back to Congress. This is our chance. The metric system is on the ropes. We can knock it out.●

POPE PAUL VI

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. EVANS of Delaware. Mr. Speaker, the world has lost an invaluable force for peace and understanding with the passing of Pope Paul VI.

Since 1963, Pope Paul worked tirelessly to promote peace in many corners of the world. In October 1965, Paul VI jour-

neyed to the United Nations in New York to deliver his famous "Never Again War" speech with a fervor which surprised many of the assembled delegates. He worked for an end to conflicts in Southeast Asia, Nigeria, Northern Ireland, the Middle East, and other areas, and he used the diplomatic offices of the Vatican in a relentless effort toward international harmony.

Pope Paul VI also strove to bring the church to the people. As the first Pope to leave Italy since 1809, Paul VI took his message to such diverse points as Latin America, the Philippines, the Holy Land, India, Portugal, Turkey, Columbia, Switzerland, Uganda, the Far East, and the United States. His commitment to humanity was worldwide, and nothing better demonstrated this commitment than his desire to bring his message personally to so many millions of people.

Pope Paul also did much to promote interreligious cooperation and harmony. He met with leaders of Protestant and Orthodox faiths, and generally tried to further the spirit of ecumenical cooperation.

The world now awaits the election of a new Pope. But whomever it is, the new Pope will benefit greatly from the work of Paul VI. Pope Paul presided over a difficult period in the history of the church and of the world. It is a tribute to his work that he accomplished so much during so turbulent a time.

People everywhere shall miss his kind and gentle work on behalf of all mankind.●

DAILY BREEZE CELEBRATES 50 YEARS OF OUTSTANDING JOURNALISM

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DORNAN. Mr. Speaker, the Daily Breeze, a highly esteemed newspaper in my district, is celebrating its golden anniversary as a Copley newspaper.

In 1928, when Col. Ira C. Copley purchased the paper, it was published in the basement of a bank building with a circulation of less than 3,000. Today the Daily Breeze, boasts a daily paid circulation of 87,000, has its own building located on a 5-acre site, and ranks at the top nationally in terms of advanced publication technology.

The Daily Breeze has succeeded in achieving a blend of world and national affairs while continuing to maintain its detailed coverage of the events of California's South Bay area. Because of its recognized accuracy in reporting and strong dedication to a policy of respectable journalism, it has earned a reputation as an outstanding publication by its subscribers and all of us who have had the pleasure of dealing with the paper's staff.

Mr. Speaker, I ask you and my colleagues in this 95th Congress to join me in commending and congratulating the entire 450-person staff of the Daily Breeze, from the editor to the young men and women who deliver the paper to our homes. It is because of their tremendous individual and group effort that the Daily Breeze has become the outstanding credit to the southern California area that it is today.●

HUMAN RIGHTS AND CAPTIVE NATIONS IDEOLOGY

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DERWINSKI. Mr. Speaker, during the past two Captive Nations Week observances, much national discussion centered on the relationship between a human rights policy and captive nations ideology. As a result of the discussion, it has been made amply clear that human rights is indeed "old hat" for captive nations ideology. Not only this, in advancing the ideology, there is a wholesome pressure on the advocates of human rights to expand their advocacy to the third and broadest sphere of human rights, namely national rights. The point was again underscored in the recent 20th Captive Nations Week observance.

Reflecting this theme are further evidences of the 20th observance which I wish to insert at this point: (1) Proclamations by Mayor Gilbert R. Gunn of Sunnyvale, Calif.; Governor Jerry Apodaca of New Mexico; Mayor Marvin Randle of Irving, Tex.; (2) the syndicated column by Robert Morris on Captive Nations Week; (3) articles in the Chicago Sun-Times and St. Louis Post-Dispatch of July 16; (4) a report in the July 21, China Post; (5) and a note in the July 25 Philadelphia Inquirer:

CITY OF SUNNYVALE CALIFORNIA

PROCLAMATION

Whereas the imperialistic politics of Russian Communists have led to the subjugation and enslavement of the people of Poland, Hungary, Czechoslovakia, Romania, East Germany, Bulgaria, China, North Korea, Albania, Vietnam, Cuba, Cambodia, Laos and others; and

Whereas the desire for liberty by the overwhelming majority of peoples in these nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas the freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights; and

Whereas the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and invites people to observe such a week with prayers, ceremonies, and activities; expressing their support for the just aspirations of the captive nations:

Now therefore, I, Gilbert R. Gunn, Mayor of Sunnyvale do hereby proclaim the week of July 16-22, 1978, as Captive Nations Week in Sunnyvale, and call upon our citizens to join with others in observing this week by dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

GIL GUNN, *Mayor.*

PROCLAMATION BY JERRY APODACA, GOVERNOR, STATE OF NEW MEXICO, SANTA FE, N. MEX.

Whereas, the imperialistic politics of Russian Communists have led, through direct and indirect agression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet Cossackia, Turkestan, North and South Vietnam, Cambodia, Cuba, Laos, and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom-loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies, and activities; expressing their sympathy with and support for the just aspirations of the captive nations;

Now, therefore, I, Jerry Apodaca, Governor of the State of New Mexico, do hereby proclaim the week of July 16 through 22, 1978, as: "Captive Nations Week" in New Mexico, and call upon all citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

Done at the Executive Office this 14th day of July, 1978 witness my hand and the great seal of the State of New Mexico.

JERRY A. APODACA,
Governor.

Attest:

ERNESTINE D. EVANS,
Secretary of State.

OFFICE OF THE MAYOR, CITY OF IRVING—PROCLAMATION

Whereas: The imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czechoslovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaijan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Slovenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos and others; and

Whereas: The desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas: The freedom loving peoples of the captive nations look to the United States as the citadel of human freedom and human rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas: The Congress of the United States by unanimous vote passed Public Law 86-90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations.

Now, therefore, I, Marvin Randle, Mayor

of the City of Irving, Texas do hereby proclaim the week of July 16–22, 1978, as "Captive Nations Week" in Irving, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

MARVIN RANDLE, *Mayor.*

AROUND THE WORLD—CAPTIVE NATIONS WEEK

(By Robert Morris)

I am hoping that the fury engendered by the 1978 Moscow trials will ignite a burning interest in the observance of the twentieth Captive Nations Week. Last year despite President Carter's professed espousal of human rights, the national rights of the peoples in bondage, an integral category thereof, were virtually passed over in silence.

Dr. Lev E. Dobriansky, the most articulate spokesman for the Captive Nations, regularly lists the nations now enslaved with the dates of their captivity and the mere chronology is informative.

As he has pointed out the indicator which he calls the list with the dates, infuriates Moscow because it refreshes people's memories and enables them to readily relate to today's evolving takeovers. i.e Angola, Ethiopia, Mozambique and Rhodesia. It also exposes the true nature of the USSR, as a combine of conquered peoples rather than, as President Carter erred again in his Annapolis speech, is referring to it as a "nation."

The indicator expels the misconception that the Captive Nations are essentially the East European bloc. Armenia, Azerbaijan, Georgia, the Ukraine were all absorbed in 1920. Then came the Far Eastern Republic and Turkestan in 1922, Mongolia in 1924 and Estonia, Latvia and Lithuania in 1940. The litany goes on and on to Laos in 1975 and now stands ready to include Mozambique, Angola, Ethiopia and Afghanistan.

Captive Nations Week helps those who would be interested to keep their eye on the ball. It should engender concern about Angola, Mozambique, Namibia and Rhodesia where once again United States policy is affirmatively pushing peoples onto the Captive Nations list.

As I look at the indicator I am reminded of how many nations U.S. policy has caused to move into Captivity. It is demonstrably true of China, Cuba and Yugoslavia. F.D.R.'s assent to the creation of speres of influence during World War II was responsible for Poland, East Germany, Romania, Bulgaria, Hungary and Czechoslovakia being absorbed.

All together there are thirty nations enchained and the four of five more that I have mentioned are sliding down into dungeondom.

The liberty—spiritual and political—of these human beings, our brothers and sisters, should be of great concern to every sector of our society, led by our churchmen.

I believe that is truly a measure of our decline as a civilization that this exciting spiritual institution—Captive Nations Week—evokes barely a yawn from the leaders of our nation.

MANTOLOKING, N.J.

[From the Chicago Sun-Times, July 16, 1978]

ADDRESSES DALEY PLAZA CROWD—DISSIDENT PRAISES CARTER ON RIGHTS

(By Larry Ingrassia)

There are "tens of thousands" of political prisoners in Russia for their stance on human rights, former Soviet Army Gen. Pyotr Grigorenko said Saturday.

The exiled dissident applauded President Carter's support of other human rights activists in the Soviet Union and called for U.S. sanctions to put pressure on Russian officials.

Speaking through an interpreter at a Captive Nations Day celebration at the Daley Plaza, Grigorenko reminded the audience that recently convicted Soviet dissidents Anatoly Shcharansky and Alexander Ginzburg are not alone.

"Not just those you read about, but tens of thousands are now in prison who support this fight for human rights," the general said.

Grigorenko was stripped of his citizenship and barred from returning to the Soviet Union last March after being permitted to leave to visit a stepson in New York.

But he told the crowd of several hundred: "The people of the Soviet Union are arising and I believe I will yet return to a free Ukraine." Many in the crowd were fellow Ukrainians and did not have to wait for the interpreter to applaud this declaration.

Grigorenko said he was pleased that Carter "has taken a hard line" toward the persecution of Shcharansky and Ginzburg. Both received lengthy prison terms.

He added that the United States "should use sanctions of government to fight this" but did not elaborate. Western nations also should demand that the 1975 Helsinki accord—which included guarantees of human rights—should be nullified unless the Soviets and other Eastern bloc nations stop prosecuting political dissidents, he said.

Grigorenko accused the Soviet Union of "merciless genocide" against the people of the Ukraine and other nationalities within the U.S.S.R. National identity as well as human rights is a major concern of the dissidents, he said.

"Every expression in favor of human rights or national identity is punished by imprisonment," Grigorenko added.

Grigorenko was a leader of the so-called Helsinki Human Rights Group in Russia along with Ginzburg and Shcharansky. A World War II hero, he rose to the rank of major general before his criticism of Soviet officials led to a demotion. He later spent two terms in psychiatric hospitals for his outspoken support of human rights.

U.S. Rep. Henry J. Hyde (R-Ill.), who spoke before Grigorenko, called on Carter to adjourn the strategic arms limitation talks because of the "contemptuous" Soviet attitude in proseculting Shcharansky and Ginzburg.

"SALT is as important to the Russians as it is to us," Hyde contended.

He also called for a hard-nosed attitude toward the expansion of Soviet influence in Africa. The United States could have thwarted a "Marxist take-over" in Angola if Congress had approved military aid, he said.

The Captive Nations group seeks the end of Communist rule throughout the world.

[From the St. Louis Post Dispatch, July 16, 1978]

SUFFERING AND TEARS BEHIND THE IRON CURTAIN

The battle against communism cannot be fought on a military level, according to a Lutheran pastor who spent 14 years in prison for aiding Christians in Communist Romania.

"The only thing that can conquer Communists is sainthood," the Rev. Richard Wurmbrand said in a speech Sunday opening Captive Nations Week. "We need not anti-Communist fighters, but saints."

Commenting on the softness of American life, the Rev. Mr. Wurmbrand said, "We can't even understand the toil and suffering of others . . . All the suffering and tears should not belong to those behind the Iron Curtain."

Captive Nations Week, which has been proclaimed by Congress for the last 28 years to remind Americans of imprisoned countries, should not even exist, he said. "We should always remember our fellow brothers in faith. Captive Nations Week should be 52 weeks a year."

Those who do not remember their brothers in prison will fare no better than Communist torturers at Judgment Day, the Rev. Mr. Wurmbrand predicted.

In prison, he said, "not a night passed that prisoners did not pray for America—its churches, its youth, its people, its president."

After he was ransomed from Romania by a group of Norwegians and came to America, "I was sure I would hear a prayer or reminder of those in Romania with 50-pound chains at their feet. I have rarely heard a mention," he said.

Christians have a responsibility to share the suffering of the imprisoned people in captive nations, he said.

The minister heads an organization that smuggles Bibles and Christian literature into Communist countries. He was arrested in 1948 for his underground ministry to captive Romanians and to Soviet soldiers in the invasion force.

He was released twice and rearrested for continuing his work. After his third release, he left Romania and founded Christian Missions to the Communist World, whose U.S. affiliate is Jesus to the Communist World Inc.

Captive Nations Week activities here are directed by the St. Louis group Free Friends of the Captive Nations.

[From the China Post, July 21, 1978]

TAIPEI RALLY TO MARK CAPTIVE NATIONS WEEK

A mass rally with over 3,000 people taking part, including high ranking government officials, foreign distinguished guests, foreign envoys and representatives from all walks of life, will be held at the Sun Yat-sen Memorial Hall in Taipei this morning to commemorate the 1978 Captive Nations Week.

Dr. Ku Cheng-kang, honorary chairman of the World Anti-Communist League, will chair the rally.

Premier Y. S. Sun will also make a speech at the rally.

Other speakers at the rally will include U.S. Congressman John Ashbrook; Chairman of the National Center of Independents and Farmers of France Bertrand Motte; Vice-President of the Supreme Court of the Ivory Coast, Georges Creppy; Japanese Diet Member Taikan Hayashi: the publisher of "Replica" in Saudi Arabia, Sheik Mohammed Salahuddin; and the Counselor of State Council of Uruguay, Willy Patocchi.

The Taiwan Provincial mass rally to mark the week will also be held in Taichung this morning, to be attended by some 2,000 people. The rally will be presided over by Tsai Hung-wen, speaker of the Taiwan Provincial Assembly.

[From the Philadelphia Inquirer, July 25, 1978]

NATIONAL AND INTERNATIONAL NEWS IN BRIEF NOTES

Fifty thousand persons attending a Taipei, Taiwan, rally to mark the end of Captive Nations Week adopted a resolution strongly criticizing the normalization of relations between the United States and Peking. . . .●

TRIBUTE TO STACY "STAC" ALDRICH—OUTSTANDING BOY SCOUT

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. ROUSSELOT. Mr. Speaker, I was recently made aware at a board of directors meeting of the San Gabriel Valley Council of the Boy Scouts of America that last year, on November 10, 1977, their medal of merit was awarded to a young man who lives in the city of Baldwin Park which is in the 26th Congressional District of California which I serve. Because I am extremely proud of

the distinguished conduct of my constituent, Stacy "Stac" Aldrich, I am bringing to the attention of my colleagues in the U.S. House of Representatives, and placing in the public record, the statement on the medal of merit award which describes the remarkable act of bravery which Stac performed.

THE MEDAL OF MERIT

For outstanding service putting into practice Scout skills and ideas is awarded by the Boy Scouts of America upon the recommendation of the National Court of Honor on November 10, 1977 to Stacy "Stac" Aldrich.

While on his way home from school in Baldwin Park, California, on May 13, 1976, Star Scout Stac Aldrich, 12, spotted a five-and-a-half foot long snake crawling toward a young boy playing on the ground. Acting without regard to his own safety, Stac struck the snake with his fist and suffered two puncture wounds on his hand when the snake turned on him. His action saved the boy, five-year-old Larry Green, from harm. Stac was hospitalized for observation but suffered no ill effects. His quick, courageous action reflected great credit upon him and his Scout training.●

THE REGIONAL DEVELOPMENT ACT OF 1978

HON. PHILIP E. RUPPE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. RUPPE. Mr. Speaker, today I am introducing a bill which would update, clarify, and consolidate under one act, title V of the Public Works and Economic Development Act, and the Appalachian Regional Development Act. This is a reform that is long overdue. Further, this legislation would extend the life of the Appalachian and Title V Commissions through 1985, and reestablish the Title V Commissions as independent of the Department of Commerce.

In 1965 Congress demonstrated its support of regional commissions by enacting the Appalachian Regional Development Act. Subsequently, Congress also enacted title V within the Public Works and Economic Development Act which created other regional commissions outside of the Appalachian Regional Commission. These acts have highlighted the Federal Government's increased recognition that Federal programs affecting State and local areas must display greater sensitivity to regional, State and local needs.

The Title V Commissions and their counterpart, the Appalachian Regional Commission, were established through the voluntary support of the participating States. The Commissions, such as the Upper Great Lakes Regional Commission, are planning commissions that provide technical and supplemental grant assistance for regional development and represent State and local concerns at the Federal level. The Upper Great Lakes Regional Commission, for example, has been a particularly effective agency to my constituents in Northern Michigan.

To date, nine commissions have been established, including the Appalachian Regional Commission under a separate act. Because of the success of these existing commissions, 17 more States have filed applications to form seven new regional commissions in just the past 2 years. This demonstrates a general consensus among State governments that a regional approach to economic development has been effective.

The legislation I have introduced maintains State initiatives in commission organization, emphasizes the key role sub-State districts play in the overall regional development process, and reaffirms the importance of supplemental grant and aid programs.

During recent years it has become apparent that revisions of title V are necessary in order to conform to changing economic conditions. These changes are not only needed for revising the Title V Commissions, but have also been recognized as beneficial for the Appalachian Regional Commission by both the Appalachian Regional Commission itself and the Regional Commission Task Force established within the Department of Commerce.

Incorporated within the Department of Commerce, the Title V Commissions have found themselves the victims of cost-cutting initiatives and political manipulation which has blunted the effectiveness and ability of the Commissions to fully realize their goals. The result of these actions has been a drastic reduction in funding levels authorized under the Public Works and Economic Development Act, and has limited the Commissions' ability to coordinate important projects of interest to various levels of State government.

The effectiveness of the Appalachian Regional Commission has been due largely to its superior funding, its highly placed position within the Federal Government, and its inter-governmental planning and policy coordination system which reaches from the local level to the White House. However, Appalachian Regional Commission officials also realize the benefits to be gained by updating the legislation and consolidating their status with Title V Commissions.

My legislation, by granting independence to the title V commissions, would provide the commissions with the necessary authority and status to insure their increased effectiveness in the future.

Suggestions have been made to move toward a State block-grant system and place greater emphasis on urban concerns. Such a system would eventually result in the ignoring of multi-State and rural concerns, the initiation of increased expenditures, and be irresponsible toward the expressed interest of the States in maintaining a regional commission concept.

This bill will provide the commissions with greater direction and a mandate backed by the funding necessary for the commissions to play their intended role in economic development. The authorization levels would not increase above the present level of $250 million for the first 3 years, and would only be gradually increased up to a maximum of $500 million in order to permit the expansion and establishment of present and new commissions.

At a time when Congress is faced with demands for less Federal interference, a streamlining of Federal agencies and commissions, and a demand for a better return on each tax dollar, the title V commissions have proven their worth even though meagerly funded. In comparison to the LPW and CETA programs, this regional commission is a bargain and, best of all, it is also responsive to State and local needs without an overbearing Federal bureaucracy.

The present legislation covering the title V and Appalachian Regional Commission will expire next year. This act is too important to be left for last minute consideration. Congress should become familiar with the revisions of this act now, and that is why I have introduced my proposal at this time.

I am hopeful that the appropriate committee can schedule oversight hearings on this legislation before Congress adjourns in mid-October. This legislation deals with an issue that has received the active consideration of all 50 States and the U.S. Commonwealths this year, and should be a priority issue for the Congress as well.●

HUMAN RIGHTS VIOLATIONS IN THE SOVIET UNION

HON. WILLIAM S. MOORHEAD

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MOORHEAD of Pennsylvania. Mr. Speaker, I wish to again comment on human rights violations in the Soviet Union. Human rights arise from a fundamental respect for the simple dignity inherent in all people. As the Declaration of Independence said with eloquent reserve, "We hold these truths to be self-evident, that all men are created equal, that they are endowed by their Creator with certain unalienable rights, that among these are life, liberty, and the pursuit of happiness . . ." Simply put, human beings, wherever they are in the world, should be accorded certain essential rights simply because they are people.

All countries say they provide their citizens with such essential human rights. As we know, many nations say one thing and do another. The Soviet Union is one such country, as the recent trials of Anotoly Scharansky and Alexander Ginzburg demonstrate. Scharansky and Ginzburg are Jewish activists. They are asserting their rights of free speech, of freedom of religion, and the opportunity to emigrate, as protected by articles 50 and 52 of the Soviet Constitution and the Helsinki agreement.

What do Scharansky and Ginzburg get for exercising their purported rights, as "guaranteed" by the Soviet Government? Jail. The Russians say human rights are well and fine—but do not rock the boat. Dissent is not allowed. Liberty is a lovely word—but do not do anything the Government disapproves. The individual is in complete control of his life—unless the Soviet State decides—arbitrarily and capriciously—that the individual has done something wrong and then so much for individual life.

Human rights are precious. They are more than just words. They mean some-

thing. They mean that human beings have the opportunity to do certain things, notwithstanding whatever the governments of this world do or do not want. They mean that human beings have innate value and respect and dignity, and that this must be recognized and indeed cherished by others. They mean that governments are to serve and protect the interests of their citizens, and not the reverse. They mean that human beings have culturally evolved above the stone man mentality where there were no rights, only individual will where the strongest survived and dominated.

The city council of Pittsburgh recently passed a resolution concerning the recent trials in the Soviet Union, condemning the trials and urging the release of Scharansky and Ginzburg. I wholeheartedly agree with it. I ask unanimous consent to have this resolution printed in the RECORD.

RESOLUTION No. 795

Whereas, Americans of various races, religions, and political persuasions share a profound belief that mankind, through natural instincts, seeks freedom of thought and deed, and that in this blessed land of America, we believe in freedom as essential in asserting the supremacy of Human Rights; and

Whereas, Jewish human rights activists Anotoly Scharansky and Alexander Ginzburg were tried and convicted in the Soviet Union on charges of treason and espionage, such charges causing shock and dismay among the free peoples of the world; and

Whereas, the tenor and severity of the charges against the two defendents indicates they may not have received a fair and equitable trial in an air of suspicion and hostile attitudes toward Jews living in the Soviet Union; and

Whereas, President Carter, indignant concerning the obvious renunciation of the men's civil and human rights, personally has denied that Mr. Scharansky ever worked for the Central Intelligence Agency, one of the allegations against him; and

Whereas, American officials have warned the Soviets repeatedly that the nature of the trials of both Mr. Scharansky and Mr. Ginzburg and any harsh sentences against them could seriously damage American-Soviet relations;

Now, therefore

Be it resolved that the Council of the City of Pittsburgh on behalf of the freedom loving citizens of the City of Pittsburgh does hereby join with the Pittsburgh Conference on Soviet Jewry in condemning this display of anti-Semitism on behalf of the Soviet Union;

And, be it further resolved that we urge President Carter and American officials to remind leaders of the Soviet Union of their commitment to extending Human Rights to all their citizens, and to urge the USSR to dissolve these unreasonable charges and release these men from custody so they may rejoin their families and pursue their rights to freedom of thought and expression.●

CROSSING THE ATLANTIC BY BALLOON

HON. HAROLD RUNNELS

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. RUNNELS. Mr. Speaker, last night three men from New Mexico achieved a goal that has eluded aviation enthusiasts since 1859. Ben Abruzzo, Max Anderson, and Larry Newman did what no one else has ever done before—they completed a crossing of the Atlantic Ocean by balloon.

The three New Mexicans began their flight in a balloon called the *Double Eagle II* last Friday evening from Presque Isle, Maine. Last night they passed over the Irish port town of Louisburgh, County Mayo, the first persons to ever soar from the North American Continent to Europe in a balloon.

I am proud to report the men are still airborne. They were passing over England this morning, and in their words and hoping to "follow in the footsteps of Lindbergh and fly direct to Paris."

Not only are Ben Abruzzo, Max Anderson, and Larry Newman the first persons to ever complete a trans-Atlantic journey by balloon, they have set a new endurance record for unpowered balloon flight. Yesterday they surpassed the old record of 107½ hours and they are still going.

I would like to point out that the New Mexico men have succeeded in their adventure after 17 previous attempts to cross the Atlantic by balloon have failed. In fact, two of the men, Mr. Abruzzo and Mr. Anderson, made an unsuccessful attempt last year, but they have come back to triumph. As they crossed the Irish coast to officially complete their crossing they radioed to observers, "We are on top of the world."

There are some who would say a balloon crossing of the Atlantic means little, that it will not open the way to a new enterprise as the flight of Charles Lindbergh did or have any lasting effect in this complex world of ours other than a few lines in a book somewhere. But I believe those people are missing the point. The flight of the *Double Eagle II* was never intended to do that.

Instead, it is a reaffirmation of the fact that ordinary men can confront the elements, find a challenge and conquer it, and doing that is justification in itself. That is what this balloon flight across the Atlantic Ocean was all about and I am proud that three men from New Mexico were able to meet this challenge and overcome it.●

JUDGE FRED S. LUCERO

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MINETA. Mr. Speaker, today I rise in honor of a man who has ably served the people of Santa Clara County for many years: The Honorable Fred S. Lucero, judge of the superior court.

On August 31 Judge Lucero will be honored at a dinner by the woman's alliance. This multiethnic organization was created to help low-income minority women, especially those victims of domestic violence.

They believe, as I do, that Judge Lucero brought to the superior court bench a fresh sensitivity to the problems women have, especially in the area of family law.

Judge Lucero began his career in the Santa Clara County Public Defender's Office. During his 13 years in that organization he held many of the top positions. He was the supervising attorney, juvenile court division and later the senior felony trial attorney. He was eventually made assistant public defender in 1972.

In November 1976, Judge Lucero was appointed to the superior court bench in Santa Clara County. Since his appointment, Judge Lucero has served as the supervising judge in family court. In this capacity he has worked with the bar association, other members of the bench and various community groups to improve the administration of justice in the critical field of family law. He is now also a member of the executive committee of the superior court.

Mr. Speaker, I ask you and my colleagues to join with me and many of the fellow Santa Clara County residents in thanking Judge Lucero for the great contribution he has made to the administration of justice.

Further, let us all wish him the best of luck and success in all his future endeavors.

FUSION FOR ENERGY

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. PURSELL. Mr. Speaker, I would like to take this opportunity to express my thanks to the Baltimore Sun for its candid editorial regarding fusion.

I have been plugging fusion—sometimes in a lonely atmosphere—and now we have gained some allies. Fusion does have a great opportunity for success. I submit this article for the RECORD:

[From the Baltimore Sun, August 16, 1978]

FUSION'S UNLIMITED PROMISE

As Congress's effort to adopt comprehensive energy legislation verges on collapse, the most heartening energy news is not the Texaco discovery of natural gas off the New Jersey coast. It is a successful scientific experiment in Princeton, N.J.

Though scientists dislike the usually misleading word "breakthrough," fusion energy researchers cannot disguise their joy at the results of the Princeton experiment: Using magnetic lines of force in a doughnut-shaped containment chamber called a "Torus," they produced a "plasma" with a temperature of 60 million degrees.

Not only does that get them closer to the 100-million degree temperature needed for actual fusion, it verifies that physical laws work, as earlier anticipated, at such high temperatures. "We can predict with confidence now," said one administrator, "that when we get a larger machine at Princeton [scheduled for completion in 1981] we can achieve actual controlled fusion in an experimental setting."

Fusion is the ultimate form of energy, the source of the sun's light and heat, the reaction that makes the hydrogen bomb work. But containing it for peaceful generation of electricity is a formidable task. Two experimental approaches are being taken: magnetic reactors like the Princeton one, and "inertial" techniques in which fuel is compressed and heated with laser, electron or heavy-ion beams. The latter technique may render container walls radioactive, but it will create no dangerous radioactive isotopes, such as the bone-seeking strontium 90 produced in conventional fission reactors. Moreover, there is

no danger in fusion of an inadvertent explosion. And heavy hydrogen fuel can be extracted cheaply from seawater in almost infinite quantities. Both approaches are promising—the magnetic one more so at the moment.

Commercial use of fusion, if it comes, is so far off (the current target date being about 2025) that other energy avenues for the interim must be explored. Scientists believe judicious increases in the federal fusion budget could hasten fusion's development. Yet the Carter administration has actually cut the modest budget. The promise is for unlimited energy, enough to make not only the Texaco find seem paltry but even to render Arab petroleum reserves of minor importance. With the success of the Princeton experiment, the promise is significantly nearer fulfillment. It is time for the administration to review its attitudes toward the fusion energy budget.●

AN ANALYSIS OF OUR FOREIGN POLICY

HON. JOHN J. RHODES

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. RHODES. Mr. Speaker, I want to bring to the attention of my colleagues an astute analysis of our past foreign policy under Democrat administrations by Robert J. Pranger, director of foreign and defense policy studies of the American Enterprise Institute for Public Affairs.

Mr. Pranger notes that for 80 years Democrat Presidents have wavered between quiescence and emergencies. He also points out the dangers of such vacillation in the current nuclear age. He notes that Mr. Carter seems to be continuing this unfortunate policy, with his utopian rhetoric on human rights being undermined by cutbacks in our defenses.

In this perilous world, Mr. Pranger's tracing of our foreign policy history should remind us of past mistakes, and impel us to take precautions against repeating those blunders.

Text of Mr. Pranger's article is as follows:

THE DEMOCRATIC PARTY'S UNSTEADY FOREIGN POLICY LEADERSHIP IN THE TWENTIETH CENTURY: QUIESCENCE AND EMERGENCY

The Democratic Party's record in foreign affairs during this century, while not precisely fitting the "party of war" description, nonetheless might be called "the party of two foreign policies," neither policy sufficient for preventing war, because both are unsteady in their application. On the one hand, from Wilson to Carter, the Democrats have espoused quiescence in foreign policy: our major problems are domestic ones and these should be given top priority. On the other hand, this same party has been the ruling party in the White House during the onset of all major emergencies in our foreign relations since 1900. And this is precisely the problem with the foreign policy of the Democratic party: it is not so much warlike as unstable, vacillating between quiescence and emergency. Indeed, the two extremes of the pendulum are related. First comes inattention to foreign affairs, then comes the explosion. Every Democratic president in this century has started his term with promises to keep the nation from excessive foreign adventures by concentrating on domestic ills, or at least to de-emphasize the military aspects of our international commitments, and yet eventually each has led us into some new major international emergency.

Roosevelt's first inaugural words, "We have nothing to fear but fear itself", came less than two months after Hitler became Chancellor. By 1937 Franklin D. Roosevelt was talking about "quarantining" dictators. In 1940 we were engaged in lend-lease assistance to Great Britain. Yet, in all this period our own military buildup was minimal and we were caught off-guard at Pearl Harbor. Despite some advance warning to American public opinion, December 7 was an enormous shock for which no one, including Roosevelt, was prepared. History repeated itself in Korea in 1950, Cuba in 1962, Vietnam in 1965—in each case under a Democratic president. Are we due for another such shock under President Carter, but now under conditions of nuclear parity with the Soviet Union?

President Carter's current vacillating policy toward the Soviet Union might be contrasted with the confidence and firmness of his Republican predecessors over the past eight years. From 1969 until 1977 detente was firmly coupled with defense. Now detente is in trouble and so is our defense. Any sense of compatibility between negotiations and strength, typical of the 1972 Nixon-Brezhnev summit, has been lost. In January 1977, as President Ford left office, the United States and Soviet Union were on the verge of a SALT II agreement, but our nation was also embarking on its first real increase in defense spending in recent years. After all, the Soviet Union saw nothing incongruous about strengthening itself militarily while negotiating on nuclear arms control. Why should we?

President Carter proceeded along a more adventurous course by announcing his highly idealistic human rights policy, confusing the SALT negotiations by his abortive March 1977 proposal (applauded by conservatives in his party), meanwhile cutting the Ford defense budget programs (applauded by liberals in his party). The B–1 bomber was not an issue in SALT, but surely helped shore up confidence in our national defense.

President Carter cancelled the B–1 program. Improvements in our land-based missiles were provided for in the 1978 Ford defense budget, but these were delayed in the Carter approach to defense. Not an issue in SALT, the neutron warhead has been at least temporarily shelved by the Carter administration. And an expanded naval shipbuilding program in the last Ford defense budget was severely trimmed by President Carter one day after he had delivered a hard-line speech in Winston-Salem. The pendular swings between quiescence and emergency, typical of his Democratic predecessors, seem part of the Carter foreign policy as well, only now, rather than coming in historical sequence, we find the two themes jumbled together in obvious confusion.

Defense preparedness is not linked by the Carter administration to a long-term diplomatic process for stabilizing world affairs and lessening tensions. Despite the numerous historical lessons from international politics about the importance of military power as an adjunct for sound and reliable negotiations, President Carter's approach seems consistent with his party's tradition, if in a somewhat exaggerated way: he believes in a utopian vision of a world without military conflict, and yet when disappointed he petulantly exhorts us to see this same world in terms of emergencies and Soviet expansion. He offers conflict or cooperation, either one or the other. His speech at Annapolis on 7 June of this year highlights this. Rather than rest secure with the idea that the world, as we know it, will have both competition and cooperation, he offers the Soviet Union (and presumably ourselves) a choice. In the world we have experienced in this century is there really such a choice, or do we have to live with contradictions? Must we strain for moral absolutes in world affairs, or can we settle for limited virtures bought at great sacrifice?

[Perhaps this is the most striking feature of Democratic Party foreign policy in this century, the fact that it eschews a foreign policy of inevitable constraints and ambiguities for international programs of stark alternatives.] Wilson the dove became the flaming hawk. Unprepared at Pearl Harbor after negotiating without strength, Roosevelt was outraged after being suddenly betrayed by the militarily powerful Japanese. Having drawn defense lines that effectively excluded Korea from our defense commitments in early 1950, Truman moved the nation to emergency footing when South Korea was suddenly attacked from the north in mid-year. With his stirring and highly idealistic inauguration speech still very much on the public mind, Kennedy became embroiled in the tawdry Bay of Pigs episode in 1961 and then in a near-war with the Soviet Union over Cuba in 1962. President Johnson turned a deaf ear on Republican proposals in early 1964 that our escalating involvement in Vietnam be subject to full national debate, only to call for major armed commitment in 1965.

Such inconstancy coupled with a tendency to deal in absolutes—quiescence and emergency, idealism and disillusionment—give an appearance of unsteadiness in world affairs. More than appearance, however, this unsteadiness has proved quite real. Ad hoc reaction has become an established tradition in Democratic Party foreign policy, and President Carter does not seem able to break the spell of this tradition. If anything, his inexperience has only exaggerated it. While the "war party" label may be a bit strong, if stated bluntly, the Democratic Party should be held responsible for its failure to establish long-term stability in our conduct in world affairs during this century. Under the present administration we have become unpredictable and problematic for ally and adversary alike. In place of a steady improvement in our defense and in our relations with the Soviet Union, carried on simultaneously and without fear of contradiction, this administration has substituted confusion in both areas by emphasizing unreal choices between utopia and instability. The vision of a new world order has been juxtaposed to a fear of inexorable Soviet expansion. One has been attributed to Secretary Vance, the other to Dr. Brzezinski, but the problem is much deeper in Democratic Party history than this.

One might ask why the Democratic Party has displayed such unsteadiness. Why should Wilson proudly campaign in 1916 on the slogan "He kept us out of war," and then bring the country to war-time emergency footing scarcely a year later? Why should Roosevelt, having promised no American involvement in Europe's war during the 1940 campaign, be faced with a surprise attack on Pearl Harbor in late 1941? Why should President Carter, who took then-President Ford to task in their second presidential debate in 1976 for starting a new Vietnam in Angola, now cry alarm over Soviet and Cuban expansion in Africa? Have such turnabouts—and others like them under Truman, Kennedy and Johnson—been mere historical accidents? Europe was at war in 1916 and we were already involved on the high sea in this war. By November 1940 we stood as a de facto ally of Great Britain in the struggle against Hitler, and were deadlocked in unproductive negotiations with militaristic Japan. And surely Brezhnev and Castro had come to a meeting of minds on Africa before the November 1976 presidential election. The tides of world affairs do not operate according to four-year presidential cycles. Quite the contrary, new Presidents find themselves in the stream of world history stretching back long before their arrival in office and

reaching ahead beyond the end of their tenure.

Then why such unsteadiness in the Democratic Party? Why the pendular swings between quiescence and emergency in its foreign policy? Why the absence of prudent statemanship that combines the long-term with the immediate, negotiation with strength? Why the tendency toward impulsive reaction and sudden shifts? One explanation has to do with the Democratic Party intelligentsia, its ideolgical elite, which is more utopian in orientation than is the intellectual vision of the Republican Party. This might be attributed to a contrast between liberals and conservatives, but even foreign policy conservatives in the Democratic Party—witness President Johnson and his party supporters during Vietnam—seem prone to unsteadiness. For utopians, the world is a lesson in abstraction, a form of moral geometry that can be set right by pure reason. In turn, what's wrong with the world is most often seen by this intelligentsia as the result of ignorance or deliberate falsification. The idea that reason itself is limited to finite programs, and only with great difficultly, seems defeatist. Also, the notion that reasonable persons may differ is alien. Out of such idealism, of course, comes a belief in progress through expanded reason. Quite naturally, the realities of life soon catch up with this utopian vision: expansion of reason may bring forth more learned arguments, but not necessarily their resolution. Or reason may never prove expansive enough to keep up with the nonrational and irrational forces of history, from explosion of populations to the need for people to live—and governments to govern—by myth as well as by scientific thought.

A second explanation for unsteadiness in Democratic Party foreign policy has something to do with the party's voting constituencies. Since the advent of Wilson's "New Freedom" in 1912, the Democratic Party has been highly biased toward domestic affairs rather than international politics. So much "unfinished business" (the utopian bias again!) seems to be present in our own country, it is argued, that we should turn toward internal reform before trying to save the world. Or perhaps worse still, we should try to transfer the lessons of our own reform to the wider world by vigorously spreading democracy. Even the Johnson realists, such as Secretary of State Rusk, were prone to argue the merits of our involvement in Vietnam on the ground that we were fighting to save free elections there. And now we appear embarked on a policy of preaching human rights to a world where the very concept has been used by some nations to enslave millions.

The combination of a utopian intelligentsia and a voting base heavily committed to domestic reform has been central to the identity of the Democratic Party in this century. This identity has not equipped the Democrats for steady foreign policy leadership. So perhaps it is time to drop the war party label for the Democrats, changing it instead to the "unsteady party" in foreign policy. President Carter is now at an unprecedented low point in the polls after 18 months in office. Part of his sagging popularity can be traced to his handling of foreign affairs. Once again the wisdom of the American public seems confirmed. But is this a problem for President Carter alone, or a judgment on his party as well? I think the latter.

The record of the first nearly 80 years of our twentieth-century history and of six Democratic presidents who have served the nation in this period would seem to indicate that unsteadiness in foreign policy is an endemic problem for the Democratic Party. Its tendency to traffic in utopian ideals about world affairs, its pendular swings between quiescense and emergency, its bias toward domestic reform to the neglect of long-term foreign policy planning, its transfer of ideas about domestic policy to the more complicated international arena, and its propensity to pose the problems of humanity as stark alternatives all have made the Democratic Party an unreliable resource for national leadership in foreign policy. This problem has by no means been confined to the liberal sector of the party, but extends to some of its more conservative elements as well. Given American responsibilities for worldwide stability, affecting ourselves and others, this unsteadiness could lead to great calamity in this nuclear age. The weakness appears to be a trait of the Democratic Party itself no matter who leads it.

Wilson, Roosevelt, Truman, Kennedy and Johnson all operated either in a world environment without atomic weapons or with American nuclear superiority. If quiescence led to national emergency, the consequences for the American public were never disastrous. There were large numbers of casualties among brave combatants from this country, of course, and so the responsibility for not having long-term foreign policy programs that combine negotiations and strength has been great. In this sense, the "party of war" label pasted on the Democratic Party has some validity. Yet, today the stakes for the American public are much vaster. Our own civilian population is now under the sign of nuclear holocaust in this age of nuclear parity between the United States and Soviet Union. President Carter is the first leader of his unsteady party to serve in this era of full-fledged nuclear parity where Soviet power may even surpass that of the United States during his tenure in office.

Under conditions of nuclear parity we cannot afford bad foreign policy, and I associate such faulty policy with unsteadiness or a failure to combine negotiations to reduce the danger of war with the strength to make these negotiations last in an international order where lawful authority is still weak. Has President Carter inherited his party's propensity to engage in unsteady foreign policy? If he has and cannot find a cure, then the American public could suffer terribly before the end of his term. At the very least, he must resort to a bipartisan foreign policy which will give stability to his own inherited tendencies toward unstable policies. Given the difficulties he seems to be having in accomplishing this, it may well be safer to propose another alternative: the Republican Party should be elevated by the American people into a genuine majority party, first with substantial gains in Congress in the 1978 Congressional elections including majority status in the House of Representatives, and then to the Presidency in 1980. Parties do make a difference in this country, no less in foreign than domestic policy. The record of the two parties since 1900 has been steadiness in foreign policy by the Republicans, unsteadiness in the Democratic Party.●

RECOMMENDATION BY REPRESENTATIVE JOHN WYDLER TO USE THE BARNWELL NUCLEAR FUEL PLANT

HON. FLOYD SPENCE

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

Mr. SPENCE. Mr. Speaker, the House Science and Technology Committee has released a report entitled "Oversight of European Nuclear Energy Development" prepared by my good friend and colleague, JOHN WYDLER, the committee's distinguished ranking minority member.

I urge my colleagues to obtain a copy of the report and read the account of how European nations are accelerating their nuclear power development while the United States pauses to question commercial nuclear fuel reprocessing. Of particular interest to me is Mr. WYDLER's recommendation dealing with the Barnwell nuclear fuel plant in my district in South Carolina. He recommends:

The United States should reinstate the plan to reprocess light water reactor fuel at the Barnwell Nuclear Fuel Plant under modern safeguards. This country should develop a comprehensive plan for nuclear waste management, civilian and military, which recognizes that fact that nuclear reprocessing cannot be indefinitely deferred.

In the report's summary of findings is the statement:

Our present policy on the breeder and reprocessing ignores the advances which have been made in safeguards technology as well as the chief mechanism for implementing these safeguards, namely, the International Atomic Energy Agency.

Finally, Mr. WYDLER's report on his discussions with officials of the IAEA should cause us all to be concerned about the administration's nuclear policy when he notes "* * * the world is developing a mistrust of American reliability because of our shifts in Atomic policy. Ironically, this policy causes more countries to get into the reprocessing an enrichment field, leading to more, not less nuclear proliferation."

THE GOOD SAMARITAN ACT

HON. CARL D. PURSELL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. PURSELL. Mr. Speaker, it is with great pleasure that I reintroduce today, the Good Samaritan Act along with 17 cosponsors. I first introduced this bill (H.R. 10740) on February 2, 1978, in response to a great concern voiced by one of my constituents.

Basically, the Good Samaritan Act encourages on-the-scene emergency medical care aboard aircraft by relieving physicians, registered nurses, and aircraft employees from civil liability for damages resulting from any act or omission in rendering such care. This bill will provide the necessary legal protection for the aforementioned people, so that they will be encouraged to assist airline passengers who experience medical problems during a flight.

The inspiration for this legislation is Dr. Melvin Reinhart of Ann Arbor, Mich. Several years ago, Dr. Reinhart was on an airline flight on which another passenger suffered a heart attack. He was very disturbed that basic medical equipment was not available to him and the other doctors on board, to assist the stewardess in caring for the heart patient. The doctor promptly began efforts to require airlines to carry basic medical supplies on their planes.

Through contacts with the Federal Aviation Administration, it was learned that such equipment was not available on the airlines because their stewardesses and pilots, and doctors and nurses who were on board, could be held per-

sonally and legally liable in suits growing out of the emergency care.

Thus, we now have the vehicle to protect these people in this legislation.

The Air Line Pilots Association and the Flight Attendants Association—those people who will be affected by this legislation—have strongly endorsed the bill, and are actively working for its passage.

I urge all of my colleagues to look favorably on this legislation as I intend to keep up my efforts to enact this bill.●

CLEVER SCHEME TO PAY FOR QUIETER PLANES

HON. PAUL SIMON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. SIMON. Mr. Speaker, one of the great public raids of our time is being perpetrated by the airlines, a raid that makes Jesse James look like a symbol of virtue and rectitude.

This morning's Washington Post carries an excellent article by Hobart Rowen about that Treasury raid. I am inserting it in the RECORD at this point.

The obligation of the House is clear. We should defeat the legislation. And if it should pass the House and Senate the President should veto it.

If the airlines are interested in a Government guarantee on some long-term loans because of the noise standards, I would agree to that. I might agree to a gradual imposition of the air standards so that as the new planes come on line we will be heading in a responsible direction.

But multibillion treasury raids I shall oppose.

"CLEVER SCHEME" TO PAY FOR QUIETER PLANES

(By Hobart Rowen)

If the airlines have their way, every time you buy a ticket for a flight in this country, 25 percent of the taxes you pay would go directly to them to buy $3.3 billion worth of new aircraft and equipment. And every time you go abroad, $10 would go from your pocket to the airlines' treasuries—it wouldn't even go first to Uncle Sam—to finance their new equipment.

This rip-off is part of a clever scheme concocted by the airlines to have the public pay for the less noisy planes they are supposed to acquire. It is a lovely make-work project for the aircraft manufacturers. And among the more interesting aspects is that airline fares could be reduced by the amount of this bonanza to the industry if administration officials and congressional leaders have the guts to oppose the scheme.

Wage-price watchdog Barry Bosworth wrote a private internal memorandum to the Office of Management and Budget on Sept. 18, 1977, exposing the plan. But he has not been allowed to go public with it. The details of the proposed "Treasury raid" were first publicized by Rep. Gene Snyder (R-Ky.).

Here's what has happened: The airlines now collect, to pay for air-safety measures, an 8 percent tax on domestic tickets, 5 percent on domestic air freight, and a fixed $3 fee on each foreign departure.

Those monies go into a trust fund financing airport safety measures, including the salaries of personnel and the detection equipment used in the pre-boarding routines. But the money collected is said to be more than needed, suggesting that the 8 percent tax ought to be lowered to about 6 percent and the other charges accordingly. Wouldn't a 25 percent reduction in airline taxes be a nice anti-inflationary gesture?

But no. The airlines, required by a 1976 Federal Aviation Administration regulation to use less noisy aircraft after 1984, saw an opportunity to make the public pick up the check. Instead of lowering the tax bill by about $3.3 billion, the airlines' lobby has had two measures (H.R. 8729 and H.R. 11986) introduced in Congress.

They would divert 2 points of the 8 percent passenger tax (25 percent) and 2 points of the 5 percent freight charge (that's 40 percent) into a kitty to finance new planes. The $3 departure tax would be upped to $10, with all of it going to the airlines. And a brand-new 5 percent surcharge would be placed on international cargo—all going to the carriers.

So far, these measures appear to be moving with little opposition through the House Public Works and Ways and Means committees.

In 1976, the FAA estimated that the airlines could modify their planes to conform to anti-noise requirements for a total cost of $950 million. "Retro-fitting" a Boeing 727 by installing sound-absorbent material costs only about $225,000. A new plane can run to $12 million.

But if the airlines can squeeze $3.3 billion out of an unsuspecting public, they will have acquired all new equipment, by putting up barely over half of the total cost, estimated at $7 billion. You and I will pay for the rest.

If the airlines get away with this bad precedent, then the public should expect to be the victim—through taxes—of the cost of meeting any environmental standard.

But the devious nature of this particular proposal is extraordinary. The tax is sneaky, because it is already on the books for another purpose. Without publicity, the "raid" would have taken place, and no one would be the wiser.

This gift to the airlines ought to be vigorously contested by the Carter administration. Instead, it is keeping quiet, in the hopes that it will get some congressional votes as a trade-off for an airline regulation reform bill.

Privately, Carter aides hope to get the House bills weakened in the Senate. But if the White House really wants to control inflation, and be convincing in denials that it has muzzled Bosworth (whose jawboning has offended George Meany), it can do so easily. It can unleash Bosworth and others for an active role in whipping an inexcusable handout to the airline industry at the taxpayers' expense.●

NO LAUGHING MATTER

HON. DAN ROSTENKOWSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. ROSTENKOWSKI. Mr. Speaker, it appears that we have finally reached the end: the end of decency, responsibility, and respectability.

Today, in theaters across the United States, a movie is being shown to the American public. Burt Reynolds is cast in the lead role, and he also produced and directed the film. I am referring to the movie. "The End."

"The End" is a gross and obscene degradation of not only Polish people, but also people of every ethnic heritage. This movie has senselessly inflicted injury on an entire race of people. Under the guise of entertainment, Mr. Reynolds has recklessly and maliciously slurred those of us who are fiercely proud of our heritage.

"The End" has no socially redeeming value. In fact, it has no artistic value either. I found the plot at best mediocre, the theme nihilistic, the acting shoddy, and the direction nonexistent. I do not consider myself a movie critic, but the only thing this movie accomplishes is insulting one's intelligence. The only redeeming value of "The End," and the one value the motion picture industry places above all others, is its boxoffice pull.

I have patiently endured years, really a lifetime, of Polish jokes. My patience is at the end. I cannot abide ethnic slurs. I am shocked, outraged, and demoralized by "The End." This movie is a bad and cruel Polish joke.●

CONGRESSIONAL OVERSIGHT IMPROVEMENT ACT

HON. JOHN E. MOSS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MOSS. Mr. Speaker, I am pleased to at this time introduce legislation which would aid Congress in effectively exercising its oversight responsibilities. Joining me in the sponsorship of this bill are 20 Members who are chairmen or ranking minority members of investigative committees or who are otherwise intimately aware of the need for this legislation.

We believe that vigorous congressional oversight is an essential part of regulatory reform. Oversight by the people's representatives is needed in order to determine whether administrative agencies are faithfully executing laws consistent with sound public policy and the legislative intent behind our laws.

The U.S. Supreme Court has long recognized the powers of Congress in this regard. In the landmark case of Watkins against United States, the court explained:

The power of the Congress to conduct investigations is inherent in the legislative process. That power is broad. It encompasses inquiries concerning the administration of existing laws as well as proposed or possibly needed statutes. It includes surveys of defects in our social, economic or political system for the purpose of enabling the Congress to remedy them. It comprehends probes into departments of the Federal Government to expose corruption, inefficiency or waste. 354 U.S. 178, 187 (1957).

But the powers of Congress are continuously being challenged and are becoming increasingly more costly and burdensome to defend, especially as our legislative schedule becomes more crowded. This much-needed bill would do two things.

First, it establishes an Office of Congressional Legal Counsel in order to defend the powers of Congress whenever those powers are challenged. Establishment of this Office enables the Congress to further preserve its status as a coequal branch of Government by not having to rely on the Justice Department, an arm of the executive branch, to defend Congress.

This bill would not result in increased spending. It could even save money. At present, the Justice Department assigns six lawyers to represent Congress on a full-time basis. The use of expensive law firms has still been needed, costing hundreds of thousands of dollars a year.

The number of occasions when one or both Houses of Congress is a party to litigation has grown during the past decade. Congress is now participating in from 15 to 20 court cases per year.

The work of this Office would be controlled by a bipartisan leadership committee which would use a two-thirds vote for all resolutions. The full House would also have to approve these resolutions.

The second part of this legislation, providing for civil court enforcement of congressional subpenas, is equally sound. Presently, the only means available for enforcement of congressional subpenas are contempt proceedings instituted with a resolution by either House involving a criminal action prosecuted by the executive branch or using the common law method of trial before the bar of the Houses.

Contempt proceedings have become much too cumbersome for a Congress already burdened with a crowded legislative schedule. Civil court enforcement of our subpenas would place these proceedings in a forum which is eminently experienced in such activities, the courts. This provision would not replace contempt proceedings, but it would provide an attractive alternative to them.

Both of these measures are included in S. 555 which passed the Senate earlier by a margin of 85 to 5. Both provisions have received equally strong support in the legal community. The New York City Bar Association has endorsed these proposals, concluding in a recent report, "We favor the establishment of an Office of Congressional Legal Counsel and the granting of civil jurisdiction to congressional subpenas."

For the reasons outlined above, we are proud of this carefully crafted legislative answer to problems that have long plagued Congress. Let me introduce, Mr. Speaker, the distinguished colleagues who join me in sponsoring this bill: Mr. KASTENMEIER, Mr. MANN, Mr. GORE, Mr. HUGHES, Mr. EDWARDS of California, Mr. DERWINSKI, Mr. CORCORAN, Mr. DRINAN, Mr. RAILSBACK, Mr. LENT, Mr. PREYER, Mr. NIX, Mr. LEVITAS, Mr. ADDABBO, Mr. CONYERS, Mrs. CHISHOLM, Mr. RINALDO, Mr. WAXMAN, Mr. HARRIS, and Mr. MARKS.●

HAROLD S. ROSEN

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today in honor of a man whom I have come to know over the past few years, and for whom I have a tremendous amount of respect and admiration: Mr. Harold S. Rosen.

On Friday, September 1, Mr. Rosen is to be honored by the city of San Jose on his retirement as deputy city manager.

Mr. Rosen has served the city of San Jose for the last 5 years as deputy city manager. In the previous 12 years he served the county of Santa Clara as director of personnel and chief negotiator.

Mr. Rosen was the first director of personnel for the State of Colorado and for 5 years served as a consultant to the Philippine Government and several local and State governments.

Mr. Rosen has not only benefited this community as a fine administrator but has contributed to the academic world as author of a number of articles and pamphlets on various labor relations subjects. Further, Mr. Rosen has been a lecturer and instructor at the University of San Francisco, University of California, Berkeley and San Jose State University.

Just a few of Mr. Rosen's other credits include serving as manpower consultant to the National League of Cities/U.S. Conference of Mayors, faculty member of the Mayors Leadership Institute, U.S. Conference of Mayors, and he is currently on the California League of Cities Labor Relations Task Force.

Harold Rosen is an asset to any community and I am proud to say he is a part of San Jose.

Mr. Speaker, I ask you and my colleagues to join with me in thanking Harold Rosen for his dedication to San Jose and wishing him the best of luck and success in all his future endeavors.●

IF YOU CANNOT STAND THE HEAT

HON. BILLY LEE EVANS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. EVANS of Georgia. On January 11, 1978, Sccretary Joseph Califano proposed to launch a nationwide antismoking campaign which would require $30 million to operate in the first year alone.

Last Thursday, August 10, Dr. Gio Batta Gori, Deputy Director for cancer cause and prevention at the National Cancer Institute, reported that the average daily smoker of some of the current brands of low tar and nicotine cigarettes faces no more extra risk of death than someone who smoked only two cigarettes a day before 1960.

I feel that Mr. Califano is using the power and prestige of his office as Secretary of HEW to dictate against contradictory statements to his previously announced plans of mandating a total ban on smoking in the United States.

Mr. Califano should not be allowed to repress, contradict, and condemn scientific findings which have evolved through one of the most well-funded, well-staffed, and well-equipped research efforts in the history of the United States simply because those findings are opposite to what he would like them to be.

I am very sorry that this 14-year effort on the part of learned and knowledgeable scientists have stepped on the toes of a lawyer who has no scientific training and who through political process was appointed Secretary of HEW.

To Mr. Califano I direct the following—If you cannot take the heat, get out of the kitchen. If you cannot accept documented, scientific evidence which happens to be contrary to your personal belief, and if you launch a vendetta against the scientist who produced this research by pressuring his superiors to fire him by threatening to withhold funding, then I have but one demand—resign, for the betterment of the scientific community of this country and the people in it. ●

MIDLOTHIAN COUNTRY CLUB

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. RUSSO. Mr. Speaker, this year we have the pleasure to commemorate the 80th anniversary of an outstanding institution dedicated to the object for which it was formed 80 years ago—that being, pleasure, recreation and the promotion of outdoor sports. This organization is the Midlothian Country Club of Chicago.

The game of golf, at the turn of the century, gathered momentum as a social and recreational sport rapidly in the Chicago area. By 1900, there were 26 golf clubs, and among them was the Midlothian, organized on January 22, 1898. The man credited as founder of the club is George R. Thorne, who, at that time, was head of Montgomery Ward and Co. Many prominent people in Chicago's history were among the original members of Midlothian Country Club, including Reuben Donelly, J. E. Stack, O. B. Taft, Richard Fitzgerald and A. Montgomery Ward. The oldest active member today is Mr. Jennings Stansberry, and the oldest senior member is Dr. Earle Pronger who joined the club in 1937. The club is fortunate to have quite a few members of 30 years or more. They are: Mr. Eugene A. Barreet, Dr. Leon DePree, Mr. Pierre DeMets, Mr. Stanley Heidenrich, Mr. George T. Howe, Mr. Wesley Miller and Mr. Roy L. Proctor.

The country club, designed by Herbert James Tweedie, the foremost golf architect of his day, boasts some of the finest facilities in Chicago's South Side. There is a beautiful Championship 18-hole Golf Course, Par 71. At one time, it possessed the only railroad owned exclusively by a country club, which consisted of a small locomotive with two coaches and a crew of four. It made 14 trips daily and ran until 1929. Through the naming of the train's depot after the club, the surrounding area became known as Midlothian.

Throughout its 80-year history the Midlothian Club has been host to many fine events, such as the prestigious U.S. Open in 1914, with the immortal Walter Hagen defeating Chick Evans for the championship. Three Western Opens were held at the club—one in 1901, won by Lawrence Anchterlance, and others in 1969 and 1973, both won by Billy Casper. The Hagen Invitational in 1939, and the Women's Amateur in 1907, 1911 and 1915 were other important tournaments held at the club.

Today, Chicago Baseball Charities annually sponsor the Hutch Tournament at the club which nets a fine profit for the Cancer Society. Other events include a husband-wife tournament and a caddie day, where caddies are given the opportunity to compete. Prizes, games and a dinner are provided to thank the caddies, and in a small way show appreciation for them. Midlothian was also the scene of a "swim for heart" marathon, a fund raising event for the Heart Association. Children, sponsored for a specific amount per lap, earned approximately $1,400.

It is a pleasure to find an organization so dedicated to charitable causes, and the promotion of family recreation while remaining nonprofit. And today I would like to commend the club for its 80 years of service to the community.●

REV. HENRY L. PINCKNEY: OUTSTANDING RELIGIOUS AND COMMUNITY ACTIVIST

HON. LOUIS STOKES

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. STOKES. Mr. Speaker, I rise on this occasion to pay tribute to one of the leading citizens of Cleveland, Ohio, Rev. Henry L. Pinckney. A year ago, Mr. Speaker, I had the pleasure of informing my colleagues in the House of some of Reverend Pinckney's outstanding contributions to the city of Cleveland, especially in the black community and low-income areas. At that time, I cited his work with the Glenville Task Force on Education and also his establishment of a hot supper program at his church, the Glenville United Presbyterian Church, where 50 children receive free meals throughout the year. In 1974, he established a sandwich, fruit, and milk program which enabled 450 children in Glenville social service agencies to receive free lunches.

In 1975, Mr. Speaker, Reverend Pinckney negotiated with the Council on Economic Opportunity for creation of the first senior citizens program in Glenville. He was one of the organizers of the Glenville Concerned Parents Organization and in 1973, received the Council on Economic Opportunity's Award for outstanding service in Glenville.

Mr. Speaker, in addition, in 1974, Reverend Pinckney was president of the distinguished organization, the Greater Cleveland Interchurch Council and served as moderator of Presbytery of the Western Reserve, comprised of 61 United Presbyterian churches in greater Cleveland, with total membership of 33,000. Reverend Pinckney was active in the Kathryn Tyler Neighborhood Center, on the board of Neighbors Organized for Action in House, chairman of Glenville Community Center and served as volunteer chaplain at Forest City Hospital. His church is fiscal agent for a juvenile action program, counsels youths, and provides them with programs.

Mr. Speaker, Reverend Pinckney has a distinguished educational background. He received his B.S. degree, cum laude, in elementary education from South Carolina State College under the GI bill and his divinity degree from Johnson C. Smith College where he was on the dean's list during all semesters and the winner of the National Presbyterian Scholarship for 2 years.

Mr. Speaker, the reason that I am reciting some of Reverend Pinckney's accomplishments in our city is due to the fact that he has decided to leave Cleveland after years of outstanding service. He has been called to Atlanta, Ga., to assume duties. No doubt, his absence will be a considerable loss to his parishioners, his friends, and the community. Reverend Pinckney has provided inspiration, guidance, and comfort to thousands of citizens, both young and old, black and white, rich and poor. He has won the respect and admiration of all those who know him.

At this time, Mr. Speaker, I ask that my colleagues join me in paying tribute to the distinguished Reverend Pinckney and to wish him success in his future endeavors. In closing, I would like to share with you and my colleagues a quote by Reverend Pinckney which summarizes his high religious principles and deep commitment to humanity:

A church is the only institution that relates to personal and spiritual being and makes people concerned citizens who have to love themselves and their neighbors. It is an experience on people working together and sharing responsibilities.

I am certain that I speak for the citizens of Cleveland when I say thank you, Reverend Pinckney, for a job well done.●

FLORENCE MALONE—SUPER CITY CLERK

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. PATTERSON of California. Mr. Speaker, Florence Malone, city clerk for the city of Santa Ana, Calif., is suspending her distinguished career of public service on September 15, 1978. Mrs. Malone has served as the Santa Ana city clerk for nearly 10 years and has provided examplary service to every elected official and every city employee during that time. Her professionalism, dedication, and devotion have not only guided and inspired the staff, but have endeared her to everyone with whom she works. There are none in the city family who have been more conscientious or knowledgeable of the intricacies and interworkings of the city of Santa Ana.

Florence has a diversity of experience that few can claim. Her public service includes, in addition to Santa Ana, the cities of La Puente and Monterrev Park, and the school district of Rowland Heights. She has worked for the Social Security Administration, Boeing Aircraft, and has even used her many talents while working for the Pinkerton Detective Agency.

Florence and her husband, Ben, are the parents of five children and have five grandchildren. Upon her retirement from the city, the Malones will make their home in Vista, Calif., where Florence will expand her experience even further by studying law. It has been my good fortune to have worked with Florence for several years when I was the mayor of Santa Ana, and I count her as a special friend. It is with a great deal of pride and affection that I urge my colleagues to join me in paying tribute to a super city clerk and a truly fine lady—Florence Malone.●

DEDUCTION FOR RETIREMENT SAVINGS

HON. HELEN S. MEYNER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mrs. MEYNER. Mr. Speaker, I am today introducing a bill to amend the Internal Revenue Code of 1954 to increase the amount allowable as a deduction for retirement savings.

I would like to discuss both the need for, and the specifics of, this legislation.

Before 1974, a worker not covered by a payroll retirement plan really had no place to go if he or she wanted a plan. Then, with the enactment of the Employee Retirement Income Security Act of 1974, these "pension-less" people finally had someplace to turn.

Specifically, individuals not covered with a company pension plan can open an Individual Retirement Account (IRA), which allows them to take a tax deduction of 15 percent of earned income up to $1,500 a year for retirement savings, and to defer the tax liability on their contributions to these plans until they actually start drawing their pensions.

With IRA's American workers have the opportunity to supplement their eventual social security income to provide for dignity and economic stability in their retirement years. In addition, IRA's encourage savings and provide reinvestment capital to stimulate our sagging economy.

There is, however, a problem: The $1,500 limit on contributions to an IRA is too low. The $1,500 limit on IRA contributions was first proposed in December 1971 and became a part of the 1974 Employee Retirement Income Security Act.

Since that time, the cost of living has risen 51 percent—a fact that, in itself, should bring the current limit to $2,265 a year. Unlike limits for contributions to corporate retirement plans, the IRA limit is not subject to cost-of-living adjustments.

It would make sense to adapt the IRA program to allow it to provide real dollars for people who are going to draw on their plans 20 or 30 years down the road. And this is precisely the reason I have introduced legislation to enact a new ceiling for IRA's. The first thing my bill would do is establish a new ceiling or $2,300 for contributions to IRA accounts, effective January 1, 1978. And

then, it proposes that future increases in the IRA contributions limit be tied to yearly cost-of-living adjustments.

Whatever reductions in revenues to the U.S. Treasury this bill would cause would be more than offset by the economic benefits of increased private savings and investment. Moreover, small business owners and operators—who represent the kind of individuals who most need a protected pension plan, deserve the opportunity to insure themselves retirement years that are economically stable. As much as anyone else, they deserve real dollars, not inflation-eaten dollars, when they retire. ●

BLACK YOUTH: A LOST GENERATION

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. RANGEL. Mr. Speaker, I rise to call to the attention of the chair and this distinguished body an article in the August 7, 1978 issue of Newsweek magazine entitled "Black Youth: A Lost Generation?" The people at Newsweek, especially the team of reporters who worked on the article, deserve commendation for excellent journalism and service.

As pleased as I am about Newsweek's professional, journalistic product, I am even more disturbed, even frightened, at what I read. The despair, frustration, helplessness and, yes, creeping defeat of a generation, perhaps two, of black youngsters are being captured in vivid description and detail on those pages. It is a sad situation, my colleagues, and has threatening implications for the future. Something must be done.

You will hear no clarion call from me, today, for more social experiments, poverty programs or increase welfare. I do not seek to make the case for helping those youngsters by appealing to your sense of social justice. But I will make the case for help for you, for the country, for the taxpayer, based solely on economics, on cost.

The question is relatively simple: What will it cost to help get them into the job market today as compared to what it will cost to ignore them tomorrow?

To assist us all in answering this question, I plan to call for the General Accounting Office to launch an investigative study to determine future expense to the taxpayer, stemming from the costs of penal institutions, health care, welfare, courts, insurance premiums, business losses and human lives so detailed in the Newsweek article.

[From Newsweek, Aug. 7, 1978]

BLACK YOUTH: A LOST GENERATION

NOTE.—You are cutting off an underclass which is not needed, not employable . . . You must create out of this underclass, or their children at least, human beings who fit into modern America, who are needed, who are productive, who have a value. This is what the question is about.—Gunnar Myrdal, updating "An American Dilemma," 1968.

(Sometimes I sleep late, then go hang out. Play ball all day. That ain't cool—it's gettin' me nowhere, I know. I go lookin' for work when I hear where somebody's hirin'. But it just ain't the jobs for somebody like me. What you expect?—Ronnie Dozie, 18, assessing his life as a black dropout in Detroit, 1978.)

Ten years later—ten years after the riots and the Great Society and a time of unprecedented black advancement—America is in danger of losing that generation of children Myrdal warned us about. Some competent observers believe that it may be lost already. The slums of the nation's aging and blackening cities have bred a population of young people for whom the norms of existence are unemployment, crumbling neighborhoods, fatherless homes, failing schools and dependency on the dole—or crime—as a means of survival. Many escape by sheer bootstrap effort, but more are caught in the demoralizing, dead-end life around them. "A lot of black kids simply feel they don't count, and they don't," says the black psychiatrist Alvin Poussaint. "In terms of what makes this society run, they're expendable."

The statistics of the workplace bear witness to that bleak conclusion. The unemployment rate among black teen-agers has exploded from one and one-half to nearly three times the white rate since the middle 1950s, and has hovered near 40 per cent for the past three years. Some analysts believe that the numbers overstate the gravity of the problem, and that most young blacks seeking jobs find them in their 20s anyway. But others argue that the reality in the big-city slums is a fact worse than the figures—that joblessness among the black young there is on a runaway curve untouched by economic recovery, poverty programs, affirmative action or the emergence of a large and growing black middle class. If the real numbers were fed into a computer, says Diana Durham of the National Urban League, "the projection would read 'riot'."

What the black young indeed have left is the power to disrupt, in a degree frightening not only to whites but to their own parents; in this, they are at once the symbol and the end product of the malaise of America's cities. Yet even the fieriest of insurrections of the '60s have sputtered out into the random, one-to-one street violence of the '70s. The spark of rebellion, like the will to succeed, must fight for life among young people growing up black in America—a world in which half of all black children are born out of wedlock, two in five live in fatherless homes, two in five grow up in poverty, and one in three is supported by welfare. The too-common alternatives are for the young to reproduce the failures of their elders: for boys to slide into crime or hustles—which a recent study in Watts calls the major single source of income for ghetto youth—and for girls to bear their own out-of-wedlock babies in their teens.

The will to succeed has nevertheless survived. Perhaps a fourth of black America has scrambled above what the government considers the intermediate income line—$16,236 a year for a family of four—and has established a secure and stable toehold in the middle class. The black young stay in school longer—two-thirds finish high school where three-fourths dropped out a generation ago—and more often stick at their books against the lure of the streets and the derision of their peers. They seek out work, often against the most discouraging odds; a crowd of 120,000, heavy with minorities, lined up overnight for 55,000 government-funded summer jobs in New York City. "These people will work," says Detroit dropout Ronnie Dozie, sweeping one hand across his neighborhood panorama of ranshackle tenements and litter-clogged alleys. "They'll work. I know they want something out of life besides this."

The problem remains that the work is not there, in spite of the revival of the economy since the 1975 recession and the renewed interest of the Federal government under Jimmy Carter. The Administration has, in the new vogue phrase, targeted in on youth unemployment with a series of imaginative new programs—among them a multicity experiment at guranteeing government-paid work for the young poor if they agree to stay in school. But these programs have not perceptibly improved the lot of black teen-agers; their unemployment rate still hung above 37 per cent in June, despite a dramatic dip in the over-all national rate. Their plight, moreover, has resisted national solutions in the past, in part simply because they are relatively few in number—perhaps 400,000 are out of work by current official estimates—and are scattered in ghettos across the country.

Other public and private institutions, combat-fatigued and underfunded, have had little better luck finding or creating work for unskilled, semiliterate young black men and women who may not even know how to dress for a job interview or fill out a rudimentary application form. It is indeed arguable that the single most hopeful force working in their favor is a demographic accident—the end of the postwar baby boom that doubled the number of black teenagers, from 1.2 million to 2.4 million, between 1960 and 1975. The sheer size of their generation inflated rates of unemployment street crime, drug addiction and family disintegration in that period; now, the big-city crime rate has begun turning down, and some analysts believe the other numbers will follow.

But there is otherwise small ground for cheer either in the anomie of the slums or the flow of history outside—the flight of industry to the suburbs and the Sun Belt, the rising competition of white women and the elderly for what work remains, the enduring irrationality of a welfare system that penalizes work and family stability. The rate of unwed motherhood and broken homes have, like teen-age joblessness itself, taken on a breakaway life of their own; the new generation of black children who will reach adolescence in the 1990s will be smaller, but a majority will have been born out of wedlock, raised for at least part of their lives by only a single parent, and propelled into a high-skill 21st-century economy. "Many black kids at 13 or 14 are already obsolete," says Douglas Glasgow of Howard University's School of Social Work, and at least some of the trends that make them obsolete are accelerating.

Some hopeful countercurrents have germinated in the black community itself, like flowers poking up through the cracks in the city pavement; one is a growing revival of the gospel of self-help, notably—but by no means exclusively—in the mod ministry of the Rev. Jesse Jackson of PUSH, for People United to Save Humanity. But the resources for self-help in the black slums, never large, have got smaller with the slackening of public and private financial aid since the 1960s, and the gospel rings faintly for those of the young already acquiescent in their defeat. "We're going to slowly disappear—get doped up or put in jail or shot," says Ellery Thomas, a Detroit ghetto 15-year-old. "Something's goin' to happen to all of us, 'cause, see, for us right now all the stuff in the street—dope, guns, fast money—we see people makin' tops doin' that every day. We're gonna want a piece of the rock too. Nobody wants to walk around poor."

SITUATIONS WANTED

Larry Callahan, 19, left his sister's apartment in Atlanta's Grady Homes housing project early one morning to see about a job. The woman he spoke to at a Federal job office directed him to the Atlanta Urban League office. A woman there told him to talk to a

man at the Indian Springs condominium complex in suburban Atlanta. Larry borrowed the bus fare but then got on the wrong bus. Determined, he walked 45 minutes in the rain to make the appointment—but the man he was to see wasn't there yet. "He showed up at 5:45." Larry recalls. In the end, Larry was told that government funding for the maintenance job he sought hadn't come through yet. Call back, the man said, and Larry has been doing just that for six months. "I really thought I had that job," he says. "But it turned out the same way they all do, a loser."

Larry has been losing a lot lately. When he graduated from high school last year, he stepped right into a $4.25-an-hour maintenance-trainee job that a friend had told him about. He never thought he would make that much right away, he says. "It was like a dream come true." But it didn't last. Two and a half months after Larry was hired, the company moved out of Atlanta. Since then, he's been making the rounds several mornings a week, following up tips. "I've got applications out all over town," he tolu NEWSWEEK's Vern E. Smith.

Work is nothing new for Larry. He's been at it since he was 8—when he cut up beans in a neighborhood cafe. Now, when he's short on bus fare or job leads, Larry spends time baby-sitting for his 7-year-old niece, umpiring softball games at the Boys' Club or playing pinball in a neighborhood soda shop. "I've got to keep active," he explains. "I have a friend who got into trouble. He'll be on probation until 1980. The trouble thing ain't me."

That he has stayed straight is attributable, in part, to a solid upbringing—although even there, Larry has had his share of problems. When he was 11, his mother died, and he went to live with his grandmother. Larry now divides his time between her place and the apartment of one of his sisters. "Without them I never would've made it," he says. "I've told them I'm going to do something good for them before I leave here." His father dropped out of the picture early on. "He lives in Atlanta somewhere," the youth says disdainfully. "I've seen him on the street and tried to flag him down but he keeps on like he didn't see me. I had a bottle in my hand once. I started to throw it, but then I told myself, 'No'."

If he can get a job to pay his way, Larry would like to take up plumbing at a trade school. He thinks he is being turned down for jobs mainly because he is unskilled, not because he is black. "Everywhere I go I see signs saying 'equal opportunity employer,' but they look at some blacks and say they just ain't got the skill. I just want to have me a good job with decent pay. Everybody keeps saying hang loose, hang loose. But it's hard to hang loose living like this."

Hanging loose, for the Larry Callahans, is too often all there is to do. They are part of what James W. Compton of the Chicago Urban League calls a glut of young, big-city blacks "who have no skills, are not getting and job experience, and probably are not developing life-styles that include any work at all." That a majority, like Callahan, keep trying is testimony to the hardihood of the American dream even in those urban barrens where it has most vividly failed. A minority, unsurprisingly, give up. One day recently, a young black man grabbed Sue Ann Berry Freeman, a Berkeley youth worker, in the street and begged her for money. Another panhandling derelict, she thought—until she recognized him as an ex-client with a wasted 150 IQ.

Even the numbing unemployment figures are an inadequate measure of conditions in the slums. The view of some revisionist students is that they are not quite so catastrophic as they look—that they are statistically shaky to begin with; that they are swollen by the children of the baby boom; that they count some young people who are actually working "off the books"; that the jobless rate in any case is halved among blacks in their early 20s, and halved again after they turn 25. But there remains little doubt that the numbers, however inexact, are bad and have got worse at a rate far exceeding that among the white young. Some analysts believe that they are in fact worse than they look: the Urban League's Vernon Jordan argues that, when you add in the underemployed and people who are too discouraged even to look for work, the real unemployment rate for black teen-agers may approach 60 per cent.

The causes are numerous, and intractably interwoven. Age and color both count against the black young in the job market, and so do the feral stereotypes they conjure up among whites and middle-class blacks. Technology, even in such everyday forms as automatic elevators and ditch-digging machines, makes old-fashioned sweat labor obsolescent. Blacks have been moving to the suburbs in quickening numbers, but jobs have moved farther and faster; there are now more in Chicago's suburbs than in the city. The black young pay further for the most benignly intended customs and public policies—for minimum-wage rises that price them out of jobs; for the surge of women into the labor market, and relief of the elderly from mandatory retirement at 65; for the demand for credentials like high-school diplomas, without regard to whether a particular job really requires one.

Neither do the disabilities of growing up in the ghetto travel well where the jobs are. Schooling in the slums has improved far more in quantity than in quality. Fedco Food, a black-run New York supermarket chain, aggressively hires black youths, but a majority of the 2,000 it screens for 250 jobs every year flunk out on a single three-R-level test question—"If three cans cost 39 cents, how much does one can cost?" Police records are easily acquired and hard to live down; on some blocks in some cities, most of the black boys have one, for offenses ranging from hustling "herb"—marijuana—to burglary and robbery.

Even the elementary etiquette of job hunting, bred into the white and black middle class from early childhood, can be a distant and frightening mystery for a teenager in Harlem or Watts. "You have to tell them, 'You don't go looking for a job with sneaks on, your shirt out and cornrows in your hair'," says Carver Leach, a Washington youth-work supervisor. " 'You put on a shirt, tie and coat, and real shoes, and you press your pants. Don't lean over the desk, take your hat off, state your name fully and slowly.' You've got to tell them all these things, because a lot of them don't know, and they come back from an interview angry 'cause the white ——— didn't hire them."

A corollary to the revisionist view of the problem is that short, intermittent periods of unemployment may even be good for young blacks—an off-the-job education in seeking and finding work. If so, practice does not quite make perfect; unemployment among blacks in their early 20s, though greatly reduced, remains at a depression-level 20 percent. The view, in any case, is not widely shared by makers of public policy, who still cleave to the traditional view that jobs are the simplest and most effective way to begin helping the ghetto poor. It is held in even lower regard among blacks beset by the costs of joblessness among their children—the retarded hopes and ambitions of those who survive it, the tug of the street and the dole for those who do not.

TRAPS OF POVERTY

The world of Patricia Davis was crowded and chaotic. She lived with her mother, five younger brothers and sisters and her mother's sometime boyfriend in a two-bedroom apartment in the vast, palm-treed ghetto of south-central Los Angeles. Her life revolved around school and friends, an always-on TV set and a blaring stereo. But when she was down, she would sit by herself in the garage to think about things—about other kids she knew getting into trouble with the law, about what she really wanted for her life. Sometimes she would talk to adult friends, including her grandmother who lived around the corner. But Patricia felt she needed something else, something of her own. So she had a baby.

The decision was easy—and almost traditional. Patricia's mother, Beverly, was only 17 when she had Patricia by a husband from whom she was divorced after half a dozen years. Patricia's grandmother was 16 and unmarried when she had Beverly. In fact, when Patricia looked after tots in a child-care center last summer, her mother warned her about the temptations of maternity. "If you work there, you're going to have a baby." Patricia ignored the warning. She was seeing a boy named Theodore Johnson, who had just graduated from her school. She called him "Theedie," they made love, and Patricia took a chance. "I didn't take no birth control," she told NEWSWEEK's Martin Kasindorf. "Secretly, I wanted to have a baby. It was something to keep me happy, I guess. I wanted to start a life of my own."

Her mother was mortified. "I wanted her to get rid of it," Beverly Davis says. "I wanted her to get an abortion." Instead, Patricia borrowed money from her grandmother to go to Houston, where her father lived. But his drinking got on her nerves, she grew homesick and soon returned to L.A. to attend "pregnant school"—a program for young mothers and mothers-to-be where child-rearing techniques are taught along with schoolwork. Last spring, two months before junior-year finals and Patricia's seventeenth birthday, Taneshia Patrice Johnson was born.

Lately, Patricia's mother has reconciled herself to the situation. An electronics assembler in a bus factory, she is "on the county"—receiving welfare aid—for her six children and new granddaughter as well. Theodore, a liquor-store cashier, often visits his daughter and occasionally contributes money for the child's support. He has asked Patricia to marry him several times, but she refused. "I said I'm not ready yet," she says. "I tell him to give me time. I have to get everything straight."

In the peculiar psychology of the welfare cycle, Patricia would now like to get "on the county" herself—as a mark of independence. But she doesn't mean to be a "welfare queen," she says, and has vainly sought summer employment at a Zodys discount department store, a Jack-In-The-Box fast-food shop and an optician's office. What she would really like to be is an assembler, like her mother. What is certain is that she wants to be somebody—and despite all the odds, she believes that Taneshia will help. "Having the baby pushes me forward to do something better," she says. "You know, like, hey, I gotta make it for me and my baby. I want to graduate so my baby can see me. She'll be in the audience saying, 'There go my mommy'." Yet Patricia has already conceded that Taneshia's fate may ultimately be the same as hers, her mother's and her grandmother's. "One day she might feel like I do," she says, "and want something of her own to be dependent on her." And the cycle would begin once again.

The Patricia Davises, multiplied by the tens of thousands, are the prisoners of what Harvard's Dr. Poussaint calls a "doll syndrome"—babies having babies and coming prematurely into an adulthood mired in poverty, dependency and broken homes. The folk notion that welfare is what tempts them is mostly myth; in a community where nearly half the children are born out of wedlock and none are counted "illegitimate," Pous-

saint observes, "it makes you feel like somebody to have a baby call you 'mama'." But welfare remains the most common outcome. Nearly a fourth of all black families and a third of all black children depend in some measures on it—and some still unmeasured fraction of them may be turning into a permanent and hereditary welfare class.

The social tragedy hidden in those figures is the continued rise in the percentage of black families headed by women, from 25 percent when Daniel Patrick Moynihan wrote his famous 1965 report on the problem to 35 percent now. As a consequence, fewer than half of all black children live with both parents—compared to 85 percent of white youngsters—and two in five grow up fatherless and poor. One outcome of the doll syndrome is the dole syndrome—a life drifting on and off welfare and a long and frequently losing struggle to keep the cycle from repeating itself. "There's nothing my mother can tell me," says Dee, a Chicago welfare daughter who became a welfare mother six years ago, at 15. "If she were so smart, why was she stuck with seven children and no man?"

The consequences can be devastating. Fathers disappear, encouraged by welfare laws in 24 states that still deny checks to poor two-parent families. Children start shopping, fixing meals, even hustling extra money at 5 or 6—an education in life at the expense of being a child. Boys grow up with no role models except those they find on the street corner—and sometimes no concept of work as a way of life. "I don't have no heroes," says Marcus, a bravado slum kid of 15 in Detroit. "See, I live in a houseful of women—my grandmother, my mom, two aunts, and they all have daughters—and I won't look up to them." So he has become his own hero, prowling the streets with his hair done up in a net, a derby atilt on his head, and a .22-caliber "bop gun" stuck in his waistband. When a grownup asked him what he expects to be doing at 20, he answered implishly: "Three years in jail."

The schools have been powerless to help manchildren like Marcus; he bumped along for years on that conveyor-belt system known euphemistically as social promotion—"See, I can just *sit* there and pass"—and when he was expelled last winter for fighting, it seemed to him pointless to go back. The statistics of black education are in some respects profoundly hopeful: blacks now are nearly as likely as whites to finish high school, are more likely than whites to perform *above* grade level and are going on to college in growing numbers. Thirty-four states have tried, moreover, to brake the conveyor belt by requiring students to pass competency tests in the three R's for promotion or graduation.

But staying power has far outstripped achievement in ghetto schools where pupils and teachers share a mutual expectation of failure; where students commonly disrupt because they are not coping; where maintaining order has sometimes supplanted schoolwork as the first priority. More blacks than whites perform *below* grade level as well as above—29 percent of the girls and 42 per cent of the boys in their teens. Magical teachers and experimental teaching sometimes waken their dormant possibilities; at Detroit's Kettering High, for one example, a 32-year-old ex-football player named Luther Campbell has coaxed good work out of a small problem class with nothing but the daily newspaper for his text. It remains a Sisyphean labor. He sparked one of his 16-year-olds to a bleak bit of poetry—"Communities get worn and turn into ghettos/It's hardly fit for living but that's how it go's . . ." The poem still hangs on the classroom bulletin board. The poet has dropped out.

The problem remains that the ghetto young see little in school directly relevant to their own survival, and less reward at the bottom line. In St. Louis, Jimmie Harris, 23 and unemployed, ticked miserably down his list of credentials—high-school and technical-school diplomas, a Job Corps certificate, an Army discharge—and said: "This stuff doesn't mean a thing out there." His case is at least arguable in a society in which white high-school dropouts are still more likely to find work than black high-school graduates. It is, in any case, a view widely held in the ghetto. "Why," asked a young hustler on Chicago's South Side, "should I waste my time going to school so I can end up with a $13,000-a-year job at the post office? Hell, man—I can *steal* that much."

THE MEAN STREETS

Times were hard—but not all that hard—for Gary Weaver growing up on Wharton Street in the shabby heart of black South Philadelphia. His mother drew welfare to supplement her job as a waitress and always managed to hold things together for Gary and his two brothers and sister. "We were poor, but not poor poor," Gary says, shrugging. "I've got no beefs." Yet he and some friends walked into a store two years ago and killed the owner for little more than pocket money, police say. Gary Weaver is now in jail, awaiting his second trial for murder, and those who know him best can only shake their heads and blame "the street."

Gary was a tall, unexceptional kid partial to Bally shoes, Pierre Cardin shirts and a girl named Rosetta. His father was a spit-and-polish cop who left home when Gary was 1 but came around periodically to see the boy and take him on fishing trips down in Jersey. Following his parents' example, Gary tried to work hard—he spent summers collecting trash around city parks and baby-sitting—and he attended a special high-school program for the disadvantaged. He couldn't read a word when he entered the program, but by the end he was doing well enough to consider a job as truck driver or construction worker. "I thought he would amount to something," laments a school official, Tammy Williams.

But Gary couldn't find a full-time job, and at 18 he finally gave himself up to the risky changes of the street. He rose past noon to dribble, pass and shoot away the summer days in a nearby schoolyard, then play cards and shoot dice into the night. He stayed high on marijuana and sold "nickel bags" ($5 each) for spending money. He got busted once for mugging, but the case was thrown out. "You get awful bored sometimes on the street," Gary told Newsweek's Tony Fuller. "There's just not that much to do."

One idle Sunday morning two years ago, Gary and three pals thought of something. The police reconstructed it this way: the foursome sauntered to The Drugstore, a variety shop across the street from Gary's house where he had bought candy since childhood. "Hello, kids," said Joseph Cohen, 65, the white proprietor. Suddenly, one of the four lowered the protective iron grate over the front door and then helped the others drag Cohen into a back room where they tied a venetian-blind cord around his neck and hung him from a metal shelf. "Please don't, I'm your friend," Cohen cried, but they stuffed a pillow over his face—and stabbed him repeatedly in the chest until the knife blade broke. One of the youths found another knife and buried it hilt-deep in the old man. Then they ran off with $128. "We thought we needed the money," Gary told Newsweek. He insists that he stood lookout during the stabbing, but admits that all four youths agreed that Cohen should be killed because he would recognize them.

All four were arrested and Gary gave the police a statement that was tantamount to a confession. They were tried together, convicted and sentenced to life in prison, but the convictions were overturned last year because Pennsylvania's joint-trial statute was found unconstitutional. Gary is awaiting retrial in Holmesburg prison, a humid, aging place as bleak as his future. "I'm responsible for what I did," he admits with little apparent emotion. "I don't blame anybody else. It was something that happened." He still spends a lot of time playing basketball—it's about all there is to do in jail—but sometimes he simply sits in his cell, overcome by the knowledge that "things could have been different." Or he writes long letters to Rosetta, talking about how—if he ever gets out of jail—he wants to marry her and move down South to work the land. "Just a little bit of land," he writes, "where it's real quiet and there's no street and no trouble."

In the big-city black slums, the street tugs constantly at the Gary Weavers, and trouble is never far distant. Their world is one in which two-thirds of the men work in blue-collar or menial jobs—when they work at all—and in which the wealth most conspicuously displayed has been earned outside the law. The temptations are obvious, contagious and often irresistible. "You ask a little white boy what he wants to be," says James Taylor, a June high-school graduate in Detroit, "and he may say some kind of big-time executive. You ask a little black child the same question, and he may say, 'I want to be a pimp'." Or a fence, or a numbers banker, or, most profitable of all, a drug dealer: one apprentice currently circulating in Oakland, Calif., is said to be pocketing $200 a week running narcotics—at age 10.

The specter of black crime has made the ghetto young, guilty or innocent, the objects of fear in middle-class America—an anxiety unrelieved by the facts that most of it happens in the ghetto and that the appalling statistics have at last started down. Black youth, in fact, do account for a vastly disproportionate share of arrests for teen-age crimes of violence—52 per cent nationwide—and, as a result, police records are ten times as commonplace among the ghetto young as in the middle-class world around them. But if the jails are full of the failures, the streets are thick with the ones who got away. New York City's Vocational Foundation Inc. calculated that the odds against a juvenile's doing time in city jails for a major felony were 100 to 1, and concluded: "There is simply no clear pattern of rewards for good behavior and penalties for bad."

Crime flows from the emptiness of slum life as well as from its poverty. The ghetto is full of young people who never leave their neighborhoods and never see the world outside except on TV. It is a place, as well, where careers in crime are born on whims simply because nothing else is happening. "I was with one of my partners," says James S., a child of Watts, "and he said, 'Are you down for snatchin' a purse?' I wasn't thinkin', so I just snatched it." He got caught that time, but progressed anyway from purse-snatching to gang-fighting to burglary—and now a stretch in a California youth prison at 15.

But the most powerful temptation is the obvious one for young people raised on the dole and commonly unemployed: crime pays. "We're in the position," says Barbara Burk-Tatum, a Boston youth-service administrator, "of talking about diplomas and minimum-wage jobs to kids who've been making a hell of a lot more hustling—and tax-free, too." It is low-risk, high-yield work, accessible even to grade-school-age entrepreneurs dealing "loose joints"—single marijuana cigarettes—for a dollar apiece on a stairwell landing. The Watts study conducted by research economist Paul Bullock reached the conclusion that victimless crimes alone—the

street traffic in drugs, bets, numbers and women—constituted "probably the greatest single source of market income for young men in the central city."

The temptation seems unlikely to fade for the young blacks caught, unemployed and sometimes unemployable, in the backwash of the mainstream economy. "I hate to wake up some mornings," says Eugene Franklin, a 21-year-old dropout in the St. Louis slums. "I ain't got no gig, and even if I had one, it wouldn't be payin' nothin'—by the time I got a check it'd be gone. So you'd rather take your chances hustlin' on the streets. You got to do *somethin'* to stay alive." The siren song is a powerful one in the asphalt wastes of the nation's inner cities; it is the dismal suspicion of some social scientists that it is too often the best and brightest of the ghetto young who answer it—and the misfits who have the will and the courage to resist.

BREAKING THROUGH

Linda Carmichael has lived all her 18 years in a gritty South Side Chicago tenement staked out by winos, junkies and petty hustlers. She has done four years in a high school whose academic reputation is a bad joke and whose students, all black, come from the poorest families in the city. She has watched playmates exhaust their youth—and their potential—while still in their mid-teens. Yet she herself has survived, even triumphed. Pretty and petite, Linda graduated fourth in her class of 360 last June, one of a handful of bona fide honor students, and, come fall, she will fulfill a family and personal dream when she packs off to tiny Luther College in Decorah, Iowa—the first in her family to seek higher education. "Linda is a classic over-achiever," says Luke Helm, assistant principal at DuSable High. "She has done much better than anyone had any reason to expect."

The motivation in Linda's case is plain. "Her aim is to get the hell out of the ghetto," says Helm—and Linda agrees. "I've wanted to go to college since I was in grade school," she explains. "As long as I can remember, I would look at the people on the street who didn't go to school, and I knew I didn't want to be like them." She gives all the credit to her father, a restaurant-chain cook, and mother, a school-lunchroom attendant—both Southern-born with old-time values and a gift for nurturing ambition in the rockiest ghetto soil. "My parents are always there," she says. "Whenever I had something bothering me, I could always come to them."

Having a family to fall back on, it seems, helped her to achieve independence. When she was 15, Linda got tired of asking her parents for money and decided to get a part-time job. She listened to rejections for two years before being signed on as a salesclerk in Wieboldt's department store downtown. After school she took the train to work five afternoons a week, then dragged herself home to plow through homework on the bed she shares with her sister. (Her two brothers share the other bedroom; her parents sleep on a small sofa in the room that serves as living room, dining room and kitchen.) Only then did she go out with friends, stubbornly refusing liquor and pot in favor of milk and pop. Predictably, her discipline has provoked resentment from some of her peers—"some people tell me I think I'm smart," she shrugs—and passing regrets by Linda herself. "There were times when I got tired of all the work. I wanted to be out partying and goofing off like everyone else," she confesses. "But I'd start thinking about all those people on the streets with nothing to look forward to, and where would I be without school. That kept me going." Her goals now include a degree in physical therapy, a job in which she can help other people—and enough money to help her parents buy a home of their own. Says Linda: "It's something they've always wanted."

She finds it odd that so few of her peers see things her way. "What makes me happiest is seeing people trying to do things for themselves," she says. "I'm saddest when I see so much crime—people trying to get too much vengeance back on the world. We can't help it because we are darker than other people, and we can't make up for what happened hundreds of years ago." But in fact, making up for that lost time is what Linda's life is all about. She is, like others before her, a believer, determined to make a way where there is none. "The problem with our people is that some of us just give up too easily," she told NEWSWEEK's Sylvester Monroe. "I feel I've accomplished a lot—more than my mother and father had the opportunity to do. I'm proud of myself."

It is pride, finally, that raises the Linda Carmichaels up from under—pride and grit and a stubborn resistance to the pull of the street. The strivers who stay at their books and fight free of the downward spiral of poverty do so against formidable discouragements—the simple difficulty of finding a quiet place for study, the competing necessities of bringing in money and helping keep a household together; the demoralization of the schools and the demoralizing opposition of the dropouts and the flunk-outs they leave behind. "There's no program for achievers," says Dale Hines, a black Los Angeles gang-control cop who made it out himself. "If they fail, there's programs. If they're a thug or a crook, there's programs. For them—nothing. Everybody beats up on them."

For a privileged middle-class minority of the black young, that struggle was fought and won a generation ago or more. "I know I'm very fortunate," says Bridgett Gidron, 18, the daughter of a self-made and successful black Cadillac dealer who bought his family a future in the moneyed New York suburbs. "The only ghetto experience I've had was driving through the South Bronx once or twice on the way into the city." For those who live there, the process blacks call "getting over"—finding work, finishing school, scuffing to a life better than one's parents led—can be a lonely labor. "Over here," says Raymond Noble of his life as a striving eleventh grader in Boston, "are people who don't know me; over there, people who don't like me; behind me, people who are making fun of me and want to beat me down."

Still, for a majority of the black young, the struggle goes on, and it has lately found a rousing cheerleader in Jesse Jackson and his "Excel" campaign. Jackson's self-help revivalism has flourished in direct proportion to the failure of old-style, megabuck Federal programs to dent the problem and the flickering of the nation's will to keep trying.

He brings his ministry into a school, rousing assemblies with his exhortations ("No one can save us from us but us") and leaving "contracts" in which children, parents, and teachers all pledge to do better. The suspicion lingers that the program is stronger on theater than on follow-up, but after a promising beginning in ten Chicago schools, it is expanding into Kansas City and Los Angeles.

What has faded is the millenarian dream of the 1960s that Washington could drown the sorrows of the ghetto in ten-figure appropriations and twelve-point programs. Some worked—the Job Corps, for one useful if expensive example—but others suffer from bad design and inflated expectations. The real promise of Carter's billion-dollar, 250,000-job cluster of programs under the new Youth Employment and Demonstration Projects Act may indeed be its rifle-shot targeting and its conscious modesty of ambition—to see what, if anything, really helps. The new wisdom, in Washington and in the street, is that at least some of the answers may be surprisingly cheap and close to hand—lowering the minimum age for drivers' licenses and beauticians' papers, relaxing laws and regulations that bar minors from working nights or operating heavy machinery, creating a new credential for young people who complete a ninth-grade education.

But the rescue of a generation in the ghetto is not an easy or an inexpensive labor, and the battle-worn men and women in the front lines commonly despair of America's will even to try. They spend their days in discouraging struggle against conditions that, for the children of the big-city black slums, are demonstrably worse—much worse—than they were before the riots of a decade ago. What they really fear among their charges is something even more destructive than rioting: the surrender of a generation to its own defeat.●

THE CRIMINAL JUSTICE ASSISTANCE ACT OF 1978

HON. JOHN CONYERS, JR.

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. CONYERS. Mr. Speaker, it is not difficult to understand the widespread dissatisfaction with the Law Enforcement Assistant Administration. LEAA has spent nearly $6 billion with little or no impact on the rate of crime, the fear of victimization, or the sense of injustice experienced by persons—especially minorities and the poor—who come into contact with the criminal justice system.

In the 10 years since the creation of LEAA, criminal justice expenditures have escalated fourfold from $5 billion to about $20 billion. To quote the Attorney General's own study group on LEAA:

> The increase in personnel and funds have not had a significant impact on the crime rate . . . They have not stemmed the rise in the backlog of the Nations courts, nor have they curbed the over-population of the Nation's correctional institutions.

For the most part, LEAA funds have been funneled into the burgeoning criminal justice budgets, with very little experimentation or innovation resulting. Typically LEAA-funded programs consist of hiring more policemen, building detention centers, conducting police training and public relations, and purchasing communications and computer equipment.

The problem with LEAA is not simply that the agency needs to be administratively streamlined and redtape eliminated, nor is the solution to be found in increased appropriations. An entirely new policy direction is needed for the Federal role in financing State and local innovation in crime fighting and delinquency prevention.

In proposing legislation for restructuring LEAA, I am very aware of several political and institutional realities. Local law enforcement agencies want Federal money with as few restrictions as possible. This was true in 1968 when LEAA was created and it is no less true today. These are the same agencies that were

criticized 10 years ago for failing to devise new crime-fighting strategies, which was an important part of the rationale for creating LEAA. However, the block grant approach of the Safe Streets Act yielded too much to local discretion and did not clearly delineate the nature of the criminal justice improvements to be funded. As a result, there has been great confusion and uncertainty as to what constitutes an "improvement," with the result that the traditional criminal justice agencies and programs have dominated the funding process and been able to resist change. Finally, the planning, evaluation, and statistics components of the LEAA funded system at all governmental levels generally, with a few notable exceptions, have been unproductive.

After 10 years, the General Accounting Office is still unable to evaluate LEAA's overall program:

> . . . We determined that there is very little feedback of valid and reliable evaluation information to policymakers . . . on the relative effectiveness . . . of funded LEAA and state programs. . . . As a consequence, decisions and policies made at the state and local levels regarding continued federal funding or assumption of costs by states or localities are frequently unaffected by the results of evaluations which have been conducted.

The ability of State and local planning agencies to engage in "comprehensive planning" is undermined by several operational realities: By vagueness in the LEAA authorizing statute; by the State, regional and local LEAA mandated supervisory boards whose members are usually composed of the leading criminal justice practitioners, all of whom understandably want a generous piece of the pie for their institutions, agencies and constituencies; and by the planning organizations' lack of control or even influence over the budgets of line agencies.

Since LEAA funding only accounts for about 3 percent of total criminal justice expenditures, it is misleading to conceive of this program as a fiscal relief measure. Distributing LEAA funds merely to increase criminal justice agency budgets dilutes the potential impact of what little LEAA funds exist. Instead, the Federal Government should establish program priorities, and then having demonstrated the effectiveness of specific projects within these priority areas, provide incentives to get the States and localities to adopt them.

The legislation I am introducing would address many of these problems by designating three national priorities as fundable criminal justice program areas:

Neighborhood-based community anticrime efforts;

Alternatives to traditional incarceration; and

Programs to prevent juvenile delinquency.

Ten years of LEAA experience and 6 years of hearings on LEAA before my Subcommittee on Crime has convinced me that merely pumping more dollars into the existing law enforcement and criminal justice apparatus will not stem the crime problem. Involving people in their neighborhoods and communities in law enforcement efforts to reduce crime is the only way we are going to significantly impact on juvenile and adult crime problem. This vitally important ingredient of crime prevention—community participation—is most in need of Federal assistance at this time.

I find it deplorable in principle and practice that the United States has one of the highest incarceration rates in the industrialized world, exceeded only by South Africa. Prisons are by far the most expensive, inhumane, and counterproductive remedies to crime and, moreover, are unnecessary for the vast majority of offenders who are nonviolent. Postimprisonment recidivism rates of 60 percent and higher suggest that prisons produce more and worsened criminal behavior and certainly fail to help the offender become a positive and contributing member of society. Therefore, one of the priorities of my bill is Federal financing of alternatives to prisons, jails and detention facilities, of alternatives to including community service orders, restitution, 24-hour supervision in the community, group homes, and more extensive use of fines.

Youth and young adults under the age of 22 now account for about one-half of all arrests. The crime problem is in many ways a juvenile and youth crime problem. My legislative proposal for restructuring LEAA designate as a priority prevention programs aimed specifically at preventing juvenile crime: programs to strengthen families; educational programs that encourage juveniles to remain in school; youth service bureaus; and incentives to reduce the number of juveniles who are incarcerated. Since this legislation designates juvenile delinquency as a national priority area, there would be no need for a separate office of juvenile justice and delinquency prevention within LEAA. Hence, the Juvenile Justice and Delinquency Act of 1974 would be repealed.

Within each of these categories, States and localities would still retain ample discretion to allocate funds on whatever percentage basis selected. There would be no earmarking. In addition to formula grants to the States and localities, the new Bureau of Criminal Justice Assistance (formerly LEAA) would manage a special emphasis discretionary program, funding exemplary programs to improve the quality and fairness of the criminal justice system and reduce the reliance on the justice system as a whole.

Formula grants would initially be allocated among the States on the basis of population. Within each State, funds would be divided between the States and localities on the basis of some equitable formula to be developed in the course of hearings to restructure LEAA. States and localities could fund up to 100 percent of the cost of each project selected under the formula or special emphasis program.

In order to facilitate local implementation, larger units of local government and combinations of smaller units could apply to the State planning agency for a miniblock grant—that is, one grant for the entire 3-year authorization reflecting all project activity, thus lending more stability to the funding process than the submission of individual grant applications and guaranteeing localities a certain fixed amount of funds. The requirement for an annual State plan would be eliminated, and in its place, a 3-year plan would be substituted. The appropriate population levels to qualify for a mini-block grant will be established only after hearings have been conducted to consider various alternatives.

State and local planning units would be able to secure Federal planning dollars, but such funds would be derived from that jurisdiction's formula grant allocation. Unlike the administration's bill, there would be no separate planning appropriation and no match requirements. Planners must justify their share of formula funds in competition with action programs. Hopefully, this will insure that only those jurisdictions seriously interested in planning will undertake such efforts.

A separate community anticrime program would be established, in addition to the formula grant program, to provide both technical and grant assistance to community groups. These funds would enable communities to help define and alleviate the crime problems facing them, as well as apply for and manage community anticrime funds. Twelve percent of the overall Federal assistance would be provided to support these efforts.

Like the administration's bill, my proposal would create both a separate research institute and statistics bureau within the Department of Justice. Unlike their proposal, our National Institute of Justice would be concerned solely with criminal justice research (excluding civil matters) and would be governed by a 12-man policy board of presidential appointees designed to insulate the Institute from the political pressures of the Justice Department. The Institute would also be required to evaluate the effectiveness of programs funded by the Bureau of Criminal Justice Assistance and the Bureau of Justice Statistics. The Bureau of Justice Statistics would be responsible for both civil and criminal statistics, and would also be governed by a policy board, as opposed to an advisory board under the administration's plan.

The current LEAA civil rights provisions would be retained and strengthened to include a preaward compliance review, with the understanding that additional resources would be assigned to civil rights compliance efforts.

There is no provision in my bill for the Law Enforcement Education program (LEEP) due to the likelihood that this program will be transferred to the proposed Department of Education. In a similar vein, the public safety officers' death benefits program will be transferred to the Department of Labor, which seems to be a more appropriate agency to administer this program.

LEAA has been such a wasteful program that we ought to proceed cautiously in authorizing funds for another 3 years. By focusing on the block grant program, Congress can maintain more accountability over how Federal assistance is spent, as well as prioritize an ample

amount of funds for criminal justice experiments at the State and local levels of government. Since we reject the assumption that Federal funds must be equally distributed among all components of the criminal justice system, there is no justification for appropriating huge sums of Federal tax dollars.

Mr. Speaker, if the primary function of LEAA is to distribute funds to the criminal justice system, then there are simpler and most cost-effective methods than working through the LEAA bureaucracy. Specific revenue sharing would be one such method. My colleagues should be aware, however, that a recent Brookings study concluded that most general revenue sharing funds spent on public safety go towards the maintenance of existing law enforcement programs (for example, primarily personnel and equipment costs). I am opposed to this approach, but if this is what Congress really wants, then we at least ought to be frank with the public.

On the other hand, if the primary goal is to use Federal funds to support truly innovative programs, then a smaller program with specific objectives, to be carefully evaluated by Federal and State researchers, would seem more desirable. My proposal is designed to accomplish this very task.

Mr. Speaker, for the RECORD, I offer the following section-by-section analysis of the "Criminal Justice Assistance Act of 1978":

The analysis follows:

SECTION-BY-SECTION ANALYSIS—TITLE I

Section 101 amends Title I of the Omnibus Crime Control and Safe Streets Act as follows:

"Sec. 101. The Declaration and Purpose Clause in section 101 sets forth the following purposes of the Criminal Justice Assistance Act of 1978: (1) support community anti-crime efforts; (2) provide for alternatives to incarceration; (3) encourage the development of basic and applied research directed towards methods for the prevention and reduction of crime; (4) develop and conduct programs to prevent delinquency, divert juveniles from the traditional juvenile system, and provide critically needed alternatives to institutionalization; (5) encourage the collection and analysis of statistical information concerning crime, juvenile delinquency, civil disputes, and the operation of the justice system; (6) reduce the reliance on the criminal justice system as a means of social control; and (7) reduce the number of people under the control of the criminal justice system.

PART A—BUREAU OF CRIMINAL JUSTICE ASSISTANCE

Sec. 102. Section 102 creates a new Bureau of Criminal Justice Assistance within the Department of Justice. The Bureau shall be headed by an Administrator appointed by the President with the advice and consent of the Senate. The duties and functions of the Administrator are specified herein.

Sec. 103. Section 103 creates within the Bureau an Office of Community Anti-crime Program. The Office shall dispense technical assistance and grants to nonprofit community groups in crime prevention programs.

Sec. 104. Section 104 authorizes the Administrator to make grants to the states for the following purposes: (1) community anti-crime projects; (2) projects to prevent juvenile delinquency; divert juveniles from the traditional juvenile justice system; and provide critically needed alternatives to institutionalization; (3) alternatives to incarceration; and (4) planning projects at the state, regional, and local levels of government.

All planning funds are match-free and shall be derived from the formula allocation to the states and units of local government. Formula grant funds shall be allocated annually among the states according to their respective populations.

Sec. 105. Section 105(a) requires that each state establish a Criminal Justice Coordinating Council for the purpose of preparing a state application and reviewing, accepting, or disapproving applications for formula funds made by other state agencies and units of local government. Several other duties are specified, including the preparation of an annual report, the provision of technical assistance, and the auditing of formula grant projects.

Subsection (b) provides for the establishment of a Criminal Justice Council by state law and specifies the composition of its membership. Representatives of the general public would comprise a majority on the Council.

Sec. 106. Section 106 provides for the allocation of formula grant funds within each state between state agencies and local units of governments. Following further testimony and research concerning various allocation options, a specific allocation formula will be inserted.

Sec. 107. Section 107 requires that each state desiring formula funds shall submit an application to the Bureau for all anticipated activities over the period which appropriations are authorized (3 years). State agencies, units of local government, and combinations of such units desiring formula funds shall also file an application with the Criminal Justice Council. Larger units of local government and combinations of smaller units of local government may submit a single three-year application to the Council (mini-block) and such application shall be deemed approved unless the Council finds that the application is inconsistent with Federal law or the priorities established in Section 104. Testimony will be taken on what the appropriate population level for mini-block eligibles should be.

Local government units would have the option of establishing their own criminal justice offices to administer formula funds, and planning grants would be available to support the activities of such offices. The members of local planning offices must be broadly representative of criminal justice and other local government agencies, with at least a majority consisting of members of the general public.

All applications under this part must provide citizens adequate information concerning the nature and scope of proposed programs, including public hearings and the opportunity to participate in the development of applications. Grant recipients would be required to file an annual performance report concerning the impact of their activities.

Sec. 108. Section 108 establishes procedures for the approval of applications submitted by the states to the Bureau of Criminal Justice Assistance. No formula funds could be spent for the purchase of equipment of hardware, or the payment of personnel costs unless such expenditures were incurred as an incidental and necessary part of the program. Construction projects and salary increases would be ineligible to receive such funds as well as projects which have been demonstrated to be ineffective. The Bureau would be required to suspend funding for an approved application that has failed to conform to the statutory objectives of this Act as evidenced by the content of the annual performance report or based on an evalaution of the project.

Sec. 109. Section 109 grants authority to each Criminal Justice Coordinating Council to review formula grant applications submitted by units of local government. Each Council must suspend funding to an outgoing project that has failed to conform to the requirements or statutory objectives of this title as evidence by the annual performance reports or other such evaluations.

Sec. 110. Section 110 sets forth requirements for the provision of special emphasis grants to any public or private entity. Such grants and technical assistance may be designed to (1) improve the quality and fairness of the criminal justice system; (2) reduce the reliance on the criminal justice system as a means of social control; (3) reduce the number of persons under the jurisdiction of the criminal justice system; (4) train criminal justice personnel and citizens who have demonstrated concern in criminal justice; (5) fund innovative projects which have the approval of the National Institute of Justice; and (6) identify, evaluate, and distribute models of successful projects assisted under this part.

PART B—NATIONAL INSTITUTE OF JUSTICE

Sec. 201. Section 201 establishes a National Institute of Justice within the Department of Justice.

Sec. 202. Section 202 creates a Board to establish the policies and priorities of the Institute. The Board shall consist of twelve members appointed by the President with the advice and consent of the Senate. All Board members shall serve until their successors are appointed and have qualified. Various duties and powers of the Board are specified herein, including the composition of the Board, the terms of office of each member, and the authority to create formal peer review procedures.

Sec. 203. Section 203(a) provides that the Institute shall be headed by a Director appointed by the President with the advice and consent of the Senate. The Director shall have demonstrated significant expertise in justice research, shall have final authority over all grants and contracts awarded by the Institute, and shall carry out the policies and priorities established by the Board.

Subsection (b) sets out the responsibilities of the Institute. The Institute shall have the authority to make grants and conduct research designed to identify the causes of criminal behavior, develop methods of preventing and reducing crime, improve the quality and fairness of the criminal and juvenile justice systems, insure citizen access to and participation in crime prevention, and devise alternatives to incarceration and the criminal justice system in general.

Among other responsibilities the Institute shall evaluate the effectiveness of programs funded by the Bureau of Criminal Justice Assistance and the Bureau of Justice Statistics.

Subsection (c) authorizes the Director, with the approval of the Board, to request and obtain relevant information from any Federal agency.

Sec. 205. Section 205 requires that recipients of grant assistance provide, whenever feasible, money, facilities, or other services to carry out the purposes for which the grant is sought.

PART C—BUREAU OF JUSTICE STATISTICS

Sec. 301. Section 301 establishes within the Department of Justice a Bureau of Justice Statistics.

Sec. 302. Section 302 creates a Board to establish the policies and priorities of the Bureau. The Board shall consist of twelve members appointed by the President with the advice and consent of the Senate. All Board members shall serve until their successors are appointed and have qualified. Various duties and powers of the Board are specified, including the composition of the Board, the terms of office of each member, and the authority to create formal peer review procedures.

Sec. 303. Section 303 provides that the Bureau shall be headed by a Director ap-

pointed by the President with the advice and consent of the Senate. The Director shall have demonstrated significant expertise in statistical programs, shall have final authority over all grants and contracts awarded by the Bureau, and shall carry out the policies and priorities established by the Board.

Sec. 304. Section 304 authorizes the Bureau to enter into grants, contracts, or cooperative agreements designed to improve civil and criminal justice statistics. The Bureau is required to collect, analyze, disseminate, and maintain accessible data systems concerning the prevalence and attributes of crime, juvenile delinquency, and civil disputes at the Federal, state and local levels. Other functions of the Bureau are specified, including the mandate to collect statistics relating to criminal victimization, white-collar crime, civil disputes, and the processing of criminal, juvenile and civil cases.

Among other powers, the Director shall have the authority to request and obtain relevant information from any federal agency.

Sec. 305. Section 305 requires that recipients of grant assistance provide whenever feasible, money, facilities, or other services to carry out the purposes for which the grant is sought.

PART D—ADMINISTRATIVE PROVISIONS

Sec. 401. Section 401 authorizes the Administrator of the Bureau of Criminal Justice Assistance and the Directors of the National Institute of Justice and the Bureau of Justice Statistics, respectively, to establish such rules as are necessary to carry out their functions under this title.

Sec. 402. Section 402 provides general authority under this title for the appropriate Bureau or Institute to terminate, reduce or otherwise limit funds to recipients of assistance under this title who have failed to comply with any provisions of federal law. All recipients of such action shall be entitled to adequate notice, hearing, and appeal procedures.

Sec. 403. Section 403 prohibits the transfer of duties of both Bureaus and the Institute elsewhere in the Department of Justice unless specifically authorized by Congress.

Sec. 404. Section 404 provides both Directors and the Administrator with the authority to select, employ, and compensate personnel pursuant to existing civil service provisions.

Sec. 405. Section 405 authorizes the appropriate Bureau or Institute to reimburse other federal agencies for work performed under this title.

Sec. 406. Section 406 permits both Bureaus and the Institute to obtain the services of experts and consultants in accordance with Title 5, United States Code.

Sec. 407. Section 407 prohibits the discrimination or denial of employment on the basis of race, color, religion, national origin, or sex in connection with any programs funded under this Title.

Before approving any grant or contract in excess of $200,000.00 the appropriate Director or Administrator shall conduct a pre-award review to determine compliance with this section.

Should any program be found in violation with this section, the appropriate Bureau or Institute shall suspend further payment of any funds following proper notice and hearings. Procedures relating to cause of action, notice, appeal, hearings, attorney fees, and resumption funds are included herein.

Sec. 408. Section 408 requires the Administrator of the Bureau of Criminal Justice Assistance to report annually to the President and to the Committees of the Judiciary of both the House and Senate on activities pursuant to this title.

Sec. 409. Section 409 permits the appropriate Bureau or Institute to maintain such records as it may require recipients of assistance under this title. It authorizes the appropriate Bureau or Institute to obtain access for the purpose of audit and examination to any records of grant recipients. Similar provisions are provided for the General Acounting Office.

Sec. 410. Section 410(a) prohibits any federal employee or recipient of assistance under this title from revealing any research or statistical informaiton furnished under this title which is identifiable to any person, other than the purpose of the research. Such information shall be immune from legal process unless the person furnishing such information consents. An exception is granted to legislative bodies.

Subsection (b) requires the appropriate Bureau or Institute to assure the security of all criminal history information collected, stored, or disseminated through assistance under this title. Such information shall be kept reasonably current and shall contain, wherever feasible, disposition date where arrest data is present. A fine of up to $10,000 is provided for violation of this section.

Sec. 411. Section 411 permits any member of the public to inspect all records of recipients of grants, contracts, or cooperative agreements which relate to the performance of that grant, contract, or agreement under this title.

Sec. 412. Section 412 authorizes the Institute or appropirate Bureau to accept the voluntary and uncompensated services of qualified individuals.

Sec. 413. Section 413 prohibits the expenditure of any assistance under this title for land acquisition.

Sec. 414. Section 414 permits the Administrator to waive state liability with respect to Indian tribes, and pursue appropriate legal remedies concerning enforcement of the grant provisions contained in this title.

Sec. 415. Section 415 authorizes sums to be appropriated for fiscal years ending September 30, 1980, September 30, 1981, and September 30, 1982. Of the sum appropriated for Sections 103, 104, and 110, 10 percent is authorized for the Office of Community Anticrime Program; 60 percent for formula grants to states and localities (including planning funds); and 30 percent for special emphasis grants. Fifteen million dollars is specifically authorized for the National Institute of Justice; and forty million dollars for the Bureau of Justice Statistics. Sums appropriated for any fiscal year shall remain available until expended.

Sec. 416. Section 416 defines the following terms used in this title: 'state,' 'unit of local government,' and 'criminal justice.'

PART E—CRIMINAL PENALTIES

Secs. 501, 502, 503. Sections 501, 502, and 503 continue to effect prior sections 651, 652, and 653 of the Omnibus Crime Control and Safe Streets Act, as amended, relating to the criminal misuse of funds received from the Bureau of Criminal Justice Assistance, the National Institute of Justice, or the Bureau of Justice Statistics."

Sec. 102. Section 102 amends Section 5314 of Title 5, United States Code, to provide for the schedule of compensation for the Administrator of the Bureau of Criminal Justice Assistance, the Director of the National Institute of Justice, and the Director of the Bureau of Justice Statistics. This section also deletes several administrative positions under the Law Enforcement Assistance Administration.

Sec. 103. Section 103 repeals Titles I and II of the Juvenile Justice and Delinquency Prevention Act of 1974, as amended.

Sec. 104. Section 104 authorizes the Attorney General to make such rules as to assure the orderly termination of programs eliminated by this title and the orderly transition to activities initiated by this title.

TITLE II

Secs. 201, 202, 203, 204, 205, 206. Sections 201, 202, 203, 204, 205, and 206 transfer the provisions of the Safe Streets Act that pertain to the public safety officers' death benefit program to the Department of Labor.●

MEMBERS EXPLANATION OF VOTE AGAINST H.R. 13511

HON. CHRISTOPHER J. DODD

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DODD. Mr. Speaker, I am making this statement on behalf of the following Members: Mr. STARK, Mr. NOLAN, Mr. MARKEY, Mr. GARCIA, Mr. DELLUMS, Mr. BRODHEAD, Mr. EDWARDS of California, Mr. CLAY, Mr. WEISS, Ms. MIKULSKI, Mr. MOFFETT, Mr. CLAY, Mr. GORE, Mr. PHILLIP BURTON, Mr. WEAVER, Mr. DIGGS, Mr. DRINAN, Mr. SOLARZ, Mr. BONIOR, Mr. STUDDS, Mr. HARRINGTON, Mr. MAGUIRE, Mr. REUSS, Ms. CHISHOLM, Mr. RICHMOND, and Mr. CORNELL.

On August 10, the House passed H.R. 13511, a tax reform bill that we cast our votes against. Where others could approve of a tax bill that rejects the entire concept of tax equity by providing the greatest amount of tax relief to those who need it the least, we could not. Where other Members could ignore the lack of any provision that would soften the dual blow of inflation and increased social security taxes, we could not. To say that H.R. 13511 is a tax reform bill is a hoax. To say that it is a tax regression bill that opens loopholes for the very rich even wider than before would be a far more accurate description.

The final passage of H.R. 13511 will do little to lessen the load for the lower and middle-income earners who represent 87 percent of the taxpayers in this country, but for the wealthiest in our society the results will be more than satisfactory. The bill allots 96 percent of the benefits from capital gains tax reductions to taxpayers earning over $50,000, the top 2 percent of all taxpayers. Over 75 percent of these reductions will go to persons with incomes in excess of $100,000. In short, the vast majority of Americans are being shortchanged.

As approved, H.R. 13511, when coupled with social security tax increases scheduled to take effect in 1979, will actually result in tax increases for most people. It is an undisputed fact that the social security tax is levied most heavily on workers in the lower and middle-income brackets. This legislation offers no genuine relief to these groups, and the scheduled rise in social security taxes will exacerbate the inequities already evident. For example, the net increase in the tax bills of people making between $20,000 and $30,000 a year will rise from between $83 to $261. These figures belie the arguments by proponents of H.R. 13511 that the bill is a tax cut measure for the middle-income wage earner.

Although the administration compromise can hardly be viewed as a cure all for our economic ills, the House would

have been much better off passing the Corman-Fisher amendment that offered a far more equitable distribution of tax cuts. For instance, a typical family of four with $20,000 of income would have received a $228 tax cut under Corman-Fisher, but only a $146 cut under the House bill. It would have provided 38 percent of the tax cuts to those earning less than $20,000, while H.R. 13511 gives only 25 percent of its relief to that group.

To make matters worse, the new law in some cases would impose a miniscule tax of only 5 percent on an investment gain of up to $800,000. The Corman-Fisher plan lowers the maximum capital gains tax rate to 35 percent as in H.R. 13511, while insuring that the superrich do not escape their fair share of taxes. More specifically, the tax bill provides three-quarters of its capital against tax reductions to those earning over $100,000 a year or more, and repeals the present minimum tax. It replaces that minimum tax with a "microminimum" tax that is of little real significance and which will allow huge gains to remain untaxed. The Corman-Fisher proposal would have created a new, more meaningful minimum tax to insure that windfall gains of more than $800,000 would be taxed at a rate of 17.5 percent.

The Corman-Fisher approach was a selective one that sought to provide a more valid distribution of tax cuts along with incentives to spur capital formation. Furthermore, it retained the business tax reductions of the committee bill and the homeowners' relief provisions while still maintaining the integrity of our tax system: That everyone contributes according to his or her ability to pay. The legislation that the House has approved ignores tax equity, ignores the effects of inflation, and ignores reform. Its attention is directed toward the theory that as the rich get richer the not-so-rich will benefit from whatever may "trickle down" to them.

It is time that Congress recognized the need to relieve tax pressure at its source: At the low- and middle-income levels where the need is greatest. It should be obvious by now that American taxpayers do not want hand-me-downs. That is what the tax bill is offering, and that is what we are opposing.●

PERSONAL EXPLANATION

HON. ABNER J. MIKVA

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MIKVA. Mr. Speaker, I was unable to take part in two rollcall votes on Tuesday, August 8, 1978.

Had I been present, I would have voted as follows:

Rollcall 661, Mitchell amendment, that sought to reduce total appropriations not required by law by 1 percent, yea; rollcall 662, Harkin amendment, that sought to reduce total appropriations not required by law by 2 percent, yea.●

INDICTMENT OF FORMER FBI OFFICIALS

HON. BOB WILSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. BOB WILSON. Mr. Speaker, a short time ago, I spoke to my colleagues about the Justice Department's indictments of three former FBI agents. I commended to their attention a resolution adopted by the Society of Former Special Agents of the FBI. I would now like to put forward to you the following policy statement which that society has also adopted. It presents a forceful argument and is well worth reading. I recommend it to each of my colleagues.

POLICY STATEMENT BY BOARD OF DIRECTORS, RE: INDICTMENT OF FORMER FBI OFFICIALS

NEW INDICTMENT DEPLORED

The 7,400 members of the Society of Former Special Agents of the FBI, Inc., are shocked by the unjustified, unconscionable, and unprecedented action of the U.S. Department of Justice in obtaining Federal indictment against three former top officials of the FBI, as a result of the performance of their official duties to investigate the terrorists and bomb-throwers of the Weatherman underground.

Our Society members, all of whom served honorably in defense of the United States, consider the indictment on April 10, 1978, of former Acting Director L. Patrick Gray III, former Acting Associate Director W. Mark Felt, and former Assistant Director Edward S. Miller to be a travesty of justice.

We affirm that any criminal prosecution of FBI Agents for actions taken totally without criminal intent, while performing their duties with honor and determination to protect the country from criminals and subversives, is completely unwarranted. None of these officials obtained personal gain or profit. They acted to protect the country, to prevent terrorism, and to apprehend Federal fugitives.

FBI INVESTIGATED TERRORISTS

These dedicated FBI men, now charged with criminal offenses, firmly believed they were discharging responsibilities imposed on the FBI by our government. They utilized long-standing investigative procedures which had been condoned or approved by the Congress, Attorneys General and Presidents, going back to World War II.

The FBI acted shortly after the Capitol of the United States and numerous other facilities in our country had been bombed by the Weatherman underground in the early 1970's. At that time the FBI was expected and urged by government officials and the citizens of our nation, to take whatever steps were necessary to stop the terrorist activities of the Weatherman organization.

The indictments, based on actions taken five years ago (December 1972 to May 1973) resulted from the conclusion by certain attorneys in the Criminal and Civil Rights Divisions of the Department of Justice that these prior acts were deemed to be illegal. These actions were taken by the FBI during a time of national crisis. No statutory guidelines existed. As a matter of fact, such guidelines are still nonexistent and, on the very day that Gray, Felt, and Miller were arraigned on the April indictment, the Attorney General was testifying before Congress regarding future guidelines for the very same investigative techniques utilized by the FBI to investigate the Weatherman underground.

To now deem criminal those good faith actions taken years ago by Special Agents is a gross miscarriage of justice and the height of hypocrisy. Our Society is convinced that such ill-conceived attempts to prosecute FBI employees will be regarded by the American public as abhorrent to our nation's sense of fair play and justice.

AMERICAN INTELLIGENCE ERODED

Current attempts to press criminal charges against former FBI officials are a tragic blow to the effectiveness of the Bureau. FBI morale has been devastated. The efficiency of all intelligence—FBI, CIA, NSA, DIA, Secret Service, and others—in the performance of their mission to protect and defend the United States from its enemies has been seriously eroded. All branches of law enforcement are affected.

Our Society fears that these criminal charges, declaring illegal those actions which were taken years ago, will benefit only foreign enemies, domestic subversives, and criminals. The vulnerability of the United States to political terrorism, hostage kidnapping, skyjacking, and extortion, now rampant in Europe, North Africa, and parts of South America, is greatly enhanced by these unfair prosecutions. They have the effect of shackling and handcuffing our intelligence community. Who will be responsible tomorrow if the present wave of terrorism comes to America, and our government or industrial leaders are the victims of political kidnapping or assassination?

FBI HARASSED AND PERSECUTED

Attorney General Griffin B. Bell and others now or formerly in the Department of Justice have been investigating FBI procedures for five years. They have caused grand juries in New York City and the District of Columbia to obtain testimony from more than 120 Agents and former Agents over a 3-year period. They waited until one month before the normal statute of limitations would have run in May 1978, before obtaining the Gray, Felt, and Miller indictment. The tactics of the Department of Justice in prolonging the investigation of FBI procedures are tantamount to harassment and persecution.

Unauthorized leaks to news media, by representatives of the Department of Justice, of confidential information regarding restricted grand jury testimony, and the public release of names and unsubstantiated charges of misdeeds by FBI Agents, have prejudiced their right to a fair trial. This is contrary to the American code of justice, which proclaims all citizens to be innocent until proven guilty in a court of law. Our Society insists that these malicious leaks of restricted information be fully investigated by the Department of Justice and appropriate action taken with regard to responsible individuals.

In his press release, April 10, 1978, the Attorney General admitted publicly that "one or more Justice Department attorneys failed to make full disclosure." He further stated that "the possibilities of the involvement of Justice Department attorneys in one or more of the alleged failures to disclose will be investigated fully by the Department." Our Society urges that a full and complete investigation be conducted of present and former Department of Justice attorneys and officials regarding their knowledge and approval of FBI investigative procedures.

KEARNEY INDICTMENT TERMINATED

On April 7, 1977, John J. Kearney, former Supervisor of Squad 47, New York City Division of the FBI (which Squad was responsible for the investigation of the Weatherman underground) was indicted by the Federal Grand Jury for the Southern District of New York. He was charged in a 5-count indictment with illegal wiretapping, obstruction of the mail, and conspiracy. Two of the counts were thrown out by U.S. District Judge Kevin J. Duffy, and the conspiracy count was under serious attack. Through

Inspection and Discovery Motions, Kearney's attorneys obtained voluminous records from the Department of Justice files regarding the Department's knowledge of and policy for handling wiretapping and mail-opening investigations. These documents periled the government's case and delays in the prosecution of Kearney occurred for over one year.

The Federal District Court in the Southern District of New York, on motion of the Department of Justice, dismissed all remaining charges against former FBI Agent John Kearney on April 10, 1978.

In a news release from the Attorney General's office the day the nolle prosique was issued, it was stated that Kearney had been under investigation or indictment for more than 33 months. The conclusion of the Department of Justice was "that it would be in the interests of justice for this case now to be dismissed," and added, "to allow the Kearney prosecution to continue under these circumstances would violate basic tenets of fair and equal justice."

This conclusion was reached belatedly. Kearney's 25-year career of distinguished FBI service had been besmirched, his reputation subject to public attack, his current employment jeopardized, his physical health impaired, and his freedom imperiled by threat of fine and imprisonment.

DEPARTMENT REFUSAL TO PAY LEGAL COSTS

The Department of Justice steadfastly refused to provide legal counsel for Kearney's defense. Kearney was forced to obtain his own attorneys and obligated himself to pay over $158,000 in defense counsel fees. Our Society, realizing the devastation being wrought on Kearney's family finances, paid all his criminal attorney fees through its Special Agents Legal Fund.

On August 2, 1977, the Society's Board of Directors passed a Resolution calling for the dismissal of the Kearney indictment and reimbursement by the Department of Justice of the legal expenses for Kearney's private counsel. This Resolution was disseminated to the President, the Attorney General, members of Congress, and the media.

It took almost three years for justice to run its course and for John Kearney to be completely vindicated. The Department of Justice, as late as April 27, 1978, still refused to pay his legal expenses.

OTHER FBI AGENTS THREATENED

Kearney, Gray, Felt, and Miller are not the only present or former FBI Agents called before Federal Grand Juries, interrogated by Department of Justice attorneys, and threatened with criminal prosecution.

Approximately 120 other FBI Agents have been similarly investigated and required to obtain private counsel to defend themselves from Department of Justice threats of Federal criminal prosecution for investigating the Weatherman underground. The cumulative legal fees were staggering. These beleaguered FBI Agents faced serious financial problems. Again our Society, through its Special Agents Legal Fund, provided in excess of $150,000 in attorney fees, to insure their adequate legal representation.

In the previously mentioned cases (Kearney, Gray, Felt, Miller), the Department of Justice instituted criminal proceedings. Regarding J. Wallace La Prade, former Assistant Director of the New York Division of the FBI, the Department of Justice announced, in its April 10, 1978, public press release, that it was initiating "administrative disciplinary proceedings" for his conduct in the performance of his official duties in connection with the Weatherman underground investigation.

The Department of Justice subsequently announced that as many as 68 other FBI Agents were being considered for disciplinary action, ranging from censure to dismissal, because of their investigation of the Weatherman. On June 13 the Department of Justice made public, for the first time, the names of 30 present and former FBI Agents which it listed as "unindicted conspirators."

Our Society firmly believes that the Department of Justice has pilloried the FBI long enough!

CONGRESSIONAL RESOLUTIONS

Our Society has taken cognizance of the opposition of many members of the United States Congress to the indictment of Kearney, Gray, Felt, and Miller. Many members of the House of Representatives and the Senate have spoken out in the Congressional Record and elsewhere against the Department of Justice action.

Of special significance are two Resolutions now before Congress. The first, introduced by Senator S. I. Hayakawa (R-Cal.), designated as S.Con.Res. 85, May 10, 1978, urges the Attorney General to seek dismissal of the Gray, Felt, and Miller indictments. Similarly, Representative Leo C. Zeferetti (D-N.Y.) introduced H.Con.Res. 619, which concludes: "It is astonishing that we can grant amnesty to the draft dodgers of the period, consider upgrading the dishonorable discharge of those who deserted during the war, talk of normalizing relations with Cuba and Vietnam, and still prosecute FBI Agents on such charges. I respectfully suggest that the Congress urge that these indictments be dismissed and that we continue to form guidelines for the future conduct of intelligence personnel."

Our Society commends Senator Hayakawa and Representative Zeferetti for the courageous and forthright stand they have taken, and has observed increasing support in Congress for these companion Resolutions.●

RAY VILLA—A MAN FOR THE PEOPLE

HON. JERRY M. PATTERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. PATTERSON of California. Mr. Speaker, Ray Villa, executive director of the Orange County Operation SER program, has received many honors during his long and distinguished career of public service. However, none will be more meaningful than the one to be bestowed upon him at a ceremony on August 27, 1978, by the Santa Ana League of Latin American Citizens—"The Ray Villa Scholarship.'

Ray Villa has helped and inspired countless American citizens of Latin descent, and it is only fitting that this scholarship be established in his name. As director of operation SER, Ray has been instrumental in perhaps the most successful training and employment program in Orange County.

A former Santa Ana city councilman and owner of a successful insurance business, Ray has been a tireless worker in community service projects throughout his career in Santa Ana. His dynamic leadership has provided guidance to many programs that may have otherwise floundered. He has constantly advanced the cause of the disadvantaged and given them hope.

I urge my colleagues to join me in paying tribute to a man who has devoted his life to helping others; a man who is respected by all segments of the community; and a man who richly deserves this honor—Ray Villa.●

IMPORTED FARM LABOR

HON. EDWARD W. PATTISON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. PATTISON of New York. Mr. Speaker, the growing of apples is an important part of my district's economy, particularly along the Hudson River in Columbia County. The apple industry is constantly changing, with new growth and harvesting methods continually being tried. But one factor that defines the economics of harvesting is that apples are still picked by hand. So far, no one has devised a method of picking apples mechanically without bruising the fruit.

In the past, much of the community postponed other duties and did the harvesting. Schools in the area let out so the children could participate. Today, however, the world is a different place. Like it or not, our present culture is not particularly suited to the demands of applegrowing. Although pickers can earn very good wages during the season, the season doesn't last long. Even if they wanted to, workers employed in stores and factories can't leave their jobs for 8 weeks of harvest.

Why not hire those receiving welfare to pick apples? First of all, the vast majority of welfare recipients are aged, blind, disabled, or children. They can't pick apples. Second, those on welfare who are able-bodied but unemployed often simply lack the strength and skills required, or the motivation. That may be a shame, but that is one major reason they are on welfare. They are human beings and society should direct its attention to helping them by training, education, and incentive that can help them become productive citizens. But in general, with individual exceptions, welfare recipients simply don't make very good, reliable applepickers.

Consequently, applegrowers face a yearly dilemma: How to get the crop picked? For years, the answer has been to hire migrant U.S. laborers as well as to import a number of foreign pickers, generally from Jamaica. Jamaicans are considered good pickers: The wages are far higher than in their country, and because their culture does not put agricultural workers on the bottom of the social scale, they are highly motivated and reliable.

Under current law, in order to import pickers, the growers are annually put through a most maddening process. Job requests are filed with the Labor Department for both domestic and foreign workers at least 80 days before the harvest begins. The Labor Department must give priority to U.S. workers; many of the job orders are filled with migrants and Puerto Ricans, all of whom are U.S. citizens. Sixty days is allowed for recruitment, which is done by both the growers and the Labor Department. Only if not enough U.S. workers are available, will Labor certify the temporary employment of foreign workers. Uncertainty is the major problem: Uncertainty about whether or not, when, and how many of the requested number of workers will be

certified, about how many of the recruited domestic laborers will arrive, and about how many will stay until the end of the harvest. However, there is no uncertainty about the need to pick the apples when they ripen.

To witness the frustration, anger and confusion of a grower that desperately seeks new pickers for crops that are already ripe because his request for foreign workers was rejected by the Labor Department and because many of the domestic workers never arrived as promised or left after 3 days—makes one ask why we are making it so difficult for an earnest and hardworking farmer or small businessperson to survive.

This is an issue of national policy, the rules of which are defined by our laws. I do want the jobs of U.S. workers protected and decent living and working conditions of temporary agricultural labor insured. However, the present situation which makes harvesting a nearly impossible task for so many growers every year, is not good public policy.

An op-ed piece by S. Steve Karalekas and Thomas J. Bacas in the Washington Post of August 11, 1978, discusses the issue in some detail. I invite my colleagues to take a few minutes to read the article so that they will understand the problem. The article follows:

[From the Washington Post, Aug. 11, 1978]

IMPORTED FARM LABOR: A MATTER OF SURVIVAL

(By S. Steven Karalekas and Thomas J. Bacas)

With 7 million Americans unemployed, it should be no problem to find 3,800 workers willing to harvest the East Coast apple crop, in 1975, however, the State of Vermont sent "call-in" postcards to all 28,812 residents drawing unemployment or welfare benefits, inviting them to accept employment in Vermont's apple orchards. The effort produced 19 apple pickers. In 1976, apple growers and the Department of Labor conducted an expensive and intensive 10-day recruitment campaign in New York City to obtain workers for the apple orchards in the Hudson Valley, less than 25 miles away. Only 75 New Yorkers, out of an estimated 500,000 unemployed, signed up for the apple-picking jobs, only 12 arrived at the orchards, and none of those 12 lasted on the job more than a week. Without the use of temporary foreign labor, most of Vermont's and New York's apples would have been lost. The belief that there is an army of unemployed Americans eager to pick apples or harvest other crops, however, is a major fallacy underlying Ronald Goldfarb's distorted description of the foreign labor certification program ["Imported Farm Labor: How Growers Manipulate the System," op-ed, Aug. 2]. It is by no means the only one.

Goldfarb portrays the secretary of labor engaging in a "minuet of malfeasance" with "powerful farm owners," "sidestepping" the immigration laws and stamping on the rights of unemployed American workers. It is not clear what law Goldfarb has in mind. The Immigration and Nationality Act specifically provides that foreign workers may be temporarily admitted into the United States when not enough qualified American workers are willing to accept a particular job or class of jobs. Congress recognized that, at times, not enough qualified American workers are willing to fill certain jobs and that American employers facing such labor shortages would suffer severe economic injury unless foreign workers were admitted on a temporary basis. The law recognizes both the need to give priority to American workers and the equally compelling need to provide growers access to foreign labor markets when not enough willing American workers are available.

The East Coast apple growers, mostly small, family-owned enterprises, would find Golfarb's portrayal laughable if their struggles with the secretary of labor were not so expensive. They have often had to resort to expensive, time-consuming litigation against the secretary of labor over the administration of the foreign labor certification program; last year, they were forced to bring five separate lawsuits. They were successful in all five. Only days before the 1977 apple harvest was to begin, they again had to sue to require the secretary of labor to certify their need for temporary foreign workers. A federal court ordered the secretary either to produce enough American workers to pick the apples or to allow temporary foreign workers into the country. The secretary's lawyers argued in court that there were at least 3,000 American workers immediately available to harvest the apples. When the secretary could produce only 60 American workers, approximately 3,800 foreign workers were allowed into the country.

Since World War II, American farmers have experienced a shortage of American workers willing to harvest crops. Some farmers have been able to solve their problem by substituting machines for people. Farmers who grow labor-intensive crops, like apples, however, have faced real problems.

They have had to contend with a federal government that devotes virtually all its training and employment funds to getting people out of agricultural work. They have had to compete with generous unemployment compensation and welfare benefits. (There is no provision for cutting off an individual's public welfare benefits for refusing to accept temporary agricultural work.) They have encountered the social reality that no parent in the United States is raising his child to become an agricultural worker. And they have had to deal with complex federal regulations that make nationwide recruitment a difficult exercise at best.

Despite Goldfarb's contentions, the foreign labor certification program is designed to extend every possible protection to the American worker. An American farmer may not hire any temporary foreign worker if enough qualified American workers accept his job offers. Before he is permitted to bring in temporary foreign workers, he must engage in nationwide recruitment efforts. Contrary to Goldfarb's contention that growers often wait until the "last minute" before attempting the recruit American workers, the secretary of labor's regulations require a grower to begin his recruitment efforts at least 60 days before the harvest season begins. Most apple growers file their requests for workers more than three months before the harvest season.

The American farmer seeking temporary foreign workers also must offer wages and working conditions that substantially exceed those offered by farmers not using offshore workers. For example, he must pay a wage rate 30 to 40 cents per hour higher than the prevailing farm wage rate in his area, provide free housing, pay the worker for his transportation expenses from his home to the place of employment regardless of distance, and provide insurance and other benefits. Only if the farmer does not obtain enough American workers can he obtain temporary foreign workers, and he must offer the same benefits to foreign workers that were offered to American workers.

In 1977, only 15,281 foreign workers were certified to work on American farms, approximately 0.004 percent of the total U.S. labor force. Moreover, those foreign workers merely supplement the American work force. For example, only 20 percent of the apple pickers used by the East Coast apple growers in 1977 were foreign workers. Rather than depriving Americans of jobs, the foreign labor certification program actually *gives* employment to many American workers. For example, many Americans work in packing houses and related jobs that are dependent upon the apple harvest.

While it does appear anomalous for the United States to allow the importation of temporary foreign workers when there are millions of Americans unemployed, the problem does not result from the growers' "manipulation of the system." Both Goldfarb and the secretary of labor must come to grips with the reality that there are some jobs that Americans no longer care to accept. Goldfarb would make a more useful contribution if he were to suggest changes in our system that would encourage unemployed Americans, especially those drawing welfare benefits and unemployment compensation, to accept the available jobs that go begging.●

SELF-DETERMINATION FOR PUERTO RICO

HON. BENJAMIN A. GILMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. GILMAN. Mr. Speaker, July 25 of this year marked the 80th year of Puerto Rico's association with the United States. It also marks the 26th anniversary of the founding of the Commonwealth of Puerto Rico. The significance of Puerto Rico and of her relationship to the United States during this period has called world attention to the progress she has made in liberty, prosperity and economic freedom.

In the period after World War II, political reforms to abolish the remains of colonialism came rapidly with the full consent and support of the United States. In 1952, Puerto Rico approved a constitution under which she became, in terms of international government, a self-governing commonwealth associated with the United States. The attainment of commonwealth status was of great importance to Puerto Rico not only politically and economically, but also culturally, permitting its people to retain and even strengthen their native culture of Spanish derivation and also their identity as Puerto Ricans.

In recognition of the rights of the Puerto Rican people, a fundamental part of American policy toward the commonwealth since its beginning has been their right of self-determination. As stated by President Carter in his Presidential Proclamation to the People of Puerto Rico on July 25, 1978:

> The United States remains fully committed to the principle of self-determination for the people of Puerto Rico. President Eisenhower made that commitment in 1953, and this has been the position of all U.S. Administrations since that time. We continue to regard it as the fundamental principle in deciding Puerto Rico's future.
>
> My Administration will respect the wishes of the people of Puerto Rico and your right to self-determination. Whatever decision the people of Puerto Rico may wish to take—statehood, independence, commonwealth status or mutually agreed modifications in that status—it will be yours, reached in accordance with your own traditions, democratically and peacefully.

The current freely elected Governor of the Commonwealth, Carlos Romero

Barcelo, has taken steps to exercise this self-determination by his commitment to begin the plebiscitary process by 1981 on the future status of Puerto Rico.

The debate about the future of Puerto Rico and its form of government has been complicated by perennial attack on the United States by Cuba. Since its establishment, the Cuban dictatorship has sought to use the Puerto Rican nation and its people as a political tool to attack the United States. Cuban attempts to have the status of Puerto Rico scrutinized by the United Nations have been repeatedly rejected by that body on the grounds that relations between the Commonwealth and the Federal Government are an internal matter.

It is quite possible, however, that when the United Nations General Assembly Decolonization Committee meets during the last week of August 1978, it may vote to place Puerto Rico on its list of non-self-governing territories. Due to a decided increase in anti-American hue during the last year, the committee may approve a Cuban proposal that Puerto Rico, despite its Commonwealth status, should be considered as a colony of the United States.

This effort will be to place Puerto Rico on the list of territories governed by article 73 of the United Nations Charter ("Declaration on Non-Self-Governing Territories"). It is important to note that Puerto Rico was removed from this list by a vote of the General Assembly in November 1953 following the advent of Commonwealth status. As stated by the U.N. resolution removing Puerto Rico, the General Assembly:

Recognize(d) that, in the framework of their Constitution and of the Compact agreed upon with the United States of America, the people of the Commonwealth of Puerto Rico have been invested with attributes of political sovereignty which clearly identify the status of self-government attained by the Puerto Rican people as that of an autonomous political entity.

Governor Romero has announced that he will take the courageous and unprecedented step of participating in the U.N. debate to represent the legitimate rights of the Commonwealth and people of Puerto Rico. It is anticipated that he will make at least three points: First, Puerto Rico is a Puerto Rican matter and not a Cuban one; second, President Carter's reaffirmation of self-determination is to be applauded; and third, the matter of Puerto Rico is one whose ultimate destiny will be decided by Puerto Rico and the United States without any outside interference.

The past 26 years have been ones of growth and progress for Puerto Rico, economically, socially, and politically. While much remains to be accomplished, the successes of this unique democracy have been an example to that area of the Western Hemisphere, serving to demonstrate the strength and vitality of her people. Governor Romero is to be congratulated and supported in his efforts to continue this progress and protect the rights of self-determination for the people of Puerto Rico.

The Government and the people of the United States must help in this effort to continue this great experiment and protect it from being subverted as a propaganda tool for foreign interests. In honor of the 26th anniversary of Puerto Rico's Constitution Day, the American people salute and stand beside that nation in defense of her rights to self-determination.●

GOVERNMENT AND THE AMERICAN FARMER

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. FINDLEY. Mr. Speaker, recently an article appeared in the Quincy Herald-Whig, written by one of the Midwest's outstanding agricultural journalists, Keith Wilkey, which pretty well summarizes the history and growth of the Federal Government interacting with American agriculture. I found it to be an interesting article, and I encourage my colleagues to read the following clipping keeping in mind the enormous impact that Government has today on the role of the American farmer.

NO MIDDLE GROUND FOR GOVERNMENT AND FARMERS

There has been a complete generation of farmers that has never known anything but government farm programs. They perhaps haven't participated personally in these practices, but throughout their farming career, a sort of partnership between government and farmers has existed. It has been a way of life.

But it wasn't always so. The first government assistance for farmers was seriously proposed just 50 years ago this month.

Speaking in West Branch, Iowa, his birthplace, Republican presidential nominee Herbert C. Hoover, on August 21, 1928, proposed the creation of a federal farm board to deal with the low commodity prices and surplus stocks of grain farmers.

Hoover was elected and was successful in getting through Congress the Agricultural Marketing Act, and signed it into law on June 15, 1929. The Federal Farm Board was created as a result of this legislation.

Both the Farm Board and other organizations, plus the administration felt that a businessman should head the newly created agency. Money was not appropriated as a direct subsidy to agriculture, but as a revolving fund: $500 million was placed at the disposal of the Farm Board to stabilize prices.

With the revolving fund, the Farm Board was authorized to buy various farm commodities then in surplus condition, to be released to the market when supplies diminished, and consequently the price improved.

The Farm Board had hardly started when the stock market crash of October 29, 1929, occurred. The general economy gradually fell to pieces. Farmers had produced most of their crops on credit and could not sell them. The panic in farm prices paralleled the panic in business and industry.

The Farm Board made loans to wheat and cotton farmers, which helped momentarily, but the ferocity of the depression whirlwind could not be withstood.

As prices declined, surpluses increased. The Farm Board asked for a 30 percent voluntary crop reduction for the 1932 crop. But the '32 crop was bigger than ever.

With the election of 1932, all farm programs then in effect came to an end. The Farm Board was all but disgraced as the members, puzzled by the savageness of the depression, returned to their homes.

America has never experienced another similar depression. Many strong men actually feared the U.S. economic and political system would fall. Passions were high and fear stalked the land. Those in government, like those in the private sector, wanted to help, but no one was sure just what to do.

At the time the Farm Board and its principles were ridiculed. But every farm program the government has had has been actually a continuous program, under different names, administered by both Democratic and Republican administrations and Congresses, has employed the principles of the Federal Farm Board of 1929.

Government purchases of commodities, done today by the Commodity Credit Corporation (CCC), the present day Farm Board, works reasonably well during times of price stability and/or price rises.

In a plummeting market, such as was experienced in the early 1930's, these practices cannot function, for the orderly processes of marketing are virtually immobilized.

The Farm Board was like all its successors, including the Food and Agriculture Act of 1977. Either the government enters and becomes directly involved with market agriculture, or it stays out.

Such philosophy has been argued by government leaders and others from 1928 to 1978. The wisdom of government action is as much a matter of controversy today as 50 years ago.●

FULL EMPLOYMENT NEEDED NOW

HON. AUGUSTUS F. HAWKINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. HAWKINS. Mr. Speaker, I want to comment briefly about what appears to be a mysterious phenomenon, one which I hope will end very quickly. This mysterious phenomenon—entirely without rational explanation—is a slowdown in manifest determination, through national policy, to deal with the problem of unemployment and even to continue 6-percent unemployment as a hedge against inflation. On March 16, 1978, this House approved the Humphrey-Hawkins bill, the "Full Employment and Balanced Growth Act of 1978," by a majority in the neighborhood of 100 votes. This approval was not lightly undertaken. It was preceded by years of careful consideration and public discussion of the bill. It includes months of negotiations between representatives of the President and representatives of my office and the late Senator Hubert Humphrey's office, culminating in complete agreement about every word and comma in the bill, and the unqualified endorsement of President Carter.

On the Senate side, two committees, the Committee on Human Resources and the Committee on Banking, Housing, and Urban Affairs voted to bring the bill to the Senate floor.

While there is speculation in some quarters—which I do not share—that the bill may not even be disposed of by the Senate at this session of the Con-

gress, commonsense dictates action not apathy.

I must emphasize that what I am saying here today involves no criticism of the other body nor of any Member, since I understand the nature of the Congress overwhelming legislative responsibility. But I am also equally concerned about the approximate 1 month of vigorous congressional activity before adjournment now scheduled for early October, and the question of scheduling the full employment bill for Senate action before adjournment.

Both Houses of the Congress therefore, in my judgment, have a serious responsibility for coming to grips with the formulation of a national economic policy on employment, and for promoting prompt enactment of the "Full Employment and Balanced Growth Act of 1978," which fundamentally addresses this issue.

For all of these reasons, I have been searching for an explanation for the deterioration of congressional interest in bringing this important piece of legislation to enactment and to effective operation which was so manifest earlier this year, and even much earlier.

Certainly, no rational explanation can be found in ignoring the current and foreseeable unemployment situation in the United States. Full-time unemployment as officially measured was 6.2 percent in July 1978, or higher than the average for the first 6 months of 1978. This 6.2-percent rate of unemployment occurred, not during a year of recession or during early stages of recovery, but instead occurred after more than 3 years of a so-called recovery movement. This 6.2-percent rate of unemployment should be compared with 4.1 percent in 1956, 2 years after the recession year 1954, 5.5 percent in 1959, 1 year after the 1958 recession, and 4.9 percent in 1973, 3 years after the 1970 recession. These comparisons hardly indicate that we have made even a tolerable economic recovery. Indeed, the 6.2-percent unemployment rate in July 1978, and the average rate only slightly below that during the first 7 months of 1978, was higher than the unemployment rate of only 5.5 percent in the recession year 1954, only 4.9 percent in the recession year 1970, and only 5.6 percent in the recession year 1974.

Nor is the apparent disappearance of adequate concern about unemployment justified by other measurements of economic trends, nor by informed—and troubling—forecasts as to our economic future. In real terms, total national production was about 5 percent higher in 1977 than in 1976. But in the first quarter of 1978, it was the same as in the fourth quarter of 1977.

Now after a brief resumption of a high growth rate, a slowdown is in process again. Most reliable forecasts indicate a real economic growth rate of somewhere between 2.5 and 3.5 percent during the next year or so, with substantial chances of another absolute recession before the end of 1979. Viewing the tendency of the five most recent recessions to be of increasing severity, it appears that under current national economic policies and those now under active consideration, we may suffer an unemployment rate of 7 to 9 percent or even higher before the end of 1979.

We have heard recently that inflation has supplanted unemployment as our No. 1 domestic problem. Even if this were the case, it would have nothing whatsoever to do with the imperative need to achieve more satisfactory and comfortable results regarding the reduction of unemployment. This is urgent because an official rate of 6.2 percent imports a true unemployment rate of almost 9 percent, and especially in that the unemployment rate of 6.2 percent means an unemployment rate above 15 percent for all teenagers and coming perilously close to 40 percent for black teenagers. How long can this continue, without progressive alienation, increased human demoralization, and dangerous recurrences of civil disturbance?

Equally foolhardy is the deviously promoted campaign to misrepresent the need and public demand for genuine tax relief, or reform, as an excuse to irresponsibly cut Government expenditures for high priority domestic needs in order to shift the tax burden from those already undertaxed to those in the middle- and low-income brackets.

But the entire proposition that inflation has supplanted unemployment as our No. 1 domestic problem is absolutely unsupportable. It is unsupportable because the evidence has increased year by year and month by month that tremendous idleness of human power willing and able to work, and tremendous idleness of plant and other production resources, are at the heart of the inflationary problem itself. The empirical evidence during the past quarter century that more unused resources mean more inflation, and that less unused resources mean less inflation has by now become so weighty that it was the accepted view of those Members of this House who spoke when the "Full Employment and Balanced Growth Act of 1978" was approved by the House. It is also the accepted view, on the record, of the two Senate committees who have concurrent jurisdiction regarding the proposed legislation.

The most recent experience is all in the same direction. The scarcities and other evils generated by high idleness of human power and other production powers, the hurtful effects upon productivity growth under these conditions, have increasing inflationary impacts when they have continued for many years. The reappearance of double-digit inflation, after an intolerable rate of inflation even before that, has occurred with the pronounced slowdown in the real rate of economic growth. Concurrent with these factors is the most recent evidence that unemployment is not really being reduced and in fact is moving upward again. Most forecasts, which are projecting dismal predictions about real economic growth and about unemployment, indicate that there will be little or no relief from an intolerably high rate of inflation. The only real road to the reduction of inflation is the reduction of unemployment and of other idle resources.

The size of the Federal deficit, especially as it impacts on employment, is a matter of special concern, to those of us who are advocates of a full employment economy, so it is encouraging to note that the deficit has moved sharply downward in the recent past, and is likely to be even lower in the next fiscal year. But everyone who looks at the facts knows that this reduction in the deficit is not due to skillful management of the Federal budget, nor to cuts in spending, nor to restraint thus far with regard to some of the excessive tax cuts which may be on the way.

Everyone who looks at the facts knows that the huge deficits occurred because of abysmally low economic performance and extremely high unemployment; that the deficits have been reduced, though not enough, because we have now been in a recovery movement, although a sadly insufficient one, for about 3 years; and that the deficit will rise again and hit new peaks if forecasts about another recession and an accelerating upward movement in unemployment are borne out by actual developments.

Finally, the mysterious disappearance of adequate pressures for immediate enactment of the "Full Employment and Balanced Growth Act of 1978" cannot be attributed to some brilliant and sudden discovery that the provisions of the act are no longer adjusted to current and foreseeable economic conditions. No such claim has come from any creditable source. To the contrary, the only opposition to the proposed act comes from those who have opposed it, over the years, and whose unsupportable pleas were overruled by this House when it approved the Humphrey-Hawkins bill on March 16, 1978. More than this, there is more evidence every day that the core features of the Humphrey-Hawkins bill are even more needed now than previously—if that be possible.

Everyone is talking and writing about the intensification of our current difficulties in the formulation of national economic policies, but most of the explanation of these tend to be sensational and superficial.

There are complaints that the President and the Congress are at odds over this issue, but this is partly because we do not have the provisions of the Humphrey-Hawkins bill which would establish systematic and periodic procedures for bringing the administration and the Congress closer together. We complain that we do not seem to be heading anywhere as an economically viable nation, but this is because we have not adopted nor even expressed the definite goals which enactment of the Humphrey-Hawkins bill would establish. We all know that, through recent enacted legislation and currently pending legislation, we are moving in conflicting directions simultaneously. Thus we continue to take one jump in the dark after another, because we have not adopted and put into operation the one piece of legislation which would make so powerful a contribution toward development and application of a consistent, unified, and comprehensive national economic

policy. Until we have such legislation, we will not be able to effectively measure the pros and cons regarding success or failure of legislation already put into effect, and thus we will continue to make the same blunders in 1979 and 1980 that we have been making during the past decade and longer.

On top of all this, in the international economic arena the dollar is going to you know where in a handbasket. We have not stopped to consider that the most fundamental of all reasons for this is the poor performance of the U.S. economy, and the inability of others to discern what our evolving national ecomic policies are going to be because we appear not to know what they were last year, what they are now or what they will be in the future.

This House should be proud of the fact that it has made available to the Congress, the President and the American people the opportunity, through enactment of the Full Employment and Balanced Growth Act of 1978, to think more clearly about national economic policies, to act more wisely, and to achieve improved results. I hope that all those who have spent so much time and effort toward enactment of the Humphrey-Hawkins bill will formidably reassert and dramatically intensify their efforts to demand congressional passage of this bill during the days immediately ahead, so that the opportunity which this House made available when it approved the Humphrey-Hawkins bill will be translated into achievement.●

PASSAGE OF THE TUITION TAX CREDIT BILL BY THE SENATE

HON. LAWRENCE COUGHLIN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. COUGHLIN. Mr. Speaker, it gives me great pleasure to comment today on the passage of the tuition tax credit bill by the Senate on Tuesday night. Many of us in both the House and the Senate, who have worked long and hard for the chance to provide middle-income families with the educational assistance they so desperately need and want, can feel a real sense of accomplishment in the passage of tuition tax credit measures by both the House and the Senate.

I first began my efforts on behalf of education tax credits eight years ago in the 91st Congress with the introduction of a bill which would have provided income tax credits for higher education. Eighty-seven of my colleagues joined me in cosponsoring the same bill in the 92d Congress, and during the same year I first sponsored a bill which included parents of students attending elementary and secondary schools. In the following Congress, the number of cosponsors of some form of tuition tax credits for higher education rose to 103, and I am pleased to say that during this session, over 250 Members sponsored 170 bills to provide some form of tuition tax relief before passing the tuition tax credit bill on June 1, 1978 by the overwhelming vote of 237 to 158. The Senate, before strongly approving the tuition tax credit bill by a 65 to 27 vote Tuesday, had passed some form of education tax relief six times since 1967.

I hope that President Carter now realizes the irrefutable popularity of tuition tax credits, and reconsiders his threat to veto this fair and sensible bill. He can certainly see that this concept is the will of the Congress by looking at the substantial margins by which both the House and the Senate passed the bills. He cannot deny that tuition tax credits are also the will of the people, as shown by both a recent Harris poll showing that a 65 to 25 percent majority of Americans support tuition tax credits, and by the recent trend seen throughout the country of support for lower taxes.

I personally regret that the tuition tax credit bill passed by the Senate does not include an education tax credit for parents of children in elementary and secondary schools. The conferees will face a great challenge in attempting to reconcile the differences between the two bills, and I truly hope that a suitable compromise can be reached expeditiously.●

EQUAL RIGHTS AMENDMENT

HON. JOSEPH L. FISHER

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. FISHER. Mr. Speaker, the House has passed a resloution to extend the ratification time limit for the equal rights amendment. I am a long-time supporter of the ERA. I voted for the extension resolution and against the Railsback amendment allowing for recission by a State which has previously ratified the ERA. I would like to set forth my reasons for voting as I did. Much has been said about matters of extension of time, rescission of ratification and the like. On these matters I will say more later but let me address first what I feel is the central issue.

The central issue to me—one which has been overshadowed in the recent months of debate—is the equal rights amendment itself, and the meaning behind it. There are those who have said that the amendment is unnecessary, that any inequities that still exist—and there are many—can be settled individually by court case or by legislation. I say that these people are missing the central point.

The greatest thing that this country really had going for it in the 1770's was a philosophy, a fundamental belief that every person had the same inalienable rights as every other person. This was a philosophy that was quite new to the rest of the world. The United States wrote its Declaration of Independence around that principle. Our ancestors went to war because of that principle. They tried to base our Government upon that principle.

The philosophy with which we started is contained in our basic Government document—the Constitution. Any statement reaffirming the principle of equal rights should be included in that document as well. Piecemeal legislation and individual court decisions simply will not have the same symbolic importance.

We have heard in the last few months, many arguments opposing the extension resolution. Much has been said about the constitutionality of an extension of the time limit. The argument is that Congress retains only those powers specifically conferred upon it by the Constitution, and that since the Constitution does not expressly state that Congress can extend the deadline it set on this amendment, such an extension is unconstitutional. Well, I thought about this point, and it seems to me that if this is true, then the imposition of any time limit at all must also be unconstitutional, since the Constitution does not specifically confer upon the Congress any power to set ratification time limits.

Much also has been said about rescission, the argument being that if the time limit were extended, then rescission must be allowed in order to be fair to those States that have changed their minds. I feel that the responsibility the amendment process involves must be taken seriously by each State, and the sanctity of a ratification must be preserved. If there is a question about the validity of a particular State's ratification, then that matter should be decided by the Congress sitting at the time of the last ratification required for passage.

In summary, Mr. Speaker, I believe the House has taken the proper course. The equal rights amendment should become a part of the Constitution, and States such as my own should be given more time to consider it. The full Virginia General Assembly has never voted on the ERA. Now they have time to do so.●

FEDERAL TRADE COMMISSION REPORTS

HON. JOHN E. MOSS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MOSS. Mr. Speaker, last year, I called to the attention of the House a U.S. district court order upholding the Federal Trade Commission's line of business and corporate patterns reports. Those two report forms seek financial information that will enable the Commission to compile a large economic data base concerning industry concentration, diversifications, expenditures, and profitability. These data are valuable to the Commission, the Congress, and the public for aiding antitrust investigations, setting economic and antitrust policy, and making investment decisions.

In recent years, detailed financial information about various industries has become unavailable as smaller industries have been acquired by giant conglomerates. I have therefore enthusiastically supported the Commission's programs to obtain this information, and I and other

Members of Congress have strongly opposed past efforts to deny appropriations for the Commission's efforts.

Accordingly, I am pleased to note that the district court's enforcement of the line of business and corporate patterns reports was recently affirmed by the court of appeals. Unfortunately, because of continued resistance by a minority of the companies involved, the Commission has not yet received reports from all respondents. I look forward to the time when this protracted delay is terminated and the Congress can receive and employ the Commission's published reports and analyses of this information.●

BUSINESS COMMUNITY COOPERATION TO IMPROVE EDUCATION IN NEW ORLEANS, LA.

HON. LINDY BOGGS

OF LOUISIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mrs. BOGGS. Mr. Speaker, I would like to share with my colleagues news of an innovative effort in my district to improve primary and secondary education through the assistance and cooperation of the New Orleans business community.

In response to studies which show that poor education is a detriment to local economic development, the New Orleans/River Region Chamber formed a business task force on education. Recently the task force agreed to conduct a management assistance study of the New Orleans public schools, and the agreement is a real landmark in cooperation between business and education.

The task force will not produce "just another study" which will gather dust after the press releases are issued. Local leaders in business, education, and the city government have pledged to continue to work together to implement the findings and recommendations of the study to improve education for the area's children.

Other communities may wish to study the example of the New Orleans Business Education Task Force, and therefore I include in the RECORD a summary of the plans and progress of the management assistance study.

BTF TO IMPLEMENT STUDY OF NEW ORLEANS PUBLIC SCHOOLS

Martin C. Miler and Floyd W. Lewis, representing the Business Task Force on Education, Inc. (BIF), today signed an agreement with Drs. Mack J. Spears and Gene A. Geisert, president and superintendent of the Orleans Parish School Board, to implement a Management Assistance Study of the New Orleans Public Schools. Miler is the BTF chairman, and Lewis is chairman of the BTF's Management Assistance Team.

The study will be the first of its kind in the country between a public school system and the business community where senior officers are loaned from local business and industry to design and carry out the project. These volunteers will be recruited by Walter J. Amoss, Richard W. Freeman. Jr., T. R. Fiddler and G. Frank Purvis, Jr., all BTF members.

The study, expected to begin shortly and require eight to ten weeks for completion, will examine revenues and cash management, extramural resources, budget development and control, financial and audit systems, facilities management and maintenance, and long-range planning and evaluation. Members of the school staff will work with the loaned executives in each of the study areas.

The BTF, organized to strengthen elementary and secondary education in Orleans Parish, is composed of 31 chief executives of business and industry. Important to the BTF effort is a thorough understanding of the resources now available to the New Orleans Public Schools, how those resources are being managed and used, and the efficiency of such management and use. The study is designed to provide this understanding, and will enable the BTF, in cooperation with the New Orleans Public Schools, to develop methods for improving efficiency of the use and existing resources, in the event a need for this should be indicated, and to work for the identification and acquisition of additional resources as needed.

Miler, chairman of the Board of Hibernia National Bank in New Orleans, also presented the five year goals of the BTF, which are:

1. To create an active, viable constituency within the business community and the total community that would support educational improvement, especially in the public school system;

2. Systematically review and delineate the financial needs of the school systems, seeking additional modes of support if such funds are needed and justifiable;

3. Provide sound business advice and expertise to the public and non-public schools for improving educational services and programs;

4. Seek out and help redirect federal and state support, as available, to strengthen the financial base of the local school systems;

5. Assist in improving the economic strength and competitiveness of New Orleans by insuring that high school graduates possess the requisite basic skills needed to participate effectively and productively in the labor force.●

DAWNE NAPUAMOHALAONAONAA-MEKAWEHIWEHIONAKUAHIWIA-NENAAWAWAKEHOOMAKAKE-HOAALAKEEAONAAINANANIA-KEAOHAWAIIKAWANAAO LEE

HON. CECIL (CEC) HEFTEL

OF HAWAII

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. HEFTEL. Mr. Speaker, what's in a name? If Shakespeare had known Dawne N. Lee of Honolulu, he wouldn't have asked.

It is a pleasure to include the following article from The Honolulu Advertiser for the enjoyment of my colleagues. As you will see, in Dawne's case, there's a great deal in a name.

A TRIBUTE TO THE RECORDHOLDER FOR THE LONGEST CHRISTIAN NAME IN THE WORLD

(By Beverly Creamer)

People laughed 11 years ago when longtime Hawaii musician William K. "Billy" Lee gave his new daughter an enormously long Hawaiian middle name that means something about the blossoms smelling good in Hawaii.

"She's going to get writer's cramp," people told him.

There were no less than 102 letters in her middle name. It wasn't until that baby Dawne N. Lee, was eight years old that she finally mastered the delicate art of just saying the thing.

"My father taught me," she says.

Even today, at 11, she can't spell it yet.

"I can just say it," she says. "My friends at school keep asking "what was your middle name again?" One of them memorized it. It took a week."

But today Billy Lee, now 73 and the one who concocted that typically Hawaiian middle name and tagged his youngest child with it, is having the last laugh.

For as far as anyone knows, Dawne's middle name is the longest Christian name in the world.

And because of that Dawne has been invited to appear on Japanese television on a program roughly equivalent to "What's My Line."

She and her parents, Billy and Agnes, have received an all-expenses paid trip to Japan from the Nippon Television Network, Japan's national TV network. They leave Aug. 20.

"We're practicing now for her to do the hula over there," says an excited Billy. "And I'm prepared to do one or two songs too."

Lee is also the father of the late Kui Lee, popular and beloved Hawaii singer and songwriter who died of cancer in 1966. Kui was the youngest child of Lee's first marriage. Dawne is the youngest of his second.

It all happened, apparently, because of the Guinness Book of World Records.

Dawne's middle name (and we'll tell you what it is any minute now) has been listed in it for a number of years as the longest Christian name in the world, even though they didn't spell it right, says Billy.

It has been misspelled in every edition but Lee never bothered to have it corrected because he figured "the damage is already done." He still doesn't know how the Guinness people got it.

Anyway, the people at Nippon TV saw her name in the 1977 edition and late last year decided to trace Dawne. They sent a representative, Tsugio Saotome, to Hawaii to find her.

And that's where it got complicated. "Saotome went all over Honolulu asking people if they knew Dawne Lee and her family, chuckles Billy. No one could help him so he turned to the governor for help.

Al Miyasato, one of Gov. George Ariyoshi's administrative assistants, entered the picture.

"The guy couldn't speak English at all and naturally they sent him to me," says Miyasato, the only person in the governor's office who speaks fluent Japanese.

"He walked in with this book in his hand, the Guinness Book of World Records."

Miyasato got in touch with the state Department of Health's Bureau of Vital Statistics to see if someone there could track Dawne. And that's where everyone got lucky.

"The deputy registrar over there knows me and knew my baby had that long name because they struggled to get it on her birth certificate," says Billy, picking up the story.

"They made one error too," he muses. "They left an 'a' out."

With the knowledge of whose child Dawne N. Lee was, Miyasato sent the Nippon TV representative over to the Lee home on Aala Street.

"He came in a taxi cab frantic as heck," remembers Billy. "His hair was disheveled, he looked like he had been beat up. He had this overcoat on.

"We brought him up here and gave him a beer and let him rest first. Then I sang a couple of songs for him and Dawne did one or two hulas."

Over his beer and dinner that night the Nippon TV man heard the Lee life story and how Billy had once spent two years

as a traveling musician cum baseball player with a Hawaiian band in Japan. (Billy still speaks Japanese.)

That was from 1925 to 1927 and Lee played his drums, sang and even danced hula for Madame Tenkatsu's magic show extravaganza.

Billy had to dance the hula because the Japanese police refused to let his wife do it. "The Japanese considered that immoral back then," he chuckles. (On the side the band played baseball.)

A few months after the Nippon TV representative returned to Japan, the Lees were officially invited to Japan. But along with that invitation came a request for a full explanation of Dawne's long middle name.

Billy has a whole story for it.

It all came to him, he says, the night Dawne was born, just before midnight Feb. 21, 1967 at Kaiser Foundation Medical Center.

He had left his wife and new baby at the hospital and gone to the Ilikai for a snack. Afterwards, maybe 4:30 a.m., he was walking home across the YMCA grounds in Waikiki.

"A very slight breeze was blowing and I smelled the sweet fragrance of flowers... ginger, mock orange . . . and the dew on the grass," he says. "And it was close to dawn."

So they named the new baby Dawne. But then it took Billy another 20 minutes or so to come up with the rest.

For that he pulled from his boyhood memories of what it was like smelling the flowers as he hiked through Hawaii's valleys and mountains. *Voila,* his daughter's name was born:

"The abundant beautiful blossoms adorning the mountains and valleys begin to fill the air with their fragrance throughout the breadth and width of the glorious Hawaiian islands at dawn."

In Hawaiian, it goes like this, and it has been broken down into syllables for easy reading though it really should be run all together.

"Na-pua-mohala-onaona-a-me-ka-wehi-wehi-o-na-kuahiwi-a-ne-na-awawa-ke-hoomaka-ke-hoaala-ke-ea-o-na-aina-nani-akea-o-hawaii-i-ka-wanaao."

How they're ever going to say that on Japanese television is anybody's guess.●

A SALUTE TO A DISTINGUISHED AMERICAN

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. O'NEILL. Mr. Speaker, I want to take this opportunity to pay a special tribute to one of America's most respected and admired soldiers, Col. Lloyd L. "Scooter" Burke. With great honor and distinction, Scooter Burke gave 34 years of dedicated service to the Army of the United States.

Scooter Burke has recently retired after 11 years as the Army's Chief Liaison Officer for the House of Representatives. It was in this capacity that I became acquainted with him. Through his untiring efforts to strengthen the efficiency and support assistance of the Army's service operation in the House, the Army Liaison Office has become an integral part of every Member's constituency service. The importance of the Army Liaison Office is measured by the fact that all members—freshmen and seniors alike—must rely on the liaison office to help them cut the redtape of the Pentagon bureaucracy to assist their constituents with their problems.

Those of us who were privileged to work with Scooter Burke over the years quickly learned to admire and appreciate his competence, diligence, and resourcefulness in directing an active and responsive service organization. He has earned the gratitude of all the Members of the House of Representatives who have called upon the services of his office, just as he won the admiration, support, and respect of all the soldiers who served under him on the battlefield.

I know I speak for all the members of the House of Representatives who have known Scooter Burke in expressing our sincere gratitude and appreciation for a job well done. To Scooter and his family, I wish them every success in the years ahead.●

LABOR REFORM

HON. JOHN H. ROUSSELOT

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. ROUSSELOT. Mr. Speaker, despite the recommittal by the Senate of H.R. 8410, the so-called "Labor Reform Act," there is still a chance that the issue will be reconsidered before the end of this 95th Congress. It is unfortunate, in my judgment, that a "labor reform" bill should be used to facilitate the organization of employees when there are real issues affecting the civil rights of labor union members which are not addressed by H.R. 8410.

Douglas Caddy is a noted attorney and authority on labor law who has written several books, including one on labor union political activity entitled "The Hundred Million Dollar Payoff." Doug Caddy has recently written a thoughtful article on the subject of labor law reform entitled "Can Organized Crime Be Eliminated From Labor Unions?" which appeared in the July 1, 1978, edition of Human Events.

I urge my colleagues to read this article because it contains many interesting facts which may alter the perspective from which Members may view the issue of labor law reform. The following are some pertinent excerpts:

CAN ORGANIZED CRIME BE ELIMINATED FROM LABOR UNIONS?

(By Douglas Caddy)

For years prominent law enforcement officials have propagandized the public on innumerable occasions, without their statements ever being challenged, that organized crime is attempting to take over organized labor. Recently, for example, one Justice Department prosecutor with experience in the area declared: "Organized crime in labor is probably the most serious problem in the criminal field It overrides everything else. I can name four national urions now in the hands of hoodlums. And [the Department of] Labor is not doing the job of getting at them."

Are these dire assessments true or are they merely the stuff put out for public consumption to keep law enforcement budgets generously funded?

Strangely, after years of public rhetoric on hoodlum penetration of labor unions, Congress only recently got around to holding an inquiry into the subject when the Senate Permanent Investigations subcommittee sponsored two days of hearings in April. (*Organized Crime Labor Racketeering Investigations*. Hearings before the Permanent Subcommittee on Investigations. Committee on Governmental Affairs, U.S. Senate, April 24–25, 1978. Available in late summer. Single copies free from the committee, Room 101, Russell Senate Office Building, Washington, D.C. 20510.)

Sen. Sam Nunn (D.-Ga.), who chaired the hearings, set the tone in his opening remarks:

"The dollars paid into union treasuries and pension and other benefit plans by rank-and-file union members should be as safe as money in the bank and have to be protected against exploitation by criminals. . . .

"The purpose of these hearings is to seek clarification, to inform the Senate of the magnitude of the organized crime labor-management racketeering problem as seen not only by the Department of Justice but by the Labor Department as well."

Ranking Minority member Sen. Charles Percy (R.-Ill.) in his opening statement articulated his concerns:

"In the 1950s this subcommittee, under the distinguished chairmanship of the late Sen. John McClellan (D.-Ark.), launched a massive three-year investigation into corrupt practices in labor-management relations. That investigation resulted in passage of the historic Landrum-Griffin Act, which gave the Department of Labor a key role in eliminating organized crime from the unions, mandated by law.

"It is now all too apparent that labor-management racketeering has not disappeared in the 20 years since those hearings."

What is at stake in organized crime's inroads into the union movement? A key witness before the subcommittee, Justice Department official Robert Stewart (from whom more will be heard later), zeroed in on this:

"What we have here today is the exact same problem as in the 1950s involving many of these exact same suspects, but the problem has become infinitely more difficult because of the financial sophistication which has been developed to circumvent the labor reform legislation. And the prize today is some $40 billion in benefit fund assets which are not adequately protected because the government does not have the legislative tools and the investigative and prosecutorial resources to enforce the regulatory legislation which is in the statute books."

No one who sat through the two days of hearings or who has read the hearings' transcripts of the testimonies of 11 Justice Department and four Labor Department officials can fail to come to one inescapable conclusion: The U.S. government program to ferret out organized crime in organized labor is a bust, a massive failure, mere bark and no bite, only a cream puff, and taken as a whole, is virtually non-existent. This, after decades of rhetoric and budgets of millions to fight crime.

As witness Stewart declared in his testimony:

"The unfortunate reality of today is that little or no progress has been made to control labor racketeering over the past 20 years, despite some good legislation. The same schemes and the same forces and the same tyranny dominate the field of labor racketeering today as they did during the original McClellan Committee hearings.

"If no progress is made in the next 20 years and if the present rate of improvident

investments and outright looting continues, this nation will face a benefit fund default of catastrophic proportions. The statutory framework to protect the assets of organized labor is generally sound . . . but those laws are not being obeyed in either letter or spirit in far too many cases and they will not be obeyed in the future unless there is a drastic improvement in the government's enforcement capabilities."

At the core of the failure of the government's anti-crime program lies a serious defect, a loophole, in the Landrum-Griffin Act: The Act places the power to enforce the law in the Labor Department, not the Justice Department. Observed Percy at the hearings:

"There are persistent indications that the Labor Department has deliberately shied away from taking an aggressive role in ferreting out the corrupt and venal persons—interested only in personal gain and power—who hold sway over certain unions to the detriment of the rank-and-file.

"In light of this, suggestions voiced over the last few months before congressional committees that the Labor Department would all but end its participation in the Organized Crime Program are almost unbelievable. . . ."

Responsibility within the Labor Department for fighting crime lies in the Office of Labor-Management Standards Enforcement. By statute, Compliance Officers located in this office have the primary investigatory responsibility to enforce key criminal labor laws. Yet, Deputy Atty. Gen. Benjamin Civiletti, testifying before the Senate subcommittee, complained that when the Justice Department last year conducted a survey of its Strike Forces, "we could only find 44 Labor Department employes working in the Strike Forces. Most of them were not full time, and we estimated they were working about 28 man-years, as the Labor Department would measure them."

The Justice Department's Strike Forces, recently increased to 15 with the addition of New Orleans, are its principal anti-crime tools. The Strike Force concept is that attorneys from the Justice Department, from the inception of a criminal investigation, work with the investigative agents from the various federal agencies charged with conducting criminal investigations. Thirteen different agencies participate in the Strike Force Program, including Labor Department Compliance Officers.

Sen. Nunn was critical of Labor's poor record of participation. The Senate committee's "staff inquiry shows that over the last four years there has been an erosion of the [Labor Department's] support. Strike Force attorneys interviewed by the staff have complained that the manpower made available by the Labor Department has declined to a point where many labor-management racketeering cases cannot succeed because no one is available to work them."

Percy echoed his fellow senator, pointing out:

"The Strike Forces, almost out of desperation, have turned to the FBI for help. The FBI has responded well, but is far more limited in its access to the underlying evidence of corruption—the union's financial records—and has little experience in this complex area of investigation."

A big difference exists in the powers of an FBI agent and a Compliance Officer in union crime cases. As Civiletti observed, "Compliance Officers have contacts in the labor movement who can and do provide such information. The FBI does not have authority to obtain access to records kept by labor unions without a grand jury subpoena. Compliance Officers have such authority."

A graphic indication of the low priority of the Labor Department in combatting crime, although mandated by Landrum-Griffin to do so, is its budget request for FY 1979 which asked for only 15 Compliance Officers to be assigned to Strike Forces. This is a ridiculous number from a government agency supervising the expenditure of $25 billion annually. When that extremely low, almost purposely insulting, figure became public, key senators reacted with alarm. So, according to Sen. Nunn, "On March 9, 1978, Senator Percy and I wrote to Atty. Gen. Bell expressing the subcommittee's concern that such a reduction [to 15] in Labor Department manpower might seriously impair the Justice Department's capability to pursue criminal violations of the labor laws."

For every action there's a reaction and the Nunn-Percy letter produced just that. On April 13, about two weeks before the Senate hearings were to start, Secretary of Labor Ray Marshall announced that the Justice and Labor Departments were about to conclude a new agreement concerning the Labor Department's participation in the Organized Crime Program. The next day, April 14, Marshall sent a letter to Atty. Gen. Bell indicating his intention to submit a revision in the FY 1979 budget to reflect an increase, to a total 125 Compliance Officers assigned to combat crime.

Clearly, Secretary Marshall's turnabout was a response to pressure being exerted by Senators Nunn and Percy. Even now, there are many who doubt that Marshall will remain true to his word in increasing the number to 125. "My enthusiasm is guarded," Percy said, "because, to date, participation by the Labor Department in the Organized Crime Program has been little more than a numbers game—some even consider it almost a charade."

Even if Labor Department personnel are beefed up, there still exist statutory and bureaucratic demands on these same personnel which will undercut their effectiveness.

For example, it is required by statute that challenges to union elections be resolved by the Labor Department within 60 days, so Compliance Officers working with Strike Forces are frequently called away on emergency assignments to resolve election disputes. This has obviously been disruptive when these Compliance Officers were conducting a complex labor-management racketeering investigation which often takes many months to complete, and which had to be shelved pending the resolution of the election dispute.

Another problem has been the rotational system imposed by the Department of Labor on its employes. Every 18 months a Compliance Officer is rotated out of the Strike Forces into another assignment. This has meant his replacement spends considerable time catching up.

Finally, a third problem exists in the Labor Department's practice of accounting assignments in man-years rather than men actually assigned. Assigning three men, one-third time to a Strike Force for a year is not as effective in conducting investigations as assigning one man full-time for a year.

The Senate hearings were unique in that among the witnesses were the heads of nine Strike Forces. If awards were given for public drama to witnesses at congressional hearings, these nine would be among the top contenders. Their testimonies thoroughly shocked the audience and alarmed the senators. When they had finished, Percy exclaimed that "in my 12 years in the Senate this has been one of the most valuable sessions I have had and some of the finest witnesses we have ever had. . . ."

Before the Strike Force heads began to testify, Nunn set the stage:

"We have encouraged each of the Strike Force attorneys to make a frank, candid assessment of their own individual districts and we have not asked them to get all of their opinions signed off for by the Justice Department.

"Once you do that, you have to go through OMB [Office of Management and Budget] and then have a never-ending process. So what we encouraged, frankly, is their own candid assessment of the situation. We did not ask them to speak officially for the Justice Department, but rather their individual views."

Deputy Attorney Gen. Civiletti, present at the testimony, admitted that even he had not read the prepared statements of the Strike Force heads.

* * * * *

What, then, can be concluded from these hearings into organized crime labor racketeering, the first such congressional investigation since the Landrum-Griffin Act was passed 19 years ago?

1. From the day Landrum-Griffin was enacted, under both Republican and Democratic administrations, the Department of Labor has sought to protect the labor movement, not necessarily the union member. A key part of this strategy has been to ignore its mandate to protect labor unions from corruption by organized crime. A successful investigation and prosecution of union corruption may take up to three years to complete. Yet there has been steadily weakening Labor Department participation in Justice Department Strike Force efforts against labor racketeering.

2. Since Congress passed legislation insuring pension funds, the task of investigating labor racketeering has become even more demanding. If organized crime can obtain control and use the vast assets of pension funds, amounting to tens of billions of dollars, the pension funds will eventually go bankrupt and the taxpayers will pick up the tab for funding organized criminal activity.

3. The Labor Department should fulfill is promise to commit a minimum of 125 Compliance Officers to ferreting out corruption. These men should be accounting-type fraud investigators and should be allowed to remain in their posts, without being rotated, until their jobs are done.

4. Should the Labor Department fail to commit adequate skilled manpower to this task (and its record over the past 20 years would seem to predict failure), then legislation should be passed transferring enforcement authority to the FBI and the Criminal Division of the Justice Department.

5. The Criminal Division of the Justice Department should be authorized to hire 50 to 70 additional prosecutors for its labor racketeering program.

6. Federal law should be amended to outlaw extortion by making it a felony for a union official to receive payments from two or more employers simultaneously or within a three-month interval; to forbid convicts from heading any union employment; to prohibit payment of attorney's fees or additional salaries or benefits to union officers accused or convicted of felonies; to forbid deprivation of a union member's rights by violence (the federal government's inquiry into the abduction and presumed murder of Hoffa ludicrously had to be based on a one-year misdemeanor).

7. The Labor Department should cease emphasizing civil actions over criminal prosecutions. The only way to ferret out corruption is through the criminal process. But the Labor Department has instead chosen the civil action route, which takes much longer, is less effective and allows the defendants to use union treasury funds to pay for their legal defense.

Thus, for example, the Labor Department last February with great fanfare filed civil suit against the trustees of the Teamsters Central States Pension Fund. In doing so, it gave the Justice Department only one day's notice. Observed Deputy Atty. Gen. Civiletti to the senators, "We did not have an opportunity . . . to fully study this suit, the persons against whom the suit was going to be brought, and whether or not the suit in time was premature and should be combined with

some other remedy relief sought or some other activities or should except out some individual defendants who may have been cooperating in the criminal investigation."

Such civil suits can only complement, not substitute for criminal prosecutions.

Jimmy Carter, at the 1976 Democratic convention, declared:

"We can end the double standard of justice in America. . . I see no reason why big-shot crooks should go free while the poor ones go to jail." To which all honest Americans still say, "Amen, brother," but must now wonder when their born-again President in the White House will begin to practice what he has preached.

Mr. Speaker, the article also contains revealing and intriguing excerpts from the testimony of members of Justice Department task forces. Members who are following the labor reform issue closely may wish to obtain copies of the full text of the Caddy article as well as of the hearings themselves.

AN EVALUATION OF THE SPECIAL SESSION ON DISARMAMENT

HON. ROBERT F. DRINAN

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DRINAN. Mr. Speaker, earlier this year I participated as a congressional adviser at the United Nations special session on disarmament, a conference with implications which go far beyond the session's 31-page final document.

Participants in the special session did not expect that nuclear disarmament would be an immediate result. Nor were they simply giving lipservice to the urgent need for international arms limitation agreements. The goals of the conference, and the criteria by which it should be evaluated, are the discovery and discussion of means by which different sovereign states view the arms race and the prospect of disarmament.

Evaluated on the basis of its own expectations, the special session was highly successful. It revealed the views not only of the superpowers who have the potential to destroy the world through nuclear holocaust, but also of the nonnuclear states who fear a forced dependence on the nuclear powers.

In providing a forum for discussion of these diverse views, the special session reflected the dynamic nature of the current political world order. Because a nuclear war would affect the entire human race, nonnuclear nations are rightfully becoming increasingly unwilling to accept the position of powerless "have-nots." This positive development, which was a constant theme in the discussions and decisions of the special session, reinforced the principle that each state is important in political decisions on arms control and disarmament.

I believe that the special session on disarmament demonstrated the usefulness of continuing, multilateral discussions on disarmament. I also believe that it helped to establish the spirit necessary to foster a SALT II agreement. I commend to the attention of my colleagues the following fine article on this subject by J. Bryan Hehir in the August 19, 1978, issue of America, the national Catholic weekly. Father Hehir, a member of the Vatican delegation to the United Nations special session on disarmament, evaluates the "modest but real" accomplishments of the session.

TOWARD A WORLD WITHOUT WEAPONS

(By J. Bryan Hehir)

HOW JUDGE THE RECENT U.N. SPECIAL SESSION ON DISARMAMENT? ITS ACHIEVEMENTS WERE MODEST BUT REAL, AS IN OTHER CONFERENCES WHERE GLOBAL CONCERNS COMPETE WITH POLITICAL RIVALRIES

The Special Session of the United Nations devoted to disarmament (S.S.D.) closed on June 30, concluding six weeks of debate, which produced a 31-page final document. The S.S.D. was the largest gathering in history devoted to the topic; it attracted several heads of state, although neither President Carter nor Chairman Brezhnev were among them. Pope Paul VI addressed a special message to the S.S.D. During the session, nongovernmental organizations (N.G.O.'s) played a sustained and significant role, climaxed by a special day set aside for N.G.O.'s to address the General Assembly. Among the N.G.O.'s, religious organizations, representing all the major world religions, made a substantial contribution officially and through the special participation of key N.G.O. representatives, such as Homer Jack (World Conference on Religion and Peace), Barry Hollister (Quakers) and Alan Geyer, all of whom were instrumental in publishing (throughout the S.S.D.) the informative and widely read Disarmament Times. These dimensions of S.S.D. were all important, deserving more attention than this article can provide, yet they do not address the central question: How evaluate the S.S.D.?

To answer this question it is necessary to establish criteria of evaluation for sessions of this type. Within the United States, two kinds of evaluation, mirror images of misperception, need to be resisted: those who expected nothing and those who expected everything from S.S.D. The first view, reflected often in passing comments in the media, is a species of self-fulfilling prophecy. U.N. sessions are by nature long, wordy, monotonous and ultimately unproductive. Supposedly a hard-headed and realistic view, such a position is often superficial and narrow. It fails to assess in any rigorous fashion what the capabilities of the United Nations are; such an omission, in turn, deprives the analysis of any nuanced perspective for sorting out the real themes of the meeting from the symbolic rhetoric that inevitably surrounds a gathering like S.S.D. The second view, expecting too much, similarly distorts the analysis by failing to assess what the United Nations can do on an issue as central to states as security and armaments. Expecting too much leads to disappointment because unrealizable objectives, when not fulfilled, overshadow the more modest results that are attained.

In setting forth these positions, the intent is not to contend with caricatures but to illustrate how expectations govern evaluation. At its present stage of development, the United Nations should be evaluated in terms of modest expectations. "Modest" does not mean "minimalist," but it does imply a careful calculus of how an organization of sovereign states (not a superstate) must deal with an issue as complex and as deeply rooted in the doctrine of sovereignty as the arms race. Such a modest perspective is able to acknowledge that a special session of the United Nations produces the following results: It highlights a key question facing the international community; it forces governments, through a process of peer pressure, to confront the problem and declare their intentions; it provides a comprehensive framework for review; and it concludes with a systematic response to the problem.

At the same time, a modest view will acknowledge from the beginning that it would be highly unlikely for any state to move in a U.N. session significantly beyond positions it had taken in more specific and detailed bilateral or multilateral negotiations (SALT or the Non-Proliferation Treaty). The atmosphere of the United Nations can provide a different framework for issues, but it provides neither a mechanism for coercion nor incentives for political conversion. Given these limits of a modest perspective, it is the burden of this essay to ask whether even modest achievements should be credited to the S.S.D. The S.S.D. can be tested by its relationship to other U.N. conferences on particular global issues, by its final product and by its linkage to other arms-control forums.

SPECIAL SESSIONS AND THE S.S.D.

The significance of examining the S.S.D. in relationship to similar meetings is that it isolates two characteristics that these sessions have in common. First, they are the only forum where problems that are not only transnational but universal in scope are examined by an assembly that is universal in its makeup. The S.S.D. is particularly illustrative; no one doubts that if the nuclear "moment of truth" ever comes, it will have implications for the entire human community (through direct attack, fallout, disruption of the minimal degree of political order that exists). Yet the forums in which the arms question is debated and decided are seldom broadly representative (e.g., SALT, Mutual Balanced Force Reductions).

Second, in the other specialized U.N. conferences (Environment 1973, Food 1974, Population 1974, New International Economic Order 1976), there has been a double agenda under review. On one level, the debate is about the specific technical issue at stake in the session (trade, arms, prices); on a second level is the pervading question of political order in the globe today. The political-order issue has pervaded these global discussions, seldom surfacing in specific terms but always shaping the nature of the debate. Whether it is the claims of "The 77" in the N.I.E.O. debate, or "The Non-Aligned" in the S.S.D., the unifying theme is the prevailing pattern of political order and the inability of those on the margin of power to influence key decisions that affect their states.

To ignore this topic of political order, more precisely this challenge to the present order, is to render an abiding dimension of a special session unintelligible. The case in the S.S.D. that illustrates the point is nonproliferation of nuclear weapons. This question split the assembly more decisively than any other issue precisely because it always involved more than the specific technical issues about proliferation. At stake in the proliferation debate is the way in which possession of nuclear weapons reflects prevailing patterns of political order, bestows major-power status and legitimates a division of the globe into (nuclear) haves and have-nots.

This distinction should not be overplayed in terms of its ultimate significance in world politics; it could be argued that Japan and West Germany, nonnuclear states, exercise greater influence through economic power than Britain, France or China wield with their nuclear stockpiles. At the same time, the distinction does make a difference, especially for those states devoid of either military or economic status. The nonaligned states view the Non-Proliferation Treaty (N.P.T.) of 1968 as discriminatory on two counts. First, the treaty binds the nonnuclear states to a commitment to forego nuclear weapons in return for a pledge from nuclear states "to pursue negotiations in

good faith on effective measures relating to cessation of the nuclear-arms race at an early date and to nuclear disarmament" (Article VI). In the judgment of the nonnuclear states, the promised negotiations have proceeded too slowly and have thus far produced peripheral results. Almost all support a SALT II treaty, but they also see it as very limited and very late. Second, nonnuclear states see existing and foreseen restrictions on the transfer of nuclear technology and access to nuclear energy as a barrier to future economic development. (In this regard, the apparent unanimity of the developing countries in their quest for nuclear energy stood in striking contrast during the S.S.D. to the position of several U.S.-based groups, which link nuclear disarmament to prohibitions on uses of nuclear energy.)

The topic of political order, however, was confined to conflict over nonproliferation. On a limited but critical point, the major achievement of the S.S.D. was realized in the area of political order. This was the decision to change the international negotiating structure on disarmament. The decision involves expanding the membership of the Conference of the Committee on Disarmament (C.C.D.) and rotating the chairmanship of the C.C.D. among all member states rather than confining it to the superpowers. The move is admittedly an incremental and bureaucratic outcome of six long weeks of negotiation. At the same time, it does institutionalize a major objective of the nonaligned states that were the moving forces behind the S.S.D. The new C.C.D. opens the arms control-disarmament debate on a regular basis to those who have neither the political prestige nor the military capacity to influence the nuclear actors. The new framework for C.C.D. has motivated France to return to the Geneva disarmament negotiations and, in time, is expected to bring the Chinese into the discussion for the first time. The Chinese were active participants in S.S.D. and are expected to continue their participation in some regular fashion. A long-term result of bringing all the nuclear powers around the negotiating table, and of giving representative nonnuclear states a voice and a stake in future disarmament negotiations is a modest but crucial gain in political order. Recognition of this step, however, is not a sufficient evaluation of the S.S.D.; the specifics of the document need to be assessed.

THE PRODUCT OF THE S.S.D.

The final product of the S.S.D. was the document adopted by consensus on the last day of the session. The document has four parts: an introduction; a declaration of principles; a program of action; and a concluding section on machinery for future disarmament negotiations. The introduction, which provided a synthetic review of the arms race, and the declaration of principles expressed an existing consensus and were relatively uncontested in the session. The section on machinery, restructuring the Conference of the Committee on Disarmament in Geneva and establishing a U.N. Commission on Disarmament to follow through on the S.S.D., were the successes of the session. Both were procedural rather than substantive in nature, but on international questions procedural measures can in time produce substantive results.

If the machinery section is the place to look for progress in S.S.D., the Program of Action illustrates the present limits of the United Nations as a disarmament forum. The final version of the Program of Action resembles an agenda more than a program; all points of disagreement were deleted. The result is that the Program of Action is minimalist in tone and content.

The Program of Action was potentially the most substantive part of the document, containing proposals for nuclear and conventional disarmament, a comprehensive test ban (C.T.B.), the establishment of nuclear free zones and zones of peace, nonproliferation and the establishment of links between disarmament and development. Although all these topics are mentioned in the final document, the tone is either descriptive or exhortatory, not analytical or programmatic.

The intrinsic limits of the S.S.D., when it came to specific action items on the disarmament agenda, were evident on the topics of both nuclear and conventional disarmament. When it dealt with "the nuclear package" (SALT, C.T.B., nonuse of nuclear weapons), the session was confronted by the desires of the nonnuclear states for significant moves and the determination of all the nuclear states to keep their negotiating options open (e.g., by confining them to bilateral forums like SALT, or the three-power talks on C.T.B.). The dynamic of the S.S.D. nuclear debate, evident from the opening general statements through the final week of intense, private negotiations, involved the nonaligned and nonnuclear states (e.g., Sweden and Norway) trying to apply political and moral pressure on the nuclear powers, with the latter ready to concede marginal points, but not to make qualitatively new moves. The end product of this diplomatic minuet is a series of statements in the Program of Action that urge conclusion of ongoing nuclear-arms control measures and reassert the imperative of ultimately eliminating nuclear weapons from the arsenals of states.

On the conventional arms front, the dynamic and product of the S.S.D. was not much different. Lincoln Bloomfield and Harlan Cleveland, in a study prepared prior to the S.S.D., note that 80 percent of global military expenditures are for conventional armaments, and military spending by developing countries has been growing at 10 percent a year for the last 20 years. Although the intense political struggle in the Middle East accounts for much of this growth rate, these statistics illustrate how the pattern of debate shifted in the S.S.D. when the agenda changed from nuclear to conventional disarmament. In the conventional debate, it was often the nonaligned and/or the developing nations whose military expenditures were under scrutiny. Their response was not unlike that of the nuclear states; those under scrutiny moved to protect their freedom to decide. This strategy was illustrated in the resistance of the nonaligned states to any proposal linking nuclear and conventional disarmament. Their position was that such a principle distracted attention from the central problem of the arms race, nuclear arms. While the assertion contains some truth, it also serves to parry sustained analysis of the conventionel arms race, including the galloping arms trade involving both industrialized and developing nations. The reluctance to focus on conventional arms control produced the same modest language and proposals that one finds in the nuclear section of the Program of Action.

A third problem that illustrated the difference between the S.S.D.'s capacity for identifying central aspects of the arms race and its capability to address those problems was the relationship of disarmament and development. This abiding concern of the United Nations (and of Paul VI, who, in his message to the S.S.D., cited again the scandal of "the crying disproportion between the resources in money and intelligence devoted to the service of death and the resources devoted to the service of life") received much attention, yet produced little action in the S.S.D. Here again, evaluation of the session should not devalue too rapidly the explicit consensus reiterated at the S.S.D., that a link should and does exist between these two major themes of world politics. But the final conclusion of the S.S.D. on disarmament and development was simply to urge the Secretary General to initiate a study on the potential contribution disarmament can make to the establishment of a new international economic order and to report the findings to the General Assembly.

BEYOND THE S.S.D.

The essential limitation that constrained the Program of Action on every front is the fact that individual states still control the decision making on disarmament. Consequently, even in the face of an interanational problem, being dealt with in an international assembly, it is not possible to take concerted action that jumps over or beyond the politics and policies of the individual states. The decisive conclusion to be drawn from this is not how bad the prospects for disarmament are at present, but how essential concerted action is within key states. No state, including the Soviet Union, is more crucially located in the disarmament drama than the United States. What are the prospects for the post-S.S.D. agenda?

First, it is significant to see how arms control and disarmament have again become visible and viable topics. The last major political and moral debates about disarmament were the A.B.M. decision in 1968 and the Partial Test Ban Treaty in 1963. Just after the latter was signed, the United States began the disastrous slide into Vietnam. Almost all parties concerned about the morality of the use of force were consumed in the bruising Vietnam debate. The discussions in the last 18 months picked up the thread of an argument that had been in abeyance for at least a decade. Although the advocacy of arms control stalled, the arms race did not; we return, therefore, to the old questions faced with qualitatively new problems.

Those problems are illustrated, although not exhausted, by the SALT II debate, which is now upon us and will certainly intensify in the next several months. Viewed against the background of the disarmament agenda, SALT II appears as a rather limited arms-control measure. Yet the very problematic status of achieving a SALT II agreement that will be ratified by the Senate manifests the complexity and difficulty of taking even incremental steps toward disarmament. Some measure of the obstacles facing SALT II ratification can be made by comparing it with the recent ratification debate over the Panama Canal treaties. The intrinsic problem of ratification, guaranteeing 67 votes, is aggravated in SALT II by the increased complexity of the problem.

The content of the Panama Canal debate (as opposed to the rhetoric and myth) was exhausted after the first few weeks. The SALT II debate involves technological, strategic and political problems that admit of honest intellectual differences. In my view, a sound and compelling case can be made for a SALT II agreement that caps the nuclear race quantitatively and qualitatively, and opens the way to the "deep cuts" in the arms race that are promised in SALT III. But this case will have to be *made* in the Senate and with the wider public; it cannot be assumed to be evident.

Making the case for SALT II in the public debate is a task that invites participation by the church. One of the principal functions of the traditional moral doctrine on war was to help set the terms of public debate on the morality of the use of force. As we enter the heart of the SALT II debate, there is no well-defined, visible constituency for arms control and disarmament measures. The cultivation of an informed constituency of conscience that could be relied upon to stand for and speak for SALT II and beyond is a political and moral necessity. To call for such a constituency is not to envision that most Catholics will grasp the technical intricacies of the SALT II debate. Such an

expectation borders on fantasy. It is possible, however, to build an atmosphere of public opinion that sustains a climate favorable to a sound SALT II treaty. Shaping such an ambit of opinion within which the technical policy choices can be made is a contemporary exercise of the church's teaching ministry, which is worthy of the vision of Vatican II's "Gaudium et Spes" and John XXIII's "Pacem In Terris."

The religious participation in the S.S.D. was a beginning. The forms of participation varied from a broadly representative presence in the Mobilization for Survival program, to the specifically Catholic liturgy sponsored by Pax Christi, to the religious service for S.S.D. delegations conducted by the Holy See Mission to the United Nations. This superbly planned and inspiring Pax Christi liturgy, concelebrated by Bishops Gumbleton, Dozier, Sullivan, Kelly and Bettatzi (Pax Christi International), was complemented by the blend of political realism and moral urgency in the Holy Father's message presented by Archbishop Agostino Casaroli. Both of these events provide hope that in the post-S.S.D. period, the church can draw upon the resources of faith and moral insight to shape a constituency of conscience that can address the political and ethical dimensions of the nuclear era.

Over 20 years ago, Romano Guardini wrote that the essential problem that the "post-modern world" faces is whether we can develop the moral insight to control and direct the power we have created. Nothing symbolizes this cosmic question more clearly than the nuclear arms race. The S.S.D. vividly portrayed how the future of the human family rests upon the race between moral wisdom and technological power. As the United States moves from S.S.D. to SALT II, the political will of the nation will be tested. Under no less scrutiny, however, will be the moral wisdom of the church.

[The Rev. J. Bryan Hehir, *associate secretary of the U.S.C.C. Department of Social Development and World Peace, was a member of the Vatican delegation to the U.N. Special Session on Disarmament.*]●

HARLEM CELEBRATES MARCUS GARVEY MONTH

HON. CHARLES B. RANGEL

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. RANGEL. Mr. Speaker, in honor of the contributions Marcus Garvey has made to blacks in America, a number of black communities around the country are paying tribute to Marcus Garvey this month. Special ceremonies were held in my district, during which the borough president proclaimed the month of August 1978 to be Marcus Garvey month in the borough of Manhattan. I should like to present excerpts from the proclamation for inclusion in the CONGRESSIONAL RECORD:

Whereas, few men in history have done as much to arouse the identity of an oppressed people as Marcus Garvey, and

Whereas, Marcus Garvey, who by his willingness to dream new things and meet the adversity of his time head-on has set a high example for people of every race and creed to follow, and

Whereas, Marcus laid the groundwork for the principle which Martin Luther King would later make clearer to us all that "injustice anywhere is a threat to freedom everywhere," and

Whereas, the philosophy Marcus Garvey helped set in motion—that of self-help, self-respect and economic self-determination—are precepts which must be realized now more than ever.

For many black Americans living in my district, the message of Marcus Garvey has reawakened their pride and instilled a sense of dignity and purpose. Children are discovering Garvey for the first time, and adults are rediscovering him. His legacy has meaning not only for black Americans, but white Americans as well.●

INTERNATIONAL TRADE PROBLEMS

HON. BUTLER DERRICK

OF SOUTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DERRICK. Mr. Speaker, our country's problem in international trade, including the enormous deficits that we have been running for some time, the fact that many of our trading partners are unwilling to take steps necessary to open their doors to our products while we continue to be flooded with those manufactured under conditions that are illegal here, raises further serious questions for this country.

Indeed, our present policies in today's world seem totally passé. A clear example of this appeared in the August 7, 1978, edition of Forbes magazine, entitled "Thinking the Unthinkable." It was written by E. M. Bernstein, a former high Treasury official and one of the key founders of the post-World War II International Monetary Fund. Mr. Bernstein's observations should cause all of us to ponder most seriously the current direction we are taking in our international trade matters.

I ask unanimous consent for the article to be inserted in the RECORD at this point.

[From Forbes magazine, Aug. 7, 1978]

THINKING THE UNTHINKABLE

Since the Germans and Japanese are unwilling to take the painful measures needed to bring their trade with the U.S. into better balance, what is to be done? Simply permitting the dollar to decline in value against the yen and the deutschemark seems not to have done the trick. From Edward M. Bernstein, the sage of Bretton Woods and a lifelong advocate of free trade, comes this reluctant proposal: Raise U.S. tariffs.

Says Bernstein, now 73 and author of Washington-based analytical reports on monetary affairs read by central bankers and economic officials throughout the world: "A uniform U.S. tariff on imports of, say, 10% might be beneficial."

This from a man who is no narrow-minded protectionist mouthing propaganda from the American Iron & Steel Institute. He played a key role in formulating the U.S. postwar liberal trade policy.

Sure, he acknowledges, oil is an enormous problem that cannot be ignored. True, our faster economic growth vis-à-vis Europe and Japan has hurt. Oh yes, less inflation in this country would help and success of the current Geneva trade talks would be a good thing.

But to Bernstein the principal problem in our dismal trade picture is this: "A lot of countries look upon us as a depression market where they can sell that part of their output that cannot be absorbed by their home markets." Dumping? "Let's call them 'unfair' trade practices," says Bernstein with a wry smile. "We must be diplomatic about these things."

Bernstein reels off a dismal—and convincing—set of statistics. Since the fourth quarter of 1975, our current account (which includes trade and investment income) has deteriorated by nearly $50 billion a year, a staggering sum.

Between 1975–1977, domestic spending on goods increased $189 billion. Of that, nearly 29% was supplied by increased imports. "Such a proportion is unprecedented in our history," says Bernstein. Last year U.S. output of goods increased only 7%, yet imports from Western Europe zoomed 36% and imports from Japan almost 47%. In the first half of 1978, our current account deficit with Japan just about equaled that with the OPEC countries.

Concludes Bernstein: "There's no way to account for these extraordinary increases by the normal patterns of trade. It appears some countries are behaving like the mercantilists of old," whose philosophy was to get a trade surplus regardless of the methods.

Oil? "Between the first quarter of 1977 and first-quarter 1978, our deficit with OPEC was reduced by $1.1 billion as imports fell by 11.9%. By contrast, our trade balance with Western Europe fell from a large surplus to a deficit and our deficit with Japan increased by 160%."

Bernstein chuckles at Japan's and Europe's finger-wagging at the U.S. "They blame the dollar's troubles on energy and say we should reduce imports of oil. They say we should lower our rate of inflation and thus become better exporters. That's what they would like us to believe."

Bernstein doesn't think the U. S. can get rid of its deficits through more exports alone. "Politically, other countries are unwilling to accept the increase in U.S. exports it would take to put our trading account into balance." Nor will Germany and Japan, moreover, willingly undergo the domestic economic disruption that would arise from cutting back exports to this country.

Volatile exchange rates and unfair trade practices are why we have to consider something like 10% tariffs, says Bernstein.

"This is not protectionism where you have different rates for different products. This would be a tax on *all* imports." What if Europe and Japan put a similar levy on U. S. imports? "I don't mind that at all," responds Bernstein. He argues that the hurdles will affect Japan and Germany far more than the U.S.

A man with intimate knowledge of international finance, Bernstein maintains that the costs of a continuing import flood in lost U. S. production far exceed what we'd lose by erecting a 10% tariff.

The reason the U.S. has been rather tolerant so far is that employment in this country has grown significantly during this period. But for a variety of reasons, including a coming slowdown in our economy, he feels that this safety valve will be shut off and that the U.S. government will be under growing pressure to slow down those imports. Bernstein has never believed the much-touted virtues of floating exchange rates. "The experience of the recent past does not encourage the view that falling exchange rates will of themselves, in all circumstances, result in a marked change in the trade balance."

He devoutly hopes that the devalued dollar will really turn things around, but if it doesn't, he says, we should be ready to get tough.●

MOBILE HOME DISCRIMINATION

HON. LARRY PRESSLER

OF SOUTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. PRESSLER. Mr. Speaker, in South Dakota, many low- and middle-income people simply cannot afford the cost of housing.

Mobile homes provide shelter for over 10 million Americans. In South Dakota, more than 55,000 people live in mobile homes.

Since mobile homes provide important home ownership opportunities for so many Americans, I am concerned that reasonable financing is available to those Americans who cannot afford, or do not wish to purchase, nonmobile homes.

Persons who wish to purchase a mobile home have a hard time getting mortgages. Congress recently approved extended mortgage loan maturity terms for mobile homes. This new provision allows potential purchasers of mobile homes longer mortgage repayment periods.

At present, the FHA will insure mortgages on nonmobile homes for up to 30 years and for a maximum of $60,000. However, FHA guarantee loans on mobile homes are limited to only 12 or 15 years, up to $16,000 for single wide, and $24,000 for double-wide homes. Although the price of a mobile home is far less than that of a conventional home, these limitations make it impossible for many individuals to own their own homes. This inequity in financing opportunities represents a grave injustice to these people.

In passing the Community Development Act of 1977, this Congress included a provision authorizing the Secretary of Housing and Urban Development to extend loan maturity terms from 15 to 23 years for loans made to finance double-wide homes. Unfortunately, the Federal Home Loan Bank Board, which is responsible for governing loan activities of federally chartered savings and loan associations which invest in mobile home loans, has not yet revised its regulations to include the longer maturity terms.

Today's mobile homes are built according to HUD regulations and are certainly durable enough to last the 15 and 23 years proposed by the Congress as maturity terms for FHA-insured loans. The 50 to 60 percent rise in mobile home prices over the past 8 years makes it nearly impossible for many families to afford the high monthly payments on mobile home loans. It is essential that the Federal Home Loan Bank Board and HUD extend the length of maturity terms if these families are to be able to afford suitable housing.

In an effort to correct this situation, I have worked throughout this Congress to lengthen the maturity terms of federally insured mobile home loans. After voting in favor of the Community Development Act of 1977, I have contacted Secretary Harris of HUD on numerous occasions to express my support for extending the maturity terms. I have also encouraged my constituents to express their views directly to HUD.

In addition, I recently supported the Housing and Community Development Act amendments, which provide annual rental assistance payments to low-income mobile home owners who rent the space on which their mobile homes are located. At present, rental fees in many trailer parks are too expensive for mobile home owners to afford. Without this legislation, the mobile home will no longer provide an opportunity for low-cost, respectable housing for many Americans.

I believe we must put an end to this injustice to owners of mobile homes. It is certainly time for the Department of Housing and Urban Development to extend the maturity terms of FHA-insured loans for mobile homes so that savings and loan associations will be able to adequately service the great number of mobile home owners wishing to borrow money. An extension of these terms is the first step toward equal opportunity regardless of type of housing. I urge my colleagues to join me in this effort.●

CAMBODIAN REFUGEES

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. SOLARZ. Mr. Speaker 15,000 Cambodian exiles have been languishing for 3 years in refugee camps in Thailand. Having escaped from the atrocities of the Khmer Rouge, these refugees find themselves with little hope of permanent resettlement. Through no fault of their own, the vast majority are ineligible to enter the United States under the terms of the current Indochinese parole program which gives preference to refugees with relatives in the United States or with close ties to the U.S. Government.

While these Cambodian refugees are only about 10 percent of the total Indochinese refugee population, I believe that the unspeakable sufferings they have endured give them a special claim on our emergency immigration procedures. Reliable sources indicate the 1 million Cambodians have been ruthlessly murdered and another 1 million have died due to the deliberate deprivation of food and medical care by the leaders of so-called Democratic Kampuchea. The Khmer Rouge, upon seizing control of the country in 1975, sought to destroy all vestiges of the previous government and culture of Cambodia. The cities, towns, and villages were abandoned and the survivors of the waves of terrorism were forced into labor camps.

In the Congress we have passed resolutions expressing our outrage at what has occurred in Cambodia and calling upon the governments of the world to pressure the leaders of Democratic Kampuchea to stop the slaughter. But now it is time to go further. Now it is time for us to reach out to those 15,000 victims if an Asian holocaust who have been able to escape and to offer them the chance for a new life in a new homeland.

Forty years ago the innocent victims of a European holocaust could find no place of refuge. Today, we have the opportunity to open our doors to these few Cambodian survivors and demonstrate in a most concrete way that the United States remains committed to assisting the innocent victims of war and terrorism and that we will not remain silent in the face of the moral atrocity that continues in Cambodia today.

Today, I am proud to be introducing with 50 of my colleagues a resolution that calls upon the Attorney General to exercise his powers under section 212(d)(5) of the Immigration and Nationality Act to grant a special parole over the next 2 years for those Cambodian refugees who desire to come to the United States.

By offering this special parole to the Cambodian refugees, we will give these victims of the worst human catastrophe since Nazi Germany the opportunity to establish new lives in a free society—a goal they have already risked their lives to achieve. For the penalty for attempting to flee Cambodia is death.

Like the other Indochinese who have come to the United States under the parole authority, the Cambodians are hard working and willing to make the necessary adjustments. Already 95 percent of these Indochinese refugees are employed and they have become good citizens and loyal Amerians.

In recent testimony before the Subcommittee on Asia and Pacific Affairs, of the International Relations Committee, Albert Shanker, president of the American Federation of Teachers, endorsed the proposal for a special parole for the Cambodian refugees. A large number of church and civic groups have also expressed their support, and have urged the President to call upon the Attorney General to announce such a parole as a humanitarian gesture.

On August 3, Senator DOLE introduced a sense of the Senate amendment to H.R. 12934 calling upon the Attorney General to grant a special parole for these Cambodian refugees. The amendment was adopted by voice vote. Senator KENNEDY, in the debate, commented favorably upon the amendment:

I think it is a clear reflection of humanitarian concern. I think it is desirable and worthwhile.

Mr. Speaker, I insert the text of the resolution at this point in the RECORD.

H. CON. RES. 701

Resolved by the House of Representatives (the Senate concurring),

Whereas the United States Government is committed to the maintenance of internationally recognized human rights;

Whereas the President of the United States has called Cambodia the worst violator of human rights in the world and has pledged assistance from the United States to Cambodian refugees in Thailand;

Whereas the House of Representatives has requested that the President cooperate with other nations in an effort to end the flagrant violations of internationally recognized human rights in Cambodia;

Whereas the fifteen thousand Cambodian refugees in Thailand are subject to debilitating living conditions and constant fear

of border raids, and have not received offers of resettlement from other nations;

Whereas the Indochinese parole program recently announced by the Attorney General will not apply to most of the Cambodian refugees in Thailand;

Whereas Indochinese refugees already admitted in to the United States have become meaningful contributors to United States society, without depriving United States citizens of employment opportunities; and

Whereas it is the policy of the United States to encourage the nations of the world to accept Indochinese refugees for resettlement: Now, therefore, be it

Resolved by the House of Representatives (the Senate concurring), That it is the sense of Congress that

(1) the Government of the United States should give special consideration to the plight of refugees from Democratic Kampuchea (Cambodia) in view of the magnitude and severity of the violations of human rights committed by the Government of Democratic Kampuchea (Cambodia); and

(2) the Attorney General should exercise his authority under section 212(d)(5) of the Immigration and Nationality Act to parole into the United States—

(A) for the fiscal year 1979, 7,500 aliens who are nationals or citizens of Democratic Kampuchea (Cambodia) and who are applying for admission to the United States; and

(B) for the fiscal year 1980, 7,500 such aliens.●

WHERE THE "INS" AND THE VISITORS EAT IN THE NATION'S CAPITAL

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. STARK. Mr. Speaker, noted English poet William Cowper once remarked that "No man can be a patriot on an empty stomach." After hours of walking through the museums, the Mall and the monuments, sightseers love their country, but would also love a bite to eat.

An article has recently come to my attention that describes some of the better cafes and cafeterias that tourists can cure their hunger blues. I commend it to my colleagues' attention so that they might share it with their visiting constituents.

[From the New York Times, Nov. 6, 1977]

WHERE THE INS AND THE VISITORS EAT IN THE NATION'S CAPITAL

(By Alice Shabecoff)

(Alice Shabecoff, consumer affairs writer for the Department of Housing and Urban Development, is a bureaucrat who likes to eat well.)

Compassion impels me to share with the foot-weary sightseer my inside advice on the best places to eat in the area around Washington's Mall. Between the White House and Capitol Hill are not only the thickly touristed Smithsonian museums but also an alphabet soup of Government agencies, commissions and departments, the I.C.C., the F.A.A., H.E.W., H.U.D., I.R.S.

We bureaucrats, disdaining the brown-bag lunch, have through years of gastronomic self-interest ferreted out the delectable cafes and restaurants in the vicinity. On my confident way to such a spot, I often pass tourist families walking blocks to find something to eat or waiting in line with bedraggled patience for dried-out hamburgers at overcrowded cafeterias.

Let me help these sightseers find quiet spots with good food or mammoth places where prices are low and seats always available. Some of these are museum cafes overlooked by many tourists, while others are cafeterias in Government buildings, open but unknown to the public. The restaurants that follow are limited to those around the Mall or easily accessible to it, in descending order of eating pleasure or of convenience.

The uncontested jewel, both for atmosphere and cuisine, in my mind is the cafeteria in the courtyard formed by the architectural marriage some years ago of the National Collection of Fine Arts (8th and G Streets N.W.) and the National Portrait Gallery (7th and F Streets N.W.). It is called Patent Pending because the present galleries incorporate the old Patent Office Building.

The cafeteria, run by a young graduate of the Ecole de Cuisine Fracaise, in Dijon, offers a menu of whimsy, variety and excellence. Choose Tomatoes Alice B. Toklas ($1.65)—half of a scooped-out tomato is stuffed with chick peas vinaigrette, the other half with dill egg salad. Or try their Courtyard Salad ($1.55), with fresh mushroom slices, tiny cauliflowers and pieces of tomato on a bed of salad greens, under a subtle but spicy yogurt-based dressing. Their nitrite-free hot dogs are prepared as a Bulldog ($1.25, covered with homemade chili and sliced onions), a Krautdog ($1.15, groaning with sauerkraut and kosher pickles) and a Hot Diggity Dog (95 cents, usual trimmings plus pepperoncini). Soups (lentil, zucchini or corn chowder) at 85 cents for big bowls, can be paired with sandwiches for a fine lunch. The best-selling dessert is homemade apple pandowdy, 85 cents.

A tray may be taken outdoors or to one of two vaulted rooms, which are hung with paintings and elegantly carpeted. The table centerpieces are small brown crocks holding parsley bouquets. Each table has a jar of Dijon mustard, a reminder of the chef's credentials. The quiet outdoor courtyard is set with small tables among modern sculpture, two fountains and towering elms.

Lunch is served weekdays from 11:00 A.M. to 3:30 P.M.; Saturday and Sunday, 11:30 to 4:00 P.M.

If you are on the Mall, you have the extra delight of getting to the National Portrait Gallery by free shuttle service on a red double-decker bus. The vehicle, presented a few years ago by an anonymous donor, had been used on the streets of Norwich, England. Now every half hour between 10:30 A.M. and 5 P.M., seven days a week, it leaves from in front of the National Museum of History and Technology (13th Street and Constitution Avenue N.W.). Free fans are given out as souvenirs.

On a small triangle of land adjacent to the National Gallery of Art (Fourth Street and Constitution Avenue N.W. entrance). . . . [stands an I. M. Pei designed building. It houses the] . . . overflow from the National Gallery of Art collection, as well as special exhibitions. An underground arcade links this new museum to the existing National Gallery, and already in operation in this arcade is the Mall's second-ranking restaurant.

Pei's architectural skill dispels any closed-in feeling. A sculpture of large triangular crystals, at ground level, creates the skylight in the restaurant's ceiling. One wall is a wide expanse of window well, looking out on the cascade of an Islamic-style waterfall. Called a "chadar," it has water flowing down narrow cuts in the wall.

Planters divide the room in half. To the right is a buffet, offering prosaic fare for the hamburger/hot dog generation, plus a carving board for meats (hot corned beef sandwich for $2.10). To the left, nearest the waterfall, is the elegantly set cafe, where one sits at a marbel-topped pedestral table to be waited upon courteously by uniformed waitresses. The menu has become more cosmopolitan since J. Carter Brown, the museum's director, brought in professional culinary consultants James Beard was one, and a Beard choice appears on each menu, which changes with the season. A recent menu included shrimp crepe with Mandarin sauce and a garden salad for $3.25, and poached salmon with cucumber marinade for $4.25. Private-label Spanish wine is 80 cents a glass. Hot fudge sundaes tempt in the summer-time, and pastry is served from a cart.

Another peaceful place for good food is the Refectory in the Capitol itself. It is on the ground level in the north wing, the Senate side, of the Capitol Building. The Refectory, which serves the general public, consists of a series of small rooms with tiled floors and vaulted ceilings. The waitresses wear dresses from the 1870's period, an atmosphere the restaurant captures nicely. "Good, simple, natural foods" is promised on the menu, and the promise is kept. Children will especially like the hefty Uncle Samburger ($2.25) or hot roast beef with mashed potatoes and gravy ($2.50). Salad platters included chef's salad, fruit and cheese, and cold cuts. And here's a chance to try the famous Senate bean soup (45 cents a bowl), which is hearty and delicious. For dessert, hot Southern pecan pie (75 cents) is recommended for everyone except dieters.

The same word of caution applies to the Refectory as to all eating places in the Capitol, Senate or House. Avoid the standard lunch hour. The Refectory, with its limited capacity, often has long lines from noon to 1 P.M. The other places in these buildings are supposed to serve staff only from noon to 1:30 p.m. Children and adults with cameras or other tourist trappings might be turned away, especially if the restaurants are crowded. Over in the south wing (House side) of the Capitol, in the basement, is a small, pleasant cafereria where a good selection of standard items (steak sandwich, $1.25, roast beef sandwich, $1.10, hamburger, 60 cents, or tacos, 65 cents each) is available.

The Senate dining room in the Dirksen Building, B level, is marble-pillared and enormous. The food is bland but acceptable. Hamburgers (80 cents) or hot dogs (65 cents), along with a changing main course, such as shrimp fried rice ($1.25), are offered. A takeout shop, which might inspire picnics by the fountain at the foot of the Capitol, is also in this building. The House of Representatives restaurant is in the basement of the Longworth building (the middle one of the three House office buildings). The restaurant's odd architecture boasts stone walls and curtained fake French windows. Like the Senate cafeteria, it has standard fare with substantial main courses. Someone well-versed in nutritional controversy has noted in red on the menu wherever sugar has been added to an item—Harvard beets, for example.

Carry-out shops are found in each of the three House office buildings. They offer basic hot and cold sandwiches (75 cents to $1), hoagies for $1, and good soups at 40 cents a cup. An ideal place for a picnic is the fountain courtyard of the Rayburn Building (lowest on the Hill).

A fine secret I would now like to share with Washington visitors is the cafeteria in the penthouse of the new Health, Education and Welfare building, on Independence Avenue between First and Second Streets S.W. It's a nice alternative when the lines in the House office building's cafeterias are too long for tired souls to bear. The cafeteria is an immense room, with a white ceiling that cantilevers into outdoor balconies, with views of the House, Senate, Capitol and reflecting pool.

The food, though not inspired, is passable. Lunch is offered from 11:30 A.M. to 1:30 P.M.

As with all agency buildings, breakfast is served, from 8 to 9 A.M., and is a bargain—compared with hotel breakfast prices—bacon at 14 cents a portion and hash browns for 20 cents. (Across the street, by the way, is the U.S. Botanic Garden Conservatory, Maryland Avenue S.W., quiet, lush, beautiful and worth a visit.)

One of the best lunches in town, analyzed bureaucratically on a cost-benefit ratio, is the buffet in the Museum of Natural History, available to members of the Smithsonian Associates. (Membership may be obtained for individuals, couples or families. For more information, write to Smithsonian Associates, Reception Center, 1000 Jefferson Drive S.W., Washington, D.C. 20560.) The buffet is smorgasbord, with roast beef sliced to order, surrounded by other main dishes (fried chicken, shrimp quiche), soup, salad and bread, for $3.95. This is, however, not an insider's place, so avoid rush-hour traffic between noon and 1.30 P.M. Breakfast is available during the summer.

For sheer splendor nothing can surpass picnicking between the Henry Moores and the Alexander Calders in the courtyard of the Hirshorn Museum. The Hirshorn is Washington's rotund repository of contemporary art, at Independence Avenue and Eighth Street S.W. The courtyard, now closed, will reopen in the spring.

A block away is the Air and Space Museum, the Smithsonian's newest and most popular attraction. On the third floor at the east end is a pleasant glass-walled dining room. Its ordinary food is presented on a revolving counter while prospective diners stand and choose what appeals—somewhat like airline passengers retrieving items from a rotating baggage counter. It is jammed. If there are crowds when you want to eat, I suggest you simply retreat across the street, to the monolithic NASA building (Seventh Street and Independence Avenue S.W.), and make use of their basement cafeteria. Outside NASA is a sunken playground with wooden climbing structures for kids and benches for parents.

A cafeteria in the basement of the Smithsonian History and Technology Museum has sandwiches (roast beef, $1.35, hot dog, 85 cents) on one side of the room and hot dishes (fried chicken, $1.39, baked whitefish, $1.49) on the other. The immense undistinguished room is enlivened by a wall of Horn & Hardart Automat windows in marble and cut glass. Alas, it's an exhibit, displayed as an antique, and the pies inside are plastic. A nostalgia for the good old days of Automat, and its atmosphere, architecture and food, does not speak particularly well for today's menu.

Every day of the week, except Monday, you are likely to find these cafeterias mobbed, the rows of guard rails lined by families with glazed eyes and sore feet. If the lines are truly discouraging, you can always hop across the street to the Interstate Commerce Commission building where, in the basement, you can get a roast beef platter for $1, or a chicken salad for 75 cents. No crowds here, and you have a chance, while on your way through the corridors, to see bureaucracy at work. The Justice Department and I.R.S. buildings, across the street from the Natural History Museum, also have cafeterias they admit only government workers or visitors with passes.

BEAN SOUP

Here is the recipe for the famous Senate Restaurant Bean Soup: Take two pounds of small Michigan Navy beans, wash and run through hot water until beans are white again. Put on the fire with four quarts of hot water. Then take one and one-half pounds of smoked ham hocks, boil slowly (approximately three hours) in covered pot. Braise one chopped onion in a little butter and, when light brown, put into bean soup. Season with salt and pepper, then serve. (Do not add salt until ready to serve). Eight portions.●

TUITION TAX CREDIT

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MAZZOLI. Mr. Speaker, as we draw near a House-Senate conference on tuition tax credit, worries are being expressed that this bill will only contribute to the decline of the public school system. In his recent column in the Washington Post, James Kilpatrick stresses that the bill will not signal a Government commitment to private schools and will not lead to the diminishment of its commitment to a strong and excellent system of public education. Mr. Kilpatrick's article is well worth reading.

HYSTERICS ON TUITION TAX CREDITS

(By James J. Kilpatrick)

Opponents of tuition tax credits are in a bad way. They have come down with spavins, heaves, and hysterics. Consider, if you please, this splendid denunciation from Sen. Ernest F. Hollings of South Carolina:

"This proposal would turn our education on its head, benefit the few at the expense of the many, proliferate substandard segregation academies, add to the federal deficit, violate the First Amendment, and destroy the diversity and genius of our public schools."

And after that, the skies would fall, the planet would tilt on its axis, and tidal waves would engulf South Carolina as far inland as Columbia, Camden and Kershaw. Cows would be born with two heads, and sea serpents would swarm in the Santee River.

The senator has a full head of steam. Tuition tax credits are "horrendous." The idea is budget-busting: In just three years, the annual cost would approach $1.1 billion. The scheme is blatantly unconstitutional. More than that, it is undesirable. The *Washington Post,* breathing heavy approval of the senator's hyperbole, adds some bombast of its own: "This bill is a fundamental assault on the public schools. Any vote for it in the Senate is a threat to the public school system."

There, there, one would like to say to these fever victims, dry your eyes; stop sobbing. Simmer down! Let us take things one at a time.

What is proposed is an amendment to the Tax Code that would permit parents to take a tax credit of up to $250 for every dependent in college, or up to $100 for every dependent in an accredited non-public elementary or secondary school. In terms of administrative burdens, the plan is clean, clear-cut, and could be put into effect by a simple declaration on a Form 1040. A qualifying taxpayer would have the same right to the credit that he has to deduct the interest on his mortgage in computing net taxable income.

By contrast, the administration's idea is vastly to enlarge the existing program of BEOG's—Basic Educational Opportunity Grants. The two approaches could not be more diametrically opposite. Mr. Carter's plan involves applications, approvals, disapprovals, rules and regulations, eligibility standards, the whole bureaucratic swamp. And it would have precisely the same billion-dollar impact on the deficit that tuition tax credits would have.

Now, is the tax credit approach "blatantly unconstitutional"? On this score, one lawyer's judgment is as good as another's. The Supreme Court is so divided on state tuition plans that the nine justices have gone off in six different ways. A good argument can be made that Congress has full authority under its 16th Amendment power "to lay and collect taxes on incomes from whatever sources derived."

On this point, senators and editors would do well to read the Supreme Court's opinion of May 4, 1970, in *Walz* vs. *Tax Commission of New York.* With only Mr. Justice Douglas dissenting, the Court upheld New York's law granting tax exemption to churches. True, the effect of relieving "believers" of a tax burden, as Douglas said is to impose an additional burden on "nonbelievers," but the majority found "no genuine nexus between tax exemption and an establishment of religion." Neither is there a nexus between a tax credit and an establishment of religion.

It is a curious manifestation of the critics' hysteria that they believe tax credits would "destroy" or even "threaten" the public school system. This is palpable nonsense; but even if the charge contained a grain of truth, the proper response would be to this effect—that something must be grossly wrong with our public schools if they could be threatened or destroyed so easily.

Senator Hollings is mistaken when he asserts that "the government's duty to the public is to provide public schools." The government's duty is to provide educational opportunities toward the end that children grow up to be responsible adults. It is immaterial—or it should be immaterial—whether these opportunities are provided in public, private, parochial, permissive, or highly disciplined schools. It is the end product that is the state's concern.

The senator is right on one point, and those of us who support tuition tax credits should give it careful thought. Federal aid involves federal control. Just as Congress has put conditions on other provisions of the Tax Code, so a future Congress could condition tuition tax credits in terms of certified teachers and courses of study. It is something to think about, but that peril is a way down the road.●

JAMES GRANT BOLLING

HON. JOE MOAKLEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. MOAKLEY. Mr. Speaker, I wish to join my friend from Louisiana (Mr. LONG) in expressing my profound shock and sorrow on learning of the untimely death of Jim Bolling.

All of us who knew Jim share the terrible loss DICK BOLLING has suffered and I wish to join their many friends in expressing deep sympathy in this difficult hour.

DICK BOLLING has lost at once a loving wife, a trusted adviser, devoted friend, and tireless aide. And the Congress has lost a woman whose contributions to this institution are known to us all. Although she rarely sought a headline or even notice in the House, she worked with steady dedication for many years to make the House worthy of the affection which she and her husband gave it.

Few men or women elected to Congress have had the impact that Jim Bolling did, from no official capacity, in reforming Congress and bringing the organization and procedure of the House into line with the democratic concepts of our time.

Mr. Speaker, all of us will miss Jim Bolling. We will miss her strength, her courage, her wisdom, and her vision. For myself and my wife, Evelyn, I express my deepest sympathy to DICK BOLLING and his family and to join the House in mourning their loss.●

TRIBUTE TO DAVID NEWBY

HON. DAVID W. EVANS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. EVANS of Indiana. Mr. Speaker, it is with great pleasure that I bring to my colleagues' attention the achievements of David Newby, a constituent of mine. Too often the youth of our country are criticized. It is refreshing to encounter a young person who exemplifies such virtue and determination. My congratulations to Dave Newby and to the Order of DeMolay for their outstanding choice.

The son of Harry and Gloria Newby, 9 Almond Court, Plainfield, David has been a leader at Plainfield High School, at Boys State and Boys Nation, in local and international DeMolay and in Boy Scouts.

"My parents were a constant source of encouragement and inspiration," said National Merit finalist Newby, bound for Wabash College on a Lilly scholarship to study political science.

"I've always enjoyed self-expression," said Newby, the senior class president who was active in speech, debate, drama, wrestling, and even played tenor sax in the pep band.

He went to the State finals in improvisations and acted in several plays and a musical in high school.

Newby, past master counselor of the Plainfield Order of DeMolay, has been named "Indiana DeMolay of the Year," "International DeMolay of the Year" and received the International Distinctive Service Award of the Order of DeMolay.

Newby says the backbone of the organization is its precepts or Seven Cardinal Virtues of its members: love of parents, reverence, courtesy, comradeship, fidelity, cleanliness, and patriotism.

"DeMolay is a fraternity like Elks, Eagles or Masons, open to anyone 13 to 20 years old of any race or religion, with a belief in God and good standing in the community.

"But when you get down to brass tacks, it's basically a boys' club, a civic service organization," said Newby The 20-member Plainfield chapter made nearly $400 last year in their 36-hour "Euchre-a-thon," which paid for an assortment of new chairs for the Hendricks County Home for the Aged.

The Plainfield native said when he was 14 years old he became interested in the Muscular Dystrophy Association's Labor Day fundraiser. He helped the Plainfield group begin annual operation of the MD donations fishbowl in downtown Indianapolis. Last year the group collected and bagged more than $50,000, he said. He has held many offices on the local, State, and international level.

In June 1977, more than 950 delegates to Hoosier Boys State elected Newby governor. From the week-long mock State government session on the Indiana State University campus, the political hopeful journeyed to Washington, D.C., for 1977 Boys Nation.

Newby was elected to enter the American Academy of Achievement, and was inducted with leaders in entertainment, sports, service, and journalism fields. Erma Bombeck, John Sirica, Gen. Omar Bradley and Adm. Stansfield Turner were among those inducted with the Plainfield youth.

An active member of Boy Scout Troop 304, Plainfield, Newby achieved the rank of Eagles several years ago. "The most rewarding scouting experiences have been traveling to scout jamborees and to Philmont scout camp," he said. Newby has been lay Sunday speaker at Zion Evangelical United Church of Christ, Indianapolis, where he also serves as an usher.●

RECODIFICATION OF FEDERAL CRIMINAL LAWS

HON. CHARLES E. WIGGINS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. WIGGINS. Mr. Speaker, the Subcommittee on Criminal Justice has drafted and reported to the full Committee on the Judiciary a bill to begin the process of modernizing and updating Federal criminal laws. The chairman of the subcommittee, JAMES R. MANN, on behalf of all of the members of the subcommittee, has today introduced the subcommittee's bill.

There are two basic ways to go about modernizing Federal criminal laws. One way is to do everything at one time in an omnibus reform bill. The other way is to work individually on discrete areas of the criminal law and process several bills—in other words, to modernize on an incremental basis.

The Subcommittee on Criminal Justice unanimously believes that the latter way is the most appropriate method. That belief is underscored by a letter written to the subcommittee chairman by Prof. Harold Norris, of the Detroit College of Law. Besides teaching law, Professor Norris has been involved in recodifying his own State's criminal laws, as well as in rewriting its constitution. Consequently, he is in an excellent position to evaluate how best to approach recodification. Professor Norris concludes that the subcommittee's approach is the best approach.

I am insertng the full text of Professor Norris' letter so that all my colleagues will have the benefit of his comments.

WEST BLOOMFIELD, MICH., *August 8, 1978.*

HON. JAMES R. MANN,
Rayburn House Office Building,
Washington, D.C.

DEAR MR. MANN: Thank you for seeing me recently to discuss the House Criminal Justice Subcommittee's work on the new Federal Criminal Code. I am aware of the time constraints upon Members of the House of Representatives and appreciate your fitting me into your crowded schedule.

As you may recall, we discussed during our meeting the criticism leveled at your Subcommittee by the Washington Post and by the New York Times for the Subcommittee's refusal to reform the Code in an omnibus package along the lines of S. 1437. My experiences in code reform have led me to conclude that the more limited approach that you advocate is to be preferred.

In 1961, I served as a delegate to the Michigan Constitutional Convention, and in 1965 as Counsel to the Committee on Constitutional Revision of the Michigan Legislature. In 1967 and again in 1977, I served on the State Bar of Michigan Special Committee to Revise the Michigan Criminal Code. In these capacities, I devoted a considerable amount of time to the manner in which revision should be undertaken. As a professor and a student of law, the omnibus approach had initial appeal for me, since it would result in a symmetrical document that would be neat, streamlined, and intellectually satisfying. Unfortunately, this manner of proceeding, I soon concluded, was impractical and ill-suited to the reform of laws that are complicated and impact upon significant civil and political rights. What I have read of S. 1437 confirms that judgment.

Because of the enormous scope of S. 1437, it is difficult to highlight and focus upon the serious issues it raises and the pervasive and permeative effect its redrafted provisions will have upon our system of criminal justice. Its size also militates against the proper education of the legislators who have the right and responsibility to know what they are enacting into law. I suspect that only a few Members of the Senate had the time and assistance to acquire a secure grasp of the bill's provisions at the time of its passage.

The June 27, 1978, draft of the Criminal Justice Subcommittee is a small but positive step toward the reform of our Criminal Code. I commend you for your approach, although I had hoped that you would hold new hearings on the sentencing provisions rather than report the draft to the full Committee on the Judiciary. Sentencing is among the most delicate of the areas to be revised and yet, it is a subject upon which much possibility for consensus exists, since many believe some form of structuring of judicial sentencing is needed.

Your bill is an important beginning, and we are all in your debt for your thoughtful and deliberate work.

Sincerely,

HAROLD NORRIS,
Professor, Detroit College of Law.●

DIGESTIVE DISEASES INFORMATION CENTER

HON. TIM LEE CARTER

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. CARTER. Mr. Speaker, I call to the attention of my colleagues the fact that a new, philanthropically supported, information center has been established to bring to the attention of the American public facts about digestive diseases: Opportunities for cure and care, as well as for prevention; opportunities for improvement in public and professional education; and opportunities for new areas of biomedical research. It will be known as the Digestive Diseases Information Center, and will be located at 6410 Rockledge Drive, No. 208, Bethesda, Md. 20034. The president of the center will be Fred

Kern, Jr., M.D., professor of medicine and head of the division of gastroenterology at the University of Colorado Medical Center.

I believe that such a program is necessary now. Too little information has been given to the public in the past; too little research has been supported; too little concern has been shown for the sufferers of these diseases.

On March 2 of this year, in my testimony before the National Commission on Digestive Diseases (which, by the way, was created through legislation I coauthored and supported). I said that the Commission had a unique opportunity to help shape the future direction and organization of our national resources for digestive diseases.

At that time, I testified that one out of every nine Americans is affected by chronic or recurrent digestive diseases—in other words, over 18 million Americans have such a condition. Digestive diseases are the second most frequent cause of visits to physicians.

The list of serious problems of digestive diseases could go on and on, but I would like to indicate a few here, because my colleagues might not be aware of them:

Digestive diseases account for one of every 10 deaths in the United States; if deaths due to cancerous tumors of the digestive system are included, digestive disease ranks as the third most common cause of death in the United States.

One of every three surgical procedures is performed for a digestive disease.

One of every six men who miss work do so because of a digestive disease complaint. Digestive disease is the second ranking cause of disability among workers in the United States.

Over 2 million people have digestive disease problems affecting their capacity to work; of these 2 million, almost 25 percent are totally disabled.

Ten percent of all personal health expenditures are for digestive diseases-related problems.

In 1973, annual economic loss from digestive diseases was calculated at $16.5 billion. That was over 10 percent of the annual economic cost from all diseases.

Digestive disease is the leading reason for hospitalization of people aged 45 to 64, and the second ranking reason at other ages.

These are not simply assertions of facts—they are facts, supported by data supplied by the National Center for Health Statistics of the Public Health Service. Recently, in a study published by the Institute of Medicine of the National Academy of Sciences reporting on the "Current Burden of Illness in the United States," Rice, Feldman, and White reported that in terms of direct economic costs of illness, digestive diseases represented 14.7 percent of the total, with only one category of illness being higher, that of the diseases of the circulatory system.

Of course, persons in rural areas suffer these diseases as well as those in urban areas; however, it is likely in most cases that their care will be poorer, because of the lack of medical facilities and personnel, as well as the lack of continuing education for those who deliver care.

Mr. Speaker, the new Digestive Diseases Information Center has laid out an ambitious program for itself, including publications of factsheets on the diseases, newsletters, a campaign to educate science writers, a campaign for professional and lay education, and the placement of articles about digestive diseases in national magazines, labor, and industry publications. The Center also hopes to involve radio and television.

It is my understanding that the Center will rely upon private, not Government funding for its work, and although it will not become a voluntary health organization in the sense of seeking members, establishing chapters around the country, and developing broad-based fund drives, it will support and enhance the work of those voluntary groups already in the field. This kind of effort to support like-minded groups, and to coordinate efforts, is to be strongly commended. I wish the Center great success.

Finally, Mr. Speaker, I want to indicate my support for the Natinal Digestive Disease Commission. Ever since the legislation to initiate the Commission was passed 18 months ago, a dedicated band of more than 25 outstanding individuals have worked hard, traveling at considerable inconvenience in effort and time to all geographic areas of the Nation, to learn of the experiences, information and insights of patients, researchers, physicians, nurses, and many others. These commissioners have worked hard, and soon will send the Congress a full report on their findings and recommendations. I am looking forward to receiving them.●

CONGRESSMAN DRINAN'S 25TH ANNIVERSARY IN PRIESTHOOD

HON. MICHAEL HARRINGTON

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. HARRINGTON. Mr. Speaker, my irrepressible colleague from Massachusetts (Mr. DRINAN) has celebrated an anniversary recently which ought to be cause for some celebration in our delegation. We have known for quite some time of BOB's longstanding liaison with all causes liberal and humane. And there has been always assumed a "meaningful relationship" between BOB and the Law, with a capital L. It is also no secret among the well connected in Massachusetts circles that BOB DRINAN has turned what was once an occasional filing with partisan politics into a living arrangement which we all hope will continue for many years. But the anniversary I refer to today, Mr. Speaker, is a celebration which gives shape and coherence to all of these various indiscretions. We celebrate this year, in celebrating BOB DRINAN's 25th anniversary of entering the priesthood, the fact that for the past 25 years, he has been running in the black, which is a lot more than we can say for the rest of the U.S. Government.

Having now jeopardized my standing with the church, the Jesuit order, and St. John's Prep in Danvers, Mr. Speaker, I would like to bring to my colleagues' attention a tribute paid more deferentially to BOB DRINAN by William Leonard, a member of BOB's fellowship. I recommend it to my colleagues, and include it in the RECORD:

SERMON AT THE 25TH ANNIVERSARY CELEBRATION OF THE ORDINATION OF FR. ROBERT F. DRINAN, S.J.

Many of us remember vividly that sunny June day in 1953 whose silver anniversary we are observing today. The celebrant of the Mass was the same, though perceptibly younger. Dr. Frank, whose absence today is such a pull on our heartstrings, was here with Helen and Catherine. A legion of friends crowded the pews. The eloquence of the then-bishop of Worcester filled the church. And we all rejoiced and gave thanks to God for a new priest. The day was bright with gladness and immense promise. Was it all twenty-five years ago? As Pogo said, "They don't make years the way they did when I was a boy. In those days they made a year that would last." And what a quarter-century it has been; the age of Sputnik the age of Aquarius; the stormy sixties and the sorrowful seventies; Vietnam and Watergate; Vatican II, the "new morality," liturgical changes, resignation of priests, departure of nuns, closing of parochial schools . . . I am reminded of the story about the young English officer, just out of military academy, who was drilling his company for the first time near the cliffs of Dover. "Forward march!" he shouted, and the troops swung off. But then he couldn't remember any other commands. The company drew closer and closer to the edge of the cliff, and at last the sergeant spoke up: "Do say something, sir, if it's only to say goodbye."

And what have all of us been doing during these twenty-five years? Let me make an immense, sweeping simplification and put it this way: we have been trying to become converts. Under all the goings and comings, the growing up, the marrying, the rearing of children, the pursuit of a career, the coping with sorrow and loss, we have been trying, against the drag of the flesh and the perverse blindness of self-seeking, to realize how profoundly we are loved by our God and to respond adequately to that love. This is conversion; a turning away from the idols, a turning toward God.

If we were ever fully converts, what would we be? In the first place, we would be adult, mature disciples—not blown about by every word of doctrine, not riders of an emotional roller-coaster. We would be conscious of our consecration as the holy people of God, and unwavering in our loyalty to it. We would be enthusiastic, because of our conviction that our world has been loved and redeemed by God. We would be realistic, because we would have assessed accurately the forces arrayed against us, but optimistic, because of our confidence in the mercy and power of him who can bring good out of evil. We would be endlessly grateful for what we have been given: life, light, hope, love.

But, over and above this full humanity in a personal sense, we would—if we were wholly converted—be alert to the will of God for the coming of His kingdom. Solid centers ourselves, we would know we are called to go out, to give ourselves to others in love, to humanize the world and make life livable for our fellows. We would be men and women for others, bent on imitating our Master, Jesus Christ, who came to serve, not to be served. We would be striving not only to alleviate the misery and unhappiness of individuals in our immediate acquaintance, not only to resist the forces of injustice and oppression, but to reform the structures of our society which bring about and perpetuate injustice.

Where does the priest fit into all this? He must collaborate, like any Christian, in his own conversion. But his particular grace,

the grace of Holy Orders, is given not for himself but for others. He is to spend and be spent for the building up of community on the Earth. He is to lead the voices of men and women as they speak to God, but he must also make it possible as far as he can for them to speak to one another. He is called to be a bridge across which God will come to men and men will go to God, and across which, also, men can walk into one another's hearts. Painfully conscious of his own frailty and fallibility, an ordinary believer like anyone else, he must be sympathetic with doubts, uncertain about problems, modest in giving advice, and yet, as commissioned ambassador and courier, he must speak in the name of him who came to cast fire on the Earth; he must make us uncomfortable; he must dispense a new hunger, a new thirst. There are better things to be done than we are doing now for God and for our brothers and sisters.

And if unjust structures in our society are to be reformed, if the elderly, the destitute, the oppressed, the powerless are to have an advocate, where better than in the halls where the country's laws are framed, where public policy is debated and established? Fr. Drinan's proudest priestly title may be seen one day to have been not professor, not dean, not doctor of laws, but representative, a priestly office, indeed, as we know from the Letter to the Hebrews, a Christ-like office. When I examine the congressional committees and subcommittees on which he serves I find that their concerns are these: civil rights, the administration of justice, consumer affairs, environment, energy and long-term care of the aging. Are these not worthy concerns for one who would imitate natural resources, the housing, health, and in our day the Good Shepherd, the author of the parable of the Good Samaritan?

And when I look over the titles of his books and of the organizations in which he is active I find an absorption in kindred matters: the war in Vietnam, family law, the right to be educated, civil liberties, religion and the courts, bread for the world, retarded children, the rights of black people, and—this seems to me singularly appropriate in a disciple of the Jewish Christ—a profound dedication to the sufferings of Jews in Soviet Russia and to the struggle for survival of the tiny nation of Israel. I turn from a consideration of Fr. Drinan's preoccupations in the last twenty-five years to the document of the Second Vatican Council on the Church in the Modern World and I find an extraordinary consonance of ideals and objectives. I read over Father General Arrupe's exhortation to us Jesuits, asking us to become "men for others," and I find it a summary of Fr. Drinan's ministry, carried on with courage, hope, humor, inflexible purpose, and a store of energies that I can only envy.

A man I know was talking recently about a certain priest. "He's a good preacher," he said, "but he has a slight speech defect. He can't stop talking." Lest you put me in the same category, I shall conclude by telling two very short stories. The first concerns a letter I received from a good friend, a Protestant minister whose theology is Calvinist, at a time when I was experiencing a good deal of misunderstanding and opposition. After assuring me of his sympathy and giving me generous encouragement, he said, "Bill, never forget who is the true judge of men. I think Calvinists and Jesuits especially need to be told that."

I read recently that a priest's vocation is to seek the greatest possible making present of God in the world, and I was reminded of an incident that took place a few years ago, when I was visiting Georgetown University in Washington. It was Holy Thursday, and I went over to Dahlgren Chapel to join the community in the solemn liturgy of the day. We were all assembled, vested and waiting in the sacristy for the signal to begin when the door flew open and the Congressman representing the Fourth District of Massachusetts, fresh from the debates of the Congress and the business of his office, burst in, flung off his jacket, vested swiftly in alb and stole, and joined the line of priests now moving toward the altar. The next time I saw him he was helping to distribute Holy Communion. An unusual vocation? A unique vocation? Yes, but an unusual priest, even a unique priest. Today we give thanks both to God, who called, and to Fr. Drinan, who answered.●

THE CONVINCING CASE AND NEW INFORMATION ON WHY THE 1980 OLYMPIC GAMES SHOULD BE MOVED OUT OF THE SOVIET UNION

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. KEMP. Mr. Speaker, during the past year and a half, I have addressed the House on a number of occasions on what the Soviets have up their sleeves for the 1980 summer Olympic games now scheduled to be held there. But new information, reinforcing the points I have made, continues to come to me, much of it from the International Monitoring Committee, and I feel compelled to bring that new information to the attention of my colleagues. It strengthens the summary case against the event remaining in the Soviet Union.

The Soviet Union has forfeited its privilege of hosting the games. Examine the continuing violations of human rights in the Soviet Union, the indications that it intends to exclude the athletes of certain countries with which it has major political differences, its refusal to guarantee freedom of the press for coverage of the games, and the nature of its training of athletes, and you will have a convincing case for removing these games from the Soviet Union.

Let me elaborate on this case, both referring to my prior RECORD remarks for anyone wishing to research the matter further and bringing in new information.

HUMAN RIGHTS

There is little doubt but that the Soviets intend to forcefully clear out all of the "dissidents" from the geographical areas surrounding the location of the games' events: not just Moscow, but also Tallinn, Kiev, and Minsk. They intend to remove them not only for the period of the games but in advance of and immediately following, in order that athletes, spectators, camera crews, and correspondents will not be able to meet with or interview them.

"The Vigil," a publication of the Washington Committee for Soviet Jewry, has brought us new information on this point:

CLEANSING MOSCOW

For many months now, Soviet Jews have been telling us that they have information that the authorities intend to "cleanse" Moscow of all activists for Jewish emigration and dissidents so that no dissenters will be visible during the Moscow Olympics of 1980. Their predictions are becoming more and more plausible each day, as one by one leaders of the Jewish movement are sentenced to exile. The court case against two American reporters and an article in the newspaper criticising a third are further evidence that the Soviets are attempting to raise a smoke screen on information about refuseniks and dissidents emanating from the USSR, so that they will be free to perform their acts of tyranny in the darkness.

Vladimir Slepak, Ida Nudel and Josef Begun have been sentenced to five, four and three years exile, respectively. Slepak and Nudel were major factors in the transmittal of information regarding Soviet Jews to the West.

There are still those in Moscow who transmit information to the West, but the major figures cannot perform this function and the information, especially that which comes from the provinces and the Prisoners of Conscience, has already begun to taper off.

The Kremlin, beginning two years before the Olympic games, is attempting to divert the West from news of oppressive actions closer to the 1980 starting gun, to avoid adverse publicity then. They probably reason that no one will connect arrests of Soviet Jews and attacks on Western newsmen two years in advance of the 1980 Olympics. We must take seriously what the Soviet Jews have told us—their worst predictions are coming true. History has shown that the Kremlin acts in this way when foreign visitors are in their country. During the visits of President Nixon in 1972 and 1974, Soviet Jews were rounded up and put in prison for two weeks and, this past April, after visiting Congressmen met with Jews in Moscow and Leningrad, English speaking refuseniks were sent out of Kiev on work details to prevent them from meeting with the Congressmen.

Jim Gallagher, the Moscow correspondent for the Chicago Tribune, has also provided additional evidence of this in a very recent column:

[From the Chicago Tribune, July 27, 1978]

OLYMPICS' FIRST EVENT: CRACKDOWN ON DISSIDENTS

(By Jim Gallagher)

Moscow.—Orlov, Ginzburg, Shcharansky, Whitney, and Piper will not be competing in the 1980 Olympics here, but you can score them as casualties of the competition.

Western observers following the action from the sidelines say that Soviet concern about the image of the games was part of the motivation for recent moves against the five, three local dissidents and two American correspondents.

The Soviets are determined that the Olympics two years hence will reflect nothing but glory on this city and society. Well-organized games in a well-behaved city will lend credence to the Communist contention that a brave new world is being built here.

On the other hand, the worldwide attention attracted by the Olympics makes them a potential source of great embarrassment to the Soviets, who worry that dissidents will demonstrate for the TV cameras and that foreign journalists will file on all the shortcomings here.

In the view of some experienced and knowledgeable westerners here, the current campaign against human rights activists, as well as efforts to isolate and intimidate the foreign press, stem in no small way from a determination to keep the games from turning into a fiasco.

Yuri Orlov, Aleksander Ginzburg and Anatoly Shcharansky—members of the Helsinki watch group set up to monitor the denial of human rights in this country—were sentenced in the past weeks to long terms of prison and hard labor.

Their trials were the latest engagements in an 18-month crackdown on the dissident

movement, during which almost all of its leaders have been jailed, banished to Siberia, or stripped of their citizenship and exiled abroad.

There were several reasons for the crackdown: to curtail anti-Soviet criticism at last year's Belgrade conference on human rights, to show President Carter that his campaign on behalf of dissidents is counterproductive, and to throw a bone to the hardliners here while continuing to pursue a policy of detente.

Not least important, the observers maintain, was the desire to defuse the dissident movement well in advance of the 1980 competitions, thus allowing time for the bitterness to subside before the games get under way.

"There are still, people around who might stage protests in conjunction with the Olympics," one western diplomat said. "For example, there's a group of Jewish women whose families have been denied permission to emigrate to Israel and who have become somewhat militant in the last six months or so.

"And there are some nationalist extremists, such as in Georgia, who could conceivably use the occasion as an excuse for violence. But by and large the leadership here was saved itself a big headache by sweeping the dissident under the rug at this time. My guess is that by 1980 the whole furor will be forgotten."

The Soviets are also concerned about the hundreds of newsmen who will visit Moscow during the Olympics, a prospect that many officials here must find appalling.

Based on what they know about their own newsmen sent abroad, they fully expect that the Olympic press corps will consist largely of propagandists and provocateurs.

To make matters worse, the hectic atmosphere of the games will make it impossible to impose on the visiting newsmen anything like the scrutiny and supervision that full-time correspondents here must put up with all the time.

Thus, the possibility that, in between the high hurdles and the platform dives, journalists will be interviewing the few dissidents remaining at large (such as Nobel Peace Prize winner Andrei Sakharov), snooping into the realities of life here, and writing stories about the backwardness of Soviet society.

No doubt the Soviets are searching for some way to put a leash on all this enterprise. The slander suit against Whitney and Piper should be seen in this context.

Craig Whitney of the New York Times and Hal Piper of the Baltimore Sun were found guilty of civil slander for reporting that friends and relatives of a Georgian dissident doubted the authenticity of his televised confession admitting anti-Soviet conduct.

The two Americans refused to take part in the proceedings, arguing that the results were a foregone conclusion and the real intent of the litigation was to make other foreign newsmen here reluctant to cover dissident stories and thereby risk court action.

U.S. Ambassador Malcolm Toon said the "principal motive" of the suit was "to get the message across to you people (American journalists) that unless you confine your quotations to statements made by Soviet officials, you run a serious risk of being tried for libel and slander."

Eventually the court ordered Whitney and Piper to publish retractions, but both they and their newspapers have flatly stated that the order will not be complied with.

"Sure the Soviets want to limit the contract of the full-time press corps with dissidents and the like," a knowledgeable American living in Moscow said. "But at the same time they're sending a message to all those reporters who will drop in for a few weeks during the Olympics. 'Want to get out without any trouble? Then stick to sports.'

"The regular reporters here may shrug off the suit as just the latest attempt to intimidate western newsmen. But don't you think this will have a chilling effect on the sports writers and other one-time hotshots who will be here in 1980?"

We know what is in the mind of the Soviet leadership with respect to human rights. We know that from the recent "kangaroo court" trials and sentencing of Anatoly Shcharansky and Alekrandr Ginzburg and of other brave men and women seeking to assure Soviet compliance with the terms of the Helsinki agreements which it signed and to which it bound itself. And we know that in light of what the Soviets must have known would be the impact upon consideration of the Olympic games. (July 10, 1978, 20029; July 17, 1978, 21243–4; July 21, 1978, 22247.)

REFUSAL TO GUARANTEE FREEDOM OF THE PRESS FOR COVERAGE OF THE GAMES

There can be no doubt but that the Soviets do not intend to guarantee freedom of the press for coverage of the games. There is much evidence on this point.

The Soviets are trying to rewrite the Olympic rules governing the admission and activities of news correspondents, in order to permit them to thereafter exclude in conformity with those rewritten rules, "hostile reporters and newspapers, radio and television stations that are established to destroy the spirit of peace and friendship between the people and the principles of the Olympic movement." That is a direct quote from the "Daily World," the official organ of the Communist Party of the United States, referring to an action of the Soviet Olympic Committee. (July 10, 1978, 20029.)

The Soviets want to exclude Radio Free Europe and Radio Liberty specifically. But it goes beyond those two. Such a precedent could be used against anyone who writes or otherwise reports unfavorably about Soviet training, or the conditions under which reporters covering the events must function—such as writing or reporting about the lack of freedom and restraints on human rights, or even any poor Soviet performance in the game.

We also know that the Soviet Ambassador to the United States, Anatoly F. Dobrynin, at a recent news conference here, refused to give assurances of freedom of the press during the games coverage. (July 10, 1978, 20029.)

We know also of the recent trials in Moscow of 2 American newspaper correspondents, and we know of the growing harrassment of foreign business representatives, diplomats, and newspersons in general.

These matters and their relevance to the Olympic games have not escaped the attention of the world's press, as this June 29 editorial from the Washington Post illustrates:

SPIRAL OF SHIN-KICKING

We are angered as journalists and troubled as citizens by the Soviet Union's apparently unprecedented decision to bring civil slander charges against two American correspondents in Moscow—for reporting they had been told that a dissident's televised "confession" to a charge of anti-Soviet agitation had been falsified. It is an escalation in kind of the "normal" intimidation practiced on the foreign press. It represents an evident effort at censorship. It is a plain violation of the Soviet government's Helsinki pledge to permit journalists to do their professional work. Further, it substantially adds to the queasiness many people feel over Moscow's hosting of the 1980 Olympics. Just what controls do the Russians plan to impose on the Olympic press?

That is, unfortunately, not all. When the United States last month arrested and held on high bail two Soviet spy suspects (rather than simply expelling them in the usual manner), the Kremlin tersely stated that "two can play at this game" and locked up an American businessman in Moscow. Quiet diplomacy has since gotten all three of these men out of jail, perhaps as prelude to a swap that, however distasteful from a legal standpoint, has a certain political rationale. Just as American officials were hoping that this upward spiral of shin-kicking had been halted, however, the suits were filed against the correspondents of the Baltimore Sun and The New York Times. Between the announcement of the suits on Tuesday and the actual bringing of them Wednesday, Secretary of State Cyrus Vance raised the matter with the Soviet ambassador. The Soviet government nontheless chose to proceed.

Protests are important but, we fear, inadequate. Timely reciprocal action to protect the integrity of the American news-gathering process in Mocow is called for. There should be no action taken against Soviet correspondents for what they write: That is not the American way and, anyway, the American judicial system does not lend itself to the Soviet sort of political manipulation. But retaliatory action should be taken to restrict the ability of Soviet journalists in Washington to do their professional work. For journalistic and other reasons, Moscow values the license to rub shoulders and roam that its correspondents enjoy amply here. While the specter of judicial intimidation hovers over American journalists in the Soviet Union, that license for Soviet press representatives in America should be abridged.

SOVIET POLITICIZATION OF THE OLYMPIC GAMES

The attempted politicization of the 1980 Summer Games by the Soviet Union was predictable. Why the International Olympic Committee did not face that reality at the time of its decision is beyond me, for they cannot be totally blind to Soviet actions over the past six decades.

This politicization has been most obvious in a combined Soviet and certain Third World countries campaign to exclude the athletes of certain countries, most notably Israel, from participation. The targeted countries, which cannot come as a surprise either, are those with whom Moscow and those Third World capitals have had the most intense political, philosophical, differences.

This attempt is now indirect, but unless it is checked it will be direct when the Olympics are actually held. The indirect campaign's shape is one of trying to make those targeted countries ineligible for participation in Moscow under existing or rewritten Olympics rules.

Israel could be vulnerable to an ineligibility because it belongs to only a few of the winter sporting events. (A country must belong to no less than five to be eligible.) And attempts have already been made to exclude Israel from the European and Asian regional games and

from the soccer, basketball, yachting, chess events. The New York Times, as recently (July 1, 1977, 22083; August 2, 1977, 26222–3; September 14, 1977, 29206–7.) The New York Times, as recently as June 7, carried an article about Israel being excluded from participation in the forthcoming Eighth Asian Winter Games. (July 10, 1978, 20029.)

When the athletes from throughout the world are arriving in the Soviet Union in the summer of 1980, the Soviets—either on their own motion or through their Third World surrogates—could move to deny Israel's admission on the grounds of "racism," equating Zionism with racism, as they have tried to do already, and could try to enforce that, knowing that it would be too late for the other countries to do anything less drastic than completely withdrawing in protest. This is what happened to the Republic of China at the last minute in 1976 in Montreal, and the World reaction and national withdrawals in protest never came. (August 2, 1977, 26222.)

SOVIET TRAINING

The founders of the modern games wanted individual athletes to compete against individual athletes, not countries against countries. The games were intended to transcend traditional national rivalries, to give athletes irrespective of nationality or persuasion, that guaranteed right to participate. Implicit in this was participation on equal ground.

The Soviets do not believe in training according to this spirit. Soviet athletes are subsidized. They receive benefits, luxurious according to Soviet standards, which others do not receive. They are not only trained in sports but they are indoctrinated in politics. If they succeed, they are national heroes; if they fail, they are disgraced and their "perks" taken away. All of this happens under the watchful eye of the First Chief Directorate and the Second Chief Directorate of the KGB, responsible for foreign and internal operations, respectively.

Anvone having any doubts about the realities of Soviet training should read the Jack Anderson and Les Whitten column in the RECORD of July 10, 1978, pages 20028–9.

THE PROPAGANDA BONANZA

The Soviets intend to use the Olympics, in violation of the spirit in which these games are supposed to be held, for a propaganda blitz the likes of which have not been intended in amateur sports since the 1936 Olympics in Nazi Germany. I have addressed myself to this important parallel between the 1936 games in Germanv and the 1980 games in Moscow. (April 21, 1977, 11612; July 1, 1977, 22092; July 21, 1978, 22248; August 2, 1978, 24047–8.)

The Soviets intend to use the games for the maximum political benefit of the Soviet Union and the maximum ideological benefit of Marxism-Lenninism.

How will that be facilitated, beyond the Soviet athletes?

NBC's $72-plus million contract with the Soviets for television rights for the coverage contains provisions for the showing in America of approximately 15 Soviet-produced, 1-hour television spots, through LBA Associates, the company of Lothar Bock, a West German publicist who handles pro-Soviet public relations in the West. NBC will also show Soviet produced vignettes, of half-a-minute to 1 minute, during the actual coverage of the games, vignettes showing smiling athletes, happy villagers and dancing school children. We cannot expect to see examples of Soviet failures, their crimes against humanity, violations of human rights, the massive weapons buildup or evidence of their aggressive international policies (April 21, 1977, 11612; April 29, 1977, 12892–3).

GROWING WORLDWIDE REACTION

Because the Soviets have been so blatant, their actions have aroused worldwide indignation.

The International Monitoring Committee for the 1980 Olympics, under the direction of Irene Manekofsky, Ernie Shalowitz, and Irv Losman, has now organized in the United States, France, England, Canada, Holland, and Israel. They are gathering signatures on a worldwide basis for moving the Olympics, preferrably to Montreal where there are adequate and new facilities. (August 2, 1978, 24047.)

AFL-CIO president, George Meany, has refused to serve again as the honorary chairman of the U.S. Olympic Committee for labor (July 21, 1978, 22247–8).

The Valley Forge Roadrunners Association, a chapter of a nationwide joggers association, has even run a relay from Valley Forge, a symbol of freedom throughout the world, to Washington in support of removing the games.

Editorial comment in the world's most influential papers has been clearly in opposition to the Soviets politicizing the event and any refusals of admission of countries, athletes, or newspersons.

Much has happened in Congress too. My colleague from Massachusetts (Mr. DRINAN) has introduced a resolution calling for a boycott of the games, a point to which I will return. My colleague from New York (Mr. GREEN) has forwarded two letters cosigned by a bipartisan group of House Members to Olympic officials, requesting the 1980 games be moved out of the Soviet Union. My colleague from Colorado (Ms. SCHROEDER) has helped organize staff meetings with leaders in this struggle. I have introduced sense of Congress legislation, now cosponsored by 32 colleagues, to move the games from the Soviet Union.

BOYCOTT OR REMOVAL

I wish to close my remarks today on this point of Congress most appropriate—and effective—response to this problem. Which is preferable: a boycott or a removal? I have several thoughts.

First, there are alternative sites to Moscow.

Second, there is still time to do this.

Third, a boycott would hurt our outstanding athletes, because while they might voluntarily remove themselves from the games, athletes of other countries probably would not.

Fourth, a boycott is an event which happens at the time of the event, and is subject to all the last minute confusion and reluctance (July 21, 1978, 22247).●

THE SACCHARIN CONTROVERSY

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. PEPPER. Mr. Speaker, as chairman of the House Select Committee on Aging I have followed the saccharin controversy with some concern. I pointed out at the outset of public debate on this issue that the elderly would be sorely affected by a proposed ban on saccharin, particularly those who suffer from diabetes and other chronic illness in which weight control is a necessary element.

When Congress, in its wisdom, adopted legislation imposing an 18-month moratorium on a proposed Food and Drug Administration ban, I felt that the bill would provide an opportunity for further study and would prevent hasty regulatory action based upon only preliminary information and suspicion.

During the past year evidence has mounted which demonstrates that the benefits of saccharin outweigh the risk. In particular, two recent scientific reports have added confirmation to this view. One was the epidemiological study by Drs. Irving I. Kessler and J. Page Clark, which appeared in the Journal of the American Medical Association. In this study, hospital bladder cancer patients were compared with a control group. The conclusion of the researchers was that—

> Neither saccharin nor cyclamate is likely to be carcinogenic in man, at least at the moderate dietary ingestion levels reported by the patient sample.

Of special significance was a 700-page study done by FDA's own scientist. Dr. Morris Cranmer, director of the National Center for Toxicological Research, reviewed results of 19 animal studies of saccharin as well as 36 human studies from around the world and said:

> The cancer risk of the carbohydrates that saccharin replaces are several hundred times greater than the cancer risk from saccharin.

Prior to the release of these studies, we learned that the prestigious British medical journal, the Lancet, had also reviewed the Canadian rat studies which prompted the FDA to consider a saccharin ban. Lancet said the meaning of the tests was "unclear," and that the case against saccharin is "unimpressive." Similarly, the Swiss Association for Nutrition declared that fear of saccharin carcinogenicity was "not justified" and a report by Dr. D. Schmahl of the German Cancer Research Institute indicated that even diabetics who use saccharin lifelong have no reason to believe that cancer will develop as a result of their saccharin consumption.

FDA Commissioner Donald Kennedy, who once said that it is "virtually certain that saccharin is a human carcinogen" has not, to my knowledge, publicly commented on any of the foregoing studies which tend to run counter to his earlier views. Of course, the machinery set in motion by the saccharin moratorium bill

continues to produce more information. A $1.4 million epidemiological study is being carried out by the National Cancer Institute and the Committee for a Study on Saccharin and Food Safety Policy of the National Academy of Science has invited all interested parties to present their views on subjects relevant to food safety policy at an open meeting to be held here September 7. The information gathered here, and at a previous NAS meeting on saccharin held June 19, will lead to a report to Congress from the investigating NAS committee. I am confident that the accumulated data will lead to a wiser regulatory policy.

Mr. Speaker, the public—which produced quite an outcry at the start of the saccharin ban debate—has fortunately been able to learn of the scientific studies which contradict the original FDA viewpoint. Through articles like the one written by columnist Richard Spong, which appeared in the August 5 Miami Herald, people have been able to read about the opposing views of credentialed scientists and thus become better informed. Therefore, I ask that the article by Mr. Spong appear in the RECORD following my remarks:

[From the Miami Herald, Aug. 5, 1978]

COUNTERATTACK AGAINST "CARCINOGENS"

(By Richard Spong)

It was Alexander Woollcott, if memory serves, who once mourned that everything he enjoyed was "illegal, immoral, or fattening." If the pudgy Town Crier were with us today he would have to amend that to "unconstitutional, unlicensed, or carcinogenic."

First they made us cut down on sugar and salt and tobacco. Then they banned our hair and deodorant sprays, and warned us that there could be arsenic in our toothpaste. They told us to throw away the children's nighties and made us patronize a speakeasy delicatessen if we wanted rare roast beef. They took away the meat tenderizer and told us not to fry our hamburgers in a pan or broil them over charcoal. Having scared the Old Ned out of us about sugar they tried to take away our artificial sweeteners. They swiped our Red Dye No. 2 and warned us not to stay too long in the noonday sun. They tried to sanitize our ice cream—we lucked out on that one—and to take the nitrites out of our bacon, and on that the jury is still out.

A good deal of this they did because some rats up in Canada got bladder tumors. Even though, as *Science* magazine observed in the midst of the saccharin controversy: "Many scientists point out that when it comes to bladders, rats are a special breed."

Well, by a nice coincidence, "they"—meaning mainly the U.S. Food and Drug Administration but also all the other do-gooders who have been sticking their long noses into practically everything most of us get a kick out of—are about to be challenged on two fronts.

First came a series of impressive reports that indicate that saccharin in diet drinks might in fact be less dangerous to your life expectancy than excess weight. Back in February, Dr. Bernard Cohen of the University of Pittsburgh suggested that whereas one diet drink daily for life might reduce life expectancy by two days, a 45-year-old male who was 20 pounds overweight might be cutting a full year and a half off his normal life span.

Then last month one of FDA's own, Morris Cranmer, director of the FDA's National Center for Toxological Research, said in a report to Commissioner Donald Kennedy that the use of saccharin might actually—in some cases—tend to reduce the expectancy of cancer. "Chronic caloric restriction inhibits the formation of many types of tumors," Cranmer wrote, "decreasing the incidence and delaying the time at which tumors appear."

And just the other day Dr. Irving Kessler of the University of Maryland School of Medicine reported in the Journal of the American Medical Association on an interesting study made on more than 1,000 hospital patients in the Baltimore area. "Our findings suggest that ingestion of NNS (nonnutritive sweetener), at least at the moderate levels reported by the patient sample," wrote Dr. Kessler, "is not associated with an increased risk of bladder cancer. It is concluded that neither saccharin nor cyclamate is likely to be carcinogenic in man."

Add the three reports up and they seem to be saying: 1) Saccharin users are likely to live longer than fat people; 2) Saccharin users are less likely to get tumors than are fat people, and 3) Saccharin and cyclamates in modest amounts probably don't cause cancer in man, anyway.

Comes now Dr. Elizabeth Whelan, Harvard School of Public Health graduate and researcher and her newly founded American Council on Science and Health. Mrs. Whelan says her outfit will provide a "voice of reason" when it comes to chemicals and food. She makes no bones about opposing Ralph Nader's Health Research Group, which, says Mrs. Whelan "has had a monopoly on the ear of the press on health issues" and has "given a biased representation on chemicals and human health."

"Anybody who says saccharin is injurious is an idiot," Teddy Roosevelt declared back in 1907. A good many congressmen and 80 per cent of the American people—according to one food-industry poll—think T.R. was absolutely right.

One of my less dedicated chums has suggested that this whole cancer kick would fade away like an old soldier if somebody would come up with a study implying that newsprint was carcinogenic. Which somebody probably will. ●

BALANCE(S) OF POWER SERIES BOOK III E—SUB-SAHARAN AFRICA

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, in my last selection dealing with the military balance in regional perspective, the problems posed in the Horn of Africa were viewed in the context of Soviet strategic objectives in Africa as a whole. Today's article views the military balance interior to the Horn from the national perspective of Kenya.

The article, "The Military Balance in East Africa: A Kenyan View," shows trends of military buildup and increasing prospects for confrontation among the nations of diverse ideological, political and economic persuasions in sub-Saharan Africa.

The author, Maj. J. R. Kibwana, of the Kenyan Navy, conveys the concerns which we Americans must share in recognition of the need to defend ourselves and our allies against unpredictable military exploitation of turmoil in this developing area of the world.

This article, which first appeared in the fall 1977 Naval War College Review, follows:

THE MILITARY BALANCE IN EAST AFRICA: A KENYAN VIEW

(By Maj. J. R. Kibwana, Kenya Navy)

The past 5 years have seen a dramatic increase in the level of military buildup in the East African states of Somalia, Ethiopia, Sudan, Uganda, Tanzania and Kenya—a development that has, in certain cases, led to an extravagant diversion of very scarce human and financial resources. To understand this shift from that postulated by a great many African statesman during those palmy days in the early independence period, when any military expenditure was viewed with great abhorrence, a brief overview of the history of the relevant armed forces is appropriate.

With the exception of the Tanzania military forces, which were rebuilt completely from scratch after the 1964 mutiny, and the Ethiopian forces, the rest of the East African Armed Forces were a legacy of the colonial regimes. They were essentially police instruments geared to internal security roles and frontier defense, external security having been the responsibility of the colonial power. As could be expected, therefore, the size, composition and doctrine of these forces were unimpressive, to say the least. Ill-formed and incipient, they had scant capacity to project military power effectively to their own borders, let alone sustain operations beyond them.

This, then, was the situation with regard to the military forces of the newly independent states of Somalia, Sudan, Uganda, Tanzania and Kenya in the early 1960's. Lacking an industrial base with which to support themselves and hampered by financial and technological constraints, these institutions depend almost entirely on the former metropoles for military equipment, logistics, training and certain specialized supporting services. The overall effect of this continued dependence on the excolonial power was stultifying in most cases, since any planned expansion or modernization of these forces was subtly tempered by the former metropoles' own perception of the military requirements of that particular country vis-a-vis their own political economic or overall global strategic interests.

Little or no opposition over this overt limitation of arms supplies to their countries was voiced by the respective political leaderships. This was hardly surprising, considering that at this time civil-military relations were not particularly happy. An authoritarian military regime was in power in the Sudan; short-lived abortive military coups d'etat had erupted in December 1960 in Ethiopia in December 1961 in Somalia, and there had been the Tanzanian, Ugandan and Kenyan mutinies of January 1964.

Against this background, the notion of any military expansion was viewed with great hostility and in certain extreme cases even the abolition of the armed forces was advocated.[1] Several other factors were also contributory to this continuing relationship with the former metropoles:

A general ignorance, albeit excusable, among African politicans (who had successfully followed the advice to seek first the political kingdom) not only of the function of the armed forces, but even in the vaguest terms, of their equipment, organization and capabilities.

The external threat to national independence was viewed not so much in military

---

Footnotes at end of article.

terms as in politicoeconomic terms—the neo-imperialist threat.

The benefits of standardization accruing from a single source of supply of military hardware in terms of costs in maintenance and training.

Up to the beginning of the 1970's, the external political relations within East Africa were more or less stable. There had been general public acceptance of the three principles of coexistence. That no consideration—historical, geographical or ethnic, could permit any African State to claim sovereignty over another, or part of its territory; that colonial boundaries were fixed, and that self-determination was the only criterion for any change. This doctrine had been embodied in the Charter of the Organization of African Unity (OAU) enjoining all signatories to respect "the sovereignty and territorial integrity of each member state and for its inalienable right to independent existence." [2]

However, the early 1970's heralded in almost all these countries difficulties of varying severity in the political, administrative and economic spheres, some of which were influenced by external forces and others arose from pressures of rapid development on weak economies.

The facade of African unity and coexistence began, therefore, to show signs of cracks as each country began to reexamine its national interests vis-a-vis regional considerations. Differences stemming from dormant ideological convictions or unsatisfactorily defined borders now manifested themselves by giving rise to growing hostilities between individual countries. These difficulties sometimes culminated in the sort of border skirmishes that occurred between Ethiopia and Somalia.

The situation was further exacerbated by internal upheavals and subversion by political, ethnic or occasionally religious minorities, often supported from outside. In this regard, Kenya had to contend with the "Shiftra" [3] insurgents supported by Somalia, while Ethiopia had the problem of the Eritrean separatist movement and the Sudan experienced a major rebellion by the Christian minority in the south. All these problems brought into sharp focus the need for military self-sufficiency at the national level in these affected countries.

Other factors that led to a great deal of attention being paid to the military establishment were:

The painful realization of the African countries of their inability to participate effectively in major strategic military questions affecting the continent and more specifically the liberation of Southern Africa. This was particularly true of Tanzania, which had to face harassment and intrusion at here southern border by Portuguese forces in Mozambique.

Pressure from the military elite, as in the case of Sudan, Somalia and Uganda, which had military governments. It is a peculiar phenomenon of the military governments to expand their armed forces independently of external threats. A study of military expenditures of these countries over the period immediately preceding a coup d'état bears this fact out.[4] With these regimes, the flourish of jet aircraft, the rumble of heavy tanks, artillery, etc., were sure symbols of power and authority.

With the initial goodwill of coexistence now eroded and the restraining influence of the ex-metropoles severed, all of these neighboring countries sought to improve their military capabilities according to their own perception of national security issues. More often than not, however, the relative sizes of their armed forces and their defense budgets indicated the importance placed by individual governments on the role of military power in their relationships with neighbors.

It should be noted here that even prior to this situation, the then level of military expenditures was a burden that these countries could ill-afford. Indeed, the subsequent military expansion would not have been possible without the assistance of foreign powers in the provision of military hardware as grant aid or on easy credit terms. Such arms transactions were, in most cases, out of all proportion to the defense needs of the recipient states and, in fact, tended to perpetuate the vicious circle of an arms "walk" in the region.

For instance, the U.S. aid to Ethiopia during the 1960's and early 1970's had a perceptible influence on Somalia's acceptance of military assistance from the Soviet Union (amounting to about U.S. $32 million) and the subsequent Soviet military presence in that area.[5] On the other hand, this sharp increase in Somalia's military strength was itself viewed by Kenya as a real threat to her national security, necessitating a reassessment of her own defense forces.

Kenya's Armed Forces policy in the first decade of independence was directed towards fashioning a cohesive and balanced military force commensurate with the perceived needs and priorities of the new nation. It was according to the government's defense policy, "not considered necessary to build up massive and unnecessarily large armed forces which would be an extravagant and wasteful drain on the country's scarce economic resources."

In pursuance of this policy, the armed forces were kept at a low level, consisting of a 7,500-man army, an 800-man air force and a small 350-man navy.[7] In comparison with her neighbors, this was modest, both in terms of numerical strength and in terms of military expenditure which remained in the area of 1–2 percent of the Gross National Product.

However, as could be expected, Kenya could not remain unresponsive in the light of an escalation of arms by her neighbors, made possible by assistance on a lavish scale from the Soviet Union and the People's Republic of China. A brief overview of the military situation in these countries is given to illustrate Kenya's security problem at this time relative to the countries with which she shares her lengthy and permeable borders:

SOMALIA

Since its formation in 1960, the Somali National Army has expanded from 5,000 to a formidable well-armed force of 23,000 men in 1975.[8] For a country with a population of only 3,150,000, the size of the force is quite out of proportion to its defensive needs. This situation is viewed with extreme suspicion by Kenya, in view of Somalia's irredentist claim to the North Eastern province of Kenya, and one can only assume that the level of Somalia military preparedness is linked to its continued policy of settling the border issues in one way or another.

ETHIOPIA

Although the Ethiopian Armed Forces are relatively large (a total figure of 44,800 in 1975.[9]) they are not considered excessively large for a population of 27,430,000, with potential enemies at almost every point around her circumference. Indeed, it was Ethiopia's vulnerability to concerted action by the Eritrean Liberation Front and the Somali dissidents in the east, not to mention the hostile regime in the Sudan, that led to an extensive modernization of the armed forces with assistance in the form of equipment, financial credits, grants and training from the Western countries, principally the United States. Furthermore, the governments of Ethiopia and Kenya signed a mutual defense agreement in July 1963 as a result of this common threat.

Nevertheless, the relations (from Kenya's point of view) with the present turbulent military regime are uncertain, and the treaty may not be much of an assurance to Kenya in the future.

SUDAN

Although the Sudanese Armed Forces are formidable at 48,600 men for a population of 17,870,000 relations between Kenya and Sudan are amicable to the point where Kenya administers roughly 30,000 square miles of Sudanese territory under mutual agreement. The length of the common border is under 100 miles and the chances of conflict between these two countries are remote.

UGANDA

With the assumption of power by the military regime of General Idi Amin in 1971, the Ugandan Forces underwent a rapid expansion from 6,000 to the present level of 21,000 men.[11] The continuing instability in Uganda under the flamboyant leadership, often predisposed to military adventurism and bullyism,[12] has emerged as one of the more serious threats to Kenya's security. With the current relative imbalance in the arms level between these two countries, one would well visualize a situation where a limited armed conflict could ensue, perhaps as a result of an effort by the military regime to provide distraction from some severe internal crisis.

TANZANIA

The Tanzanian Armed Forces were completely rebuilt from scratch following the 1964 mutiny and have grown steadily through the years to the present level of 14,600, a modest size for a country of a population of 15,110,000.[13] Relations with Tanzania, once one of Kenya's closest associates, at the moment are cool, largely owing to diametrically opposed ideological philosophies, especially in the economic field. However, political and diplomatic agreements appear to be the future means of resolving conflicts between these two countries.

It is against this background of superior forces of her neighbors in a period of strained relations, that Kenya must examine her capabilities to offer credible deterrence. Even using the yardstick of effectiveness and numbers rather than the old yardstick of size and numbers of units as a measurement, Kenya's security appears to be wanting. It appears, for instance, that Somalia is the strongest naval power in East Africa, with Ethiopia second, Tanzania third and Kenya fourth. It seems prudent at this time for Kenya to pursue a modest expansion program of its armed forces and to acquire more advanced equipment to redress this imbalance. Indeed, it is desirable that this situation be addressed now rather than permitting it to develop to a point where the outcome of a possible conflict would be a humiliating and costly defeat.

The pattern of military development in East Africa to date indicates that the arms buildup will increase. Against this background must be viewed the increasing tendency to resort to force in civil conflicts, the emergence if violent military regimes and the impotence of the OAU in solving disputes. One other factor likely to assume a new dimension in the future is the commitment by OAU member states to a policy of confrontation in the liberation of South Africa.[14] The policy of the 1960's of not to "build up Armed Forces which are extravagant and a drain on the country's scarce resources" [15] becomes redundant. Rather, it should be accepted that the goals of economic development and social justice can only be expected where an atmosphere of security and stability exists. No price is too high for us where the preservation of the independence, liberty and freedom of the Kenyan people is concerned.

JAMES GRANT BOLLING

HON. THOMAS P. O'NEILL, JR.

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 14, 1978

● Mr. O'NEILL. Mr. Speaker, it is with great sadness that I join my colleagues in expressing my profound sympathy to DICK BOLLING for the loss of his beloved wife, James Grant Bolling.

"Jim" Bolling was a loyal and steadfast friend to me and my wife, Millie, for nearly two decades. The entire O'Neill family will greatly miss her.

I remember Jim as a woman of great warmth and dignity, with a heart filled with compassion and concern for all people. A superb individual, she possessed a marvelous and unique sense of humor, a rhetorical wit, a gifted and incisive mind, and astute political instincts that earned superlative points on everyone's poll. I have admired and loved Jim for the courage to stand up and be counted for her convictions and beliefs, and for her fearless outspokenness as an advocate of justice and that which is best for America.

I think it was highly fitting that the House of Representatives passed this week the extension of the equal rights amendment which, to those of us who knew and admired Jim Bolling, will be viewed as a memorial tribute to her efforts on behalf of women. No one devoted more natural talent, energy and resourcefulness to the causes in which she believed than Jim Bolling. To her way of thinking, right would always triumph—with some forceful assistance from its friends.

Jim and DICK BOLLING made a competent partnership, both in public and private: a partnership marked by mutual courage, intelligence, strength of character, moral fortitude, and indomitable spirits that never gave in to defeat. To Jim and DICK BOLLING defeats were only temporary setbacks that spurred them forward with renewed vigor and determination to meet a brighter and victorious tomorrow. Jim provided firm and resolute encouragement to her husband, and perhaps no other Member's spouse ever shared a greater sence of the agonies and the ecstacies that a public office holder experiences; no spouse ever followed the political and legislative process in greater detail than Jim Bolling; no spouse could perform with finer brilliance or effectiveness in political Washington than Jim Bolling; no other spouse had a better understanding of political pragmatism and realism than Jim Bolling; and no other spouse did more for congressional colleagues and their families than Jim Bolling.

Some of the Members of the House have described Jim Bolling as a member without portfolio. I would simply say that she was all of that and more—she was a parliamentarian without portfolio, a clerk, a sergeant at arms and, a chaplain without portfolio. She understood the "ins and outs" of a congressional office, recognized the role that the politics of personalities plays in determining the success or failure of legislation, and knew when and how to direct Members and staff to effect a particular legislative result.

Jim Bolling was as beautiful a human being as she was bright and talented. She was realistic, pragmatic, hard-nosed and, darned tough—no one could be more immovable if she believed in something based on principle and conviction. Yet she could be as soft as a kitten when someone needed her help and assistance, advice, or friendship. Whether that someone was a constituent, a staff employee, Congressman, Senator, or Presidential adviser, Jim Bolling responded immediately and compassionately as the caring and thoughtful person she was.

A confidante, adviser, consultant, and advocate, Jim Bolling truly was DICK BOLLING'S best friend. I know how deeply proud of Jim DICK was, and I realize how difficult her loss is to DICK.

I join my colleagues in honoring Jim Bolling's memory. My wife Millie and I extend sincerest sympathy to our good friend, DICK BOLLING, to his family, and to Jim's family for their deep and irreplaceable loss.●

PERSONAL EXPLANATION

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. MAZZOLI. Mr. Speaker, I was unavoidably absent for one rollcall on August 14, 1978.

Had I been present, I would have voted "no" on rollcall No. 234, the Young of Florida amendment to prohibit indirect aid to Vietnam.●

PRIVATE DEVELOPMENT IN THIRD WORLD COUNTRIES

HON. RICHARD NOLAN

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. NOLAN. Mr. Speaker, very often neither Members of the Congress nor the general public fully appreciate the continuing benefit resulting from wisely used private contributions to development in Third World countries. I would like to call the attention of my colleagues to a report of a very successful training project for rural youth still going on in Dahomey (formerly Benin) under financing by the American Freedom From Hunger Foundation.

Rural youth in some 200 clubs have been helped in getting their own agricultural enterprises started by this project, and are still being assisted as a result of a revolving fund created by loan repayments. When training can be linked with supply of simple tools and equipment, the training has a practical application. In this instance, a relatively small amount of money has been made to go a long way in rural development.

The project has been carried out on behalf of the American Freedom From Hunger Foundation by the Food and Agriculture Organization of the United Nations, working through its Freedom From Hunger Campaign Action for Development headquarters in Rome.

Mr. Speaker, I would like to quote from a letter from Mr. Herbert J. Waters, president of the Foundation, who has kindly called my attention to this project report:

As you will see from the progress report prepared by Mr. M. Archaimbault, the FAO expert who is supervising the project, an investment of $78,698 by the American Freedom from Hunger Foundation in 1972 to give agricultural training to rural youth in what was then Dahomey, is continuing to benefit rural youth in 200 clubs through creation of a rotating fund from which the young club members can borrow to purchase oxen, ploughs, harrows, and hand tools, paying back the loans out of subsequent crops. We like the concept of converting from on-time grants to the revolving loan fund, training young people in how to manage loans—as the report indicates, the young people themselves decided what to buy, how much to borrow, and how to repay it. The fact that these small agricultural loans were responsibly accepted by youth groups, who managed to avoid incurring debts beyond reasonable limits, is attested to by the fact that a balance of $22,378.55 is still available for relending in the revolving fund.

Mr. Speaker, I believe Mr. Waters and the American Freedom From Hunger Foundation deserve being commended for this project, one of many they have assisted with around the world.

I hope my colleagues will read the report from FAO describing the success of this project and that it may inspire

enough support for similar efforts among rural youth in other countries.

The report follows:

FOOD AND AGRICULTURE ORGANIZATION OF THE UNITED NATIONS

TRAINING PROJECT FOR RURAL YOUTH IN BENIN: TF/BEN.15(FH)

(Progress report on project by M. Archaimbault)

TF/BEN/15/FH. Phase II—Agricultural training for rural youth

Source of funds: American FFH Foundation.

Object of fund: To give agricultural training to rural youth in Benin.

Credit available: $78,698.

Interest accrued 1970–76: $11,145.

Total: $89,843.

Present state of account	Mar. 3, 1977	Available Dec. 31, 1977
Expenditure prior to Dec. 31, 1976	$62,331	
Code 4242.53.60 equipment	18,633	$14,123.84
Code 4242.53.70 leases	1,500	1,468.50
Code 4242.53.80 grants or bursaries	4,000	3,999.88
Code 4242.53.90 P.S.C., 14 percent	3,379	2,786.33
Subtotal 1977	27,512	22,378.55
Total	89,843	

BACKGROUND

This fund was requested by the project BEN/72/027 as a follow-up to the phase I fund which had made it possible to purchase the equipment needed for 200 Clubs over the period 1968–72. In his report to the Government of Dahomey (now Benin) in 1974, entitled "Agricultural Extension Work", the expert mentioned a number of achievements attributable to the FFH loans:

20 houses with tiled roofs.
27 brick houses still under construction.
140 sheds of straw or thatch.
25 wells.
17 cisterns or tanks.
18 grass-drying huts.
5 tobacco-drying huts.
28 3½-ton silos.
10 pigsties.
30 henhouses.
15 cowsheds.

A certain amount of equipment was also bought including vehicles, photographic apparatus, slide projectors, cassette recorders, etc.

It was because this fund had made it possible for the FAO expert's activity to achieve such success that the FFH was asked to seek support for a second phase.

In 1973–74 the Clubs were further improved by the purchase of tiles to replace the thatched roofs of their premises, of cement to lay floors which could be kept clean and hygienic or for erecting parpeng walls of reinforced soil, of netting for henhouses, of shelters for small animals and gardens, and of hand tools for field and garden work.

At the beginning of 1975, purchases with these loans came to a halt when the first Project Manager left, and for two years the fund was not used. In the meantime there was a change of government, and agricultural policy underwent a radical alteration. It was then decided that the balance left in the Fund should be used to form a rotating fund as a source of agricultural credit for rural youth.

There were two main reasons for this: 1) the first was to do away with the earlier policy of making free gifts on the grounds that young people ought in future to get whatever they need as easily as possible, but never gratis; 2) the second was more particularly to train young people in how to manage loans—that is to say, it was for the young people themselves to decide what to buy, how much to borrow, and how to repay it. Agricultural loans were readily and responsibly accepted by youth groups, who managed to avoid incurring debts beyond reasonable limits.

There was yet another point considered. Thanks to the rotating fund, the Government was gradually able to dispense with foreign aid, since repayments by earlier groups made it possible to grant loans to new groups in process of formation.

PRESENT SITUATION

On this premise, 40 oxen were bought along with the necessary ploughs, harrows, etc. Youth groups who wanted to work the land with animal traction then nominated a drover and an assistant drover to do a fifteen-day training course at an ox-driving centre which was also financed by FFH.

At the conclusion of this course, the two young men returned to their group with their couple of oxen, their cart and their plough. The group had to repay the initial outlay in five annual instalments, beginning after a delay of one year.

Just for the moment there are some administrative and financial difficulties which have to be overcome if the CARDER* agents are to receive their annual grants and to clear them with the rotating fund's bank account. It looks however as if this problem may now be solved with the creation of CNAC (Centre National d'Appui aux Clubs), since the director of this centre also handles the account.

All these procedures may appear somewhat lengthy and drawn out to western minds but it must be understood that Benin is still looking for a way outside the classic or traditional western patterns and that every innovation has to be discussed at great length before it can be applied.

SETTLEMENT OF RURAL YOUTH AT BANIKOARA

Thanks to a United Nations volunteer, two youth groups are now settling in methodically in such a way as to grasp the cost of an operation and its specific difficulties. These two groups of a dozen youths, full of vigour, are doing an excellent job in clearing the land and bringing it under cultivation by working full time on their joint holding and on their own farms.

They work a four-year rotation of crops on well defined pieces of land, with fertilizers and sowing in drills. They have a couple of oxen, a plough or harrow and a small cart. The oxen are kept in a cowshed of straw or thatch, and their manure is used in the garden.

At the present time, the young men are fitting up large henhouses for producing more eggs and also table birds which are rare in this region. They are proposing to improve the size of the birds by cross-breeding them with pedigree cocks introduced for the purpose.

SETTLEMENT OF RURAL YOUTH IN THE ATACORA

Five youth groups in the Atacora have also been equipped with oxen, carts and ploughs. These groups have been carefully selected and trained by the CARDER of Atacora; but it is still too early to form any final judgement on the settlement and whether it will in fact work. It would seem that the mobility of the extension agents which had strongly influenced the agricultural supervision of the rural youth is now at last becoming more stable.

It would nonetheless be advisable to make full allowance for the tastes and aspirations of the basic trainers; some have considerable talent for training rural youth and quickly establish a relationship with them, but others are more interested in other aspects of agriculture.

Young people respond very quickly towards anyone who will lend a patient and sympathetic ear to their problems. They are quick to carry out any work programme which is clearly explained to them, especially if the results show their elders that they are now reliable and credible members of the village community, able to take a full and intelligent part in its councils and affairs, and are no longer irresponsible children.

The roles of the basic trainer and of the delegate to rural youth are therefore of crucial importance for the success or failure of a group of rural youth. It would be a very good thing if during their first year on the job these men could be given a good supplementary course in teaching methods, so as to be able to discharge their functions among the young people more satisfactorily in and after their second year.

The UNDP/FAO project, with the support of the FFH project, should see to it that this teacher training can be found a place among all the other activities of the Centre National d'Appui aux Clubs (C.N.A.C.) and of the Centre Régional d'Appui aux Clubs which is to be established at Natitingou.

RESETTLEMENT OF YOUNG PEOPLE OF THE AYOU CLUB

In accordance with the government's instructions, the young members of the Ayou pilot club, who had been established individually, have now agreed to work together on a communal plot of ground.

Before starting to clear this new plot, they have appealed to the rotating fund to equip them with axes, picks or mattocks, hoes, rakes and ropes, etc . . . , they have now been supplied with these tools and must repay the cost of them out of the proceeds of the next crop year.

They have furthermore sent two of their numbers to the training course for draught oxen, and have been given an outfit which will be used mainly for transport during their first years. In their second year they should be able to cultivate plots of land entirely destumped.

These young people, however, do need a store place of their own, independent of the 4D Club's, and help in improving their living accommodation. It would be as well for the Atlantic CARDER to make abundantly clear its interest in this club and in the young farmers who should become a model for all rural youth to follow.

RECOMMENDATIONS

1. The FFH Fund has rendered, and still continues to render, great service to rural youth in Benin. If there has been some slowing down of expenditure in the course of the last three years, this should be regarded as an indication of the Government's concern not to waste foreign aid on new structures which have not yet achieved full stability or become fully operational.

2. To use the FFH Fund as a rotating fund for rural youth is an excellent way of enabling young people to become aware of the value of the means put at their disposal. For the moment, however, the procedures for repaying the loans and of refunding the central account is still operating rather uncertainly. It is to be hoped that the Director of CNAC will take on this responsibility as soon as possible.

3. A certain number of government loans are still made available to CARDER for de-

* CARDER—Centres d'action régionale pour le développement rural.

velopment projects which also affect rural youth. It is much to be hoped that all the help and support given to rural youth will be made in the same way through the same channels and centralized by one single agency. It is CNAC which should be responsible for harmonizing all the loans and for judging whether free gifts are opportune or not in certain special cases.●

THE UNITED STATES MUST ACT AGAINST THE SOVIET UNION'S NEW ANTI-JEWISH CAMPAIGN

HON. NORMAN F. LENT

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. LENT. Mr. Speaker, I am deeply disturbed by two articles which appeared in the Christian Science Monitor August 16 detailing the launching of a major new Soviet propaganda attack against Jews and Zionism, along with the sentencing of still another courageous Soviet dissident. These accounts, which I request be reprinted in full at the conclusion of my remarks, show clearly that the Kremlin leaders have not been influenced by U.S. protests against their disregard for human rights. In fact, the Soviet officials are becoming even more reckless and callous in their bigoted propaganda attacks, and in their total disregard for human rights of their citizens of Jewish faith.

Mr. Speaker, these articles should convince our reluctant White House and State Department officials that far stronger action must be taken to curb the Kremlin-led campaign of brutality and oppression.

The most disturbing of the Christian Science Monitor articles was titled "Soviets Renew Verbal Assault on Jews, Zionism." This article details what the reporter calls an "unprecedented" Soviet attack on "Jewish controlled capitalism" and "Zionist terror." Using language that is straight out of Hitler's Nazi Germany, two of the most important weeklies in the Soviet Union have printed the most inflammatory kind of charges and allegations. This kind of brutal racial denunciation—under government sponsorship and encouragement—is truly alarming. We can never forget what happened the last time a dictatorship blind to human rights used its propaganda machine to assault the world with such blatant phrases of bigotry.

We must never let that happen again.

At the same time, the Christian Science Monitor reports the sentencing of Soviet dissident Alexander Podrabinek. He drew 5 years in "internal exile" (that is, Siberia or the Soviet North) for compiling a list of some 200 Soviet citizens who had been sent to mental hospitals as punishment for their political activities. Podrabinek is the latest in the long list of Soviet dissidents who have been sent to prison or into exile for so courageously trying to call attention to Soviet violations of the Helsinki accords on human rights.

Last month, after the sentencing of Anatoly Scharansky, his courageous wife, Avital came to Washington to discuss the tragic case with Members of Congress. I had the great pleasure of meeting this resolute woman. She told us the time for words is past—it is now time to act. But little action has been taken since her visit. In fact, in recent weeks, President Carter has approved the sale of valuable oil drilling equipment to the Soviet Union.

It is time to stop such favored treatment of the Soviets. Many of us in the Congress have recommended actions which President Carter could take. As a first move, the President must suspend exports of new technology to the Soviets until the Kremlin leaders can demonstrate why they should benefit from such favoritism. We must shift the 1980 Olympic Games from Moscow. We should suspend the SALT II talks. There are further actions in the diplomatic field, in the many scientific exchanges now going on, and in all areas where the Soviets seek our expertise, cooperation or dollars which are open to the President. The important thing is action.

Helpless hand wringing in the face of the Kremlin's ugly racist attitudes has no effect. We must show the Soviet leaders their cruel, inhuman actions will lead only to painful results for them. This is the only language the Soviets understand, and it will be effective, if the actions are taken now.

Mr. Speaker, I urge my colleagues to read the full text of the alarming articles which are reprinted here.

[From the Christian Science Monitor, August 16, 1978]

ANOTHER DISSIDENT MUFFLED

(By David K. Willis)

In defiance of Western criticism, the Soviet Union has sentenced an able, energetic leader of the younger generation of dissidents here to five years in internal exile in its latest crackdown on political opposition at home.

Alexander Podrabinek, a vigorous, dark-haired 25-year-old, will serve his exile in a remote part of Siberia or the Soviet north. His sentence came Aug. 15 at the end of a one-day trial in Elektrostal, an industrial city 40 miles last of Moscow, which was off limits to foreigners and Western correspondents.

Mr. Podrabinek is exactly the kind of up-and-coming opponent the authorities here dislike most.

For three years he researched allegations that Soviet officials consign political prisoners to psychiatric hospital wards as punishment. A former medical orderly, he is a member of the monitoring committee on the Helsinki human-rights accords and has formed a subgroup devoted to psychiatric abuses.

LOBBYING FOR PRISONERS

Mr. Podrabinek lobbied on behalf of prisoners in wards, issued statements, talked to Western correspondents, and established a reputation for intelligence and industry.

He compiled a manuscript of 265 pages circulated among dissidents here. It found its way to Amnesty International in London last summer—and let to worldwide condemnation of Soviet practices.

Amnesty said the manuscript, entitled "Punitive Medicine," contained documented details of about 200 cases and the names of some 100 Soviet doctors who had sat on consigning commissions.

Largely at the urging of Mr. Podrabinek's preface, the World Psychiatric Association passed a resolution at its conference in Honolulu last September censuring the Soviets.

Mr. Podrabinek is the latest in a long list of leading Soviet dissidents who have stood trial recently. The charge: defaming the Soviet state. About 20 activists have been arrested or tried since the Helsinki group was set up by Dr. Yuri Orlov in the summer of 1976.

As a result of his five-year sentence, Mr. Podrabinek will be out of Moscow and away from world headlines until well past the 1980 Olympic Games in Moscow.

One of the aims behind the current crackdown against prominent dissidents is to remove as many activists as possible from Moscow before they can try to use the games as a forum for more headlines—either by using contacts here or by trying to get in touch with some of the 300,000 foreigners expected to attend the games.

Mr. Podrabinek's name is less well known than those of activists Anatoly Scharansky, Mr. Orlov, or Vladimir Slepak. Although he is Jewish (his name in Russian means "assistant to the rabbi"), he has never sought to emigrate.

He has said that the KGB (secret police) told him that, if he, his brother Kirill, and his father (his mother has passed on) agreed to emigrate to Israel, charges pending against his brother would be dropped. But all three refused and decided to stay.

SOVIETS RENEW VERBAL ASSAULT ON JEWS, ZIONISM

(By Paul Wohl)

On the heels of the recent treason and espionage trials oi Jewish dissidents the Soviets have launched an unprecedented offensive against "Jewish controlled capitalism," and "Zionist terror."

This new Soviet propaganda line seeks to intimidate the remaining Soviet Jews and blacken the reputation of the capitalist West in the eyes of the third-world countries while scoring political points with the Arabs.

The new propaganda is carried by two of the Soviet Union's most important weeklies—by Nedelya, the Sunday supplement of Izvestia, and by the popular illustrated weekly Ogonyok with a circulation of 2 million.

A long two-part article entitled "The most Zionist of businesses" was published in Ogonyok on July 18 and 29. Its author, Lev Alexandrovich Korneyev, is a scientific associate of the Institute for the Study of Asian and African Countries, which is affiliated with the Academy of Sciences.

SUBJECT: ARMS TRADE

His approximately 6,000-word "Study" deals with an alleged Jewish stranglehold over the world's multibillion weapons trade, "the most Zionist of businesses which pays the dividends of blood collected by the cosmopolites of the lord of hosts."

Not even in Stalin's day did the Soviet use this kind of terminology. The famous "Doctors Murderers" of Stalin's last year had largely Jewish names. They were accused of trying to poison high members of the Politburo but were not explicitly singled out as Jews.

Mr. Korneyev's "Study" has the earmarks of a Nazi pamphlet in academic disguise, complete with scores of footnotes and hundreds of figures culled from reputable publications and quotes from the Business Week, the New York Times, The Christian Science Monitor and, last but not least, Lenin.

In his conclusions Mr. Korneyev writes: "A main feature of the expansionist aspira-

tions of the big Jewish bourgeoisie is its fast growing financial might thanks to the monopoly of Jewish capital on an international scale and its constant search for new sources of profit."

ZIONISM ACCUSED

"By following the line of expansion inherent in the capitalist system, Zionism strives to lay its hands on the military-industrial complex as the most profitable business sphere."

In his second article Mr. Korneyev attempts to analyze what he views as the interlocking structure of Jewish or Jewish-controlled monopolies of the armament industry, their links to Zionism, and the profits they derive from "the industry of death."

The first article deals particularly with what Mr. Korneyev calls "one of the world's principal financial empires (Lazard Frères), founded and controlled by Jewish bankers, Kuhn Loeb, the Rothschilds etc. . . . Tell me who your banker is and I shall tell you who you are. . . ." Another sample of Mr. Korneyev's prose is his reference to "Goldwater linked to the Jewish-Sicilian Mafia."

"It is true," writes Mr. Korneyev soothingly, that "not all Jews living in the capitalist world are Zionists nor are all supporters of Zionism Jews," but essentially the writer sees Zionism active "in secret, never in the open."

In his second article Mr. Korneyev writes: "It is difficult to determine the share of the national wealth in the West which belongs to the bourgeoisie of Jewish origin."

Mr. Korneyev's conclusion points in the same direction: "The activities of espionage, subversion, and terror of the Zionist International and their secret services seek to build up centers of tension in many parts of the world; to undermine good-neighborly relations among peoples, and to create a nauseous international climate."

Two weeks after the publication of Mr. Korneyev's "study" in Ogonyok, Nedelya No. 29 of July 17 to 23 carried an article by Mr. Korneyev called "Terror a Weapon of Zionism."

This article dealt with an alleged "pogrom" led by "Rabbi Kahane Jewish Defense League against the seminary of the Russian Orthodox Cathedral of the Trinity in Jerusalem . . . an Arab city seized by the Israelis.

"This barbarous pogrom by Zionist fascist bandits became possible only because of the subversive terrorist activities of the ruling circles of Israel." ●

THE PENDING CETA AMENDMENTS WILL NOT RESOLVE THE PROBLEMS IN THAT PROGRAM

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. KEMP. Mr. Speaker, I had originally intended not to address the House on the legislation to amend the Comprehensive Employment and Training Act—CETA, the Federal Government's largest public service jobs program.

But after a thorough review of my files on this program and the abuses within it and after its withdrawal from the active agenda of the House until later at least the August recess, I have concluded that there is time to convince Members of what is wrong with the program and what ought to be done about it. It is toward those ends that I have decided to offer these remarks.

The CETA program rests upon the wrong premises, and if the premises are wrong, how can we expect the conclusions to be right?

One premise is that a job-creating dollar spent by Government goes farther in creating permanent jobs and expanding the economy than does a job-creating dollar in the private sector.

Why is it, I ask CETA supporters, that all the billions of dollars Government has spent on jobs creation have left us with unemployment levels nearly as high as they were at the depths of the 1974 recession.

Why is it, I ask, that all this Government spending has not created the prosperity they predicted? In fact, that spending has worsened the inflation which makes prosperity impossible to attain.

Another premise is that those unemployed who should be helped first by the program are those least likely to be employed. Think about that. It is exactly opposite of what it should be.

If we are to reduce total unemployment through this program—and then keep unemployment down without having to rely on its continued funding—we should help those first who are most likely to be thereafter employed in the private sector. Most likely, not least likely: that should be our focus.

To reduce unemployment, you must start by giving those people on the margin of employment or unemployment the first help. That gets them into a private sector job that they can keep, allows that CETA money to then be used to hire another unemployed person, and thereby reduces total unemployment most rapidly. Then you must work through the harder cases, eventually ending up with the very hardest.

In the process of lowering unemployment—taking tax consumers and helping them become tax generators—you will have done more to help the private sector of the economy create even additional jobs. That will help create the "snowball" effect faster in jobs creation and economic revitalization.

As the principal sponsor of the CETA reforms of 1977, H.R. 4734, and antecedent legislation of prior Congresses, I have followed closely the conceptual and specific problems in the program.

Buffalo has been particularly hard hit by scandals in CETA. GAO investigations, one which took 2 years, did little more than say the problems were being taken care of. Less than a month after that GAO final report, another series of CETA scandals hit the newspapers as a result of their own first-rate investigations, the Buffalo Evening News and the Buffalo Courier-Express. The Department of Labor—Washington, regional, and local offices—did not uncover these wrongdoings. Neither did GAO. It was the dollar-conscious and resourceful local newspapers and the U.S. attorney's office in Buffalo which did.

But Buffalo is not alone. Everywhere I travel I read of CETA scandals. You can start right here in the District of Columbia. Or Atlanta, Boston, New York City, Philadelphia, Gary, Phoenix, or unfortunately many other major cities. The newspapers and air waves are full of the accounts.

Yet we are told by the Department of Labor that these cases are "less than 1 percent" of the CETA program. I do not believe that. It may be that the number of local projects in which there are known scandals, ones so bad that they hit the newspapers, are only 1 percent of the total number of projects, but that 1 percent is just the tip of the iceberg. If the Department of Labor did not find the newest Buffalo area scandals, how can we assume they have found them elsewhere?

Take the District of Columbia, for example. The D.C. City Council's flagrant use of CETA funds to hire personal aides hit the newspapers, but the replacement of non-CETA employees and the rehiring of CETA-funded ones at a D.C. children's museum this summer has gone unnoticed in the press. There are probably hundreds, if not thousands, of these examples nationally.

Then you have the reality that the Department of Labor calculates the Buffalo CETA program as only one program in trouble. It does not total the inconceivable number of separate and distinct abuses which have grown out of that one program since its initiation. Let me give you some representative headlines from the Buffalo Evening News and Buffalo Courier-Express about that one program over just the past 90 days:

"Thefts Tied to CETA Are probed."

"Probe of CETA Staff, 'Sting' Thefts Widens; Supervisor Suspended."

"CETA Workers Charged in Theft of Food Stamps."

"'Sting' Net May Catch More CETA Workers."

"Worker Blasts Officials of CETA Projects Unit: Resigns, Charges Program's Ruin."

"Phony Health Survey Data Linked to CETA Workers."

Those headlines all occurred following a May 5 one, "GAO Says CETA Fund Control OK." As a matter of fact, they started within 23 days after that May 5 headline.

This is some kind of 1 percent, Secretary Marshall.

The situation has become so hopelessly enmeshed in controversy, and has taken the program so far off course, that both Buffalo papers felt compelled last weekend to reign it in.

On August 11, the Buffalo Courier-Express editorialized against its continuation:

CETA'S HOPES STILL UNREALIZED

The handwriting was on the wall from the inception nearly five years ago of the federal Comprehensive Employment and Training Act (CETA). It was the type of program in which the cards appeared to be stacked against its success. On March 6, 1976, we commented in this space: "As it stands now, this tawed, patchwork CETA program has been largely a waste and futility, full of pregnant but unfilled promise."

There is some evidence that this sense of disillusionment has spread to Congress. On Wednesday, the House, debating the four-year, $11-billion extension of the agency that administers the program, voted to cut funding by $1-billion (enough to hire about 100,-

000 public-service jobs) and to reduce the wages for CETA jobs, the aim being to discourage CETA employes from staying too long in their public jobs rather than seeking work in the private sector.

The CETA program has never lived up to the high hopes that it initially generated. It is not enough just to provide jobs—often makework jobs—by propping up the public payroll at a time when the public clearly wants to move in the other direction, away from increasing a bloated bureaucracy. As Rep. Jack F. Kemp, R-Hamburg, has said, the CETA program's fault was that it limited local governments to the creation of tax-consuming, rather than tax-creating, jobs.

Those congressmen, mayors, county leaders and governors who have pushed for more funds for this much-abused program must bear the main responsibility for pushing people into a blind alley.

It would be sad, of course, if there were substantial job cuts among the thousands of CETA workers employed by Buffalo and Erie County. It's a devasting thing for people to lose their jobs; we wish it could be avoided. But CETA administrators have clearly failed in moving to convert what was supposed to be temporary public-service employment into permanent, private-sector work.

And on August 12, the Buffalo News supported last week's House action in reigning in CETA and admonished the Senate to follow suit:

CORRECTING CETA DEFECTS

For months Washington has displayed justified concern over the growth, direction and more than occassional abuses of the huge national CETA program, which costs about $11 billion and employs 725,000 people in public service jobs.

President Carter and key congressional committees which had studied the Comprehensive Employment and Training Act program had urged reforms. They want greater involvement by private business in training, stricter safeguards against waste and corruption, and curbs against the mere shuttling of government workers from local to federal CETA payrolls.

The House has now approved such changes. But it has also gone beyond them, trimming the program's overall size and cost in ways that seem to us desirable.

In the last two or three years, the number of job slots has ballooned from about 300,000 to 725,000, an expansion that looks questionable in a period not of economic decline but expansion. So a cutback on the order of 100,000, as approved by the House, should not be ruinous. Indeed, President Carter has favored a gradual job cutback later on. Half of the $1 billion trimmed from the job programs designed to counter recession, moreover, would be rechanneled into youth employment projects and job plans involving business.

Also reasonable were House votes to lower CETA pay ceilings (to $12,000 from $15,000) in high-wage areas and average wages (to $7000 from $7800). These jobs should clearly be considered temporary, tiding people over during hard times or providing useful training. Obviously, earnings levels should not be so lucrative as to discourage a search by CETA employees for permanent jobs elsewhere. Lower earnings levels, in addition to strengthening the incentives for moving on, would lighten the financial burdens of CETA for taxpayers.

We believe there is a place for public-service job programs in training workers and easing the dislocations and hardships caused by recession. But CETA has mushroomed too fast and grown too large. And it is but one way to create jobs. Its skyrocketing costs even work against another, more effective way to stimulate job creation in the private sector—tax reductions. The House has now acted to counter such drawbacks in CETA, and we hope the Senate, where similiar legislation is pending, will do likewise.

There is also growing evidence, Mr. Speaker, of what this program has really become. A massive Federal dollars program for State and local governments and politicians. Perhaps one of the largest patronage programs in history. A program designed to funnel an ever-increasing portion of this administration's take of tax dollars from the people to that constituency from which they see 1980 votes coming? They might be in for a surprise as to where those votes are going to go.

Along that line, let us look at the CETA program in Massachusetts. I offer the following article by Warren T. Brookes, a specialist in economic affairs and a columnist for the Boston Herald American, a man for whom I have the highest professional regard and personal respect:

MASSACHUSETTS EXAMPLE—CETA: CAN GOVERNMENT REALLY "CREATE" JOBS?

(By Warren T. Brookes)

Given the exorbitant levels of unemployment, particularly among inner-city minority youth, one can only wish President Carter well in his ambitious plans to create one million additional jobs through the CETA (Comprehensive Employment and Training Act) programs.

Unfortunately, the history of nearly all such Government jobs programs is anything but reassuring.

They almost always succeed, not in generating additional jobs, but simply transferring jobs from the private sector to the public.

In the process some marginal workers lose private jobs, while other marginal workers gain public jobs, but the net effect is almost always negative.

If you don't believe this, you need only realize that since CETA started in the early 1970s, unemployment among urban teen-age minorities has risen steadily to record levels, despite a CETA budget which has also risen steadily to nearly $11 billion in 1978.

There is, of course, a perfectly rational and non-ideological explanation of why this is happening.

Since the government produces no wealth of its own, it must finance CETA-type jobs by taking the money from the private sector, either by taxes, borrowing, or inflation.

When it does this, the money it takes nearly always comes, not from the major established industrial corporations whose incomes can compete with the government securities' 7-8 per cent interest rates, but from the marginal businesses which cannot compete for capital against Uncle Sam.

The result is that the very industries that have always supplied the most employment to marginal workers (unskilled inner-city youth in particular) are precisely those who are squeezed out by government deficit spending and borrowing.

Thus, the CETA jobs program turns out to be nothing more than an expensive transfer program, taking jobs away from one group of marginal workers in the private sector and giving them to another group in the public sector—and in the process destroying part of the nation's permanent private productive job base.

Furthermore, the CETA program directly competes against the marginal inner-city businesses by paying salary levels that are between 40 and 60 per cent above the going wages for unskilled factory work, and 80 per cent above the minimum wage.

Small wonder that economists are now telling Congress that CETA is having a very adverse effect on private industry in the very place where it is needed most—urban centers.

There is no better example of this "faustian" exchange than Massachusetts. Between July 1974 and January 1978, the Massachusetts economy had a net loss of about 6,000 non-agricultural jobs (not counting seasonal adjustments).

But during that period, government employment (state and local) rose by 23,500 jobs (mostly CETA) while the state's private sector actually lost 26,700 jobs.

In other words, during the four-year period when the state put on about 23,000 CETA workers, it lost more private jobs than it gained in government.

What is troubling about all this is the degree to which the CETA program in Massachusetts (as esewhere) is being accelerated, almost entirely in the public sector.

As of April 1978, the state had a total of some 45,000 CETA jobs of which about 13,000 were in the private sector (as training under Title I) and some 32,000 were in state and local government (Title II and IV).

This represents a spectacular growth of more than 22,000 CETA jobs "created" since May 1977—in only 10 months, and all but a tiny fraction of that growth has been in government employment.

The following table tells the story of just how quickly state and local government in Massachusetts have been putting on CETA workers:

CETA employment (public service)
May 1977 to March 1978

	May 1977	March 1978	Percent change
State government	5,841	18,159	210
Boston (city)	1,221	3,207	163
Springfield	820	2,196	167
Worcester	468	1,764	277
N. Bedford-F. River	402	2,106	424
Lowell	392	1,143	191
Entire State	9,954	31,424	216

In just 10 months the state government has put on 12,318 new CETA workers—while Boston has added nearly 2,000, and other cities a proportionate amount. All of these government entities are now carrying bloated bureaucracies as a result.

Since the average pay scale of these jobs is about $10,000 (80 percent above the minimum wage), it is not surprising that marginal urban businesses all over the Commonwealth are suddenly feeling competitive heat.

Testifying before a congressional subcommittee in March, Dr. James Howell, Chief Economist for the First National Bank of Boston, reported that in 41 New England cities "there has been an 18 percent reduction in absolute manufacturing capital spending from 1972-74," and he warned that it was going to get much worse, as more inner-city businesses could not compete with CETA.

As he told us, "How can you get 18-year-olds to take $7,000 or $8,000 factory jobs when they can work on CETA jobs doing light office work at $10,000?"

He pointed out that in fiscal 1978, of the $37 million spent on CETA in Boston, over $27 million was spent just on padding the Boston city bureaucracy, and only $1.4 million had actually gone for on-the-job training in the private sector.

This year, the CETA program in Massachusetts will cost federal tax payers between $350 and $400 million—enough to provide the investment capital for 20,000 or more permanent tax-productive private jobs.

Instead, all but a handful of this money is gong to make the state and local bureaucracies larger—and to make our politicians

more powerful; to hide the real size and cost of our government.

Indeed, the only employment that is really growing in Massachusetts (long term) is government employment, at the state and local level, and largely through CETA.

In Boston, for example, over the last year, total seasonally adjusted employment grew by less than 2,000 jobs, and virtually all of that growth was in CETA jobs, working for City Hall.

Small wonder that a lot of congressmen in Washington are beginning to take another hard look at the whole CETA operation. Sen. Edward Kennedy to his credit has introduced an amendment to the CETA Act designed to strengthen and expand the Title I private sector portion of it, with $75 million in new funding premised on performance rather than body count. It is a useful effort, should be supported, and may help to change CETA's present dismal performance.

Other measures are designed to curb the excessive use of CETA by state and local governments are just another form of revenue sharing, with CETA employes simply taking the place of regular government employes, but local politicians are fighting this all the way to the White House.

But none of these measures deals with the fundamental fact that government employment almost never adds to the nation's job base—it merely transfers people from productive private sector jobs to the public payroll; as such it reinforces the wrong trend.

And in the process, more and more marginal urban businesses are going down the tube in the credit crunch with Uncle Sam, leaving more and more inner-city youth jobless and hopeless.

As Dr. Howell told Congress, "The CETA program is actually making it more difficult than ever before for business to operate in the central cities."

In other words, like so many government programs it is probably doing more harm than good.

If there is any doubt on the administration's intent to keep the program in place whether there is an unemployment need or not, I ask them to look at a recent Washington Star, article, entitled "Marshall Vows To Continue Full Public Jobs Program." I quote:

Labor Secretary Ray Marshall said today the Carter Administration has no plans to reduce the number of public jobs in spite of dramatic improvement in the employment situation in the last 18 months.

If there is one thing which ought to be clear to every public official in this country, it seems it would be the rapidly growing dissatisfaction with the burden of total taxes.

Proposition 13 in California, the Jarvis-Gann amendment, was but one of many, many indications of public dissatisfaction with tax rates, burdens and incidences. That dissatisfaction is directed at all levels of government too—Federal, State and local. And the rejection of higher taxes on one hand is not intended as an invitation to raise them on the other. Tax reductions should not be pea and shell games with the public seeing the lowering of taxes one place offset by an increase in another.

Yet this is what some would have happen, and those "some" are mostly those who were the losers in the proposition 13 fight. And the losers in all the other referendums, initiatives, propositions, and constitutional amendments, including those on bonds, with the same result.

An example of this is the attempt being made by certain mayors and other officials in California right now to shift positions and persons discharged or in danger of being discharged, as a result of proposition 13 or legislation enacted pursuant to its mandate, to CETA payrolls. Thus, instead of being paid from State or local funds, those positions and persons would be paid from Federal funds. No reduction in the total tax burden upon the people, mind you, just a shift of that burden, moving the pea from one shell to another.

We cannot allow this to happen. We cannot allow it to happen in California with the CETA program. We cannot allow it to happen elsewhere as the prairie fire of tax rate reductions and tax limitations sweep this country in the coming months.

If this legislation gets to the Senate, I hope a Member of that body will offer the following amendment to it, an amendment which I would have offered had it not been for the time pressure of my efforts to amend the Revenue Act to include individual income tax rate reductions of about 33 percent over the next 3 years:

(1) No funds authorized in this Act or appropriated pursuant to it may be used to pay the salary or expense of any position or person which would have been otherwise terminated or discharged from an agency of government or any other entity described in this Act as a result of reductions in work force or payroll cost caused by fiscal restraint or reorganization arising either from propositions, referendums or initiatives, the defeat of bond issues, or the amending of constitutions determined by public ballot or from legislation enacted pursuant thereto.

Mr. Speaker, H.R. 12452 should be defeated.

The CETA bill should be defeated. This public service jobs program should be eliminated and replaced with jobs creation in the private sector. The tax dollars, taken from the American taxpaying people and businesses to pay for the program, should be returned to those taxpayers, so they can save and invest those dollars, thereby creating more jobs in the private sector, more total jobs than CETA can create, and help restore the economy.

SMALL BUSINESS AND SCIENTIFIC AND TECHNOLOGICAL INNOVATION

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, I take this opportunity to address my colleagues on the subject of small business' role in the scientific and technological innovative process—a process essential to our continuing industrial leadership and national defense—which also was recently the subject under consideration by an unusual joint hearing of the House and Senate Small Business Subcommittees—one of which I am privileged to chair.

A review of a number of government and outside studies and recommendations—including the OMB commissioned Rabinow Report released last week at the Small Business Subcommittee public hearing—shows that Federal agencies in effect discriminate against small businesses in awarding research and development contracts, despite that fact that small businesses are far more innovative and cost effective than large corporations.

In summarizing the studies that have analyzed this program, let me first say that subcommittee testimony, and massive evidence compiled by the many studies, suggests that we have studied this problem to death—that what we need now is action.

In 1966 a blue ribbon panel—commissioned by the Department of Commerce to study the contributions of small business to the development of science and technology—concluded that small business is responsible for over one-half of the scientific and technological innovations that have taken place in this century, a finding that was a matter of common knowledge in the scientific community.

Since that time, numerous studies and panels have arrived at the same conclusion: in our society small business is the *sine qua non* to the creative, innovative process that lies at the heart of scientific and technological advancement and therefore, the growth and expansion of our economy and the increase of employment in the private sector.

However, Richard S. Morse, an observer of research and development trends and a former university professor, government official and corporate manager, warned our joint House-Senate hearing that:

Since 1967 almost every action taken by both the executive and legislative branches of our government has resulted in a further deterioration in the climate for technological innovation in the United States.

It is ironic that small businesses have been receiving about 3½ percent of all Government research and development contracts when these same companies have been historically responsible for more than 50 percent of all American inventions and innovations

In his study entitled "Federal Support of Research and Development Activities in the Private Sector", Edwin Mansfield stated that:

Small firms play a large, perhaps disproportionately large, role in conceiving major new ideas and important inventions.

The National Science Foundation's study, Industrial Research and Development and Innovation, quantifies Mr. Mansfield's statement, saying:

On the basis of a sample of major innovations introduced to the market between 1953 and 1973, small firms (up to 1,000 employees) were found to produce about four (4) times as many innovations per research and development dollar as medium-sized firms (1,000 to 10,000 employees) and about twenty-four (24) times as many as large firms (over 10,000 employees). The total number of innovations produced by small firms was greater than for large firms, and both produced more than medium-sized firms.

Another important aspect of the relationship between small business and

technological innovation is this: Small high technology firms create far more jobs than low technology firms. Accordingly, a Massachusetts Institute of Technology study concluded that small high technology firms increased employment at a rate of forty (40) percent between 1969 and 1974, geometrically creating 25,558 new job opportunities.

Another study, conducted by Data Resources, Inc., supported this conclusion and included some other interesting economic data, stating:

. . . employment in U.S. high technology industries grew almost nine times as fast as that in low technology ventures during the period between 1950 and 1974, while output grew almost three times as fast. Prices, by contrast, rose for high technology products at only a sixth of the rate for low technology ones.

In an analysis conducted for the Senate Small Business Committee, the American Electronics Association found that these small, innovative companies registered a growth rate in employment of 23.7 percent compared to older, larger companies' rate of 3.2 percent for the 5 years under study.

I have been exploring and describing, Mr. Chairman, outside studies showing small business accounts for more than one-half of all inventions and innovations.

I would like to further comment on the previously mentioned, 1977 study prepared by the White House Office of Management and Budget. The findings are just as astonishing as the knowledge is appalling that the recommendations have not been carried out by the Executive branch. The inter-agency study, headed by Jacob Rabinow, informed the President that "Small firms have compiled a striking record of innovation in the private sector." The Rabinow Report also found that "The ratio of innovations to sales is about one-third greater in smaller firms . . . the cost per R. & D. scientist or engineer is almost twice as great in firms over 1,000 employees than in firms with less than 1,000 employees . . ." The report concluded that "Small firms are inadequately used" in the Federal Government's acquisition of $26 billion worth of research and development, and that "our country will lose significantly high technology capabilities in the absence of a concerted effort to increase small business research and development awards."

Given this well-documented, undeniably impressive account of small business' achievements in jobs creation, cost efficiency, innovation and development, it is passing strange to me that—one year after the study was completed and the recommendations were made—OMB did not see fit to publish the Rabinow Report nor to implement through the departments and agencies its recommendations. The Federal Government continues its discrimination in awarding research and development contracts to small business, even though it has been known for at least a decade—and documented again by the 1977 Rabinow Report—that a disproportionately large share of Federal research and development funds go to large corporations who deliver significantly fewer results.

While the amount of Federal dollars invested in research and development has increased from $8.7 billion in 1960 to over $20 billion in 1976, the amount of Federal research and development contracts going to small business has hovered around 3½ percent. It makes absolutely no sense that small business receives such a paltry amount of the funds earmarked for a function that it performs best.

But let us consider the other side of the coin; although historically the United States has been blessed with more than its share of entrepreneurs who have developed entire new industries through their genius, testimony presented before last week's joint House-Senate hearing indicates this may not always be true. Problems ranging from Government regulations and indifference to the increasing difficulty of raising capital, adversely affect the process of technological innovation by small business throughout the country.

Consider capital availability. Richard Morse testified that—

Investment liquidity, the increased capital gains tax, and reduced incentives for management represent the three most important factors which now influence the financing of new enterprises.

Dr. Frank Press, Director, Office of Science and Technology Policy, concurred saying:

Data suggest that small firms are encountering difficulties in entering the public markets to obtain venture capital. The number of public issues of common stock by small new companies has declined from nearly 650 to 1969 to 1 in the first half of 1975; the issues for small companies engaged in technologically intensive activities declined from 204 to 0.

It is obvious that without capital—be it from the private sector or from government research and development contracts—a small company will not get started, will die young or will ultimately merge with large corporation.

However, the spirit of entrepreneurship is still alive in the United States, and scientific and management talents are continually available as indicated by testimony received before a year-long series of hearings on The Future of Small Business, which I initiated in March as Chairman of the House Small Business Subcommittee on Antitrust, Consumers and Employment.

To further underline the importance of small business to our economy, and more particularly that of innovative, high technology entities, our hearings show that an analysis of the Fortune 1000 largest corporations verifies that it is small business that is creating jobs for our expanding work force, showing that the first 500 largest firms increased their employment by only 0.15 percent for the years 1969 to 1976 while the second 500 increased their work force by only 2.8 percent. Simply speaking, the Fortune 1000 generated less than 1 percent of just over 14 million new jobs created during that period. Excluding the increase in Government employees, 98 percent of the increased employment from 1969 to 1976 came from the remaining smaller business. The above-mentioned Massachusetts Institute of Technology's study of 16 innovative, high technology companies, showed that they created 25,558 new jobs in the period from 1969 to 1974.

Despite the irrefutable, dynamic achievements of small business, and federally sponsored studies recommending specific actions, the bureaucracy continues to refuse to address itself to our greatest tool in fighting inflation and unemployment: our small business community and its multifaceted potentials. We continue by taxation, regulation, paperwork and a multitude of disincentives to deny and disencourage entrepreneurial initiatives. By our actions, and inaction, small business rapidly approaches becoming an endangered species.

Mr. Speaker, the Congress of the United States must act now to recreate a national environment—in cooperation with our industry and our academic community—in which our small innovative high technology companies can flourish, new enterprises can be generated and new jobs created.

The following is a March 10, 1977, memorandum from the Office of Management and Budget, testifying to the overwhelming importance of small business to the innovative process. Included are several attachments in the form of reports summing up the countless contributions small business has made to the advancement of science and technology in this century. It is my hope that with the wider dissemination of this information—especially the Rabinow Report—the unwitting if not unconscionable discrimination by the Federal Government against small businesses in awarding research and development contracts will finally end after going uncorrected for more than a decade. For truly the role of small business in the scientific and technological innovative process is vital to not only our Nation's economic well being but to its national defense posture as well. ●

THE SHROUD OF TURIN

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DORNAN. Mr. Speaker, in the late 19th century, the alleged conflict between the articles of religious faith and the principles of modern science was elevated to dogma. In the late 20th century, the dogma may turn out to be as laughable as phrenology. But consider this point. Could there be any greater manifestation of the power of Providence to a doubting, secularized world than the provision of 2,000-year-old evidence that could only be discerned with modern man's most advanced technology?

The Shroud of Turin, said to be the burial shroud of Christ Jesus himself is a remarkable item. Seventy-five years of research has yielded positive scientific findings. Further exciting scientific work

is to be done this year. All the results thus far, virtually all parties agree, are awesomely impressive. I recommend a recent article by Mr. Harold Lewis of the National Enquirer on the subject. This holy shroud goes on exhibit for only the fourth time in this century between the dates of August 27 to October 8, 1978.

The Western World may be in for a most miraculous scientific and historical announcement.

NEW EVIDENCE PROVES THIS IS THE SHROUD THAT COVERED CHRIST

"If I were asked in a court of law to stake my professional reputation on the validity of the Shroud of Turin, I wou'd answer very positively and firmly that it's the burial cloth of Christ—and that it is Jesus whose figure appears on the shroud."

That's the stunning declaration of top pathologist Dr. Robert Bucklin after thorough examination of a life-sized photograph of the Holy Shroud—the ancient cloth which legend says covered the body of Christ.

Dr. Bucklin revealed in a exclusive Enquirer interview that not only did he conclude the shroud was genuine—he also was able to arrive at the expert opinion that Christ:

Probably died of a combination of heart failure and asphyxiation.

Died within three hours of being nailed to the Cross.

Dr. Bucklin's detailed examination—made while he was chief medical examiner of Travis County, Tex.—came at the request of David Rolfe, the producer-director of the new documentary film on the shroud, "The Silent Witness."

Rolfe told the Enquirer: "Dr. Bucklin is one of the world's leading pathologists, and his international reputation prompted me to ask him to carry out an investigation."

Rolfe added that while other experts, including NASA scientists, have presented evidence to show the shroud is not a fake, "the most startling evidence of all is that uncovered by Dr. Bucklin."

According to Dr. Bucklin, the markings on the Shroud of Turin "are so clear and so medically accurate that the pathological facts which they reflect concerning the suffering and death of the man depicted are, in my opinion, beyond dispute."

The man had been savagely beaten—as Jesus was—and the beating instrument was used "in a flicking fashion in such a way as to pull out bits of skin," revealed the expert, now clinical professor of pathology at the University of Southern California in Los Angeles.

"There was a particular whip used at the time of Christ which could have inflicted those injuries. The thongs had the ends weighted with heavy balls made of metal or bone."

The number of strokes "was . . . more than 120."

On the figure's shoulder blades the investigator found two strange areas in which the skin had been badly cut and bruised. "These were caused by a heavy object resting across the back," he concluded. "It's easy to imagine a beam that at the time of Pontius Pilate was put across the shoulders and tied. Marks of this beam can be seen on the left and upper right shoulder blades."

But the most convincing of the evidence, said the expert, is a series of odd bloodstains on the forehead and scalp.

"These wounds correspond to a crown of thorns—and probably more than any others identify the man as Jesus Christ. The Gospels state clearly that the soldiers invented this torture for Christ alone," he said.

"A forger would have shown the wounds as a circlet, as all artists did. Instead the whole head is covered, suggesting a rough clump of thorns."

Dr. Bucklin said he also found a puncture-type wound on the left wrist. "Christ was nailed through the wrist—not through the hand. If the nail had gone only through the palm of the hand, it wouldn't have supported the weight of the body."

In addition, the heel of the left foot is elevated higher than the right, "suggesting that the left foot was on top of the right instep and that a single spike was used to impale the two feet together. Suspended only by the arms, the victim would die too quickly. So the feet were nailed to provide the support necessary to extend the agony."

Finally, there is the evidence of an apparent wound in the side, he said. Jesus had such a wound, inflicted by a Roman soldier's spear just before His death on the Cross.

"In my opinion the most likely cause of death was asphyxia (suffocation) . . . exhaustion and the postural change it brought about producing cardiac failure and fluid around the lungs," he concluded.

"It would be reasonable to assume that it took three hours for death to take place.

"All the medical evidence uncovered is all borne out in some way in accounts in the Bible. There is nothing that's inconsistent."

Dr. Joseph Jachimczyk, chief medical examiner for Harris County, Tex., said: "Dr. Bucklin is board-certified in anatomical, clinical and forensic pathology. His integrity cannot be challenged." ●

BALANCE(S) OF POWER SERIES, BOOK IV–C (ii)—SOVIET STRATEGIC DOCTRINE AND NUCLEAR WAR

HON. JOHN B. BRECKINRIDGE

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. BRECKINRIDGE. Mr. Speaker, yesterday I inserted the first half of Professor Pipes' analysis of Soviet military doctrine—"Why the Soviet Union Thinks It Can Fight and Win a Nuclear War"—into the CONGRESSIONAL RECORD as part of the continuing study of Soviet intentions and doctrine—Book IV of the Balance(s) of Power Series.

Today's insertion is the second half of Professor Pipes' article, in which he reviews the chief differences between Soviet and American interpretations on nuclear war and corresponding doctrines. As in the earlier article, the conclusions are sober and compelling for all Americans concerned with deterrence and security in the nuclear age. I offer this article in the hope that our security will be enhanced through a serious and comprehensive understanding of the nature and intentions of our chief antagonist.

Professor Pipes' conclusion follows:

We know surprisingly little about the individuals and institutions whose responsibility it is to formulate Soviet military doctrine. The matter is handled with the utmost secrecy, which conceals from the eyes of outsiders the controversies that undoubtedly surround it. Two assertions, however, can be made with confidence.

Because of Soviet adherence to the Clausewitzian principle that warfare is always an extension of politics—i.e., subordinate to overall political objectives (about which more below)—Soviet military planning is carried out under the close supervision of the country's highest political body, the Politburo. Thus military policy is regarded as an intrinsic element of "grand strategy," whose arsenal also includes a variety of non-military instrumentalities.

Secondly, the Russians regard warfare as a science (*nauka*, in the German sense of *Wissenschaft*). Instruction in the subject is offered at a number of university-level institutions, and several hundred specialists, most of them officers on active duty, have been accorded the Soviet equivalent of the Ph.O. in military science. This means that Soviet military doctrine is formulated by full-time specialists; it is as much the exclusive province of the certified military professional as medicine is that of the licensed physician. The civilian strategic theorist who since World War II has played a decisive role in the formulation of U.S. strategic doctrine is not in evidence in the Soviet Union, and probably performs at best a secondary, consultative function.

Its penchant for secrecy notwithstanding, the Soviet military establishment does release a large quantity of unclassified literature in the form of books, specialist journals, and newspapers. Of the books, the single most authoritative work at present is unquestionably the collective study, Military Strategy, edited by the late Marshal V. D. Sokolovskii, which summarizes Soviet warfare doctrine of the nuclear age.[10] Although published fifteen years ago, Sokolovskii's volume remains the only Soviet strategic manual publicly available—a solitary monument confronting a mountain of Western works on strategy. A series called "The Officer's Library" brings out important specialized studies.[11] The newspaper Krasnaia zuezda ("Red Star") carries important theoretical articles which, however, vie for the reader's attention with heroic pictures of Soviet troops storming unidentified beaches and firing rockets at unnamed foes. The flood of military works has as its purpose indoctrination, an objective to which the Soviet high command attaches the utmost importance: indoctrination both in the psychological sense, designed to persuade the Soviet armed forces that they are invincible, as well as of a technical kind, to impress upon the officers and ranks the principles of Soviet tactics and the art of operations.

To a Western reader, most of this printed matter is unadulterated rubbish. It not only lacks the sophistication and intellectual elegance which he takes for granted in works on problems of nuclear strategy; it is also filled with a mixture of pseudoMarxist jargon and the crudest kind of Russian jingoism. Which is one of the reasons why it is hardly ever read in the West, even by people whose business it is to devise a national strategy against a possible Soviet threat. By and large the material is ignored. Two examples must suffice. *Strategy in the Missile Age*, an influential work by Bernard Brodie, one of the pioneers of U.S. nuclear doctrine, which originally came out in 1959, and was republished in 1965, makes only a few offhand allusions to Soviet nuclear strategy, and then either to note with approval that it is "developing along lines familiar in the United States" (p. 171), or else, when the Russians prefer to follow their own track, to dismiss it as a "ridiculous and reckless fantasy" (p. 215). Secretary of Defense McNamara perused Sokolovskii and "remain unimpressed" for nowhere in the book did he find "a sophisticated analysis of nuclear war."[12]

The point to bear in mind, however, is that Soviet military literature, like all Soviet literature on politics broadly defined, is written in an elaborate code language. Its purpose is not to dazzle with originality and sophistication but to convey to the initiates messages of grave importance. Soviet policy-makers may speak to one another plainly in private, but when they take pen in hand they in-

Footnotes at end of article.

variably resort to an "Aesopian" language, a habit acquired when the forerunner of today's Communist party had a function in the Czarist underground. Buried in the flood of seemingly meaningless verbiage, nuggests of precious information on Soviet perceptions and intentions can more often that not be unearthed by a trained reader. In 1958–59 two American specialists employed by the Rand Corporation, Raymond L. Garthoff and Herbert S. Dinerstein, by skillfully deciphering Soviet literature on strategic problems and then interpreting this information against the background of the Soviet military tradition, produced a remarkably prescient forecast of actual Soviet military policies of the 1960's and 1970's.[13] Unfortunately, their findings were largely ignored by U.S. strategists from the scientific community who had convinced themselves that there was only one strategic doctrine appropriate to the age of nuclear weapons, and that therefore evidence indicating that the Soviets were adopting a different strategy could be safely disregarded.

The predisposition helps explain why U.S. strategists persistently ignored signs indicating that those who had control of Soviet Russia's nuclear arsenal were not thinking in terms of mutual deterrence. The calculated nonchalance with which Stalin at Potsdam reacted to President Truman's confidences about the American atomic bomb was a foretaste of things to come. Initial Soviet reactions to Hiroshima and Nagasaki were similar in tone: the atomic weapon had not in any significant manner altered the science of warfare or rendered obsolete the principles which had guided the Red Army in its victorious campaigns against the Wehrmacht. These basic laws, known as the five "constant principles" that win wars, had been formulated by Stalin in 1942. They were, in declining order of importance: "stability of the home front," followed by morale of the armed forces, quantity and quality of the divisions, *military equipment*, and, finally, ability of the commanders.[14] There was no such thing as an "absolute weapon"—weapons altogether occupied a subordinate place in warfare; defense against atomic bombs was entirely possible.[15] This was disconcerting, to be sure, but it could be explained away as a case of sour grapes. After all, the Soviet Union had no atomic bomb, and it was not in its interest to seem overly impressed by a weapon on which its rival enjoyed a monopoly.[16]

In September 1949 the Soviet Union exploded a nuclear device. Disconcertingly, its attitude to nuclear weapons did not change, at any rate not in public. For the remaining four years, until Stalin's death, the Soviet high command continued to deny that nuclear weapons required fundamental revisions of accepted military doctrine. With a bit of good will, this obduracy could still have been rationalized: for although the Soviet Union now had the weapon, it still lacked adequate means of delivering it across continents insofar as it had few intercontinental bombers (intercontinental rockets were regarded in the West as decades away). The United States, by contrast, possessed not only a fleet of strategic bombers but also numerous air bases in countries adjoining Soviet Russia. So once again one could find a persuasive explanation of why the Russians refused to see the light It seemed reasonable to expect that as soon as they had acquired both a stockpile of atomic bombs and a fleet of strategic bombers, they would adjust their doctrine to conform with the American.

Events which ensued immediately after Stalin's death seemed to lend credence to these expectations. Between 1953 and 1957 a debate took place in the pages of Soviet publications which, for all its textural obscurity, indicated that a new school of Soviet strategic thinkers had arisen to challenge the conventional wisdom. The most articulate spokesman of the new school, General N. Talenskii, argued that the advent of nuclear weapons, especially the hydrogen bomb which had just appeared on the scene, did fundamentally alter the nature of warfare. The sheer destructiveness of these weapons was such that one could no longer talk of a socialist strategy automatically overcoming the strategy of capitalist countries: the same rules of warfare now applied to both social systems. For the first time doubt was cast on the immutability of Stalin's "five constant principles." In the oblique manner in which Soviet debates on matters of such import are invariably conducted, Talenskii was saying perhaps, after all, war had ceased to represent a viable policy option. More important yet, speeches delivered by leading Soviet politicians in the winter of 1953–54 seemed to support the thesis advanced by President Eisenhower in his United Nations address of December 1953 that nuclear war could spell the demise of civilization. In an address delivered on March 12, 1954, and reported the following day in *Pravda*, Stalin's immediate successor, Georgii Malenkov, echoed Eisenhower's sentiments: a new world war would unleash a holocaust which "with the present means of warfare, means the destruction of world civilization." [17]

This assault on its traditional thinking—and, obliquely, on its traditional role—engendered a furious reaction from the Soviet military establishment. The Red Army was not about to let itself be relegated to the status of a militia whose principal task was averting war rather than winning it. Malenkov's unorthodox views on war almost certainly contributed to his downfall; at any rate, his dismissal in February 1955 as party leader was accompanied by a barrage of press denunciations of the notion that war had become unfeasible. There are strong indications that Malenkov's chief rival, Khrushchev, capitalized on the discontent of the military to form with it an alliance with whose help he eventually rode to power. The successful military counterattack seems to have been led by the World War II hero, Marshall Georgi Zhukov, whom Khrushchev made his Minister of Defense and brought into the Presidium. The guidelines of Soviet nuclear strategy, still in force today, were formulated during the first two years of Khrushchev's tenure (1955–57), under the leadership of Zhukov himself. They resulted in the unequivocal rejection of the notion of the "absolute weapon" and all the theories that U.S. strategists had deduced from it. Stalin's view of the military "constants" was implicitly reaffirmed. Thus the re-Stalinization of Soviet life, so noticeable in recent years, manifested itself first in military doctrine.

To understand this unexpected turn of events—so unexpected that most U.S. military theorists thus far have not been able to come to terms with it—one must take into account the function performed by the military in the Soviet system.

Unlike the United States, the Soviet government needs and wants a large military force. It has many uses for it, at home and abroad. As a regime which rests neither on tradition nor on a popular mandate, it sees in its military the most effective manifestation of government omnipotence, the very presence of which discourages any serious opposition from raising its head in the country as well as in its dependencies. It is, after all, the Red Army that keeps Eastern Europe within the Soviet camp. Furthermore, since the regime is driven by ideology, internal politics, and economic exigencies steadily to expand, it requires an up-to-date military force capable of seizing opportunities which may present themselves along the Soviet Union's immense long frontier or even beyond. The armed forces of the Soviet Union thus have much more to do than merely protect the country from potential aggressors: they are the mainstay of the regime's authority and a principal instrumentality of its internal and external policies. Given the shaky status of the Communist regime internally, the declining appeal of its ideology and the non-competitiveness of its goods on world markets, a persuasive case can even be made that, ruble for ruble, expenditures on the military represent for the Soviet leadership an excellent and entirely "rational" capital investment.

For this reason alone (and there were other compelling reasons too, as we shall see); the Soviet leadership could not accept the theory of mutual deterrence.[18] After all, this theory, pushed to its logical conclusion, means that a country can rely for its security on a finite number of nuclear warheads and on an appropriate quantity of delivery vehicles; so that, apart perhaps from some small mobile forces needed for local actions, the large and costly traditional military establishments can be disbanded. Whatever the intrinsic military merits of this doctrine may be, its broader implications are entirely unacceptable to a regime like the Soviet one for whom military power serves not only (or even primarily) to deter external aggressors, but also and above all to ensure internal stability and permit external expansion. Thus, ultimately, it is *political* rather than strictly strategic or fiscal considerations that may be said to have determined Soviet reactions to nuclear weapons and shaped the content of Soviet nuclear strategy. As a result, Soviet advocates of mutual deterrence like Talenskii were gradually silenced. By the mid-1960's the country adopted what in military jargon is referred to as a "war-fighting" and "war-winning" doctrine.

Given this fundamental consideration, the rest followed with a certain inexorable logic. The formulation of Soviet strategy in the nuclear age was turned over to the military who are in complete control of the Ministry of Defense. (Two American observers describe this instiution as a "uniformed empire." [19]) The Soviet General Staff had only recently emerged from winning one of the greatest wars in history. Immensely confident of their own abilities, scornful of what they perceived as the minor contribution of the United States to the Nazi defeat, inured to casualties running into tens of millions, the Soviet generals tackled the task with relish. Like their counterparts in the U.S. Army, they were professionally inclined to denigrate the exorbitant claims made on behalf of the new weapon by strategists drawn from the scientific community; unlike the Americans, however, they did not have to pay much heed to the civilians. In its essentials, Soviet nuclear doctrine as it finally emerged is not all that different from what American doctrine might have been had military and geopolitical rather than fiscal considerations played the decisive role here as they did there.

Soviet military theorists reject the notion that technology (i.e., weapons) decides strategy. They perceive the relationship to be the reverse: strategic objectives determine the procurement and application of weapons. They agree that the introduction of nuclear weapons has profoundly affected warfare, but deny that nuclear weapons have altered its essential quality. The novelty of nuclear weapons consists not in their destructiveness—that is, after all, a matter of degree, and a country like the Soviet Union which, as Soviet generals proudly boast, suffered in World War II the loss of over 20 million casualties, as well as the destruction of 1,710 towns, over 70,000 villages, and some 32,000 industrial establishments to win the war and emerge as a global power, is not to be intimidated by the prospect of destruction.[20] Rather, the innovation consists of the fact that nuclear weapons, coupled with intercontinental missiles, can by themselves carry out

Footnotes at end of article.

strategic missions which previously were accomplished only by means of prolonged tactical operations:

Nuclear missiles have altered the relationship of tactical, operational, and strategic acts of the armed conflict. If in the past the strategic end-result was secured by a succession of sequential, most often long-term efforts [and] comprised the sum of tactical and operational successes, strategy being able to realize its intentions only with the assistance of the art of operations and tactics, then today, by means of powerful nuclear strikes, strategy can attain its objectives directly.[21] In other words, military strategy, rather than a casualty of technology, has, thanks to technology, become more central than ever. By adopting this view, Soviet theorists believe themselves to have adapted modern technological innovations in weaponry to the traditions of military science.

Implicit in all this is the idea that nuclear war is feasible and that the basic function of warfare, as defined by Clausewitz, remains permanently valid, whatever breakthroughs may occur in technology. "It is well known that the essential nature of *war as a contination of politics does not change with changing technology and armament.*" [22] This code phrase from Sokolovskii's authoritative manual was certainly hammered out with all the care that in the United States is lavished on an amendment to the Constitution. It spells the rejection of the whole basis on which U.S. strategy has come to rest: thermonuclear war is not suicidal, it can be fought and won, and thus resort to war must not be ruled out.

In addition (though we have no solid evidence to this effect) it seems likely that Soviet strategists reject the mutual-deterrence theory on several technical grounds of a kind that have been advanced by American critics of this theory like Albert Wohlstetter, Herman Kahn, and Paul Nitze.

1. Mutual deterrence postulates a certain finality about weapons technology: it does not allow for further scientific breakthroughs that could result in the deterrent's becoming neutralized. On the offensive side, for example, there is the possibility of significant improvements in the accuracy of ICBM's or striking innovations in anti-submarine warfare; on the defensive, satellites which are essential for early warning of an impending attack could be blinded and lasers could be put to use to destroy incoming missiles.

2. Mutual deterrence constitutes "passive defense" which usually leads to defeat. It threatens punishment to the aggressor after he has struck, which may or may not deter him from striking; it cannot prevent him from carrying out his designs. The latter objective requires the application of "active defense"—i.e., nuclear preemption.

3. The threat of a second strike, which underpins the mutual-deterrence doctrine, may prove ineffectual. The side that has suffered the destruction of the bulk of its nuclear forces in a surprise first strike may find that it has so little of a deterrent left and the enemy so much, that the cost of striking back in retaliation would be exposing its own critics to total destruction by the enemy's third strike. The result could be a paralysis of will, and capitulation instead of a second strike.

Soviet strategists make no secret of the fact that they regard the U.S. doctrine (with which, judging by the references in their literature, they are thoroughly familiar) as second-rate. In their view, U.S. strategic doctrine is obsessed with a single weapon which it "absolutizes" at the expense of everything else that military experience teaches soldiers to take into account. Its philosophical foundations are "idealism" and "metaphysics"—i.e., currents which engage in speculative discussions of objects (in this case, weapons) and of their "intrinsic" qualities, rather than relying on pragmatic considerations drawn from experience.[23]

Since the mid-1960's, the proposition that thermonuclear war would be suicidal for both parties has been used by the Russians largely as a commodity for export. Its chief proponents include staff members of the Moscow Institute of the USA and Canada, and Soviet participants at Pugwash, Dartmouth, and similar international conferences, who are assigned the task of strengthening the hand of anti-military intellectual circles in the West. Inside the Soviet Union, such talk is generally denounced as "bourgeois pacifism." [24]

In the Soviet view, a nuclear war would be total and go beyond formal defeat of one side by the other: "War must not simply [be] the defeat of the enemy, it must be his destruction. This condition has become the basis of Soviet military strategy," according to the *Military-Historical Journal*.[25] Limited nuclear war, flexible response, escalation, damage limiting, and all the other numerous refinements of U.S. strategic doctrine find no place in its Soviet counterpart (although, of course, they are taken into consideration in Soviet operational planning).

For Soviet generals the decisive influence in the formulation of nuclear doctrine were the lessons of World War II with which, for understandable reasons, they are virtually obsessed. This experience they seem to have supplemented with knowledge gained from professional scrutiny of the record of Nazi and Japanese offensive operations, as well as the balance sheet of British and American strategic-bombing campaigns. More recently, the lessons of the Israeli-Arab wars of 1967 and 1973 in which they indirectly participated seem also to have impressed Soviet strategists, reinforcing previously held convictions. They also follow the Western literature, tending to side with the critics of mutual deterrence. The result of all these diverse influences is a nuclear doctrine which assimilates into the main body of the Soviet military tradition the technical implications of nuclear warfare without surrendering any of the fundamentals of this tradition.

The strategic doctrine adopted by the USSR over the past two decades calls for a policy diametrically opposite to that adopted in the United States by the predominant community of civilan strategists: not deterrence but victory, not sufficiency in weapons but superiority, not retaliation but offensive action. The doctrine has five related elements: (1) preemption (first strike), (2) quantitative superiority in arms, (3) counterforce targeting, (4) combined-arms operations, and (5) defense. We shall take up each of these elements in turn.

Preemption. The costliest lesson which the Soviet military learned in World War II was the importance of surprise. Because Stalin thought he had an understanding with Hilter, and because he was afraid to provoke his Nazi ally, he forbade the Red Army to mobilize for the German attack of which he had had ample warning. As a result of this strategy of "passive defense," Soviet forces suffered frightful losses and were nearly defeated. This experience etched itself very deeply on the minds of the Soviet commanders: in their theoretical writings no point is emphasized more consistently than the need never again to allow themselves to be caught in a surprise attack. Nuclear weapons make this requirement especially urgent because, according to Soviet theorists, the decision in a nuclear conflict in all probability will be arrived at the initial hours. In a nuclear war the Soviet Union, therefore, would not again have at its disposal the time which it enjoyed in 1941–42 to mobilize reserves for a victorious counteroffensive after absorbing devastating setbacks.

Given the rapidity of modern warfare (an ICBM can traverse the distance between the USSR and the United States in thirty minutes), not to be surprised by the enemy means, in effect, to inflict surprise on him. Once the latter's ICBM's have left their silos, once his bombers have taken to the air and his submarines to sea, a counterattack is greatly reduced in effectiveness. These considerations call for a preemptive strike. Soviet theorists draw an insistent, though to an outside observer very fuzzy, distinction between "preventive" and "preemptive" attacks. They claim that the Soviet Union will never start a war—i.e., it will never launch a preventive attack—but once it had concluded that an attack upon it was imminent, it would not hesitate to preempt. They argue that historical experience indicates outbreaks of hostilities are generally preceded by prolonged diplomatic crises and military preparations which signal to an alert command an imminent threat and the need to act. Though the analogy is not openly drawn, the action which Soviet strategists seem to have in mind is that taken by the Israelis in 1967, a notably successful example of "active defense" involving a well-timed preemptive strike. (In 1973, by contrast, the Israelis pursued the strategy of "passive defense," with unhappy consequences.) The Soviet doctrine of nuclear preemption was formulated in the late 1950's, and described at the time by Garthoff and Dinerstein in the volumes cited above.

A corollary of the preemption strategy holds that a country's armed forces must always be in a state of high combat readiness so as to be able to go over to active operations with the least delay. Nuclear warfare grants no time for mobilization. Stress on the maintenance of a large ready force is one of the constant themes of Soviet military literature. It helps explain the immense land forces which the USSR maintains at all times and equips with the latest weapons as they roll off the assembly lines.

Quantitative superiority. There is no indication that the Soviet military share the view prevalent in the U.S. that in the nuclear age numbers of weapons do not matter once a certain quantity had been attained. They do like to pile up all sorts of weapons, new on top of old, throwing away nothing that might come in handy. This propensity to accumulate hardware is usually dismissed by Western observers with contemptuous references to a Russian habit dating back to Czarist days. It is not, however, as mindless as it may appear. For although Soviet strategists believe that the ultimate outcome in a nuclear war will be decided in the initial hours of the conflict, they also believe that a nuclear war will be of long duration; to consummate victory—that is, to destroy the enemy—may take months or even longer. Under these conditions, the possession of a large arsenal of nuclear delivery systems, as well as of other types of weapons, may well prove to be of critical importance. Although prohibited by self-imposed limitations agreed upon in 1972 at SALT I from exceeding a set number of intercontinental ballistic-missile launchers, the Soviet Union is constructing large numbers of so-called Intermediate Range Ballistic Missile launchers (i.e., launchers of less than intercontinental range), not covered by SALT. Some of these could be rapidly converted into regular intercontinental launchers, should the need arise.[26]

Reliance on quantity has another cause namely, the peculiarly destructive capability of modern missiles equipped with Multiple Independently-targettable Reentry Vehicles, or MIRV's. The nose cones of MIRVed missiles, which both superpowers possess, when in mid-course, split like a peapod to launch several warheads, each aimed at a separate target. A single missile equipped with three MIRVs' of sufficient accuracy, yield, and reliability can destroy up to three of the enemy's missiles—provided, of course, it catches them in their

Footnotes at end of article.

silos, before they have been fired (which adds another inducement to preemption). Theoretically, assuming high accuracy and reliability, should the entire American force of 1,054 ICBM's be MIRVed (so far only half of them have been MIRVed), it would take only 540 American ICBM's, each with three MIRV's, to attack the entire Soviet force of 1,618 ICBM's. The result would leave the United States with 514 ICBM's and the USSR with few survivors. Unlikely as the possibility of an American preemptive strike may be, Soviet planners apparently prefer to take no chances; they want to be in a position rapidly to replace ICBM's lost to a sudden enemy first strike. Conversely, given its doctrine of preemption, the Soviet Union wants to be in a position to destroy the largest number of American missiles with the smallest number of its own, so as to be able to face down the threat of a U.S. second strike. Its most powerful ICBM, the SS–18, is said to have been tested with up to 10 MIRV's (compared to 3 of the Minuteman–3, America's only MIRVed ICBM). It has been estimated that 300 of these giant Soviet missiles, authorized under SALT I, could seriously threaten the American arsenal of ICBM's.

COUNTERFORCE

Two terms commonly used in the jargon of modern strategy are "counterforce" and "countervalue." Both terms refer to the nature of the target of a strategic nuclear weapon. Counterforce means that the principal objective of one's nuclear missiles are the enemy's forces—i.e., his launchers as well as the related command and communication facilities. Countervalue means that one's principal targets are objects of national "value," namely the enemy's population and industrial centers.

Given the predominantly defensive (retaliatory) character of current U.S. strategy, it is naturally predisposed to a countervalue targeting policy. The central idea of the U.S. strategy of deterrence holds that should the Soviet Union dare to launch a surprise first strike at the United States, the latter would use its surviving missiles to lay waste Soviet cities. It is taken virtually for granted in this country that no nation would consciously expose itself to the risk of having its urban centers destroyed—an assumption which derives from British military theory of the 1920's and 1930's, and which influenced the RAF to concentrate on strategic bombing raids on German cities in World War II.

The Soviet high command has never been much impressed with the whole philosophy of countervalue strategic bombing, and during World War II resisted the temptation to attack German cities. This negative attitude to bombing of civilians is conditioned not by humanitarian considerations but by cold, professional assessments of the effects of that kind of strategic bombing as revealed by the Allied Strategic Bombing Surveys. The findings of these surveys were largely ignored in the United States, but they seem to have made a strong impression in the USSR. Not being privy to the internal discussions of the Soviet military, we can do no better than consult the writings of an eminent British scientist, P.M.S. Blackett, noted for his pro-Soviet sympathies, whose remarkable book "Fear, War and the Bomb," published in 1948–49, indicated with great prescience the lines which Soviet strategic thinking were subsequently to take.

Blackett, who won the Nobel Prize for Physics in 1948, had worked during the war in British Operations Research. He concluded that strategic bombing was ineffective, and wrote his book as an impassioned critique of the idea of using atomic weapons as a strategic deterrent. Translating the devastation wrought upon Germany into nuclear terms, he calculated that it represented the equivalent of the destruction that would have been caused by 400 "improved" Hiroshima-type atomic bombs. Yet despite such punishment, Nazi Germany did not collapse. Given the much greater territory of the Soviet Union and a much lower population density, he argued, it would require "thousands" of atomic bombs to produce decisive results in a war between America and Russia.[27] Blackett minimized the military effects of the atomic bombing on Japan. He recalled that in Hiroshima trains were operating forty-eight hours after the blast; that industries were left almost undamaged and could have been back in full production within a month; and that if the most elementary civil-defense precautions had been observed, civilian casualties would have been substantially reduced. Blackett's book ran so contrary to prevailing opinion and was furthermore so intemperately anti-American in tone that its conclusions were rejected out of hand in the West.

Too hastily, it appears in retrospect. For while it is true that the advent of hydrogen bombs a few years later largely invalidated the estimates on which he had relied, Blackett correctly anticipated Soviet reactions. Analyzing the results of Allied saturation bombing of Germany, Soviet generals concluded that it was largely a wasted effort. Sokolovskii cites in his manual the well-known figures showing that German military productivity rose throughout the war until the fall of 1944, and concludes: "It was not so much the economic struggle and economic exhaustion [i.e., countervalue bombing] that were the causes of the defeat of Hitler's Germany, but rather the armed conflict and the defeat of its armed forces [i.e., the counterforce strategy pursued by the Red Army.]" [28]

Soviet nuclear strategy is counter*force* oriented. It targets for destruction—at any rate, in the initial strike—not the enemy's cities but his military forces and their command and communication facilities. Its primary aim is to destroy not civilians but soldiers and their leaders, and to undermine not so much the will to resist as the capability to do so. In the words of Grechko:

The Strategic Rocket Forces, which constitute the basis of the military might of our armed forces, are designed to annihilate the means of the enemy's nuclear attack, large groupings of his armies, and his military bases; to destroy his military industries; [and] to disorganize the political and military administration of the aggressor as well as his rear and transport.[29]

Any evidence that the United States may contemplate switching to a counterforce strategy, such as occasionally crops up, throws Soviet generals into a tizzy of excitement. It clearly frightens them far more than the threat of Soviet cities posed by the countervalue strategic doctrine.

Combined-arms operations. Soviet theorists regard strategic nuclear forces (organized since 1960 into a separate arm, the Strategic Rocket Forces) to be the decisive branch of the armed services, in the sense that the utlimate outcome of modern war would be settled by nuclear exchanges. But since nuclear war, in their view, must lead not only to the enemy's defeat but also to his destruction (i.e., his incapacity to offer further resistance), they consider it necessary to make preparations for the follow-up phase, which may entail a prolonged war of attrition.

At this stage of the conflict, armies will be needed to occupy the enemy's territory, and navies to interdict his lanes of communications. "In the course of operations (battles), armies will basically complete the final destruction of the enemy brought about by strikes of nuclear rocket weapons." [30] Soviet theoretical writings unequivocally reject reliance on any one strategy (such as the *Blitzkrieg*) or on any one weapon, to win wars. They believe that a nuclear war will require the employment of all arms to attain final victory.

The large troop concentrations of Warsaw Pact forces in Eastern Europe—well in excess of reasonable defense requirements—make sense if viewed in the light of Soviet combined-arms doctrine. They are there not only to have the capacity to launch a surprise land attack against NATO, but also to attack and seize Western Europe with a minimum of damage to its cities and industries after the initial strategic nuclear exchanges have taken place, partly to keep Europe hostage, partly to exploit European productivity as a replacement for that of which the Soviet Union would have been deprived by an American second strike.

As for the ocean-going navy which the Soviet Union has now acquired, it consists primarily of submarines and ground-based naval air forces, and apparently would have the task of cleaning the seas of U.S. ships of all types and cutting the sea lanes connecting the United States with allied powers and sources of raw materials.

The notion of an extended nuclear war is deeply embedded in Soviet thinking, despite its being dismissed by Western strategists who think of war as a one-two exchange. As Blackett noted sarcastically already in 1948–49: "Some armchair strategists (including some atomic scientists) tend to ignore the inevitable counter-moves of the enemy. More chess playing and less nuclear physics might have instilled a greater sense of the realities." [31] He predicted that a World War III waged with the atomic bombs then available would last longer than either of its predecessors, and require combined-arms operations—which seems to be the current Soviet view of the matter.

Defense. As noted, the U.S. theory of mutual deterrence postulates that no effective defense can be devised against an all-out nuclear attack: it is this postulate that makes such a war appear totally irrational. In order to make this premise valid, American civilian strategists have argued against a civil-defense program, against the ABM, and against air defenses.

Nothing illustrates better the fundamental differences between the two strategic doctrines than their attitudes to defense against a nuclear attack. The Russians agreed to certain imprecisely defined limitations on ABM after they had initiated a program in this direction, apparently because they were unable to solve the technical problems involved and feared the United States would forge ahead in this field. However, they then proceeded to build a tight ring of anti-aircraft defenses around the country while also developing a serious program of civil defense.

Before dismissing Soviet civil-defense efforts as wishful thinking, as is customary in Western circles, two facts must be emphasized.

One is that the Soviet Union does not regard civil defense to be exclusively for the protection of ordinary civilians. Its chief function seems to be to protect what in Russia are known as the "cadres," that is, the political and military leaders as well as industrial managers and skilled workers—those who could reestablish the political and economic system once the war was over. Judging by Soviet definitions, civil defense has as much to do with the proper functioning of the country during and immediately after the war as with holding down casualties. Its organization, presently under Deputy Minister of Defense, Colonel General A. Altunin, seems to be a kind of shadow government charged with responsibility for administering the country under the extreme stresses of nuclear war and its immediate aftermath.[32]

Secondly, the Soviet Union is inherently less vulnerable than the United States to a

Footnotes at end of article.

countervalue attack. According to the most recent Soviet census (1970), the USSR had only nine cities with a population of one million or more; the aggregate population of these cities was 20.5 million, or 8.5 per cent of the country's total. The United States 1970 census showed thirty-five metropolitan centers with over one million inhabitants, totaling 84.5 million people, or 41.5 per cent of the country's aggregate. It takes no professional strategist to visualize what these figures mean. In World War II, the Soviet Union lost 20 million inhabitants out of a population of 170 million—i.e., 12 per cent; yet the country not only survived but emerged stronger politically and militarily than it had ever been. Allowing for the population growth which has occurred since then, this experience suggests that as of today the USSR could absorb the loss of 30 million of its people and be no worse off, in terms of human casualties, than it had been at the conclusion of World War II. In other words, all of the USSR's multimillion cities could be destroyed without trace or survivors, and, provided that its essential cadres had been saved, it would emerge less hurt in terms of casualties than it was in 1945.

Such figures are beyond the comprehension of most Americans. But clearly a country that since 1914 has lost, as a result of two world wars, a civil war, famine, and various "purges," perhaps up to 60 million citizens, must define "unacceptable damage" differently from the United States which has known no famines or purges, and whose deaths from all the wars waged since 1775 are estimated at 650,000—fewer casualties than Russia suffered in the 900-day siege of Leningrad in World War II alone. Such a country tends also to assess the rewards of defense in much more realistic terms.

How significant are these recondite doctrinal differences? It has been my invariable experience when lecturing on these matters that during the question period someone in the audience will get up and ask: "But is it not true that we and the Russians already possess enough nuclear weapons to destroy each other ten times over" (or fifty, or a hundred—the figures vary)? My temptation is to reply: "Certainly. But we also have enough bullets to shoot every man, woman, and child, and enough matches to set the whole world on fire. The point lies not in our ability to wreak total destruction: it lies in intent." And insofar as military doctrine is indicative of intent, what the Russians think to do with their nuclear arsenal is a matter of utmost importance that calls for close scrutiny.

Enough has already been said to indicate the disparities between American and Soviet strategic doctrines of the nuclear age. These differences may be most pithily summarized by stating that whereas we view nuclear weapons as a deterrent, the Russians see them as a "compellant"—with all the consequences that follow. Now it must be granted that the actual, operative differences between the two doctrines may not be quite as sharp as they appear in the public literature: it is true that our deterrence doctrine leaves room for some limited offensive action, just as the Russians include elements of deterrence in their "war-fighting" and "war-winning" doctrine. Admittedly, too, a country's military doctrine never fully reveals how it would behave under actual combat conditions. And yet the differences here are sharp and fundamental enough, and the relationship of Soviet doctrine to Soviet deployments sufficiently close, to suggest that ignoring or not taking seriously Soviet military doctrine may have very detrimental effects on U.S. security. There is something innately destabilizing in the very fact that we consider nuclear war unfeasible and suicidal for both, and our chief adversary views it as feasible and winnable for himself.

SALT misses the point at issue so long as it addresses itself mainly to the question of numbers of strategic weapons: equally important are qualitative improvements within the existing quotas, and the size of regular land and sea forces. Above all, however, looms the question of intent: as long as the Soviets persist in adhering to the Clausewitzian maxim on the function of war, mutual deterrence does not really exist. And unilateral deterrence is feasible only if we understand the Soviet war-winning strategy and make it impossible for them to succeed.

FOOTNOTES

[12] *Voennaia strategiia* (Moscow, 1962). Since 1962 there have been two revised editions (1963 and 1968). The 1962 edition was immediately translated into English; but currently the best version is that edited by Harriet Fast Scott (Crane-Russak, 1975) which renders the third edition but collates its text with the preceding two.

[11] To date, twelve volumes in this series have been translated into English and made publicly available through the U.S. Government Printing Office.

CONGRESSMAN DON PEASE'S VOTING RECORD

HON. DONALD J. PEASE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. PEASE. Mr. Speaker, it seems that the average citizen has no reasonable way to check the voting record of his or her representative. Lacking the resource material, the time, and the expertise needed to wade through the CONGRESSIONAL RECORD or other publications, citizens are left pretty much at loose ends. For this reason, I have assembled this complete record of all the votes I cast in the 95th Congress from January 4, 1977, through July 1, 1978. My constituents have a right to know how I voted and I want to accommodate them.

My votes are tabulated in such a way that each issue is described in language which can be easily understood. Each item in the list begins with the rollcall number of the vote, followed by a description of the question on which the vote was taken. This is followed by my own vote on the issue, either "yes," or "no," or "DNV" (did not vote). Finally, the vote of the entire House of Representatives on the issue is indicated by "passed" or "failed," followed by yea-nay totals:

VOTING RECORD

(2) Election of the Speaker of the House. O'Neill, 290; Rhodes, 142. voted for O'Neill.

(3) To bar amendments to Rules of the House for 95th Congress. Yes. Passed, 261–140.

(4) Rules of the House for 95th Congress. Yes. Passed, 256–142.

(9) Authorize the President to establish a 90-day emergency natural gas program. Yes. Passed, 367–52.

(10) Approve Journal of Feb. 1 proceedings. Yes. Passed, 413–2.

(11) Emergency Natural Gas Act: 90-day emergency allocation program; 180-day emergency purchase program; delete ceiling price on gas purchased from intrastate suppliers for interstate markets. Yes. Passed, 336–82.

(12) To adopt rule on resolution to create a Select Committee on Assassinations. Yes. Passed, 265–145.

(13) To eliminate language defining scope of investigation of Select Committee on Assassinations. No. Failed, 165–237.

(14) To reestablish until March 31, 1977, the Select Committee on Assassinations. Yes. Passed, 237–164.

(15) To approve journal of Feb. 2 proceedings. Yes. Passed, 329–3.

(16) Emergency appropriation ($6.4 million) for Department of Interior's Southwestern Power Administration. Yes. Passed, 341–5.

(17) To approve fishing agreements between U.S. and Bulgaria, Romania, East Germany, Poland, the Soviet Union, and the Republic of China. Yes. Passed, 353–35.

(18) To approve journal of Feb. 9 proceedings. Yes. Passed, 364–3.

(19) To direct Committee on Standards of Official Conduct to conduct an inquiry to determine whether Members of the House, their immediate families or their associates have accepted anything of value from the South Korean government or its representatives. Yes. Passed, 388–0.

(20) To raise ceiling on Small Business Administration loans and investments in FY 1977 from $6 billion to $8 billion. Yes. Passed, 381–0.

(22) To adjourn from Feb. 17 to Feb. 21. No. Failed, 109–224.

(23) Reduced air fares for the handicapped and the elderly. Yes. Passed, 403–0.

(24) To authorize medal to Marian Anderson in recognition of her distinguished career. Yes. Passed, 398–4.

(25) Budget Resolution: To adjust revenue and spending levels downward, assuming permanent tax cuts instead of expenditures for job programs. No. Failed, 148–258.

(26) Budget Resolution: Set spending ceiling and revenue floor for FY 1977. (Spending, $419.1 billion; revenue, $348.8 billion.) Yes. Passed, 239–169.

(27) To adopt rule on public jobs bill (Locale Public Works Capital Development and Investment Act of 1977). DNV. Passed, 384–6.

(28) To require that 65 per cent of funds for public works projects go to states based on number of unemployed in the state, and that 35 per cent of funds be set aside for states with unemployment rates in excess of 6.5 per cent. Yes. Failed, 187–201.

To base public works funds allocation on number of unemployed in state in relation to national rate. No. Passed, 229–158.

(30) To make $6 billion available for public works projects on which construction could begin within 90 days. Yes. Passed 295–85.

(31) To extend arrest and police authority of fish and wildlife enforcement officials. Yes. Failed, 206–136. (Two-thirds required).

(33) To approve fishing agreements between U.S. and Spain, Japan, South Korea, and European Economic Community. Yes. Passed, 377–18.

(34) Depository Institutions Amendments of 1977 on interest rate regulation, federal credit unions, Federal Reserve Banks. Yes. Passed, 401–4.

(36) To close debate on H. Res. 287 a new code of financial ethics for the House of Representatives. Yes. Passed, 267–153.

(37) To remove provision of ethics bill abolishing unofficial office accounts and instead, increase official expense allowance. No. Failed, 187–235.

(38) To remove ethics code restriction on Members' outside income. No. Failed, 79–344.

(39) Code of financial ethics, strengthening financial disclosure requirements, prohibit unofficial office accounts and lame duck travel, and restrict franking privilege and outside earned income. Yes. Passed, 402–22.

(495) Energy: To authorize $65 million in grants to state and local government for implementing energy-saving maintenance. No. Passed, 317–105.

(496) Labor, HEW: Conference report, to appropriate $60.2 billion for Labor-HEW Related Agencies. Yes. Passed, 337–82.

(497) Labor-HEW: Amendment to conference report stating that none of the bill's funds shall be used to perform abortions except where the life of the mother would be endangered, etc. No. Passed 238–182.

(498) Energy: To resolve into Committee of the Whole. Yes. Passed, 404–5.

(499) Energy: To remove price controls from new on-shore natural gas as of April 30, 1978. Yes. Failed, 199–227.

(500) Energy: To delete provision extending federal antitrust jurisdiction to the siting of fossil fuel electric generating plants. No. Passed, 257–160.

(501) Energy: To delete the van pooling program for federal employees. No. Passed 232–184.

(502) Energy: To resolve into Committee of the Whole. Yes. Passed, 378–3.

(503) Energy: To impose additional 5-cent-a-gallon gasoline tax—half going for mass transportation, half for improving bridges, roads and highways. No. Failed, 82–339.

(504) Energy: To increase gasoline tax by four cents a gallon in two stages. No. Failed, 52–370.

(505) Energy: To permit oil and gas producers to recover part of their oil equalization taxes if they invested more than 25% of gross production in the exploration and, production. No. Failed, 198–223.

(506) Energy: To transfer all revenue from crude oil equalization tax in 1978 to Social Security Trust Fund. No. Failed, 190–226.

(507) To provide $302,499 for investigations and studies by the permanent Select Committee on Intelligence. Yes. Passed, 342–10.

(508) Energy: To increase the earned income credit instead of providing rebates and tax credits for the crude oil equalization tax. DNV. Failed, 175–232.

(509) Energy: To delete exemptions from the oil and gas users tax that were provided for new plants which are exempt from the coal conversion program. Yes. Passed, 221–198.

(510) Energy: Anderson substitute for National Energy Act. No. Failed, 147–278.

(511) Energy: To delete the federal van pooling program. No. Passed, 239–180.

(512) Energy: To recommit National Energy Act with instructions to delete crude oil equalization tax. No. Failed, 203–219.

(513) Energy: Final passage, National Energy Act, providing tax credits for converting boilers to coal and weathering homes. It also increased the price of natural gas, set a national policy for regulating electric utilities, required efficiency labeling of appliances and cars, and set a program for fuel conservation in federal facilities. Yes. Passed, 244–177.

(516) To adopt conference report on defense appropriations ($109 billion in new budget authority). Yes. Passed, 361–36.

(518) Amendment to conference report to delete $1.4 billion to build five B–1 bombers. Yes. Passed, 202–199.

(520) Budget resolution: To reduce outlays ceiling by $52 billion and increase revenue floor by $8 billion to achieve a balanced budget. No. Failed, 169–230.

(522) Budget: To reduce revenue floor by $175 million to provide tax credit for tuition of full-time college and vocational school students. Yes. Passed, 311–76.

(523) Budget: To reduce budget authority ceiling by $109 million and outlays ceiling by $108 million to reduce U.S. food commodity support programs for South Korea. No. Failed, 181–205.

(524) Budget: To lower budget ceiling $144 million and outlays ceiling $110 million to reduce U.S. military and economic aid to S. Korea. No. Failed, 102–268.

(525) Budget: Adoption of the Second FY 1978 Budget Resolution setting outlay ceiling at $459.5 billion and a projected deficit of $61.6 billion. Yes. Passed, 199–188.

(526) To consider (adopt rule) ERDA National Security Authorization for FY 1978. Yes. Passed, 348–0.

(527) To consider (adopt rule) ERDA Civilian R&D Authorization for FY 1978. Yes. Passed, 338–14.

(528) To consider (adopt rule) Federal Banking Agency Audit Act. Yes. Passed, 312–47.

(529) To consider (adopt rule) Age Discrimination in Employment Act Amendments. Yes. Passed, 362–0.

(530) To consider (adopt rule) Earthquake Hazards Reduction Act. Yes. Passed, 350–3.

(531) To consider (adopt rule) National Climate Program Act. Yes. Passed, 348–2.

(532) To authorize $210 million for national earthquake hazards reduction program. No. Passed, 229–125.

(533) To establish a federal National Climate Program Office to develop a climate prediction program. Yes. Passed, 282–60.

(535) To authorize $302 million for salaries and expenses of Nuclear Regulatory Commission. Yes. Passed, 396–2.

(536) To designate 16 areas containing 1.2 million acres in western U.S. for inclusion in the National Wilderness Preservation System. Yes. Passed, 380–18.

(537) To require VA to review any discharge upgraded under President's Special Discharge Review Program before extending benefits to the veteran. Yes. Passed, 321–75.

(538) To increase educational assistance allowances for all veterans' educational programs by 6.6 per cent. Yes. Passed, 397–0.

(539) To authorize special incentive pay for VA physicians and dentists. Yes. Passed, 397–1.

(540) To repeal requirement that VA make random inspections of mobile homes purchased with VA loans. Yes. Passed, 394–1.

(541) To increase liability of persons who cause oil spills and establish $200 million fund to pay for clean-up and damages caused by oil pollution. Yes. Passed, 332–59.

(542) To authorize cost-of-living increases under the Retired Servicemen's Family Protection Plan. Yes. Passed, 391–0.

(545) To adopt conference report on Second FY Budget Resolution setting an outlay ceiling of $458.8 billion and projecting a deficit of $61.3 billion. Yes. Passed, 215–187.

(546) Minimum Wage: to Delete indexing minimum wage to the average production worker's wage. No. Passed, 223–193.

(547) Minimum Wage: To establish Minimum Wage Study Commission to study the effects of increases in minimum wage, the indexing procedure, youth subminimum wage, etc. Yes. Passed, 301–118.

(548) Minimum Wage: To reinsert into

bill the indexing provision. Yes. Failed, 169–227.

(549) Minimum Wage: To retain 50% tip credit. Yes. Passed, 264–161.

(550) Minimum Wage: To continue exemption for seasonal, recreational and theme parks. Yes. Passed, 241–183.

(551) Minimum Wage: To allow employers to pay 85% of minimum wage to youths under 19 for first six months. Yes. Failed, 210–211.

(552) Minimum Wage: To allow Secretary of Labor to waive minimum wage between June 1 and October 15 for children under age 12 in hand harvested agriculture, under certain protective conditions. No. Passed, 282–132.

(553) Minimum Wage: To increase enterprise threshold and expand definition of small businesses to include all businesses. No. Failed, 118–289.

(554) Minimum Wage: To increase enterprise coverage threshold to $500,000, but retain existing definition of small business. No. Passed, 221–183.

(555) Minimum Wage: Final passage, increasing minimum wage to $2.65 in 1978; $2.85 in 1979, and $3.05 in 1980. Yes. Passed, 309–96.

(557) To adopt conference report on Food and Agriculture Act, extending food stamp and Food for Peace Programs for four years, new payment limits for commodities, new target prices and loan levels, revising allotment, set-aside and disaster payments. Yes. Passed, 283–107.

(558) Conference report, to increase U.S. participation in International Banking Agencies. Yes. Failed, 153–230.

(559) To provide $323.5 million in federal payments and $1.4 billion from D.C. treasury for the District of Columbia government for FY 1978. Yes. Passed, 298–64.

(561) To permit filing for black lung benefits with Labor Department for only one year after the bill took effect. No. Failed, 108–268.

(562) To prohibit miners from collecting compensation on other disabilities while they are receiving total disability payments for black lung disease. Yes. Failed, 106–268.

(563) To permit mine operations to question a black lung claim based solely on X-rays by the claimant's physician. Yes. Failed, 136–242.

(564) Final passage, to establish an industry-financed Black Lung Disability Insurance Fund to pay all claims filed after June 30, 1973. Yes. Passed, 283–100.

(565) To consider (adopt rule) Increasing the Temporary Debt Limit. Yes. Passed, 284–96.

(566) To increase the debt limit to $775 billion from $700 billion. Yes. Failed, 130–201.

(567) To approve journal of Sept. 19 proceedings. Yes. Passed, 383–17.

(568) To increase district office spaces allowance from 1,500 to 2,500 square feet. Yes. Passed, 215–193.

(569) To cut ERDA funds for Clinch River Project from $150 million to $17 million to close out the project. No. Failed, 162–246.

(570) To cut ERDA funds for Clinch River Project to $17 million and delay project for one year. Yes. Failed, 129–277.

(571) To consider (adopt rule) Medicare-Medicaid Antifraud and Abuse Amendments. Yes. Passed, 374–6.

(572) To consider (adopt rule) Nuclear Antiproliferation Act. Yes. Passed, 388–0.

(573) To consider (adopt rule) Federal Insecticide, Fungicide and Rodenticide Act. Yes. Passed, 383–10.

(574) To resolve into Committee of the Whole House. Yes. Passed, 390–1.

(575) To require private industry to pay part of construction costs of Clinch River Breeder Reactor demonstration project. Yes. Failed, 196–206.

(576) To earmark $28 million to purchase four megawatts of solar photovoltaic equipment for the Federal Government and to provide $10 million to develop mass production techniques for photovoltaic equipment. Yes. Passed, 227–179.

(577) To approve journal of Sept. 21 proceedings. Yes. Passed, 283–6.

(579) To approve journal of Sept. 22 proceedings. Yes. Passed, 332–14.

(580) To authorize $6.6 billion for ERDA civilian research and development programs, including $150 million for Cinch River project. Yes. Passed, 317–47.

(581) To amend Medicare and Medicaid to establish stricter penalties for fraud and abuse, etc. Yes. Passed, 362–5.

(582) To raise the mandatory retirement age for private workers to 70. Yes. Passed, 359–4.

(583) To establish separate retirement funds for D.C. police, firefighters, teachers, and judges, etc. Yes. Passed, 348–21.

(584) To restate the charter of George Washington University. Yes. Passed, 363–4.

(585) To appropriate estimated cost of water and sewer service provided by D.C. to Federal Government. Yes. Passed, 375–1.

(586) To prohibit use of any loans in D.C. Borrowing Authority for acquisition of land or beginning construction of a convention center without prior congressional approval. No. Failed, 187–196.

(587) To extend until October, 1979, the D.C. interim authority to borrow funds from the U.S. Treasury to finance capital improvements. Yes. Passed, 266–119.

(588) D.C. Pretrial Detention Amendments: To include armed robbery as a crime for which defendants could be denied bail and be detained pending trial. No. Passed, 346–43.

(589) To extend Child Abuse Prevention and Treatment Act and strengthen protective and treatment services. Yes. Passed, 375–12.

(590) To express the sense of Congress that the Postal Service should not reduce the frequency of mail delivery service. Yes. Passed, 377–9.

(592) Second on a motion to pass Black Hills Claim. Yes. Passed, 376–19.

(594) To reject Senate language on abortion (exemptions to the ban on federal funding of abortions in cases of rape, incest, where mother's life is endangered, and certified as "medically necessary"). Yes. Failed, 164–252.

(595) To consider (adopt rule) Status of Indochina refugees. Yes. Passed, 390–22.

(596) To increase the authorization for staff allowances of former presidents from $96,000 to $150,000 per year for 30 months following termination of funds under Presidential Transition Act. (⅔ required). No. Failed, 211–203.

(597) To allow Court of Claims to determine the Sioux claim that the U.S. took the Black Hills in violation of the Fifth amendment. No. Failed, 173–239.

(598) To direct a five-year study of nine areas in Montana for possible inclusion in the National Wilderness Preservation System. (⅔ required). Yes. Failed, 256–155.

(599) To direct GAO audits of Internal Revenue Service and the Bureau of Alcohol, Tobacco and Firearms. Yes. Passed, 402–5.

(601) To establish a 16-member Select Committee on Population to study causes and effects of changes in world population of U.S. options on global population policies. Yes. Passed, 258–147.

(602) To give Select Committee on Assassinations power to defend lawsuits and make certain applications to courts. Yes. Passed, 290–112.

(603) To consider (adopt rule) on Increasing Temporary Debt Limit. Yes. Passed, 312–96.

(604) To increase the temporary debt limit to $700 billion. Yes. Passed, 213–202.

(605) To establish safeguards against U. S. nuclear fuel exports being diverted and used in nuclear weapons or explosive devices. Yes. Passed, 411–9.

(607) To resolve into Committee of the Whole to consider H.R. 6566. Yes. Passed, 361–7.

(608) To prohibit use of any funds in Energy Research and Development Administration National Security Authorizations for production or deployment of neutron weapons. Yes. Failed, 109–297.

(609) To authorize $2.67 billion for ERDA's national security nuclear energy programs. No. Passed, 330–78.

(610) To approve recissions of $21.09 million in appropriations for foreign military credit sales and $75 million for Federal Buildings Fund. Yes. Passed, 403–1.

(611) To resolve into Committee of the Whole to consider H.R. 7010, Victims of Crime Act. Yes. Passed, 377–17.

(612) To compensate only victims of crime older than age 62. No. Failed, 133–253.

(613) To approve journal of Sept. 29 proceedings. Yes. Passed, 317–11.

(614) To reduce to 25 percent from 50 percent the amount the federal government would contribute to state programs for victims of crime. Yes. Passed, 216–144.

(615) To require eligible states to insure that proceeds from articles, interviews or statements by an individual formally accused or convicted of a crime be put into an escrow fund for benefit of the victim or survivors if the accused is found guilty. No. Passed, 245–113.

(616) Final passage, to provide federal assistance to state victim compensation programs and federal compensation to victims of violent crimes in federal enclaves to cover medical bills and lost wages. No. Passed, 192–173.

(617) To increase staff allowance for former presidents from $96,000 a year to $150,000. Yes. Passed, 262–95.

(619) To require president to present a plan for transferring the functions of Council on Wage and Price Stability to other federal agencies. No. Failed, 178–215.

(620) To extend Council on Wage and Price Stability for two years. Yes. Passed, 251–145.

(622) To adopt amended Senate bill increasing the temporary debt limit to $752 billion. Yes. Passed, 223–194.

(623) To close debate and bar amendments to National Labor Reform Act. Yes. Passed, 267–152.

(624) To consider (adopt rule) H.R. 3410, National Labor Reform Act. Yes. Passed, 291–128.

(625) Conference report, reauthorizing Community Block Grants, etc. Yes. Passed, 384–26.

(626) To resolve into Committee of the Whole to consider Labor Reform Act. Yes. Passed, 384–5.

(627) Labor reform: To delete provision which directed NLRB to promulgate regulations to insure that employees have equal opportunity to obtain information pertaining to unionization from organizers and employers. No. Failed, 168–247.

(628) Labor reform: To insure employers the right to present their side of a unionization argument whenever and wherever union representatives present their views. Yes. Passed, 406–8.

(629) Labor reform: To permit judicial review of NLRB's failure to implement or promulgate regulations within a reasonable period of time. No. Passed, 246–174.

(630) Labor reform: To increase time limit for holding representational elections from 15 days to 28 days. No. Failed, 185–229.

(631) Labor reform: To increase, under certain conditions, the time limit for representational elections from 15 days to 25 days. Yes. Passed, 418–0.

(632) Labor reform: To strike provision permitting the Labor Secretary to prohibit

government contracts for three years with companies or unions that willfully violate NLRB orders. No. Failed, 111–301.

(633) Labor reform: To grant Labor Secretary authority to remove or reduce the period of time a company or union is barred from receiving federal contracts because of violations or NLRB orders. Yes. Passed, 394–8.

(634) To approve Journal of Oct. 5 proceedings. Yes. Passed, 364–16.

(635) To consider (adopt rule) Marine Protection, Research and Sanctuaries Authorization. Yes. Passed, 388–2.

(636) To close debate, bar amendments to the rule on Navigation Development Act. No. Passed, 241–169.

(637) Labor reform: To delete provision which would authorize NLRB to award employees compensation for lost pay due to an employer's refusal to bargain on the first contract. No. Failed, 162–250.

(638) Labor reform: To recommit Labor Reform Act with instructions to change election set-aside provisions. No. Failed, 139–279.

(639) Labor reform: Final passage, National Labor Reform Act, setting limits within which elections must be held, strengthening penalties for ignoring NLRB orders or violating labor laws, and authorizing NLRB to summarily affirm Administrative Law Judge decisions in unfair labor practice cases. Yes. Passed, 257–163.

(641) To recommit conference report appropriating $6.8 billion for foreign economic and military assistance programs. Yes. Passed, 273–126.

(642) To table request for a conference on Fair Labor Standards Act amendments. No. Failed, 138–266.

(643) To consider (adopt rule) House Administrative Reorganization. Yes. Failed, 160–252.

(644) To recede from the abortion language House had adopted in the conference report on Labor-HEW Appropriations. Yes. Passed, 209–206.

(645) To add to Hyde amendment abortion language, which prohibited federal funding for abortions except when mother's life was endangered, a second exception for medical procedures necessary for prompt treatment of forced rape or incest. No. Passed, 263–142.

(646) To authorize $561 million for research and development of cruise missile program and $151.6 million for F–14A aircraft and parts. DNV. Passed, 347–37.

(648) To adopt conference report establishing stricter penalties for Medicare and Medicaid fraud. Yes. Passed, 402–5.

(649) Amendment to strike from Federal Trade Commission Amendments the section authorizing class action suits. No. Passed, 281–125.

(650) Motion to recommit FTC Amendments with instructions to provide for congressional review and veto of FTC regulations. No. Passed, 272–139.

(651) To authorize $133 million for FTC and make certain changes in its enforcement of rules and orders. Yes. Passed, 279–131.

(652) To authorize replacement of locks and Dam 26 on Mississippi River. Yes. Passed, 331–70.

(653) To approve Senate compromise abortion language which dropped the "medically necessary" exception. Instead, would have prohibited federal funding of abortions except in cases where the mother's life is endangered, in cases of rape or incest, and in cases where "the mother or fetus would suffer serious health damage." Yes. Failed, 163–234.

(654) To adopt conference report on Export-Import Bank Amendments. (Neal bill). Yes. Passed, 281–62.

(655) Resolution to disapprove President Carter's proposal for reorganization of the Executive Office of the President. No. Failed, 20–350.

(656) To authorize General Accounting Office to audit the Office of the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and non-monetary policy functions of the Federal Reserve System. Yes. Passed, 336–24.

(657) To authorize $11.8 million for marine protection programs. Yes. Passed, 359–1.

(659) To prohibit HEW from implementing, for 18 months, the FDA's proposed ban on saccharin. Yes. Passed, 376–23.

(660) To revise law governing customs procedures and penalties for customs violations. Yes. Passed, 386–11.

(661) To make numerous clarifying, conforming, clerical and technical changes to provisions of the Tax Reform Act of 1976. No. Passed, 268–128.

(662) To exempt disaster payments for the 1977 wheat, feed grains, upland cotton and rice crops from the 1977 payment limitations ($20,000 per crop, $55,000 for rice). No. Passed, 265–127.

(664) To provide for a five-year Agriculture Department study of nine areas in Montana for possible inclusion in the National Wilderness Preservation System. Yes. Passed, 315–103.

(665) To appropriate $6.8 billion for foreign aid programs, international financial institutions, and State Department operations (conference report). Yes. Passed, 229–195.

(666) To allow the president to waive the prohibition of direct aid to Mozambique and Angola under certain conditions. Yes. Failed, 188–219.

(667) To strike from a House-passed bill restriction reducing aid to the Philippines. No. Failed, 160–254.

(669) To consider (adopt rule) Energy Transportation Security Act. No. Passed, 249–167.

(670) To define as "fair and reasonable rates" in Cargo Preference Bill as those no more than 50% higher than world market rates for carrying oil. Yes. Passed, 253–167.

(671) Final passage, Cargo Preference Bill, which would require that U.S.-flag ships carry 9.5% of imported oil by 1982. No. Failed, 165–257.

(672) To provide $9.1 million to build model intercultural centers at Georgetown and Tufts universities. Yes. Passed, 215–202.

(673) To delete language which would prohibit spending appropriated funds for the Clinch River Breeder Reactor project unless authorization bill was enacted. Yes. Passed, 252–165.

(674) To instruct conferees on Legal Services Corp. Act amendments to insist on prohibiting LSC-paid lawyers from handling cases on the desegregation of any elementary or secondary school or school system. No. Passed, 230–186.

(676) Minimum wage: To adopt conference report to increase minimum wage in steps to $3.35 by 1981. Yes. Passed, 236–187.

(677) To authorize $6.2 billion for civilian energy research and development programs. Yes. Passed, 336–52.

(678) To increase supplemental appropriations for Small Business Administration disaster loans by $675 million. No. Passed, 318–102.

(679) To end debate on adding $1.4 billion for B–1 bomber in Supplemental Appropriations bill. No. Passed, 212–187.

(680) Motion that the Committee rise from consideration of Supplemental Appropriations. Yes. Failed, 190–215.

(681) To add $1.4 billion to supplemental appropriations for production of five B–1 bombers. No. Failed, 194–204.

(682) Motion that the Committee rise from consideration of Supplemental Appropriations bill. No. Failed, 169–205.

(684) To order a second to a motion to suspend the rules and pass H.R. 7442, Utility Pole Attachments. Yes. Passed, 389–7.

(685) To permit expenditure of up to $30 million per year for three years to acquire more land for the Appalachian Trail. Yes. Passed, 409–12.

(686) To make it a federal offense to use children under age 16 in the production of pornographic materials, with penalties up to 10 years in prison, a $10,000 fine, or both. Yes. Passed, 420–0.

(687) To permit accredited law school libraries to serve as depositories of government publications. Yes. Passed, 397–20.

(688) To extend the effective date of several provisions of the Tax Reform Act of 1976. Yes. Passed, 411–5.

(689) To authorize acquiring suitable U.S. built mariner-class vessels in exchange for vessels in the National Defense Reserve Fleet that are scheduled for scrapping. Yes. Passed, 412–3.

(690) To increase from 50% to 80% the federal contribution for operating expenses of commuter rail services that have been adversely affected by the Regional Rail Organization Act. Yes. Passed, 308–106.

(691) To implement treaties with Mexico and Canada to permit transfer of convicted prisoners. Yes. Passed, 400–15.

(692) To instruct House conferees to agree with Senate provisions that imposed criminal penalties for the transportation, sale, or distribution of pornographic material depicting children. Yes. Passed, 358–54.

(693) To provide $7.2 billion supplemental budget authority for various departments and programs, including $4.5 billion for EPA construction grants, $1.4 billion for SBA disaster loans, and $80 million for Clinch River Breeder Reactor. Yes. Passed, 313–98.

(694) To authorize $253.6 million for Environmental Protection Agency research and development programs. Yes. Passed, 353–19.

(696) To consider (adopt rule) Social Security Financing Amendments. Yes. Passed, 265–153.

(697) Social security: To delete provision requiring social security coverage of federal, state, and local government employees, etc. in 1982 and instead require a study recommending by Jan. 1980 a fair plan of universal coverage. Yes. Passed, 386–38.

(698) Social security: To affirm the action taken on the previous vote. Yes. Passed, 380–39.

(699) Social security: To raise social security payroll tax rates faster than the bill required in order to permit more gradual increases in the taxable wage base. No. Failed, 136–281.

(700) Social security: To delete provision granting the Social Security System standby authority to borrow from the federal general revenues whenever trust fund reserves drop below 25% of annual outgo. No. Failed, 196–221.

(701) Social security: To eliminate the minimum benefit from the social security program. Yes. Failed, 131–271.

(703) Social security: To resolve into Committee of the Whole House for consideration of H.R. 9346. Yes. Passed, 405–3.

(704) Social security: To phase out outside earnings ceiling (the maximum annual wage that a beneficiary age 65 to 72 may earn without losing any benefits) by 1982. No. Passed, 268–149.

(705) Social security: Motion to recommit with instructions to mandate social security coverage for federal employees. No. Failed, 57–363.

(706) Social security: Final passage, to raise social security payroll taxes by increasing the taxable wage base for employers and employees, beginning in 1978, and increasing employer and employee tax rates, beginning in 1981. Yes. Passed, 275–146.

(708) To adopt conference report, extending the Summer Food Program through FY 1982 and revising it in order to control fraud and abuse. Yes. Passed, 386–17.

(709) To authorize the Speaker of the House to devise and implement a system for closed circuit broadcasting of House floor proceedings to offices and committees. Yes. Passed, 342–44.

(710) To consider (adopt rule) Bankruptcy Law Revision. Yes. Passed, 358–11.

(711) To resolve into Committee of the Whole House to consider Bankruptcy Law Revision. Yes. Passed, 329–2.

(712) To delete provisions of Bankruptcy Law Revision which would establish an independent bankruptcy court system. No. Passed, 182–158.

(713) Motion that the committee rise from consideration of Bankruptcy Law Revision. Yes. Passed, 268–62.

(716) To make domestic raisins subject to the federal marketing order. Yes. Passed 396–7.

(717) To extend Regulation Q through Dec. 15, 1978, set guidelines of the Federal Reserve Board to follow in determining monetary policy, etc. Yes. Passed, 395–3.

(718) To extend until April 30, 1978, Federal Reserve Bank authority to purchase U.S. obligations of up to $5 billion directly from the Treasury. Yes. Passed, 388–14.

(719) To extend the Select Committee on Ethics until the end of the 95th Congress, or completition of its official business. Yes. Passed, 385–22.

(720) To express the sense of the House that the Government of Korea should extend full and unlimited cooperation to the House investigation of whether Members of the House accepted anything of value from the Korean Government or its agents. Yes. Passed, 407–0.

(721) To denounce acts by the Government of South Africa which suppress expression and violate individual human rights. Yes. Passed, 347–54.

(722) To recommit conference report on Maritime Authorization with instructions to insist that anti-rebate provisions take effect immediately instead of eight months after enactment. No. Failed, 166–231.

(723) To expedite EPA's registration and reregistration of pesticides. Yes. Passed, 368–21.

(725) To second motion to suspend rules and pass Congressional Salary Deferral. Yes. Failed, 167–233.

(726) To uphold religious right to refrain from joining unions. Yes. Passed, 400–7.

(727) To increase the interest rates charged by Small Business Administration (SBA) from 3 percent to 5 percent on disaster loans between $40,000 and $250,000. (Two-third required). Yes. Failed, 234–170.

(728) To make employees of House Beauty Shop eligible for employee benefits. No. Passed, 273–131.

(729) To express the sense of the House that the President should appoint a 15-member Commission on World Hunger. Yes. Passed, 364–38.

(731) To permit the District of Columbia government to disburse the proceeds of revenue bonds to private colleges and universities in D.C. Yes. Passed, 403–0.

(732) To adopt conference report authorizing $2.6 billion for ERDA's nuclear weapons program. No. Passed, 336–69.

(734) To prohibit Overseas Private Investment Corp. from making any loans or guaranteeing or insuring any borrowings of the National Finance Corp. of Panama without prior congressional approval. No. Failed, 188–215.

(736) To require that at least 50% of all Overseas Private Investment Corp. insurance, reinsurance guarantees and financing activities go to U.S. small business. No. Passed, 285–111.

(738) To adopt rule on Labor-HEW Conference roport. Yes. Passed, 361–9.

(739) To concur in Senate compromise abortion language. Yes. Failed, 172–193.

(740) To consider (adopt rule) Continuing Appropriations for FY 1978. Yes. Passed, 344–5.

(742) To approve journal of Nov. 5 proceedings. Yes. Passed, 184–14.

(747) To authorize $325 million (5 years) to help state and local educational agencies provide career education programs in elementary and secondary schools. Yes. Passed, 372-20.

(748) To resolve into Committee of the Whole House to consider H. Res. 827, Disapproving Reorganization Plan No. 2. Yes. Passed, 387–2.

(749) To disapprove plan to consolidate U.S. Information Agency and Bureau of Educational and Cultural Affairs into a new International Communications Agency. Yes. Failed, 34–357.

(751) To concur in Senate compromise abortion language. Yes. Failed, 183–205.

(753) To close debate and prohibit amendments on a motion to recommit Supplemental Appropriations bill to conference. No. Failed, 125–270.

(754) To recommit Supplemental Appropriations to conference with instructions to increase funding for Amtrak to $18 million. Yes. Passed, 256–141.

(755) To affirm the vote on Amtrak appropriations. Yes. Passed, 258–138.

(756) To order the previous question, thereby closing debate and barring amendments to a motion to instruct conferees on Social Security Financing Amendments. Yes. Passed, 214–181.

(757) To instruct conferees to insist on phasing out the outside earning provisions of Social Security Financing Amendments by 1982. No. Failed, 183–209.

(759) To provide an additional $10,000 in FY 1977 for foreign travel on official business relating to the investigation of Korean-American relations. Yes. Passed, 366–2.

(761) To express sense of Congress that any national health planning guidelines should recognize and take into account the special problems of rural health care, to assure quality health care for rural residents. Yes. Passed, 357–0.

(762) To consider (adopt rule) Continuing Appropriations for FY 1978. Yes. Passed, 331–21.

(763) To further limit abortion language already voted on by requiring that rapes be forced, that incidents of rape or incest be reported promptly, for abortions to be federally funded. Yes. Failed, 170–200.

(764) To concur to a Senate amendment to conference report, Supplemental Appropriations, to provide $200 million for the Community Services Administration's Crisis Intervention Program. Yes. Passed, 182–181.

(765) To concur in a Senate amendment to rescind $462 million for production of two B–1 bombers. Yes. Failed, 166–191.

(767) To adopt conference report on H.R. 9418, which repealed an existing requirement that medical schools had to reserve positions in their third year classes for ratios of Americans studying in medical schools abroad. Yes. Passed, 344–0.

(768) To extend Legal Services Corporation for three years. Yes. Passed, 236–110.

(769) To consider (adopt rule) Continuing Appropriations for FY 1978. Yes. Passed, 251–86.

(770) To concur in Senate compromise language on abortion requiring that rape and incest be reported "promptly" to qualify as exception to prohibition of federal funds for abortion. Yes. Failed, 171–178.

(771) To consider (adopt rule) ERDA Civilian Authorization for FY 1978. Yes. Passed, 329–18.

(772) To adopt conference report, authorizing $64 million for operations of the Securities and Exchange Commission. Yes. Passed, 348–2.

(773) To adopt conference report making it illegal for a SEC-registered corporation or other domestic concern to bribe a foreign official, etc. Yes. Passed, 349–0.

(774) To consider (adopt rule) Continuing Appropriations for FY 1978. Yes. Passed, 240–109.

(775) To amend compromise abortion language so the final version stipulated that exceptions permitted federally funded abortions only for cases where childbirth would cause a woman "severe and long-lasting" health damage "when so determined by two physicians," and for "medical procedures necessary for the victims of rape and incest, when such rape and incest have been reported promptly to a law enforcement agency or public health service." Yes. Passed, 181–167.

Congressman Pease missed the following votes at the end of the session because he was holding public meetings in the Fifth District. He had either paired or announced in advance his intention to vote "yes" on each of the five following rollcalls.

(776) To approve the journal of Dec. 7 proceedings. Yes. Passed, 284–14.

(777) To adopt rule conference report on Clean Water Act. Yes. Passed, 326–6.

(778) To adopt conference report on Clean Water Act, authorizing $25.7 billion, including $24.5 billion for sewage treatment construction grants for FY 1978 through 1982. Yes. Passed, 346–2.

(780) To adopt rule on conference report, Social Security Financing Amendments. No. Passed, 178–175.

(782) To adopt conference report, Social Security Financing Amendments. The bill raised social security payroll taxes by increasing the rates and taxable wage base for both employers and employees, beginning in 1979. It also stabilized the system's benefits structure, provided equal treatment for women, and increased the outside earnings ceiling in steps to $6,000 by 1982. Yes. Passed, 189–163.

VOTING RECORD OF CONGRESSMAN DON J. PEASE, 2ND SESSION, 95TH CONGRESS

(2) Clarify authority granted for warrantless search and seizure under Fish and Wildlife Improvement Act. No vote. Passed, 215–131.

(3) Fish and Wildlife Improvement Act. No vote. Passed, 292–59.

(15) To make pre-lease drilling subject to appropriations acts if done at federal expense, to prohibit dual-leasing and to authorize alternative bidding systems. No. Failed, 187–211.

(16) To eliminate dual leasing, prohibitions against joint bidding, compulsory compliance with states' clean air standards, lease cancellation provisions and OSHA's jurisdiction over OCS. No. Failed, 143–229.

(18) To authorize funding for the Office of Rail Public Counsel. Yes. Passed, 318–44.

(19) To require Conrail to assume bankrupt railroads' obligations to pay medical and life insurance premiums for former employees of railroads who retired before Conrail took over the railroads. Yes. Passed, 314–50.

(20) To allow supplemental or charter all-cargo carriers to qualify for new air cargo certificates immediately instead of waiting one year. Yes. Passed, 403–0.

(21) To delete Interior Department authority for core and test drilling and for geological and geophysical exploration. Yes. Passed, 328–77.

(22) To strike provision that a lessee is entitled to recover his investment less any revenues he may have received from that investment if the Interior Department cancels his lease. No. Passed, 208–194.

(23) To limit the use of new bidding systems to at least 10% of newly leased areas, but not more than 30%. No. Failed, 196–207.

(24) To require that new bidding systems be used for at least 20% of newly leased acreage, but not more than 50%. No. Passed, 219–188.

(25) To resolve into the Committee of the Whole House for consideration of Bankruptcy Law Revision. Yes. Passed, 405–4.

(26) To strike provisions of the bill establishing an independent bankruptcy court system and making bankruptcy judges federal life-term judges. No. Failed, 146–262.

(27) To provide discretionary authority for Justice Department to review proposed OCS lease sales for possible antitrust implications. Yes. Passed, 241–162.

(28) To strike provisions in OCS bill requiring random selection of tracts to be used under the new bidding system. Yes. Passed, 225–174.

(29) To approve the Journal of the last day's proceedings. Yes. Passed, 368–21.

(30) To strike provisions in OCS bill to establish documentation, registry, and manning requirements for vessels and rigs operating on the OCS. Yes. Failed, 118–280.

(31) To require that all building and rebuilding of vessels, platforms and rigs for the OCS be performed in the U.S. No. Failed, 201–208.

(33) To stipulate that 20% of OSC revenues, up to a maximum of $200 million per year, be shared with the coastal states most directly affected by offshore development. No. Passed, 279–120.

(34) To exempt states which receive OCS revenue sharing funds from existing requirements that they have federally approved Coastal Zone Management Plans. No. Failed, 159–230.

(35) Passage of the Outer Continental Shelf Lands Act Amendments. Yes. Passed, 291–91.

(36) To increase ceilings for FY 78 and FY 79 on federal matching funds under Medicaid for Puerto Rico, the Virgin Islands, and Guam and to provide automatic increases at the same rate as the Consumer Price Index after that. Yes. Passed, 253–106.

(37) To adopt the rule on Chattahoochee River Recreation Area. Yes. Passed, 323–41.

(39) To direct the Secretary of Agriculture to take appropriate action to prevent collusive practices in bidding for publicly owned timber. Yes. Failed, 136–239.

(40) To establish an advisory Committee on Timber Sales Procedure to be appointed by the Secretary of Agriculture. No. Passed, 295–78.

(42) To authorize 145 new federal judgeships, 110 in U.S. district courts and 35 in the U.S. circuit court of appeals. Yes. Passed, 319–80.

(43) To adopt the rule on the Office of Consumer Representation Act. Yes. Passed, 271–138.

(44) To approve substitute bill that would have established an Office of Consumer Counsel in each of 23 departments and major agencies. No. Failed, 93–313.

(46) To resolve in Committee of the Whole for consideration of Office of Consumer Representation Act. Yes. Passed, 377–25.

(47) To extend to all agencies the requirement that the President be notified 30 days before the Office of Consumer Representation sought judicial review of an agency action. No. Failed, 195–219.

(48) To remove exemption for labor injunction suits, certain proceedings of the National Labor Relations Board and activities of Federal Mediation and Conciliation Service. No. Failed, 138–274.

(49) To remove exemption for proceedings of the Agriculture Department, Conservation Service, Farmers Home Administration and Federal Crop Insurance Corporation. Yes. Failed, 105–309.

(50) Passage of Office of Consumer Representation Act. Yes. Failed, 189–227.

(52) To recommit the Redwood National Park Amendments. No. Failed, 116–274.

(53) To expand Redwood National Park in California by 48,000 acres. Yes. Passed, 328–60.

(54) To designate 1.3 million acres in the western U.S. for inclusion in the National Wilderness Preservation System. Yes. Passed, 333–44.

(55) To resolve into Committee of the Whole for consideration of Black Hills Claim. Yes. Passed, 337–17.

(56) To direct House conferees to insist upon merit selection of district court judges. Yes. Passed, 321–19.

(57) To resolve into the Committee of the Whole for consideration of the Chattahoochee River Recreation Area Act. Yes. Passed, 325–7.

(58) To make land acquisition conditional upon a State of Georgia agreement to take over ownership and operating expenses of the area by June 30, 1978. No. Failed, 119–230.

(59) Passage of the Chattahoochee River Recreation Area Act. Yes. Passed, 273–79.

(60) To limit the number of commissioned officers in the three military branches. Yes. Passed, 351–7.

(62) Black Lung Benefits Reform Act—to establish eligibility requirements and procedures for applying for black lung disability payments. Yes. Passed, 264–113.

(63) To facilitate development of commercial aquaculture facilities in the U.S. through creation of a National Aquaculture Development Plan and loan guarantees. No. Passed, 234–130.

(65) To authorize $250 million out of Highway Trust Fund for 100% federal share grants to states to repair potholes and other road damages caused by severe winters. Yes. Passed, 274–137.

(66) To authorize the President to call separate White House Conferences on the Arts and Humanities. Yes. Passed, 341–65.

(67) To extend the Alcohol and Drug Abuse Education Act through FY 1983. Yes. Passed, 409–0.

(68) To authorize $5 million for Hubert H. Humphrey Institute of Public Affairs at the University of Minnesota. Yes. Passed, 356–53.

(71) To table motion to rescind $462 million for production of two B–1 bombers. No. Failed, 172–244.

(72) To rescind $462 million in FY 78 supplemental appropriations for B–1 bombers. Yes. Passed, 234–182.

(73) To adopt the rule on IMF Supplementary Financing Facility. Yes. Passed, 386–15.

(76) To limit salaries of representatives to the IMF Supplementary Financing Facility. Yes. Passed, 253–141.

(77) To authorize the U.S. to invest $1.8 billion in the IMF Supplementary Financing Facility. Yes. Passed, 267–125.

(78) To prohibit OPIC loans or guarantees to the National Finance Corporation of Panama unless approved by House resolution. No. Failed, 166–199.

(79) To prohibit OPIC from insuring or financing any project to establish or expand production or processing of palm oil, sugar, or citrus crops for export. No. Passed, 191–167.

(80) Overseas Private Investment Corporation—to extend OPIC through FY '80, strengthen its development mandate, eliminate direct under-writing with private insurance companies, encourage concentration on countries with per capita income of $520 or less. Yes. Passed, 191–165.

(81) To adopt rule on Grazing Fee Moratorium Act. Yes. Passed, 302–1.

(82) To adopt rule on Wichita Indian Tribal Lands Act. Yes. Passed, 295–6.

(83) To place a one year moratorium on increases in public lands grazing fees. Yes. Passed, 257–47.

(84) To delete waiver of *res judicata* and *collateral estoppel* and provide for transfer of claims to Court of Claims when the Indian Claims Commission expires. Yes. Passed, 293–1.

(85) To authorize the Wichita Indian Tribe to file its land claims against the U.S. government with the Indian Claims Commission. Yes. Passed, 226–68.

(87) To allow D.C. voters to initiate laws and disapprove Council acts by referendum. Yes. Passed, 321–24.

(88) To amend D.C. Home Rule Charter so the D.C. voters can recall elected officials. Yes. Passed, 350–4.

(90) To abolish diversity of citizenship as a basis for federal court jurisdiction. No. Passed, 266–133.

(91) Federal Trade Commission Amendments of 1978. Yes. Failed, 146–255.

(92) To authorize funds in Fiscal Years 1979, '80 and '81 for activities of the American Folklife Center in the Library of Congress. Yes. Passed, 306–80.

(94) To adopt rule on D.C. Representation in Congress. Yes. Passed, 386–21.

(95) To resolve into the Committee of the Whole for consideration of D.C. Representation in Congress. Yes. Passed, 369–15.

(96) To resolve into the Committee of the Whole for consideration of D.C. Representation in Congress. Yes. Passed, 394–12.

(97) To propose a constitutional amendment to provide D.C. with voting representation in Congress (two senators and the number of representatives to which it would be entitled by population). Yes. Passed, 289–127.

(99) To approve the Journal of the last day's proceedings. Yes. Passed, 304–20.

(100) To provide $400,000 for Veterans Affairs Committee investigations and studies during the second session of the 95th Congress. Yes. Passed, 336–1.

(101) To provide $275,000 for D.C. Committee investigations and studies during the second session of the 95th Congress. Yes. Passed, 318–15.

(102) To provide $49,500 for Rules Committee investigations and studies during the second session of the 95th Congress. Yes. Passed, 321–13.

(104) To approve the Journal of the last day's proceedings. Yes. Passed, 331–11.

(105) To designate May 3, 1978 as Sun Day to promote and call attention to the possibilities of solar energy. Yes. Passed, 348–7.

(107) To extend through FY79 the authority of the Commissioner of Education to waive certain provisions regarding the use of grants for 13 school districts which participated in National Institute of Education's study of ESEA Title I, so that demonstration projects could be continued. Yes. Passed, 404–0.

(108) To adopt the rule on Increasing the

Temporary Debt Limit Act. Yes. Passed, 285–115.

(110) To eliminate the need for separate debt ceiling legislation. Yes. Passed, 277–132.

(111) To increase the temporary debt ceiling to $824 billion effective through March 1, 1979. Yes. Failed, 165–248.

(112) To authorize Southwestern Power Administration to purchase $13.1 million in electric power to fulfill its delivery contracts. Yes. Passed, 353–50.

(113) To provide $2 million for Transportation Committee investigations and studies during the second session of the 95th Congress. Yes. Passed, 399–1.

(115) To agree to a motion that the House dispense with further proceedings under the call of the House. Yes. Passed, 372–34.

(116) To approve the Journal of the last day's proceedings. Yes. Passed, 377–26.

(117) To table a motion to reconsider the vote approving the previous day's Journal. Yes. Passed, 313–91.

(118) To order the previous question and thus close debate on adoption of the rule on the Full Employment and Balanced Growth Act (Humphrey-Hawkins Bill). Yes. Passed, 371–36.

(119) To adopt the rule on the Full Employment and Balanced Growth Act. Yes. Passed, 349–58.

(120) To agree to a motion to table a motion to reconsider the vote adopting the rule on the Full Employment and Balanced Growth Act. Yes. Passed, 368–29.

(121) To resolve into the Committee of the Whole for consideration of the Full Employment and Balanced Growth Act (Humphrey-Hawkins bill). Yes. Passed, 364–32.

(123) To approve the Journal of the previous day's proceedings. Yes. Passed, 386–15.

(125) To require the President to include in the annual economic report specific price stability goals and policies and programs with which to achieve the goals. Yes. Passed, 277–143.

(126) To mandate a specific goal of reducing inflation to 3% by 1983. No. Failed, 198–223.

(127) To require the President in the annual economic report to use two sets of employment statistics: one to measure all employment and one to count workers in public service employment programs as still unemployed. Yes. Passed, 239–177.

(128) To add to the economic goals in the bill a goal of 100% parity of income for farmers at the marketplace by 1983. No. Passed, 264–150.

(129) To approve rescissions of $40.2 million in appropriations for the military assistance program, $10.1 million in borrowing authority for the Federal Home Loan Bank Board and $5 million in appropriations for contributions to international peacekeeping activities. Yes. Passed, 318–0.

(131) To order a second on a motion to suspend the rules and pass a bill to increase the interest rate on U.S. retirement plan bonds and U.S. individual retirement bonds. Yes. Passed, 372–1.

(132) To suspend the rules and authorize the Civil Service Commission to conduct a 3-year experiment for executive branch employees with flexible and compressed work schedules. Yes. Failed, 242–141 (two-thirds vote required).

(133) To establish a uniform federal policy on part-time employment and require federal agencies to establish part-time career employment programs. Yes. Passed, 294–84.

(134) To provide Congress with the opportunity to review proposed changes in the level of national postal services before they take effect. Yes. Passed, 371–6.

(135) To require $300,000 to be allocated to internal security functions of the Judiciary Committee. No. Failed, 161–216.

(136) To reduce the Select Committee on Assassinations' funding to $600,000. Yes. Failed, 182–198.

(137) To provide $2.5 million for investigations and studies of the Select Committee on Assassinations for the second session of the 95th Congress. No. Passed, 204–175.

(139) To agree to a motion that the House dispense with further proceedings under the call of the House. Yes. Passed, 331–72.

(140) To agree to a motion that the previous day's Journal be read in full. No. Failed, 99–301.

(141) To approve the Journal of the last day's proceedings. Yes. Passed, 371–29.

(143) To order a second on a motion to suspend the rules and pass the Absaroka-Beartooth Wilderness Act. Yes. Passed, 380–20.

(144) To order a second on a motion to suspend the rules and pass the Travel Expenses of Government Officials Paid by Private Foundations Act. Yes. Passed, 387–2.

(145) To order a second on a motion to suspend the rules and pass the Home Production of Beer and Wine Act. Yes. Passed, 383–3.

(146) To suspend the rules and pass the Absaroka-Beartooth Wilderness Act. Yes. Passed, 405–7.

(147) To suspend the rules and pass Travel Expenses of Government Officials Paid by Private Foundations Act. Yes. Passed, 372–38.

(148) To adopt the conference report expanding the Redwood National Park in California by 48,000 acres. Yes. Passed, 317–60.

(150) To approve the Journal of the last day's proceedings. Yes. Passed, 387–15.

(151) To agree to a motion to resolve into the Committee of the Whole for consideration of Full Employment and Balanced Growth Act (Humphrey-Hawkins bill). Yes. Passed, 380–19.

(152) To add the specific goal of a balanced budget by 1983 and mandate the President to pursue policies consistent with that goal. No. Failed, 205–215.

(153) To declare that one of the purposes of the Act was achievement of a balanced budget consistent with achievement of the unemployment goals enumerated in the bill. Yes. Passed, 411–3.

(154) To agree to a motion to end debate at a specified time on Title I and all amendments thereto to Full Employment and Balanced Growth Act. Yes. Passed, 237–170.

(155) To add to the bill the goal of a permanent reduction in individual federal income taxes by 10% per year for three years, accompanied by a 1% reduction in corporate taxes annually for three years and an increase in the corporate surtax exemption to $100,000. No. Failed, 194–216.

(156) To agree to a motion to resolve into the Committee of the whole for consideration of the Full Employment and Balanced Growth Act. Yes. Passed, 379–8.

(157) To add to the section on national priority programs the implementation through financial assistance of programs already established by law as major national priorities, such as the removal of architectural barriers to the handicapped. Yes. Passed, 398–0.

(158) To omit the following persons from unemployment statistics used for purposes of the Act: persons unemployed because of strikes, those unemployed less than 4 weeks, persons not seeking full-time jobs, persons who voluntarily left their jobs, and those who have been hired but have not started work. No. Failed, 199–204.

(159) To strike the enacting clause and thus kill the Full Employment and Balanced Growth Act. No. Failed, 106–310.

(160) To require the President, in carrying out the Act, to consider the impact of all provisions of the U.S. Code and Code of Federal Regulations on the national economy. No. Failed, 114–296.

(161) To strike the provisions of the bill which would have required the Joint Economic Committee to submit its own concurrent resolution to Congress each year with congressional goals for employment and economic growth. Yes. Passed, 259–153.

(162) To terminate the Act on September 30, 1983 unless Congress extends it beyond that date. No. Failed, 196–216.

(163) To accept a substitute bill that would have set national goals by 1983 of 4% unemployment, 3% inflation, 100% parity in farm prices, reduced tax levels and a balanced budget and prohibit the use of public service jobs to meet the unemployment goal. No. Failed, 137–376.

(164) Passage of the Full Employment and Balanced Growth Act (Humphrey-Hawkins bill). Yes. Passed, 257–152.

(166) To approve consideration of a bill to expand educational grant and loan programs for middle-income students by $1.2 billion. No. Failed, 156–218.

(167) To authorize funds for an investigation and study of Korean-American relations by the International Relations Committee. Yes. Passed, 367–13.

(168) To adopt the rule on Postal Service Act Amendments. Yes. Passed, 387–0.

(170) To condemn the kidnapping of Aldo Moro and to call upon the President to instruct the U.S. Representative to urge the United Nations to consider the subject of terrorism and sponsor proposals for solving the problem. Yes. Passed, 398–0.

(171) To adopt the rule on the Public Debt Limit Extension. Yes. Passed, 314–80.

(172) To extend the existing temporary debt limit of $752 billion through July 31, 1978. Yes. Passed, 233–172.

(174) To make in order an amendment to begin partial public financing of House election campaigns. Yes. Failed, 198–209.

(175) To adopt conference report which abolishes compulsory retirement for most federal employees and raises the mandatory retirement age for non-federal workers from 65 to 70. Yes. Passed, 391–6.

(397) Resolution to provide for consideration of Export-Import Bank authorization. Yes. Passed, 364–4.

(398) Resolution to provide for consideration of bill to extend certain elementary, secondary and other education programs for five years. Yes. Passed, 339–13.

(339) To resolve into Committee of the Whole to consider Export-Import Bank bill. Yes. Passed, 314–13.

(400) Call in Committee. Present.

(401) To allow Export-Import Bank to extend credit to South Africa so long as credit can be extended to Angola, Cambodia, Vietnam or any Communist country. No. Failed, 157–190.

(402) To resolve into Committee of the Whole to consider Export-Import Bank bill. Yes. Passed, 318–3.

(403) To delete language prohibiting Bank's participation in transactions with South Africa. No. Failed, 116–219.

(404) To delete language that would have permitted the Bank to extend credit to People's Republic of China. Yes. Passed, 179–138.

(405) To provide the Secretary of Transportation with authority to transport Coast Guard employees to and from certain places of employment. Yes. Passed, 336–0.

(406) To implement the protocol relating to intervention on high seas in cases of marine pollution by substances other than oil. Yes. Passed, 344–1.

(407) To provide additional authorization for operating programs under the Federal Water Pollution Control Act. Yes. Passed, 338–9.

(408) Resolution providing for consideration of Boundary Waters Canoe Area Wilderness Bill. Yes. Passed, 339–1.

(409) To amend the bill with substitute removing national recreation area from bill and redesignating it as a mining protection area, liberalizing the restrictions on motor boat use within BWCA, and permitting use of motor boats on an increased number of lakes. Yes. Passed, 213–141.

(410) Boundary Waters Canoe Area Wilderness Bill. Yes. Passed, 324–29.

(411) Resolution providing for consideration of bill authorizing FY79 appropriations for certain insular areas of the U.S. Yes. Passed, 344–2.

(412) Bill to authorize FY79 appropriations for certain insular areas of the U.S. Yes. Passed, 292–54.

(413) Call of the House. Present.

(414) To provide for payments to local governments based upon the acreage of the National Wildlife Refuge System within their boundaries. Yes. Passed, 340–28.

(415) To amend the North Pacific Fisheries Act of 1954. Yes. Passed, 368–0.

(416) To establish a conservation program for the living marine resources of the Arctic and Southern Oceans. No. Passed, 268–103.

(417) Resolution providing for consideration of bill to authorize FY79 appropriations for intelligence and intelligence-related activities. Yes. Passed, 322–48.

(418) To require Attorney General to notify House and Senate intelligence-related committees of the admission of any alien he believes is excludable under the Immigration and Naturalization Act. No. Failed, 60–132.

(419) Bill to authorize FY79 appropriations for intelligence and intelligence-related activities. Yes. Passed, 323–43.

(420) Resolution providing for consideration of bill providing financial assistance to New York City. Yes. Passed, 339–21.

(421) Approve the Journal. Yes. Passed, 331–15.

(422) To authorize the printing as a House document the folder "The United States Capitol." Yes. Passed, 349–24.

(423) To authorize the printing of additional copies of Volume II of the Senate hearings "Korean Influence Inquiry." No. Passed, 329–50.

(424) Resolution providing for consideration of bill making FY 79 appropriations for Treasury Department, U.S. Postal Service, Executive Office of the President and other independent agencies. Yes. Passed, 376–1.

(425) To restore $4.2 million to the bill for implementation of new BATF firearms regulations. No. Failed, 80–314.

(426) FY79 Appropriations bill for Treasury Department, U.S. Postal Service, Executive Office of the President and certain other independent agencies. No. Passed, 297–98.

(427) Call in Committee. Present.

(428) To reduce by $28 million the fiscal year 1979 appropriation to OSHA. No. Passed, 201–179.

(429) To resolve into Committee of the Whole to consider bill to provide financial assistance for New York City. Yes. Passed, 382–3.

(430) To conform bill to the Congressional Budget Act. Yes. Passed, 401–0.

(431) To recommit bill for financial assistance to New York City to provide for a 3-year extension of the New York Seasonal Financial Act of 1975 and provide $2 billion in loan assistance for 1979, $1.5 billion in 1980 and $800 million in FY81. No. Failed, 109–291.

(432) Bill to provide financial assistance to New York City. Yes. Passed, 247–155.

(433) To reduce the Labor-HEW appropriations by $1 billion for FY79. Yes. Passed, 290–87.

(434) Resolution for urgent supplemental appropriation for the black lung program under the Department of Labor for FY78. Yes. Passed, 237–72

(435) Resolution providing for consideration of bill making FY 79 appropriations for Department of Transportation and related agencies. Yes. Passed, 309–16.

(436) Call of the House. Present.

(437) Resolution condemning gross human rights violations in Uganda and urging the President to impose a trade ban. Yes. Passed, 377–0.

(438) To increase the authorization of appropriations under the Toxic Substances Control Act, two-thirds vote required. No. Failed, 190–188.

(439) To prohibit the use of funds for implementation of regulation requiring installation of air bags in cars. No. Passed, 237–143.

(440) To allow funding to continue for research and development of occupant restraint systems. Yes. Failed, 180–194.

(441) FY 79 Appropriations Bill for Department of Transportation and related agencies. Yes. Passed, 347–25.

(442) Resolve into the Committee of the Whole to consider FY 79 Labor-HEW appropriations bill. Yes. Passed, 383–5.

(443) To delete language that restricts the use of federal funds for abortions except where the life of the mother would be endangered by carrying the fetus to term. No. Failed, 122–287.

(444) To replace restrictive abortion language with compromise language agreed to in 1977 prohibiting federal funds for payment for abortions except in cases of reported rape, incest or where severe and long lasting physical health damage to mother would result from carrying fetus to term, as determined by two physicians. Yes. Failed. 198–212.

(445) To prohibit funds in the bill to implement or enforce racial quotas by HEW or Labor Departments. No. Passed, 232–177.

(446) To reduce the Labor-HEW appropriations bill by 2 percent No. Passed, 220–181.

(447) To reduce the Labor-HEW appropriations bill by $28 million earmarked for OSHA. No. Failed, 184–216.

(448) FY 79 Appropriations Bill for Departments of Labor and HEW, and related agencies. Yes. Passed, 338–61.

(449) To resolve into Committee of the Whole to consider FY 79 Legislative Appropriations. Yes. Passed, 344–2.

(450) To resolve into Committee of the Whole to consider FY 79 appropriations for Departments of State, Justice and Commerce, Judiciary and related agencies. Yes. Passed, 368–6.

(451) To prohibit any funds for payment of expenses of maintaining American mission in Cuba. No. Passed, 241–158.

(452) To reduce funding for Legal Services Corporation by $30 million. Yes. Failed, 200–203.

(453) To prohibit the Legal Services Corporation from using any of its funds to support or defeat legislation pending before the Congress or state legislatures. No. Passed, 264–131.

(454) FY 79 Appropriations bill for Departments of State, Justice, Commerce, the Judiciary and related agencies. Yes. Passed, 359–34.

(455) To reduce by 5% the funding of the Legislative Appropriation for FY 79. Yes. Passed, 220–168.

(456) To prohibit funds to buy new color television cameras to broadcast House proceedings without prior House approval. No. Failed, 133–249.

(457) To prohibit funds being used to televise House proceedings if cameras will not be controlled by House employees. Yes. Passed, 235–150.

(458) To prohibit funds to provide wall calendars, U.S. Historical Society calendars, USDA yearbooks, plants from Botanical Garden and shipping trunks unless reimbursement is made. Yes. Passed, 214–159.

(459) FY79 Legislative Appropriation. Yes. Passed, 279–90.

(460) Call of the House. Present.

(461) Resolution providing for consideration of bill making appropriations for public works for water and power development and energy research in FY 79. DNV. Passed, 317–82.

(462) To reduce funding level in bill by $49 million for three water projects. Yes. Failed, 108–284.

(463) To prohibit funds in bill being used for five water projects. Yes. Failed, 142–234.

(464) To resolve into Committee of the Whole to consider bill making appropriations for public works for water and power development and energy research in FY79. Yes. Passed, 300–4.

(465) To prohibit funding for production of neutron warheads. Yes. Failed, 67–259.

(466) To reduce by 3% the funding of the bill making appropriations for public works water and power development and energy research in FY79. No. Failed, 93–228.

(467) FY79 Appropriations for public water and power development and energy research. Yes. Passed, 263–59.

(468) To reduce by 2% the funding in the bill making appropriations for military construction for the Department of Defense for FY79. Yes. Passed, 278–13.

(469) To resolve into Committee of the Whole to consider bill making appropriations for HUD and other independent agencies for FY79. Yes. Passed, 347–4.

(470) Call in Committee. Present.

(471) To reduce funding for EPA abatement and control and enforcement programs to FY78 levels plus 7%. No. Failed, 173–211.

(472) To reduce by 2% the funding in HUD and Independent Agencies Appropriations bill, for FY79. Yes. Failed, 156–222.

(473) FY79 HUD and Independent Agencies Appropriations. Yes. Passed, 332–47.

(474) Resolution calling for consideration of bill making appropriations for Department of Interior and related agencies in FY79. DNV. Passed, 353–27.

(475) Limit funds Economic Regulatory Administration may use to pay expenses of parties intervening in proceedings before them to $100,000. Yes. Failed, 190–221.

(476) To strike language prohibiting use of funds to pay the expenses of parties intervening in regulatory proceedings before Economic Regulatory Administration. No. Failed, 126–282.

(477) To provide a 2% reduction in bill making appropriations for Department of Interior and related agencies in FY79. Yes. Failed, 198–211.

(478) FY79 Interior Appropriations Bill. Yes. Passed, 356–50.

(479) Resolution calling for consideration of bill to extend authorization of appropriations under Rail Passenger Service Act for one year. Yes. Passed, 375–25.

(480) Call of the House. Present.

(481) To resolve into Committee of the Whole to consider the bill making appropriations for Department of Agriculture, Rural Development and related agencies programs for FY79. Yes. Passed, 369–5.

(482) To reduce funding for food stamp program by $290,200,000. No. Failed, 194–201.

(483) To prohibit Food for Peace assistance to South Korea. No. Passed, 273–125.

(484) To reduce by 2% appropriations to Department of Agriculture, Rural Development and related agencies in FY79. Yes. Failed, 189–201.

(485) FY78 Agriculture Appropriations bill. Yes. Passed, 326–59.

(486) To delete nuclear concepts from inclusion in any technical assessment of a potential solar powered satellite program. No. Passed, 267–96.

(487) Call of the House. Present.

(488) To strike provisions of bill requiring Amtrak to buy American products in those instances where the cost exceeds $100,000. Yes. Failed, 93–207.

(489) To require a discontinuance hearing for any passenger train receiving a federal subsidy exceeding $100 per passenger over any successive 3-month period. No. Failed, 119–186.

(490) To require approval of the U.S. Special Trade Representative of any purchase of foreign products by Amtrak when Secretary of Transportation determines that "Buy American" requirement would not be in the public interest. No. Failed, 121–178.

(491) To extend for 1 year the authorization for appropriations for Amtrak. Yes. Passed, 204–89.

(492) Resolution providing for consideration of bill to extend federal laws pertaining to housing, community and neighborhood development and preservation and related programs. Yes. Passed, 282–5.

(493) To authorize reserve enlisted members of the Army and the Air Force to retire within 20 years of service. DNV. Passed, 283–35.

(494) To revise the rule for recalculation of military retired or retainer pay to reflect later active duty performed between October 1, 1963 and October 1, 1973, DNV. Passed, 292–30.

(495) To allow federal employment preference to certain employees of the Bureau of Indian Affairs & Indian Health Service who are not entitled to benefits of or have been adversely affected by certain federal laws allowing employment preference to Indians. DNV. Failed, 118–204.

(496) Resolution providing for consideration of bill making changes in some park and recreation areas. DNV. Passed, 311–2.

(497) Bill to extend authorization for Civil Rights Commission for 5 years. DNV. Passed, 303–16.

(498) Approve the Journal. Yes. Passed, 326–11.

(499) Motion to refer presidential veto to Post Office and Civil Service Committee on bill to improve the basic work week of firefighters of executive agencies. No. Passed, 279–109.

(500) To order a second on bill to increase disability compensation rates for disabled veterans and to increase rates of dependency and indemnity compensation for their survivors. Yes. Passed, 378–1.●

LEGISLATION TO CURTAIL CARTELS

HON. ALBERT GORE, JR.

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. GORE. Mr. Speaker, today I am introducing legislation, along with the Honorable JOHN MOSS, which will help prevent the spread of international cartels and stem participation by American corporations in cartel activities.

The need for this legislation is painfully evident in the energy industry. A cartel controls world oil and prices and in effect controls the very fiber of the U.S. economy. Hearings before the Oversight and Investigations Subcommittee, chaired by the Honorable JOHN MOSS, uncovered a sophisticated uranium cartel that successfully manipulated a sevenfold increase in uranium prices between 1972 and 1975.

Our antitrust jurisdiction and our regulatory powers do not generally cross our borders. Yet, the United States can minimize the adverse impact on U.S. commerce by limiting participation by American firms in international cartels and by applying pressure through normal trade channels to prevent cartels from forming. My four-part legislation would require U.S. companies to report any solicitation of cartel activities, give new presidential authority to impose economic sanctions on foreign nations participating in cartels, require the special trade representative to enter into negotiations to amend international trade agreements restricting cartels, and strengthen the application of present antitrust law.

BACKGROUND

In 1972, uranium producers and uranium exporting countries were faced with a world glut of uranium supply and organized a cartel to stabilize prices. The

cartel secretly set up a formal headquarters in Paris and began dictating prices to the world market. The elaborate scheme of bid rigging and market allocation was so successful that uranium prices sky-rocketed from $6 per pound in 1972 to $41 per pound in 1975. The cartel went so far as to direct its members to submit differing bids to preserve the appearance of a competitive market.

There is no doubt that the cartel existed. There is also no doubt that one of the active participants in the cartel was the Gulf Oil Co. through its Canadian subsidiary, Gulf Minerals Canada Ltd. The controversy is over the cartels' impact in the world market and particularly in the United States. The United States has little control over the corporations of France, South Africa, or Australia, but it is imperative that we assert our antitrust jurisdiction when international cartel activities are dictated by a parent firm in the United States.

The Gulf Oil Corp., invoking the "Act of State" doctrine as a defense, contended that the Canadian Government forced them to join the cartel. Yet, after listening to Gulf's defense during three sets of hearings, it became less and less clear whether the Canadian Government coerced Gulf to join the cartel or whether Gulf urged the Canadian Government to ask them to join the cartel. I think the answer to who was pushing who is plainly seen in Gulf's internal memos. Gulf, aware that any disclosure of their role could make them vulnerable to either United States or Canadian antitrust laws, asked the Canadian Government to set up a wall of insulation that they could use to fall back on as a future legal defense, should one become necessary. In one instance, a Gulf official drafted a letter, which was ultimately signed by the Canadian Assistant Deputy Minister of Energy, Mines, and Resources, requesting Gulf to participate on the operating committee of the cartel. Clearly, Gulf's role was more than passive.

Gulf also insisted that the cartel did not affect U.S. commerce. To the contrary, evidence uncovered in the hearings demonstrated that a number of U.S. utilities, including the Tennessee Valley Authority, were forced to pay cartel prices for their uranium. TVA alone bought 20 million pounds of uranium in 1974 at cartel rigged prices from members of the "club." Similarly Duke Power, Commonwealth Edison, and Carolina Power & Light also bought uranium from cartel members during the active period of the cartel.

Mr. Speaker, Gulf was not the only U.S. firm to be asked to join the cartel. A similar offer was also extended to Getty Oil, through an Australian subsidiary. Yet, while Gulf's attorneys determined that their participation did not violate U.S. antitrust laws, Getty's attorneys believed that there were severe antitrust implications. In addition, it is very ironic to note that Gulf's partner in Canada, a German firm, declined to join the cartel because of strict German antitrust laws. Yet, Gulf sought to evade U.S. law by seducing the Canadian Government into "requiring" Gulf's participation; allowing Gulf the "Act of State" doctrine as a defense.

Clearly the United States and its captive consumers need a stronger hand in dismantling cartels. Our present policy is one of indifference which merely encourages cartel activity. The United States needs to take a tougher stance to discourage cartel activities. I believe this legislation, had it been law, would have minimized the impact of the uranium cartel, if not prevented it altogether. It can be an important deterrent to future cartel activities.

At this point I include the following:

BILL SUMMARY

SECTION 1

Gulf's internal discussions lead me to the conclusion that Gulf would not have participated in the cartel if they had been required to report their activities to the federal government.

Section 1 requires that any U.S. firm or subsidiary of a U.S. firm that engages in, or is requested to engage in, restrictive business practices report this information to the Federal Trade Commission. The FTC has the expertise to vigorously enforce this provision through its administrative procedures, without the necessity of going through lengthy court proceedings. In turn the FTC would notify the Attorney General, the Secretary of State, and the Special Trade Representative. Failure of the corporation to report any evidence of cartel activity would result in a civil penalty of $1 million and a $25,000 civil penalty for each corporate officer involved in the failure to report.

This section will not inflict further burdensome regulations—it is merely a simple reporting requirement. However, the penalty is stiff enough and the coverage broad enough to encourage U.S. firms to inform U.S. authorities of cartel activities in which they are asked to join.

SECTION 2

Section 2 calls on the President to take the necessary and appropriate steps to initiate negotiations on a new international agreement, in the form of an amendment or protocol to the General Agreement on Tariffs and Trade, that would obligate member countries to adopt legislation to control cartel and monopoly activity that affects international trade. There have been many attempts to introduce such an obligation into international law, and some legal scholars have suggested that there might be an implied obligation in the GATT.

The failure of such attempts is due in large measure to a lack of American leadership, and the efforts of multinational firms to frustrate efforts that reduce their ability to extract monopoly rents. The Charter of Havana (that would have established the International Trade Organization as a sister organization to the International Monetary Fund and the World Bank Group) included sections which would have obliged each country to control "restrictive business practices" which affect international trade. In today's highly interdependent world, that can be logically construed to mean an obligation to adopt wide-scale antitrust policies that would have the effect of increasing the wealth and economic efficiency of all countries that participate in international trade.

The Common Market has in principle adopted such a policy in regard to trade among its members, as evidenced by sections 85, 86, and 87 of the Treaty of Rome. However, their policies regarding trade with nonmembers leave much to be desired. During the investigation of the international uranium cartel, we found that large multinational firms were able to manipulate supposedly sovereign governments in order to win approval and support for their cartel activities. New international agreements are needed so that all member states will bear an international obligation to maintain the integrity of free markets. Failure to curtail specific cartel activities such as price-fixing, market splitting, production limiting, etc. should be considered an international delinquency. The GATT would provide an appropriate forum, since it has undertaken most of the functions once envisioned for the ITO and still represents the most important international agreement regarding trade. It should not be the only avenue of approach. The OECD has from time to time also suggested a tightening of policy regarding restrictive business practices.

SECTION 3

Section 3 strengthens the President's authority to deal with other nations that allow and encourage cartel activities to persist, distorting the flow of trade and robbing consumers in all countries. This amendment to section 301 of the Trade Act of 1974 would allow the President to impose trade sanctions on countries which permit their own nationals and/or require American nationals, real or juridical, to operate or participate in cartels and cartel activities that adversely affect American trade or international commerce. These sanctions would be similar to those available for use in retaliation for explicit violations of the GATT. These sanctions may include punitive tariffs, embargoes, licensing requirements and other such sanctions as are permitted for restrictive trade practices.

This legislation will serve notice on our industrialized trading partners that we will no longer tolerate government condoned cartels and monopolies that serve to distort the balance of trade in their favor through artificial manipulation of markets, prices, and production.

SECTION 4

Section 4 would disallow the use of the federal "Act of State" doctrine as a defense for firms that participate in cartels sponsored or condoned by foreign governments. Simply put, activities in violation of this act and the anti-trust laws of the United States by U.S. firms or firms that engage in U.S. commercial activity would be triable even though condoned or sponsored by a foreign government. Under the Act of State doctrine, the public acts of foreign governments cannot be adjudicated in U.S. courts. U.S. firms that participate in cartel activities have often pleaded that they did so at the request of the foreign government or a state trading agency.

The "Act of State" doctrine is unique to Anglo-American jurisprudence, and was originally formulated prior to the emergence of modern economic laws and the complexities of international trade and foreign direct investment. Multinational firms that participate in foreign cartels do so for their own enrichment, usually as an active partner of the foreign government if not as actual instigator of the cartel. The abuse of the Act of State doctrine in circumstances not in existence at the time of its origin is a glaring loophole that has long outlived its usefulness.●

PERSONAL EXPLANATION

HON. WILLIAM LEHMAN

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. LEHMAN. Mr. Speaker, earlier today I met with HUD Secretary Patricia Harris and several of my Miami constituents to discuss urban redevelopment efforts in Miami. Because this meeting

took place at the Secretary's office, I had to miss the vote on the conference report on H.R. 13467, supplemental appropriations for fiscal year 1978. Had I been present, I would have voted in favor of the conference report.●

CAPTIVE NATIONS WEEK

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. DERWINSKI. Mr. Speaker, during the third week in July, we commemorated the 20th anniversary of Captive Nations Week. Contrary to the impressions and illusions of some of our analysts, this observance is not a ritual for mourning or mere commemoration of lost once-free nations, but rather it is a period for reexamination of our foreign policy. In short, Captive Nations Week reminds us of the cumulative past in order to understand the meaning and significance of the present.

I wish to conclude my remarks with the following:

First. Proclamations by Governor Richard A. Snelling of Vermont; and Mayor Richard E. Olson of Des Moines, Iowa;

Second. A letter of rebuttal appearing in the August 4, Washington Post;

Third. An interview appearing in the July 30th Manion Forum, South Bend, Ind.; and

Fourth. Articles in the China Post of July 24, on the Week in Free China:

STATE OF VERMONT EXECUTIVE DEPARTMENT

A PROCLAMATION

Whereas, the imperialistic policies of international communism have led, through direct and indirect aggression, to the subjugation and enslavement of many peoples throughout the world; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom loving peoples in the captive nations look to the United States as the citadel of human fredom and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, the Congress of the United States by unanimous vote passed Public Law 86–90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such a week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of captive peoples;

Now, therefore, I, Richard A. Snelling, Governor of the State of Vermont do hereby proclaim the week beginning July 16 through July 22, 1978, as "CAPTIVE NATIONS WEEK" in Vermont, and call upon the citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of the captive nations.

PROCLAMATION

Whereas, the imperialistic politics of Russian Communists have led, through direct and indirect aggression, to the subjugation and enslavement of the peoples of Poland, Hungary, Lithuania, Ukraine, Czecho-Slovakia, Latvia, Estonia, Byelorussia, Romania, East Germany, Bulgaria, Mainland China, Armenia, Azerbaipan, Georgia, North Korea, Albania, Idel-Ural, Serbia, Croatia, Solvenia, Tibet, Cossackia, Turkestan, North Vietnam, Cuba, Cambodia, South Vietnam, Laos and others; and

Whereas, the desire for liberty and independence by the overwhelming majority of peoples in these conquered nations constitutes a powerful deterrent to any ambitions of Communist leaders to initiate a major war; and

Whereas, the freedom loving peoples of the captive nations look to the United States as the leaders in bringing about their freedom rights and to the people of the United States as the leaders in bringing about their freedom and independence; and

Whereas, The Congress of the United States by unanimous vote passed Public Law 86–90 establishing the third week in July each year as Captive Nations Week and inviting the people of the United States to observe such week with appropriate prayer, ceremonies and activities; expressing their sympathy with and support for the just aspirations of the captive nations;

Now, therefore, I, Richard E. Olson, Mayor of the City of Des Moines, Iowa, do hereby proclaim the week of July 16 to July 22, 1978, as "Captive Nations Week" in Des Moines, and call upon our citizens to join with others in observing this week by offering prayers and dedicating their efforts for the peaceful liberation of oppressed and subjugated peoples all over the world.

[From the The Washington Post, Aug. 4, 1978]

"CAPTIVE NATION'S FANTASY"

(By Walter B. Smalley)

I found Stephen Rosenfeld's confession about how he felt about "Captive Nations" in the 1960s and how he feels now very interesting (op-ed, July 14). Also, he concludes that the United States dare not provoke Soviet power at this time.

Unfortunately, Mr. Rosenfeld does not go on to point out how the one-time, lone resistance to Soviet power by Yugoslavia among communist-oriented nations in Europe has grown into general resistance all over the world. Communism is still all-powerful, but it is no longer a monolith controlled by Moscow. Red China is at Russia's back, and to its front are all the Eurocommunist nations and political parties making it clear to Moscow that it no longer rules the roost. True, Mother Russia has Cuba's Castro aiding and abetting the Russians in Africa, but just how far can Castro go?

The "captive nations" fantasy may be just that, but let Mr. Rosenfeld look at the reverse side of the coin. Moscow has overplayed its hand. There is more fact than fantasy in the rumblings of discontent. The dangerous dream of which Mr. Rosenfeld speaks with such knowledge could be more dangerous to the Russians than he dares to believe possible.

THE UNCHANGING MARXIST-LENINIST IDEOLOGY "COMMUNISTS . . . . WILL ALWAYS STRUGGLE FOR WORLDWIDE TRIUMPH"

(By Joseph Sheftick)

Dean Manion: Another Captive Nations Week has come and gone. Its annual observance, during the third week of every July, was established by the unanimous vote of Congress in 1959, and the first annual Presidential Proclamation of its observance was made unequivocally and immediately by President Eisenhower.

The then reigning Russian Communist Dictator Nikita Khrushchev was shocked and surprised at this anti-Communist unanimity in Congress and the enthusiastic public response of the American people from coast to coast. Khrushchev saw the great potentialities of this American expression of faith in God, human freedom, and national self-government. He feared that its exploitation might prove to be the handwriting on the wall for the Kremlin dictatorship. He went to work immediately to dilute and dissolve our anti-Communism, by subversion in this country, and iron-fisted police state methods in all of the countries that Communism had captured at the end of World War II.

Unfortunately, Khrushchev and his successors have had great success in their campaign for the dilution and dissolution of our once all but unanimous anti-Communist dedication. The success of this Kremlin effort was climaxed on May 20, 1977, when the new President of the United States presumed to speak for the American people when he proclaimed that we had "lost our inordinate fear of Communism."

But there were informed and alarmed people in this country who have kept the anti-Communist spirit of our first Captive Nations Week alive. One of them is Dr. Joseph Sheftick, President of the American Council of Captive Nations. A few weeks ago, Dr. Sheftick brought a big audience of American Legionnaires in Washington to their feet cheering his passionate eloquent appeal for the defense of our country by the revival of knowledgeable anti-Communism in America. Immediately thereafter, our friend Captain Frank Manson, Foreign Relations Counselor for the American Legion, interviewed Dr. Sheftick for this broadcast which you will hear today.

Now here is Captain Manson.

Captain Manson: Dr. Poseph Sheftick, welcome to the Dean Manion Forum.

The American Legion was most fortunate to have you as one of our speakers in Washington. You received tremendous applause and all of the members of the Foreign Relations Commission requested copies of your speech on Communism. Why do you think that the response was so great? Why do you think it happened that way?

Dr. Sheftick: There was a statement made one time by Theodore Roosevelt in answer to a question asked by General Douglas MacArthur on why the American people responded so favorably and with great inspiration to words spoken by Theodore Roosevelt. He responded, "I say what is in the hearts and minds of the people before it is on their lips."

So, I felt that the response to the speech that I gave to the American Legion was due to the fact that I told them about the victory that is necessary to bring Communism to an end, to establish a decent world, that we must overcome this evil that brings so much suffering to all people. This is what is in the hearts of the American people.

Captain Manson: I must say that you got a tremendous response and I thought that it would be valuable to reach a much wider audience through the Manion Forum. So, I am going to ask you some of the questions that came up in the course of your speech.

As you know, we are striving here in the United States to coexist with the Soviet Union, to establish mutual supporting trading policies, to have all sorts of sports, music and cultural exchanges. Dr. Sheftick, do you think that it is possible to coexist side by side—capitalism and Communism?

Dr. Sheftick: As I study the theory of Marxism-Leninism by reading many speeches, proclamations and statements made by Communist leaders throughout the world, and by reviewing the World Marxist Review, I have come to the understanding that it is the idealogy of Marxism and Leninism that gives them their power, their conviction and their determination of world conquest.

As I look to the United States and the Free World, there is no understanding of the motivation of this Marxist-Leninist principle by which Communist live, breathe and act upon. Therefore, it is not possible for the

Free World, for capitalism, for democracy, for humanity to live in coexistence with Communism.

Captain Manson: Dr. Sheftick, being the Devil's Advocate now, you know that on the Manion Forum we feel strongly as you do that Communism is evil, but what we need to do is go one step further and explain why. What is the problem?

Dr. Sheftick: Again, it is the attitude of the Communists, centering in this ideology. For example, let us examine a statement made in a Communist magazine on the Leninist course of foreign policy. This was sponsored by the Communist Party of the Soviet Union. They said, "The ideological struggle retains all of its sharpness and acquires even greater significance. Communists will never give up their ideas and principles. They have always struggled and in the future, will always struggle for worldwide triumph." This is the problem.

Captain Manson: It is the idea that they will never surrender the ideology. Is that it—the nub of it?

Dr. Sheftick: That is the nub of it. That is what is going on in the world and it is the motivation of the Soviet Union's foreign policy.

Unfortunately, in our government, those who lead our government, the Congress, I have yet to find those who understand that it is the ideology that is the problem. Since they don't understand the ideology and don't understand the firm belief and conviction that the leaders of the Communist world have in this ideology and in their struggle for world conquest, we will always react or act according to the Communist's desire rather than have a positive foreign policy based on our own initiatives and democratic principles.

Captain Manson: Your thought is then that there is no way that these two systems—capitalism and Communism—can coexist.

COEXISTANCE IS IMPOSSIBLE

Dr. Sheftick: There is no way. They tell us that. They leave us no choice. They say that it is impossible for capitalism and Communism to live side by side. Their theory, their ideology states this, and states it openly.

Since the beginning of Marxism, all Communist leaders, including Lenin, Stalin, Khrushchev, Mao, and even Castro, just 90 miles from our shores, tell us time and time again that it is inevitable that capitalism will be destroyed and that Communism will be the conqueror. I pray that our leaders would listen and understand the words. This is not just rhetoric from the Communist leaders. They truly believe it.

Captain Manson: I know that you are dedicating your life to trying to get across to the American people the very thing you are saying here. At this point in time, how would you say we are doing? Are we winning or losing?

Dr. Sheftick: Unfortunately, it is a sorrowful situation to see that our direction in the past year has worsened. Communism has advanced more and more. It is reaching out now even into our back yard in the Panama Canal situation.

Captain Manson: If I understand the present strategy of the Administration, particularly Zbigniew Brzezinski, his theory is that you can split off these various Communist parties from the mother party in Moscow, and that eventually they will dissipate and that they will converge or merge with other systems. I believe this is the theory they are working on. Is that correct?

Dr. Sheftick: Yes, in fact, I recently read in the Washington Post, of all papers, that we seem to have been getting a positive response from the Eastern European countries. They said we now have good relations with Poland, Hungary, Romania and all of the Captive Nations. There are just a few exceptions of hard core nations like Czechoslovakia and East Germany. They are hoping to increase trade and cultural exchanges with these other Captive Nations countries in order to woo them away from the international Communist Party movement.

This will never take place. Communist ideology says that this kind of thinking is false. It is on a pseudo foundation, it is a bad tactic for the West to use because it will never be able to woo these countries away from Communism and convert them to capitalism. The Communist is truly convinced of the truth, the historical value and significance of Marxist-Leninist principles. This is the difference.

Captain Manson: We have had a few cases in the United States where people have defected. I am sure you are familiar with some of them. Whittaker Chambers was one, as you will remember, and there have been others. Do you believe that these people really sometimes see the light and turn back to capitalism?

Dr. Sheftick: I think that it is possible for people to change their mind. But, again, we have to deal with the true ideologist, the true Communist, one who has lived under Communism and lives and breathes Leninism. There is a difference. I have never met a Communist who denies this. They always reiterate Marxism-Leninism, Marxism-Leninism.

Captain Manson: They do. They keep that going all the time.

Dr. Sheftick: Men who act as traitors or agents for Communist countries have been convinced that maybe capitalism isn't so good, so they move over and try to help a Communist nation. They oscillate back and forth. But this is not the true ideologist.

Captain Manson: Looking at the situation as you evaluate it at the moment, where is the front line, the battle line, between Communism and capitalism?

Dr. Sheftick: I would love to tell you because the American people must know where the line is. It is here in the United States. This country is determining the future destiny of all the nations in the world by its response, by its relationship to, and its method of relating to Communism. We are deciding the destinies of millions of people. The front line is here.

If we don't take a strong position against Communism, if we don't stand up and say that Communism is wrong, a wrong way of life, that Christian ideals and a God-centered way of life, is the best way for people to live by, to experience happiness and joy, then the destiny of other nations is weakened.

Captain Manson: Now, who is we? Are you talking about the President of the United States and the leaders in Congress? Is that who you regard as "we," or are you talking about all of us?

Dr. Sheftick: I'm talking about everyone, the leaders, the people. This war began in, I would say, in 1848 when Karl Marx issued the Communist Manifesto and asked the working people of the world to unite and to throw off the chains of capitalism. He called for all people to unite.

This is not just a national battle or race or societal battle, it is an individual battle for the mind of everyone. We must all confront Communism, recognize what it is, what it preaches, what it teaches, what its goals and purposes are, and fight against it.

Captain Manson: I know that you have a young son in your family. What sort of a world do you think he and children like him are going to live in, the way things are going?

KHRUSHCHEV'S PREDICTION

Dr. Sheftick: This is really a big question in the minds of parents. I was shocked several years back when Khrushchev visited our country and said that the American people should not be angry or fear the fact that their grandchildren would live under Communism or socialism. Khrushchev said that he pursued the process of detente, but without giving up Marxism and Leninism principles.

Every parent should ask themselves, what kind of world are my children going to live in? Is it going to be one which is dominated by Communism, one in which they will have to live under Atheistic principles that deny God, that deny the basic liberties and dignity that comes as a child of God?

Captain Manson: I suppose that it comes down to the fact that we have to ask ourselves, are we really a nation under God, or are we not? Is that what it comes down to?

Dr. Sheftick: Yes. I think that if our people would really look at the history of our nation, they would realize the very definite, special and close relationship that exists between God and America. In our Declaration of Independence, it states that all of our rights are guaranteed by God, are endowed by our Creator, and those are the rights of life, liberty and the pursuit of happiness.

Thomas Jefferson expressed this opinion at the time of the Revolutionary War when he said, "Can the liberties of a nation be secure when we have removed the conviction that these liberties are the gift of God? Indeed, I tremble for my country when I reflect that God is just and that his justice cannot sleep." So, we can see the very definite relationship and the feeling of the men who led the American Revolution, that they were motivated by God and felt a very definite, close relationship with God.

In our Pledge of Allegiance, we find that it states, "one nation under God, indivisible, with liberty and justice for all." On our currency is stamped, "In God We Trust."

Captain Manson: You know that the American Legion's motto is "God and Country." I suppose that if we didn't have God, we wouldn't have a country.

Dr. Sheftick: Exactly. I am so impressed by the Legion's motto. It even shows the priority, that God really should come first in our lives. If God does come first, then our country and our way of life will truly be a happy and joyful one.

Captain Manson: Speaking of God, do you think, do you see that there is any way that religions can coexist with Communism?

Dr. Sheftick: No. When we see the strategy of Communists, when they take over a country, when they first took over Russia, they abolished the Russian Orthodox Church. When Mao brought Communism to China, they outlawed Confucianism. In Viet Nam and Cambodia, Buddhism was outlawed. In Tibet, the Dalai Lama had to leave his people and escape into India because of religious persecution.

If we allow the Communists to take over America, you can be sure that they will wipe out Christianity as well as our way of life.

Captain Manson: Dr. Sheftick. I'd like to end this broadcast on an optimistic note. Do you see any way that we can have victory? Can capitalism have victory over Communism?

Dr. Sheftick: Yes, very definitely. The most important thing that we have to do is recognize what the problem is in the world and the problem facing our country. It is Communism. There is no doubt that it is the ideology of Communism.

We must teach our children, friends and associates that ideology is the motivating force behind the Communist movement. We must show the people of the world that Atheism is not the right way, and that the ideology of Communism is wrong, that there is a God and that a God-centered way of life is the right way and the best way.

Captain Manson: So, Communism is an attack on God. That is really what it is all about?

Dr. Sheftick: Too many of us haven't yet realized that Communism is the enemy of man and, most importantly, it is the enemy of God.

Captain Manson: Thank you very much, Dr. Joseph Sheftick, for coming to the Manion Forum. I'm sure that you had an ap-

preciative group here just like you did before the American Legion gathering.

Dean Manion: Thank you, Captain Manson, for bringing us this timely and appropriate message from Dr. Sheftick. And thank you, Doctor, for your continuing fight for God and country, by spreading the truth about the Atheistic evil of Communism.

[From the China Post, July 24, 1978]

RALLY CLIMAXES CAPTIVE NATIONS WEEK

Songs and dances filled the air at the Taipei Municipal Stadium last week as the 1978 Captive Nations Week activities climaxed in an evening rally the theme of "Strive in Unity."

Some 50,000 people from all walks of life packed the stadium waving the flags of the World Anti-Communist League, cheering, and applauding while distinguished guests gave their speeches and students demonstrating their performances.

The evening rally was opened with an address by Dr. Ku Cheng-kang, honorary chairman of the World Anti-Communist League, after a song entitled "To the Memory of President Chiang Kai-shek" was sung.

Distinguished guests included U.S. Representative Delwin Clawson, John Ashbrook, chairman of National Center of Independents and Framers of France Bertrand Motte, and Vice President of the Supreme Court of the Ivory Coast Georges Creppy also gave speeches at the rally.

In his address, Dr. Ku urged unity, will power and strength among all Chinese to oppose Communism and slavery to overthrow the Communist tyranny and recover the mainland of China.

"Push the human rights campaign behind the Chinese mainland's Iron Curtain and save all the 800 million compatriots," Dr. Ku said.

"To bring about an early victory of our struggle against slavery," Dr. Ku said, "We must smash Peiping's international united front schemes, and stop Washington's move towards 'normalization' with the Chinese Communists."

He added Washington's "China card playing" will harm the free world and produce serious consequences.

The evening performance started with the release of thousands of balloons in red, yellow, blue and green colors into the sky.

The programs included a horse riding demonstration, dragon and lions dances, and gymnastic and other performances by associations and middle and primary school students.

The performance ended with a fireworks display.

Chiang Cheng-tao, a freedom fighter, and world renowned singer Dalia Kucenas from the United States also sang at the evening rally.

The evening rally also adopted messages to U.S. President Carter, U.S. Senators and Representatives and the U.S. National Conference of State Legislators.

U.S. Representative Delwin M. Clawson: He noted at the evening rally that "The right of each individual to make his own decisions from among many alternatives should be available to all mankind."

He pointed out that Communism cannot allow men to think freely, nor can it exist where men are free to choose an individual and independent way of life.

U.S. Representative John M. Ashbrook: Congressman Ashbrook told the rally that the majority of the American people is on the side of the Republic of China and its people. He said we have to win the freedom not only for ourselves but also for future generations.

Every people loves their country, their home and longs for liberty, he added.

Bertrand Motte, Chairman of the National Center of Independents and Farmers of France: Motte noted that the Republic of China is a model for free countries, and has an astonishing economic growth and progress under it free system.

He said the achievement of the Republic of China bring hope to the free world, and human rights and dignity should not be given up.

Georges Creppy, Vice President of Supreme Court of Ivory Coast: The final victory will be on the side of the free world in its war with the Communism, Creppy noted.

'Down the Communism, down the Communism." he called to people at the rally.

He said glory belongs to the people and the government of the Republic of China.

FREE WORLD ASKED TO HELP AFRICAN COUNTRIES RESIST COMMUNISM

Georges Creppy, vice president of the Supreme Court of the Ivory Coast urged the Free World yesterday to give the African countries a helping hand to ensure their security, as violence and wars are going on in the continent, brought about by the moves of Communist China and the Soviet Union.

He said that he was worried about the future of Africa when commenting on the expansion of Communist power in the region.

In a press conference participated in by five distinguished guests at the 1978 Captive Nations Week, Georges Creppy said the problems facing the African countries today concerned with security and ignorance of the true face of Communism.

He pointed out that some people have a wrong idea in thinking that Africa is an undeveloped land where any system can be adapted.

U.S. Representative John Ashbrook told the press that the upcoming visit to mainland of China by Ronald Reagan has nothing to do with politics.

Nor in his opinion does it mean any change in Reagan's support for the Republic of China.

Congressman Ashbrook, however, noted that several mass-circulation liberal newspapers and weekly magazines are influenced by the propaganda of Communist China.

"People cannot avoid making mistakes. The same is true of countries, including the United States", said the U.S. Congressman.

Bertrand Motte, chairman of the National Center of Independents and Farmers of France said in the press conference that Communist parties in Europe are still in a minority.

He considered it is impossible that Communist parties in France, Italy and Spain will become dominate in their countries.

He also pointed out that the Communist party in Italy has brought violence, robbery, kidnaping and killing to the country.

Willy Patocchi, counselor of the Uruguay State Council, warned that the Communists have stepped up their penetration into South American countries recently.

He said democracy is the best system, but it should be carried out in various forms to fit in with various backgrounds and the character of various nations.

CAPTIVE NATIONS WEEK RALLY CABLES CARTER

U.S. President Carter was told yesterday that the human rights campaign and efforts to set the captive people free are inseparably related, in a message sent by the 1978 Republic of China Captive Nations Week "Strive in Unity" evening rally. The message read "Because of the Communist trampling on human rights, peoples behind the Iron Curtain of East and West, particularly those on the Chinese mainland, are harshly treated in chains."

It stated that diplomatic recognition of such a regime (Communist China) would amount to an open statement that the Chinese Communists can continue their enslavement of the 800 million innocent individuals.

TO U.S. SENATORS

In its message to U.S. Senators and Representatives, it said "We furthermore request all Americans to see that if the U.S. and the Republic of China stick together, both will benefit; if they are separated, both will suffer. We therefore sincerely hope that the U.S. will abide by her treaty obligations and defense commitments for the ROC so as to safeguard the common security of the entire Asian-Pacific region."

In the message to the U.S. National Conference of State Legislators, it said, "We, the rally participants, ardently hope that all of you will continue to uphold your righteous stand and make the public exert its influence so that Mr. Carter and the Congress will resolutely decide to maintain America's alliance and mutual defense relations with the Republic of China, reject all Chinese Communist offers, review the U.S. policy towards Peiping." ●

PRESS PROTECTION ACT OF 1978

HON. JOHN B. ANDERSON

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. ANDERSON of Illinois. Mr. Speaker, in my judgment, the recent Stanford Daily decision by the Supreme Court threatens a fundamental tenet of our democracy—that of a free press. The 5-to-3 decision exposed news offices to surprise police searches for and seizures of evidence that might be related to a crime in which neither the newspaper nor any of its employees were involved. This ruling effectively upholds the use of search warrants which may be obtained if a law enforcement official can show probable cause that a group or individual may possess evidence of a crime. Thus, the Court's ruling encourages surprise searches of news offices, allowing officers to go through file after file until they come across the object of their search.

As expected, reaction from newspaper editors and professional organizations has been bitter, and their disapproval has been unanimous. Gene Cryer, executive editor of the Rockford Newspapers in my hometown of Rockford, Ill., noted:

> * * * the Court has given police agencies a fishing license to inspect confidential files without providing the possessor of those records the opportunity to object in a court of law.

Attorneys for the Stanford Daily argued that free speech considerations justified an exception to the Court's construction of the fourth amendment search and seizure clause, but the Court rejected this reasoning. In essence, the Court said that the first amendment does not exempt the press from unannounced third-party searches.

Mr. Justice Stewart disagreed with the majority and in his dissent he wrote:

> Perhaps as a matter of abstract policy a newspaper office should receive no more protection from unannounced police searches than, say, the office of a doctor or the office of a bank. But we are here to uphold the Constitution. And our Constitution does not explicity protect the practice of medicine or the business of banking from all abridgement by government. It does explicity protect the freedom of the press.

I agree with Mr. Justice Stewart and was deeply distressed by the majority's decision. The Court's holding reflects an almost callous indifference to the unique protections afforded the press in the first amendment. Apparently the Court believes that if the framers of the fourth amendment had wanted to give special protection to the press, they would have incorporated those protections into the fourth amendment.

Furthermore, the Court naively tossed aside cogent apprehensions concerning the possible abuses of the search warrant procedure. Keep in mind that a law officer does not have to convince the court that a newspaper's officials or employees are involved in a crime. Nor must the police give prior notice that they will be searching news offices. Under these circumstances, the potential for abuse is almost limitless. One might wonder whether Americans might ever have read the Pentagon papers if this ruling had been in effect earlier this decade.

Fortunately, the majority decision expressly invited legislative relief, and for this reason, I am today introducing legislation designed to protect the press from these unreasonable searches.

Specifically, my bill would prevent any person acting under color of law from conducting any search or seizure of the premises of persons engaged in the gathering or dissemination of news, without an adversary court proceeding. Such a proceeding would give news operations the opportunity to contest the search and seizure of its documents, files and other materials.

My bill provides an exception to the requirement of an adversary court proceeding prior to the search. This exemption requires law enforcement officials to show probable cause that a newspaper's officials or employees have committed or are committing a criminal offense. In such cases, the police would be required to meet the strict standards set up by the Court in interpreting the fourth amendment.

Additionally, the bill provides civil and criminal remedies for violating its proscriptions. Any person affected by an unlawful search or seizure pursuant to the prohibitions of the bill could sue in State or Federal court to obtain damages or injunctive relief. The court is further authorized to award appropriate relief including punitive damages up to $10,000 per willful violation.

The bill would also permit the court to award reasonable attorney fees to the prevailing party other than the United States. Similar provisions exist in the Civil Rights Act of 1964, and other laws, and under these statutes, the prevailing plaintiff ordinarily would recover its attorney fees unless special circumstances rendered the award unjust.

Finally, the bill provides a criminal sanction in addition to civil remedies. Any person acting under color of law who willfully violates the bill's proscriptions could be prosecuted and fined up to $10,000.

Mr. Speaker, many of our colleagues have displayed their strong support for some type of remedial legislation. All of the bills which have been introduced as a result of the Stanford Daily decision address the situation but vary in their scope and approach. Today, I am adding my voice to this ever-expanding body, and while I realize it may be too late in this Congress to consider such legislation, it is my sincere hope that action can be taken as early as possible in the 96th Congress.

At this point, I would like to insert a copy of the bill in the RECORD.

H.R. 12952

A bill to secure and protect the freedom of the press from unwarranted intrusions by persons acting under color of law.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Press Protection Act of 1978".

SEC. 2. Notwithstanding any other provision of law or any rule or other authority to the contrary, it shall be unlawful for any person acting under color of law, without a prior adversary court proceeding, to search any place or seize any things in the possession, custody, or control of any person engaged in the gathering or dissemination of news for the print or broadcast media unless such search or seizure is conducted pursuant to a warrant issued by a court upon probable cause that such person has committed or is committing a criminal offense.

SEC. 3. (a) Any person aggrieved by a violation of this Act may commence a civil action in an appropriate United States district court or State court at any time not later than three years after the alleged violation occurred or terminated, or one year after the discovery of such alleged violation, whichever is later.

(b) In any civil action under this section, the court, if it finds a violation of this Act, shall award such relief as may be appropriate, including general damages, equitable or declaratory relief, and punitive damages not to exceed $10,000 for each willful violation.

(c) In any civil action under this section, the court, in its discretion, may allow the prevailing party (other than the United States, or an agency, officer, or employee thereof) reasonable attorney fees as part of the costs, and the United States (and any agency, officer, or employee thereof) shall be liable for such costs.

SEC. 4. Any person acting under color of law who willfully violates this Act shall be fined not more than $10,000.●

HOW TO REDUCE JET NOISE COMPARATIVELY PAINLESSLY

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, August 17, 1978

● Mr. ANDERSON of California. Lately there have appeared some articles in Washington area newspapers which, using distorted logic and incomplete facts, have attacked legislation currently pending which will effectively and efficiently reduce jet aircraft noise which presently batters those living in the vicinity of our airports, both large and small.

However, there have been some newspapers which have printed editorials correctly stating the purpose of the bill and how it will reduce noise at no cost to the general taxpayer and at only very little additional cost to some users of commercial air transportation on international flights. One such newspaper is the Independent Press-Telegram published in Long Beach, Calif. It is with pleasure that I share with those of you who do not subscribe to this fine paper their editorial of Sunday, August 13, which is as follows:

HOW TO REDUCE JET NOISE COMPARATIVELY PAINLESSLY

As residents around Long Beach Airport, Orange County Airport and many other fields well know, aircraft noise continues to be a major problem in the jet age.

To overcome this problem, the Federal Aviation Administration has adopted anti-noise standards and has ruled that no person shall operate an aircraft in the United States after 1984 that does not meet these standards.

In the case of the airlines, the ruling applies, retroactively, to aircraft such as the Boeing 707 and 727 and the Douglas DC-8 and early DC-9, which were approved by the federal government for noise standards when first purchased.

Airlines have three options with such aircraft: to add soundproofing material to present engines, to replace the old engines with engines that meet the new standards, or to purchase new aircraft which meet the standards.

Such action will be required on nearly 1,600 aircraft, about two-thirds of the operating fleets, and the industry estimates it will cost about $8 billion to bring them into conformity.

Two measures to help bring about this noise reduction—H.R. 8729, the Airport and Aircraft Noise Reduction Act, and H.R. 11986, the Noisy Aircraft Revenue Credit Act—are now before the House of Representatives, and may come up for discussion this week. Both should be approved.

Basically, the bills would do two things: provide funds for airports to acquire land for buffer zones between the field and adjacent residential property, and provide funds through a 2 percent excise tax on the users of air transportation to help airlines retrofit, reengine or replace aircraft to meet noise limitations.

At present, the federal government imposes an 8 percent passenger ticket tax and a 5 percent freight waybill tax. Revenue from both goes into the Airport and Airways Development Program fund, which helps airports install safety features such as lighting and radar, or lengthen runways.

The fund currently has a $3 billion surplus. Consequently, sponsors of the legislation, including Rep. Glenn Anderson, D-Long Beach/Harbor City, propose to reduce the tax on the passenger ticket to 6 percent and on the freight waybill to 3 percent and then add a 2 percent excise tax to each to build up a fund within the Treasury Department to finance the noise-abatement work.

Airlines could draw only on money their service had generated, and then only within certain limits. Purchase of a new aircraft which meets noise limit standards, for example, would be eligible for 25 to 40 percent reimbursement, less the value of the aircraft replaced.

Because the 2 percent excise tax would be taken from revenue now going into the special Airport and Airways Development fund, there would be no increase in cost to the general taxpayer. There would be no cost to the airline customer because the tax on passenger tickets and freight waybills would be reduced in proportion.

Passage of the two bills also would stimulate aerospace industry employment. Anderson estimated replacement of the 707s and DC-8s alone would directly create 23,000 new jobs and at least another 22,000 indirect jobs.

But most important, it will make feasible a comparatively rapid replacement of noisy jet aircraft with planes which meet federal anti-noise standards—to the relief and well-being of those who live near airports.●

SENATE—*Monday, August 21, 1978*

(Legislative day of Wednesday, May 17, 1978)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. KANEASTER HODGES, JR., a Senator from the State of Arkansas.

PRAYER

The Reverend Dr. Robert B. Harriman, director, the Presbyterian council for Chaplains and Military Personnel, Washington, D.C., offered the following prayer:

Heavenly Father, we thank Thee for continuingly raising up from among the people those who have dedicated themselves within the halls of government. We pray now for those who serve within this Senate. Grant wisdom to discern Thy will so that they may be wise in all their judgments. Open eyes and minds to see and comprehend that which is right. Grant health and energy for arduous tasks and long hours of deliberation. Give patience and thoroughness in efforts to understand the complex and difficult. Deliver them from words or action which would foster prejudice or encourage division. May desire for the Nation's welfare surpass any self-seeking or narrow-visioned concern for a privileged few. Let no deception destroy trust, but rather may honesty firmly establish confidence. When we are right, keep us from gloating pride. When we are wrong, may our admission be followed by correction.

We pray for all entrusted with the guidance and welfare of the Nation. May those engaged in creating, administering, and judging our laws be so led by Thy wisdom that they shall faithfully lead the people in ways of righteousness and peace. Through Jesus Christ our Lord. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 21, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable KANEASTER HODGES, JR., a Senator from the State of Arkansas, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. HODGES thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader, the Senator from West Virginia, is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection it is so ordered.

THE ARGUMENTS AGAINST A DEEP TAX CUT NOW

Mr. ROBERT C. BYRD. Mr. President, the serious problems that could befall the American economy if a very deep tax cut were enacted in fiscal year 1979 were examined in an article by Seymour Zucker which appeared in the August 7, 1978 issue of Business Week. The author provides data suggesting that a tax cut over the next 3 years on the order of $124 billion would not pay for itself through increasing the tax base. To the contrary: The deficit would soar to $100 billion by 1983, according to one study cited by Mr. Zucker. At the same time, the rate of inflation would be almost 2 percentage points higher with such a cut by 1982. The weight of the economic evidence is against a very deep tax cut at this moment in our economic recovery.

Mr. President, I ask unanimous consent that the article, "The Fallacy of Slashing Taxes Without Cutting Spending," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE FALLACY OF SLASHING TAXES WITHOUT CUTTING SPENDING

(By Seymour Zucker)

Arthur B. Laffer first drew the curve on a napkin in a Washington restaurant back in 1974. It popped into his head as he was trying to persuade an aide of former President Ford that U.S. tax rates were so high that they were stifling economic growth. Lower tax rates, he maintained, would send employment and investment soaring to the point where tax revenues would actually rise, despite the lower rates. Laffer has been preaching that gospel ever since. And the Laffer curve—which purports to show the perverse effects of a high tax rate on government revenues—is being advanced as the economic rationale for the Kemp-Roth bill, the biggest tax-cut proposal in history.

Riding in the wake of Proposition 13, which cut California property taxes by 60%, Kemp-Roth is picking up strong support, especially among congressional Republicans. No one expects it to pass this year, but it stands a good chance of becoming the key domestic issue in the Republican congressional campaign in November and could also play a role in the Presidential election in 1980. The bill, introduced by Representative Jack Kemp (R.-N.Y.) and Senator William V. Roth Jr. (R.-Del.), would reduce everyone's taxes over the next three years by one-third, thus costing about $124 billion in tax revenues. Its sponsors are pushing the Laffer argument that the tax cut will generate an economic boom of such proportions that in a few years the government will recoup all the initial revenue loss and then some. The reason: The huge tax cut will spark the incentive to work and invest, thus increasing the tax base. The effect is to shrink the deficit without cutting government spending by as much as a nickel.

Elementary. Laffer may have sold some politicians, but not his fellow economists. The economics profession—including some leading Republican economists who support Kemp-Roth—think Laffer would have done well to leave the napkin behind for the waiter to dispose of. They see huge deficits and a rip-roaring inflation if Kemp-Roth is enacted without offsetting cuts into expenditures. To Harvard's Martin Feldstein, the theoretical principal that at some point reducing rates actually increases tax revenues "is something we teach in the first week of the course in public finance." The critical empirical question is to determine when the tax schedule gets into that range, he notes.

"The Laffer curve is more or less a tautology," says conservative economist George J. Stigler of the University of Chicago, where Laffer taught before going to the University of Southern California in 1976. "It has to be right at some level. If enterprise is not discouraged at 95%, then move it to 105% and Laffer would be right by definition." But in Stigler's view, Laffer has failed to show that the current tax structure—where the highest rate on earned income is 50%—has such an adverse effect on incentives that reducing rates would actually increase revenue. "Laffer is no longer a very serious scholar," says Stigler. "He is playing the role of a propagandist, and as such he is performing some service. But I would not base a $125 billion tax cut on his work."

Feldstein and Stigler are not alone in their criticism of Laffer. Alan Greenspan, chairman of the Council of Economic Advisers under President Ford, favors Kemp-Roth—with some changes—because he holds that the only way to cut the growth of government spending is to cut taxes. So he says: "I'm for cutting taxes, but not for Laffer's reasons. I don't know anyone who seriously believes his argument."

Just how far off base is Laffer on the tax-revenue effects of Kemp-Roth? Otto Eckstein, president of Data Resources Inc., has run the Kemp-Roth proposal through DRI's huge computer forecasting model. Assuming that it takes effect in 1979 and that there are no compensatory spending cuts, the DRI model shows that the deficit will grow progressively worse. By 1983, the red ink in the budget—including additional interest payments—will increase to a mind-numbing $100 billion. So rather than recouping the entire tax cut, as Laffer argues, DRI finds that the Treasury gets only about $25 billion of it.

OVERWHELMING EVIDENCE

To be sure, economists agree that a tax cut would increase total demand and national income and thus partly offset the initial revenue loss. But to offset the effect of lower tax rates fully, total income would have to rise by some four times the original amount of the cut. And the evidence is overwhelming that no cut in taxes could generate a rise in spending and income of that size. A $10 billion tax cut, for example, produces roughly an extra $15 billion of gross national product. The current marginal tax rate against total GNP works out to 25%, so the $15 billion creates $3.75 billion in new taxes—thus recovering barely a third of the initial

$10 billion. And under Kemp-Roth, which would cut into the marginal rate itself, the outcome would be worse.

Laffer argues that this kind of calculation greatly underestimates the stimulative effect of the tax cut, because it ignores the impact of the cut on the incentives to work and save. This incentive effect unleashes a sharp increase on the supply side because more people are willing to work, save, and invest. But virtually no one else sees the magic. For example, Herbert Stein, CEA chairman under President Nixon, claims there is no evidence that the supply responses are anywhere near the magnitude necessary to prevent revenues from falling.

Stein's analysis stands in stark contrast to the Laffer contention that the tax revenues will flow back within a few short years. Using the most favorable assumptions about the response of workers and savers to the lower tax rates, he concludes that it would take "about 30 years to regain the revenue level that would have been achieved without the tax cut."

RUNAWAY INFLATION

Laffer also maintains that Kemp-Roth not only will increase real output but should actually have a dampening effect on inflation. "Excessive money growth has long been recognized as a cause of inflation. It is equally true, however, that too few goods will also cause prices to rise." So as the economy booms, more goods will be produced, and this he believes, will result in lower prices.

To be sure, Laffer is correct that Kemp-Roth would increase real output—at least in the short run. Eckstein's model shows that the economy in a few years would be booming, with unemployment falling below 5%. But inflation would be on the march. By 1982, for example, the rate of inflation would be almost 2 percentage points higher than without the cut, he calculates. And even this scenario may be overly optimistic. Econometric models have been notorious for underestimating inflation. More important, the model assumes that monetary policy is neutral even in the face of accelerating inflation. But as the deficit soars and inflation really gets rolling, the monetary authorities will have no choice but to tighten the monetary vise. And that means that capital spending and housing get clobbered, and the economy goes tailspinning into recession. So even the spurt in real growth generated by Kemp-Roth may be short-lived.

Laffer and other proponents of Kemp-Roth point to the Kennedy tax cuts of 1962 and 1964 as examples of how sharp reductions in tax rates can generate sustained bursts of economic growth. But their claims have been dismissed as wildly excessive by none other than Walter W. Heller, CEA chairman under Kennedy and Johnson. Heller fought hard for the Kennedy tax cuts, and he would dearly love to take credit for engineering the above-average economic growth that took place between 1962 and 1967. The beneficial effects of those cuts—about $12 billion, or $36 billion in today's prices—were on the demand side, not on the supply side, he holds. The key difference between the early 1960's and now is that the current inflation rate hovers near the double-digit level, compared with about 1.5% then. A tax cut—even one of only $36 billion—carries with it the danger of fueling an inflation from which the nation will take years to recover.

ENERGY ACCOMPLISHMENTS

Mr. ROBERT C. BYRD. Mr. President, less than 5 years ago the OPEC cartel imposed an oil embargo on our country. Although the serious shortage of oil we experienced ended after 5 months, the energy problems highlighted by the embargo have endured. The OPEC action told the American people in no uncertain terms that our national security as well as our energy supplies could be threatened.

Since the beginning of this decade the Congress has worked to establish a practical energy policy. We have addressed the issue in a methodical manner. Step-by-step, congressional efforts have produced many important laws to contend with the energy problem.

The 95th Congress was not yet a month old on February 2d when it passed the Emergency Natural Gas Act of 1977 (Public Law 95-2). That law gave the President authority to allocate certain natural gas supplies to help alleviate the shortage which occurred during that fearsome winter.

On March 1, 1977, President Carter transmitted to the Congress a proposal for the creation of a Department of Energy. By August, the legislation was on his desk. Congress made clear its intention that the Department would serve as the central instrument through which energy policy would be implemented. Due to the size of the Department itself and the complexity of energy issues, this is a difficult task. Yet it is an absolutely vital job which cannot be shunned.

There has been a great deal of action in the Congress on other energy-related legislation. It is clear from the titles of many of these bills that they address the energy problem directly. But there are other pieces of legislation, such as the Housing Amendments of 1978, which contain energy-related programs of great importance.

I believe these significant pieces of legislation should be recognized.

I, therefore, ask unanimous consent that a list of energy-related legislation that has been enacted by the 95th Congress or is in conference or has passed the Senate, although not having passed the House, be printed in the RECORD.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

ENERGY MEASURES—95TH CONGRESS

ENACTED

Alcan Pipeline (H.J. Res. 621, P.L. 95-158).
Clean Air (H.R. 6161, P.L. 95-95).
Deepwater Ports Extension (H.R. 6401, P.L. 95-36).
Department of Energy (S. 826, P.L. 95-91).
ERDA Nonnuclear Authorization, 1977 (S. 36, P.L. 95-39).
ERDA Nuclear Authorization (S. 1339, P.L. 95-183).
ERDA Nuclear/Nonnuclear Authorization—Civilian (S. 1340, P.L. 95-238).
Export Control—Arab Boycott (H.R. 5840, P.L. 95-52).
FEA Authorization (S. 1468, P.L. 95-70).
Mine Safety (S. 717, P.L. 95-164).
Natural Gas Emergency (S. 474, P.L. 95-2).
Petroleum Marketing Practices (H.R. 130, P.L. 95-297).
Public Works—Energy Research Appropriation (H.R. 7553, P.L. 95-96).
Radiation Exposure (S. 266, P.L. 95-236).
Small Business Energy Loans (H.R. 11713, P.L. 95-315).
Strategic Petroleum Reserve Plan No. 1 (S. Res. 429-S, agreed to disapprove resolution).
Stripmining (H.R. 2, P.L. 95-87).
Stripmining Program Authorization (S. 2463, P.L. 95-343).
Urgent Power Supplemental Appropriation (H.J. Res. 227, P.L. 95-3).
Nuclear Nonproliferation Act (H.R. 8638, P.L. 95-242).
Emergency Agricultural Act (H.R. 6782, P.L. 95-279)—Gasohol program.

IN CONFERENCE

Coal Conversion (H.R. 5146-S, agreed to July 18, 1978).
Energy Conservation (H.R. 5037).
Energy Taxation (H.R. 5263).
Military Construction Authorization, 1979 (H.R. 12602—Conf. rep. filed).
Natural Gas Pricing (H.R. 5289).
Outer Continental Shelf (S. 9—Conf. rep. filed).
Public Utility Rate Reform (H.R. 4018).
Public Works Energy Research Appropriations, 1979 (H.R. 12928—Conf. rep. filed).
H.U.D. Authorization (S. 3084)—Solar and home insulation programs.
Agriculture Appropriations (H.R. 13125)—Energy conservation programs.
Water Resource Projects—Waterway User Fee—Fuel Use Taxes.
International Development Assistance (H.R. 12222)—Bilateral assistance for energy resource development.
Military Construction Authorization—solar, geothermal, and utilities systems programs.
Interior Appropriation (H.R. 12932)—Energy production, supply, and regulation programs.
Energy and Water Development (Public Works) (H.R. 12928)—Energy research project.

PASSED SENATE, NOT HOUSE

Alaska Pipeline Destruction (S. 1496).
Educational Institution Energy Savings Grants (S. 701—Provisions are now in energy conservation bill).
ERDA Nuclear Authorization—Civilian/Military (S. 1341).
ERDA Synthetic Fuel Loan Guarantee Program (S. 37).
Natural Gas Pipeline Safety (S. 1895).
Oil Shale Commercialization (S. 419).
Pipeline Destruction (S. 1502).
Rate Discrimination (S. 2249).
Endangered Species (S. 2899)—Possible exemptions for certain energy supply projects.

INSPIRATIONAL PORTRAITS

Mr. ROBERT C. BYRD. Mr. President, a portrait of one of our greatest Presidents, Abraham Lincoln, hangs in the Senators' dining room. President Lincoln has achieved a worldwide esteem in the generations since his death. His memory is universally admired. Thus, it is appropriate that his portrait is hanging in the Senators' dining room.

Since Abraham Lincoln was the first Republican President, I know our Republican colleagues take special pride in the presence of his portrait in our dining room. However, an American of Mr. Lincoln's caliber transcends all party labels ultimately. His portrait is a genuine inspiration to all Members of the Senate.

Mr. President, it is appropriate to place the portrait of a Democratic President in the Senators' dining room, as well. He should be, like President Lincoln, a man admired by the members of both parties, who has significantly influenced national and international events through his courageous actions and decisions.

Such a man was President Harry S. Truman. In the few short years since his death, President Truman's renown and prestige have grown enormously. Among

Democrats and Republicans alike, his sagacity, character, decisiveness, and ability have received increasing recognition and acclaim. Abroad, our friends and allies give credit to President Truman for halting the post-World War II advance of communism in Europe that threatened to engulf the entire continent if unchecked; moreover, President Truman's policies helped to restore economic and political health and stability to the war-shattered nations of the non-Communist world. Harry S. Truman is a man in whom all Americans can take pride. In addition, he is a man in whom Senators can take special pride, for he served with notable distinction in the Senate, before becoming Vice President and President of the United States.

Mr. President, a portrait of President Truman will be placed in the Senators' dining room as a source of inspiration and challenge to the members of both of our great and historic political parties represented in the Senate.

ORDER OF BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I have no further need for my time. I ask if the Senator from Wisconsin would like some of it.

Mr. PROXMIRE. I would like it, but I have 15 minutes under an order.

Mr. ROBERT C. BYRD. Would the Senator like my remaining time, also?

Mr. PROXMIRE. I would, if the Senator would like to give it to me.

Mr. ROBERT C. BYRD. Mr. President, how much time do I have left?

The ACTING PRESIDENT pro tempore. Six minutes.

Mr. ROBERT C. BYRD. I yield it to the Senator from Wisconsin if he wishes to use it.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I use my time only long enough to say I have no use for my time and no request for time under the standing order. I ask the Senator from Wisconsin if he would like some of it.

Mr. PROXMIRE. I think I shall have enough with that of the majority leader. I thank the distinguished minority leader.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Wisconsin is recognized for not to exceed 15 minutes in his own right. He has additional time if needed.

INFLATION—AN UNPRECEDENTED PEACE-TIME PROBLEM—WHY WE SHOULD CUT $25 BILLION FROM THE PRESIDENT'S BUDGET

Mr. PROXMIRE. Mr. President, I rise today to address the Nation's No. 1 problem; namely, rampaging inflation. Somehow, Congress has not gotten the message. We are following policies, especially spending policies, that aggravate inflation. We are doing almost nothing to reduce inflation. And it is our primary, fundamental, elementary, crucial problem.

THE PROBLEM

Inflation is having a devastating effect.

Millions of Americans with fixed incomes or relatively fixed incomes are unable to cope with their economic problems. Their costs for food, shelter, heat, light, clothing, and transportation are going up and have been going up faster than the rise in their incomes. They are therefore suffering from a decline in their living standards in real terms.

Young people are unable to afford to buy a house and must postpone having a family.

Two or more people in many families are now at work just to make ends meet.

Elderly persons are in dire straits as they have to make their fixed incomes cover large costs and thus must either use up their savings, borrow from their children, or get aid from welfare or public sources. To many who have worked hard and have been self-sufficient, this is a demeaning state of affairs. Here they are, at the end of a productive and self-sufficient life, now thrown on welfare or required to borrow when, under ordinary circumstances, the plans they have made and the estates they have built would carry them through in a self-respecting way.

We are seeing the collapse of the dollar abroad, due almost entirely to the doubts raised by our inability to combat inflation.

And what is the Government doing about inflation? Consider: In the past year or the past year and a half, we have seen an explosion of jobs and employment. So, is the Federal Government restraining spending, running a surplus, to stem inflation? No, it is deeply in the red, with a deficit this year in the neighborhood of $50 billion. To those who believe in countercyclical economic policies, this is a great blow to both theory and belief. Many have justified government deficits in times of recession and depression on grounds that we should and would run surpluses in periods of relative prosperity and recovery. But we are now finding that in periods of recovery and high levels of employment the deficits are unprecedented in the history of the country.

John Maynard Keynes, if he walked on the floor, the person some people have blamed for the spending in the thirties and forties, would be aghast at what this Congress is doing. He would not believe it. Here we are, following a policy of big deficits at a time when unemployment is dropping sharply and inflation is worsening.

Men and women employed in our stores, factories, and mines, who ordinarily would be willing to limit their demands for wages and conditions to reasonable levels, are finding that, merely to make up for the inflation of the past, let alone to get an increase in real income, they must make demands which appear to be excessive but which in fact fall short of keeping pace with their costs.

HISTORICAL FIRST

Furthermore, this is an unprecedented situation in the peacetime history of our country. From the Bureau of Labor Statistics and the Joint Economic Committee I have gathered the facts on the rise in consumer prices in our modern history, namely since 1850 or for almost 130 years. It shows nothing like the increase of 100 percent during this 10-year period if it continues at its present rate.

Here is what it shows by decades: in the 1850's, consumer prices rose by a total of 10.6 percent, or slightly more than 1 percent a year.

During the 1860's, a wartime decade, the Civil War, the bloodiest decade in our history, they went up by 47 percent or an average of 4.7 percent a year. Almost all of it was in the period 1862 to 1865. In the last half of that decade, prices actually dropped by over 15 percent, or 3 percent a year.

What did prices do in the 1870's? Did they rise?

In the 1870's, prices dropped 25 percent or 2.5 percent a year.

And in the 1880's, did they rise?

In the 1880's, and the 1890's, prices were down by 3 percent in each decade.

From 1900 to 1910 they rose by 33 percent, or an average of 3.3 percent a year.

During World War I a tremendous war, one of the biggest in our history, they rose 100 percent, but the big push was in the war years and immediate postwar years from 1916 to 1920.

And in the 1920's?

From 1920 to 1930 the year by year declines outpaced the increases by 20 percent.

And in the 1930's?

The decade of the 1930's showed an 18-percent decrease, admittedly the period of the Great Depression offset only by some rises at the end of the decade.

The World War II decade showed a 7.3 percent annual increase, or an average equal to the inflation which we face in peacetime today. This, of course, was at a time when we were pouring as much as 50 percent of our GNP into our war effort, so, of course it was inflationary.

In the 1950's, even with the Korean war, we suffered only a 20-percent increase or an average of 2 percent a year. Today that would be considered a form of heavenly reprieve.

In the 1960's, with Vietnam, there was a 32 percent rise or 3.2 percent per year.

But thus far in the 1970's, we have seen price rises of 58 percent or 8 percent per year.

In summary, we are a country which historically has been a relatively stable price level which, year in and year out, decade by decade, has risen little more than the average statistical margin of error.

Yet this year and in this decade, we are seeing peacetime inflation rates in

excess of those we have faced historically in wartime.

That is the magnitude of the problem.

Mr. President, I might point out that it is getting worse because even our top policy advisers in the administration cannot seem to get a grip on it. In January of this year the Secretary of the Treasury predicted 1978 inflation, 6.1 percent. In July he readjusted it to 7.2 percent. In August, only a week ago, he said it would be 8 percent for this year. Every month, the Secretary of the Treasury has given out a higher estimate of inflation.

NEED DRASTIC ACTION

Mr. President, I proposed that Congress, during its proceedings on the first budgetary resolution to reduce the ceiling on the President's budget by $25 billion.

That is the kind of dramatic and vigorous action which would send a message both to those here at home and abroad that we mean business on the anti-inflation front. We should still do it.

WHY IT IS NECESSARY

Such action is necessary and desirable for a number of reasons.

First, there is no other anti-inflation program in sight. Neither the President nor Congress, business or labor favor wage or price controls. They do not work. They are counterproductive. No one wants them. They are not going to happen.

Second, certain other alternatives are simply not adequate. The move to limit hospital and medical costs, even if started, would not solve the problem. It may be a good step, but it is very limited. An increase in both Government and private productivity is highly desirable but insufficient to stop inflation now. We should make Government more efficient, cut out excessive paperwork, and reduce regulation, but everyone knows that will take a very long time to achieve if it is achieved at all.

Some very able and public spirited and qualified persons are advocating a tax-based incomes policy or TIP under which employers and employees who forego wage and cost increases would be rewarded through the tax system. TIP, however, is complicated. There is yet no concensus supporting it, and it would take far longer both to pass and for its results to occur than the time we have. TIP is a last desperate act. It could be compared to the life jacket or log thrown to a man drowning at sea and surrounded by sharks. It is a frail answer but not to be downgraded at a time of desperation.

VALIANT INDIVIDUAL EFFORTS

Third, some very responsible persons here in Congress have made valiant efforts to deal with the inflation and budgetary problems. But the forces in favor of spending and increases are so overwhelming that they have been fortunate to hold their own.

I want to pay tribute to the Senator from Maine (Mr. MUSKIE) and the Senator from Oklahoma (Mr. BELLMON) who as chairman and ranking minority member of the Senate Budget Committee have not only held the line but reduced the budget level somewhat in face of overwhelming odds. Without them things would indeed be very much worse.

The Senator from Washington (Mr. MAGNUSON), as chairman of the Senate Appropriations Committee, has brought in a series of money bills whose totals are below the requests. That has not been easy.

The Senator from Delaware (Mr. ROTH) has stood on the Senate floor and proposed general cuts time after time in the face of the withering fire of other Senators who wish to preserve the present levels of spending or raise them.

And the Senator from Virginia (Mr. HARRY F. BYRD, JR.) has been our Horatius at the Bridge or the Dutch Boy with his finger in the dike as he has questioned bill after bill to determine if it is within the budget restraints. He has been the watch dog of the Senate on this issue.

In spite of all those efforts, and they are good efforts, and these Senators certainly deserve commendation, nevertheless, this is not the kind of vigorous, effective action to hold down the spending that we need.

We have done little more than to hold our own. It is now time to act and act decisively.

It may seem to be a cruel and callous thing to cut programs—for health, education, food stamps, and other worthy efforts. Some will think such actions lack understanding or are mean and base acts. That might be true except for the crisis we face over these unprecedented rises in prices. They must be brought to a stop. We must act. A $25 billion budget cut is the best way to do it.

WHY A $25 BILLION GENERAL CUT

It will be said, it is one thing to propose a general cut of $25 billion but another thing to be specific.

Let me answer that.

First, when we propose general cuts it is said we should cut the particular. When we propose particular cuts, those favorable to the program rise in its defense. One is criticized for doing it either way.

Second, a $25 billion cut in a $500 billion budget, while a dramatic cut which would send a message to the country, is still only a 5-percent cut. As one who has presided over the hearings for the budget requests of 40 or more departments and agencies of the Government, I do not believe there is a single one which could not be cut 5 percent and have a leaner, better, more efficient program.

Third, while I believe we should first set a ceiling of $475 billion and then force the various committees in Congress and the executive agencies to keep within the overall total, I am delighted to propose areas where cuts could be made. Here is a list as openers.

SPECIFIC LIST

Congress could start out by cutting back or cutting out the third Senate Office Building. We could also put a cap on our employees and actually reduce the number through attrition.

HOW TO SAVE $640 MILLION NOW—ABOLISH LEAA

Attorney General Bell's dramatic reversal of his earlier decision to work for the abolition of the Law Enforcement Assistance Administration (LEAA) dramatizes exactly why Federal spending is on a one-way escalator: up-up-up.

At a time when this administration cries out for some way to hold down spending increases, one of its top leaders throws in the sponge in his fight against what he himself has identified as a wasteful program that should be abolished. This is a great disappointment to me, and, I am sure, to the American taxpayer.

And at a time when the inflation rate is soaring into double digits, Mr. Bell suddenly favors pouring $825 million into the discredited LEAA program rather than saving $640 million through its abolition.

I refer, of course, to the Attorney General's flip-flop at last week's Senate hearing on the fate of LEAA. Instead of fighting to disband this spendthrift and sorry agency, Mr. Bell is caving in to those thousands of law enforcement officials who now have been hooked on the multi-million dollar Federal 'fix' and, rather than kick their wasteful habit, want to squander millions more of the taxpayers' money on LEAA's continued existence.

Last year, Attorney General Bell sent President Carter a memorandum, still not made public, recommending that LEAA be abolished. While not taking a position at that time on the other recommendations in the memo, I strongly urged the President to accept Mr. Bell's recommendation on the abolition of LEAA.

I have long advocated that LEAA be abolished. I was one of only two U.S. Senators to vote against LEAA's reauthorization in 1976.

Why? Because LEAA failed miserably to meet its responsibilities for reducing crime and improving the criminal justice system.

LEAA has spent over $6 billion since its inception in 1969. But over that same time span, according to the latest FBI statistics, the crime rate has increased an alarming 43 percent. Clearly, LEAA has been woefully ineffective in trying to solve the problem of crime and violence in America.

One example can illustrate LEAA's inept and wasteful approach to crime reduction. Earlier this year, I gave LEAA my "Golden Fleece" award for a $2 million prototype police car. Because its load of problems exceeded even its load of gadgets, plans for field testing the model car were halted. But this welcome relief came only after $2 million had been drained from the Federal Treasury to pay for this goldplated disaster.

Unfortunately, LEAA has done no bet-

ter in its efforts to improve the criminal justice system. Consider these facts:

State and local courts, with few exceptions, remain overloaded;

Jails and prisons remain run-down and overcrowded; and

Many legal procedures, including sentencing, probation, and parole, remain sorely in need of reform.

Again, one example can illustrate LEAA's ill-conceived and wild-spending approach to improvement of our criminal justice system. Last year, I gave LEAA another one of my "Golden Fleece" awards, this time for spending nearly $27,000 to determine why inmates want to escape from jail. Since it should be obvious to one and all why someone in jail would want to get out, this expenditure was, in my view, a flagrant waste of the taxpayers' money.

Finally, I should point out that the public's perception of the crime problem has worsened during the life of LEAA.

A Gallup poll earlier this year, for example, found that 20 years ago, less than 1 urban dweller in 20 mentioned crime as the city's most important problem, but today 2 in 10 cite crime as the most important problem, with the proportion rising to 4 in 10 in central city areas of the Nation's largest cities.

What all this adds up to is the plain and simple truth that LEAA has failed in its mission.

LEAA is not the answer to this Nation's crime problem. It has not worked. And it has cost the taxpayers billions of dollars.

In the face of this overwhelming evidence, how can Attorney General Bell possibly support the continuation of LEAA, much less favor a 25-percent increase in its budget?

Mr. Bell was right the first time—LEAA should be abolished.

Instead of increasing the Law Enforcement Assistance Administration (LEAA) by 25 percent as the Attorney General has proposed, we should abolish it as he has previously proposed to the President. He was right to begin with and wrong now. Instead of raising the funds to $825 million we should stop the program and save the $640 million it costs.

We should support the President's veto of the military procurement bill and stop the nuclear attack carrier (CVN–71). That ship will cost $2.4 billion. Its aircraft will add another $1.5 to $1.8 billion. Its nuclear escort ships would add another $8.7 billion. There is then the manpower and operating costs. Over 30 years the full costs of the CVN, not counting its escorts, would be $30 billion in uninflated dollars. Yet as our former colleague, the Senator from Missouri, Mr. Symington, said, sinking a big carrier is like hitting a bull in the butt with a bass fiddle.

There is scarcely an agency which could not be cut. There is the big project foreign aid at the State Department which has been a failure.

The Defense Department is pouring out billions in military aid at a time when it should be cut and when it is often used by one ally to fight another ally instead of using it as a shield against the Russians.

The shipbuilding and ship claims scandal is another area where defense funds could be saved.

We pour out massive subsidies for public works, reclamation projects, mineral stockpiles, sugar and wool, and highways, to name only a few.

At HEW there are massive medicaid excesses, more money than can effectively be used at the Institutes of Health, and inefficiency and waste in welfare. A cut in the budget would force us to come to grips with these problems.

And who is to say that the Post Office is run efficiently? Could we not improve our housing programs through better administration? Why not target the funds we now have to the area of great need and cut back on the money we give to affluent communities and areas through general revenue sharing or the community development program?

NASA's space shuttle is absolutely cost-ineffective. It cannot be justified, but we rush ahead with it in any case.

We all know certain education programs could be cut. Impacted aid is only the first that comes to mind.

The National Endowments for the Arts and Humanities have been given a 20-percent increase in funding this year alone and in the past they have seen 33- and 50-percent increases routinely.

Why should college students from well-to-do families draw food stamps? And they do.

Perhaps these programs could be justified in normal times. But these are not normal times. We suffer from the highest inflation rate in our peacetime history.

We should act. We should cut the ceiling on the President's budget by $25 billion. That action would send a message to both those at home and abroad that finally we mean business.

Mr. President, one of the outstanding economists in the country, Paul McCracken, is also a man who understands Keynesian economics, is at the University of Michigan, and served as President Nixon's Chairman of the Council of Economic Advisers.

Mr. President, I ask unanimous consent that an article from the Wall Street Journal for Friday, August 18, by Mr. Paul McCracken entitled "The Cosmetic War on Inflation," which adds detail and substance to many of the points I have tried to make in general, be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE COSMETIC WAR ON INFLATION
(By Paul W. McCracken)

Barry Bosworth's basic trouble is that he has been right. And the rewards in our Babylon on the Potomac for those who insist on speaking the obvious about such unpleasant matters as inflation are not much different from those in ancient times who were disengaged from their heads for bringing to the King bad news from the wars. In Washington, success in Fighting Inflation apparently consists not in such quaint and straightforward things as reducing inflation but in producing pyrotechnics and cosmetics which will persuade the citizenry that there is progress where none in fact is really occurring. Indeed, the danger is not so much that the citizenry will be confused, having themselves demonstrated a considerable capacity for clearheadedness, as that managers of policy will mislead themselves.

The fact is that we are not gaining ground against inflation. While the monthly figures will bounce one way or the other, and we might have a few good readings now, there are persuasive reasons for expecting the basic rate of inflation to continue rising. For one thing the underlying trend since the beginning of 1976 has been upward. It is, of course, true that speaking about a "trend" during a 2½-year period will make the careful statistician wince, and food prices have given the CPI a bad upward push. But a 2½-year period contains 30 monthly observations, and some subgroup of prices (about half of them, in fact) will always be rising more rapidly than the average.

UPWARD, EVER UPWARD

Moreover, the underlying "trend" in labor costs per unit of output during the last two years has also been upward. Apart from erratic quarter-to-quarter wobbles, the underlying rate of increase in unit labor costs has itself been rising about a half a percent per quarter—a track which would bring us to double digit rates by 1979.

And it is not easy to make a persuasive case that labor costs will be rising less rapidly. For one thing we are not getting anything like the gains in productivity, to offset the impact of wage increases on costs, that the economy has historically delivered. Quarterly gains in output per man hour (annualized) have averaged a 1.6% annual rate in 1976, 1977, and thus far in 1978, and even with the strong second-quarter gain in real output, productivity in the nonfarm private sector rose at the rate of only 0.6% per year. In fact, these sluggish gains in productivity now extend back for a decade, strongly indicating that a fundamentally unfavorable structural problem has emerged in the economy.

If there were reason to expect a moderating trend in the rate of wage increases during the year ahead, that would provide some reason for optimism about the price level. This trend is more apt also to be perverse. Next year will give us a heavy schedule of collective bargaining, and this means a disproportionate share of wage increases will be the large first-year, front-loaded adjustments. And the probability that the average size of the overall packages negotiated will be enlarged further is also uncomfortably high.

All of this might, of course, be consistent with a declining rate of inflation. Some major items that consumers buy might experience a sharp decline in their prices—though if this were food, while one part of government tried to take credit for progress against inflation another part would be busy viewing with alarm the low level of farm prices.

Rising labor costs also might not fully express themselves in the price level if profit margins were to be squeezed further. Reported profits are now double those of a decade ago, and they have increased almost 50% in the last five years. Here is, however, an illustration of the extent to which inflation itself can confuse facts. With a proper accounting for current costs, which conventional procedures fail to do, true profits after taxes are up only one-third from those of a decade ago, which means that in real terms they are down. While some businessmen prefer the comfort of the misleading conventional figures on profits, they

could be expected to keep a short leash on their capital budgets if profit margins were to decline further.

After all of the rhetoric about inflation's being the dominant economic problem, a view which surveys show consumers share emphatically, we are losing ground.

What is the problem?

The problem is that our strategy for reducing the rate of inflation is, to borrow an apt phrase from D. H. Robertson, "a grin without a cat."

While there is plenty for the profession to be humble about when it comes to the economics of inflation, there is one conclusion that is supported both by logic and the facts of historical experience. The rate of inflation will not come down so long as pressures of demand pushing on supplies are strong enough so that higher prices and higher wages have no adverse effect on sales volume and employment. Indeed, holding prices and wages below these market-clearing levels by some sort of brute force or ad hoc process would produce the queue-line economy.

The rate of inflation will embark on a downward trend when the result of posting inflationary price increases or extracting excessive wage increases is a painful loss of sales and employment. Ours is the only major industrial country that has not yet mustered the will to face this basic fact of economic life. And the OECD secretariat now projects the 1978 rise in U.S. labor cost per unit of output in manufacturing to be above the average for the "Big Seven" countries, and significantly lower than the increases projected only for the U.K. and Italy.

That we have not really been willing to bite this bullet is indicated by the demand management (fiscal and monetary) policies that have been deployed. The upward pressure the budget (fiscal policy) exerts on the economy is equal to the rise in expenditures plus the revenue value of any net reduction in tax rates) which indirectly has an expansive effect by increasing after tax incomes). In the period from 1958 to 1965, when the price level was quite stable, this measure of "fiscal pressure" averaged about 1% of GNP. Since 1965 it has been 2% to 3%, and would be close to 3% in 1978–79.

This same fear of facing fundamentals seems to be evident for monetary policy. With the emergence of rates of monetary expansion during the first quarter consistent, if sustained, with more discipline on the price-cost level, nervous protests were heard about the adverse effects on the economy. Those protesting presumably were calling for more rapid rates of monetary expansion (which is the only way the Federal Reserve could relieve pressures on interest rates), which would set the stage for a more rapid and inflationary expansion, which would in the end produce the even higher interest rates that are always the accompaniment of higher rates of inflation.

ANOTHER PART OF THE PROBLEM

A part of our problem is that we have also been reluctant to be realistic about how high the economy's operating rate could be pushed before pressures would begin to build. With the unemployment rate at 6% and the operating rate in manufacturing at only 84% of capacity (according to the Federal Reserve), plenty of slack seemingly remains available to assure that more demand would translate into employment and output rather than higher prices and costs.

This is far too simplistic. After a decade in which the economy's operating rate has been low, the capacity situation and labor markets are uneven, and bottlenecks are bound to develop at lower average operating rates than after a sustained period adjusted to performing closer to overall capacity. This is particularly evident in the labor market, where lack of skilled and experienced labor may impede that expansion of output which would provide jobs to those who are unemployed.

There is empirical evidence that the economy is in the pressure zone now. The proportion of companies reporting slower deliveries is now in the range reached in late 1972, or 1969, or 1965–66. And the incidence of help-wanted advertising is now higher relative to the labor force than at all cyclical peaks during the last decade (including, even 1969).

When we are unwilling to face the fundamental realities of the economy and prefer to deal with symptoms and cosmetics, we should not be surprised that we are losing ground against inflation. Washington should not be confused about this. The citizenry is not.

Mr. PROXMIRE. Mr. President, Dr. McCracken points out in his article:

The upward pressure the budget (fiscal policy) exerts on the economy is equal to the rise in expenditures plus the revenue value of any net reduction in tax rates (which indirectly has an expansive effect by increasing after tax incomes). In the period from 1958 to 1965, when the price level was quite stable, this measure of "fiscal pressure" averaged about 1% of GNP. Since 1965 it has been 2% to 3%, and would be close to 3% in 1978–79.

Dr. McCracken points out that our anti-inflation war is like a "grin without a cat." There is just no substance to it.

THE GENOCIDE CONVENTION AND THE ENDANGERED SPECIES ACT

Mr. PROXMIRE. Mr. President, in one of the more interesting debates of this session, the Senate a few months ago reconsidered the Endangered Species Act. That act was very much in the public eye, because of a recent Supreme Court decision. When it seemed likely that the construction of a certain dam would destroy the habitat of the snail darter and lead to its extinction, the Court ruled, and rightly so, that the construction of the dam be halted.

Mr. President, I have consistently supported legislation to prevent the destruction of animal and plant species, and I am happy to say that Congress has once again shown its concern by reauthorizing the Endangered Species Act. But I cannot help but notice a certain ironic inconsistency in our actions.

Mr. President, is it not ironic that, on the one hand, we have consistently voted to protect the existence of groups of animals and plants, and yet for 30 years we have refused to ratify a treaty that would protect the existence of groups of human beings? That is what the genocide treaty would do. It would prevent the extermination of an entire group of people, the way Hitler tried to exterminate the Jews in Europe and, of course, the way the Cambodians are being exterminated and the Ugandans are being exterminated. Yet, we have not ratified that treaty.

The Genocide Convention has enjoyed the support of every President since Truman. Over the years, it has garnered the signatures of 83 nations. As soon as possible, we should add another signature to that multitude. We should ratify the Genocide Convention.

But ratification is not enough. The convention is written so that each party outlaws genocide within its own state, and then the convention binds it to uphold that law. Once again, is it not a grave inconsistency that, although we have laws to prohibit the genocide of wildlife, there is no domestic law that prohibits the genocide of human beings? Of course, we have laws against murder. But genocide is a crime more insidious than murder. The cold, premeditated destruction of human beings simply because they belong to a national, ethnic, racial, or religious group is an entirely detestable act. Genocide is the gravest crime of which man has shown himself capable.

The route we must take is clear. We must eliminate the inconsistency that allows us to protect wildlife and not human life. We must make it domestic law and international law that genocide is a punishable crime.

CONGRESSMAN OBEY'S MASTERFUL WORK IN THE HOUSE

Mr. PROXMIRE. Mr. President, a bright, young Congressman from Wisconsin has done a superb job in an unpopular cause in the House this year.

I happen to disagree with him on the issue, but that does not dampen my enthusiasm for the remarkably able work he has done. Congressman DAVID OBEY has gone to work on behalf of the President's embattled foreign aid program, and thanks in a big way to him, the program seems headed for success in the House.

Yesterday, the Milwaukee Journal published an article reporting on the astonishing job Congressman Obey has done in this regard, and I ask unanimous consent that it be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CARTER LAUDS OBEY FOR VICTORY ON FOREIGN AID

(By Frank A. Aukofer)

WASHINGTON, D.C.—In the humid early morning hours one day last week, Rep. David R. Obey went to Bob Beckel's home for a celebration. Obey had some drinks, played his harmonica and listened to Willie Nelson records.

A few hours later, Beckel went to work at the White House and dropped in to see President Carter. He walked in grinning.

"Dave Obey did a magnificent job on that," the president commented. "We owe him a great deal."

Carter was talking about House approval the previous day of a foreign aid bill totaling nearly $7 billion. It was a hard fought, major victory for the beleaguered administration, and Obey, by all accounts, put it together.

Beckel is a special assistant to the president for congressional relations, specializing in foreign policy.

"He was the single biggest key to our suc-

cess," Beckel said of Obey. "We just never expected to emerge with a bill that was even viable this year, and here we've wound up with the best foreign policy bill to emerge from the Congress in over a decade."

Foreign aid is never popular, especially in an election year. Moreover, Obey—the second ranking Democrat on the foreign operations subcommittee of the House Appropriations Committee—was in the awkward position of bucking his own chairman.

Subcommittee Chairman Clarence Long (D-Md.) wanted to cut $584 million from the bill, but Obey managed to defeat him with a substitute to cut just $25 million.

Earlier, to almost everyone's surprise, administration forces narrowly (203 to 198) beat an amendment that would have prohibited indirect U.S. aid, through international banks, to Cambodia, Uganda, Laos and Vietnam.

Last year, a similar amendment passed 295 to 115, but was later knocked out in conference committee. In defeating the amendment this time, Obey and other administration backers turned around nearly 100 votes.

William P. Dixon, one of two U.S. directors at the World Bank, said the defeat of the amendment was critically important because the bank could not accept money under such restrictions. If it did, he said, every one of the bank's 133 member countries could wind up enacting political restrictions.

DATES TO JANUARY

Dixon, a former Milwaukee lawyer and aide to Rep. Henry Reuss (D-Wis.), ran Carter's Wisconsin campaign in 1976. Along with Carter aides, Dixon worked to drum up support for the foreign aid bill. He, too, called Obey the key to victory.

Obey's involvement dates back to January, when he met with Carter to start planning an approach to the bill.

In February, he produced a memorandum for Vice President Mondale, outlining a strategy and the sort of bill he thought was possible.

"That became the basic document for our strategy," Beckel said. "We met virtually on a weekly basis. He did all the strategy; he led the battle in the subcommittee and the full committee, and then on the House floor."

Obey said the final bill came out about the way he expected, except that the administration—in defeating the restriction on indirect aid to the four countries—won more than he thought it would.

"The administration did a superb job on this one," Obey added. "They pulled in the business groups and unions like the steelworkers and church groups. We were 100 votes down on the bank amendment when we started our count."

SUPPORT IS NEW

The bill did end up with restrictions on indirect aid to Cuba and Vietnam, but Obey said he expected those provisions would be eliminated in conference committee with the Senate.

Obey said this was only the second foreign aid bill he had even voted for, but that this was because foreign aid is changing.

"It used to be fundamentally military aid," he said, "with a big share to military dictatorships. This bill is prudent financially. We made a 20% cut across the board in military training and military credit sales. . . .

"I think it's important to remember that the per capita cost, the cost to every person in the country, is about 57 cents a week—the price of a pack of cigarettes. I think that's a pretty small price to pay for the stability and influence it buys in a world in which 70 million people are starving every year. It's morally essential."

Besides, Obey said, the money does not go directly overseas. He said studies had shown that 80% of it was spent in the U.S. providing jobs for U.S. workers.

WISCONSIN SUPPORT FOR PRESIDENT CARTER

Mr. PROXMIRE. Mr. President, the big political story this year has been the fall in the popularity of President Carter. But in the last few days there has been some interesting evidence of new support for the President.

The Milwaukee Journal, generally considered one of the outstanding papers in the country, published an editorial recently calling for a letup in the carping criticism of the President and pointing to some of his accomplishments.

The Milwaukee Sentinel, which often has been critical of the President, this Sunday led off with an editorial headed "Carter Shows Grit, Astuteness in Veto," in praising the President's veto of the military authorization bill to stop the aircraft carrier.

Mr. President, I ask unanimous consent that both editorials be printed in the RECORD.

There being no objection, the editorials were ordered to be printed in the RECORD, as follows:

LET'S GIVE CARTER MORE ELBOW ROOM

A national magazine reports that Washington is beginning to hear talk of a public backlash against criticism of President Carter by congressmen and the media. It's about time.

The president has been subjected to relentless scrutiny and to ridicule far out of proportion to the rebukes he has earned. And he has received scant recognition for the things he has done right. The treatment isn't just crippling him politically. It is also diminishing the office of president, interfering with the passage of needed legislation and impairing America's ability to command respect abroad.

Of course, Carter has made mistakes, as we have noted many times in these columns. But all presidents err and some have made far more serious blunders than has Carter.

He has not led the country into war or even into any foolish foreign adventure. In fact, contrary to the usual criticism of his foreign policy, he hasn't done badly overall in dealing with other nations.

Nor has he precipitated an economic recession. Business expansion has continued and unemployment has dropped sharply since he took office.

No major scandals have marred his administration. Bert Lance's publicized transgressions took place before he became Carter's budget director. Moreover, Lance's banking manipulations were nothing on the order of Spiro Agnew's felonious tax evasion or Richard Nixon's complicity in the obstruction of justice. Carter's chief mistake was to keep defending Lance ("Bert, I'm proud of you") after Lance's actions were obviously indefensible. Yet Carter is not the only president ever to let loyalty to a friend interfere with good judgment.

Moreover, despite all that has been said about broken promises, Carter is still roughly pursuing the course that he charted in his campaign. Changing circumstances have caused him to abandon some goals, but no president should be too inflexible to adapt to change and reality. To be sure, Carter has had limited success getting his programs through Congress, but Congress seems more to blame for that than the president.

Carter is often depicted as incompetent, but the charge is off the mark. Old Washington hands such as Democrat Clark Clifford and Republican Melvin Laird rank Carter as very bright. He masters both essentials and details very quickly and remembers what he has learned. Inexperienced in the ways of Washington? Yes. Too tolerant of a poorly organized staff? Yes, until recently. But incompetent? No.

Yet Carter's approval rating in the public opinion polls have plummeted lower than President Ford's did after his untimely pardon of Nixon. Even Nixon's popularity ratings did not drop below Carter's present ranking until Watergate became very heavy.

Carter's depressed popularity can be partly attributed to a variety of factors—a collection of small and moderate mistakes by the president and his aides; a collapse of voters' exaggerated expectations (which candidate Carter had unduly inflated), general malaise in a public that is not galvanized by any crisis or overriding issue.

These things, however, do not fully explain Carter's image problem. Part of the trouble must be blamed on commentators who pick at him incessantly without mentioning his strong points; on congressmen who won't say a kind word about him even when they agree with his policies; on Washington veterans who still resent his presumptuous capture of the White House without their advice or help.

Of course, some of that friction was inevitable. Carter won by running against the system and could scarcely expect the establishment to flock to him immediately. But he has been in Washington 19 months now. It's time for the regulars to quit freezing him out.

As Lyndon Johnson liked to say of himself, Carter "is the only president you've got." Barring tragedy, he is likely to be the only one until at least January, 1981. Although those who seriously disagree with him on policy are entitled to oppose him, even they should permit him some elbow room. It isn't simply unkind or impolite to subject a president to undeserved derision. It is also foolish.

So far, Carter has been remarkably cool under attack, but sooner or later the unfair needling may get to him. It might even begin to affect his judgment, to push him in dangerous directions.

Even if Carter keeps his composure, the essential stature of his office can be withered by unbalanced criticism. We do not yearn for a revival of the imperial presidency, but the pendulum may have swung so far that presidential authority—a crucial element of leadership—has become too fragile.

In any case, it's certainly time to quit cuffing Carter around just for the heck of it. He deserves better, and the country cannot afford to have another crippled presidency.

CARTER SHOWS GRIT, ASTUTENESS IN VETO

In terms of both policy and politics, President Carter made a smart move in attempting to sink congressional plans for a nuclear powered aircraft carrier which he opposed.

In order to do so, Carter had to take the dramatic step of vetoing the entire $37 billion defense procurement authorization bill. Congress now has the choice of giving in to the president or holding up this substantial part of the defense budget.

It looks as if the president will be a winner in this battle, as well he should be. If Congress tries to hold up other vital defense

funding by insisting on spending an extra $700 million (the approximate difference in cost between the nuclear craft and the conventionally powered carrier Carter preferred) members had better think up some good excuses for the voters before election time.

Some critics are already berating Carter for creating still another confrontation with Congress. That isn't the case. The president worked hard to obtain a compromise on the issue before it came to a vote in the House, advocating the conventionally powered flattop instead of the nuclear ship. Despite his pleas, however, the proposal met defeat by an unexpectedly large margin.

Carter's basic contention is that the supercarrier is too vulnerable and that future Navy policy should involve the use of smaller and more varied vessels. As commander in chief of the armed forces, he should have a strong say on this matter and the veto was his only recourse if his policy was to survive.

The situation, as many have noted, also offers the president an opportunity to come off as a strong chief executive by challenging a belligerent Congress on a major issue.

Congress, with its obstinate refusal to bend to compromise, played right into Carter's hands. And in using the veto as a trump card, in this instance, the president shows not only strength, but a degree of political astuteness which should gain him some congressional respect in the future.

QUORUM CALL

Mr. PROXMIRE. Mr. President, I yield back the remainder of my time, and I yield the floor.

I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETING AUGUST 23

Mr. PROXMIRE. Mr. President, I ask unanimous consent for the Subcommittee on Energy, Nuclear Proliferation and Federal Services to hold a business meeting on Wednesday, August 23, 1978, at 2:30 p.m., for the purpose of marking up S. 3411, S. 3412, and S. 1493.

S. 3411 and S. 3412 deal with the GAO, and S. 1493 deals with energy impact assistance.

I understand that this matter has been OK'd on both sides of the aisle.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COMMITTEE MEETING

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the East Asian and Pacific Affairs Subcommittee of the Committee on Foreign Relations be authorized to meet during the session of the Senate today to hold a hearing on the current situation in Indochina.

This matter has been approved on both sides of the aisle.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

QUORUM CALL

Mr. PROXMIRE. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. HATCH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

REPRESENTATION OF THE DISTRICT OF COLUMBIA IN CONGRESS

The ACTING PRESIDENT pro tempore. Under the previous order, the hour of 10 a.m. having arrived, the Senate will now resume consideration of House Joint Resolution 554, which will be stated by title.

The legislative clerk read as follows:

A joint resolution (H.J. Res. 554) proposing an amendment to the Constitution to provide for representation of the District of Columbia in Congress.

Mr. HATCH. Mr. President, I ask unanimous consent that Dan Livingston, of my staff, have the privilege of the floor during the pendency of this bill and any votes thereon.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that Tom Southwick be accorded the privileges of the floor.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HATCH. Mr. President, we were privileged last week to hear from the proponents of House Joint Resolution 554, who eloquently spoke of their commitment to "human rights" for the residents of the District of Columbia. I would like to respond to some of the points raised in regard to this important question now facing us.

Many of the proponents of what is, in my view, a poorly drafted amendment, employ the phrase "taxation without representation" to illustrate the injustice which residents of the District supposedly endure. This phrase is obviously intended to cause Americans today to draw a parallel between the conditions in the Colonies at the time of the Revolutionary War and the present situation in Washington. Although a noble battle cry in the struggle for our national independence, for the purpose of this debate it serves to lay yet another blanket of rhetoric upon an issue already obfuscated by emotional slogans.

To compare the status of the American colonies in British Parliament in the 18th century to the status of the District of Columbia today is to sidestep the constitutional problems created by the proposed amendment, the problems which stem from the fact that the District of Columbia simply does not possess the attributes of statehood required by our federal system. Moreover, such an analogy ignores the special provisions which have been made to attend the needs of the people of the District of Columbia. The District is the only city in the United States with a committee of the House of Representatives and a subcommittee of the Senate wholly devoted to its needs. Far from a neglected and oppressed distant land, it is rather the seat of an ever expanding and prospering National Government.

I do not know whether "prospering" is the correct word because we certainly have a Government that is tremendously in debt right now. By September of 1979, we will be in debt $86.9 billion. The interest against that debt is more than the whole Federal budget was back around 1945, just the interest against that debt which today is about $56 billion a year. People think we owe that interest only to ourselves, but of course we owe it to banking institutions and to other lenders all over the world, including many American citizens.

I was just reading today in the Wall Street Journal about how our dollar is indebted throughout the world and how much we owe to foreign banking concerns which have been purchasing our dollars in order to bolster the American dollar because of the profligacy of our Federal Government in this Federal welfare mentality that we have right here in Washington, D.C.

So, as I have said, far from a neglected and oppressed distant land, the District of Columbia is rather the seat of an ever-expanding and, if not prospering, at least money-manufacturing National Government and reaps millions upon millions of dollars in benefits as a result. Many of our Senators and Representatives reside here as well and are thus as acutely aware of the problems of the District as they are of the areas they were elected in.

In terms of per capita spending by the Federal Government, the District received nearly four times that of any other State except Alaska. New York City is the only city to receive more in Federal aid. Clearly, this is a city whose residents have not been ignored by the Government which resides within its boundaries. Thus, the situation which gave rise to the phrase "Taxation without representation" is in no way comparable to the one we are now discussing.

I might also add that, when the early colonists complained about taxation without representation, they were governed by a distant land, governed by people who did not really care for them, governed by an imperialist parliament which literally did not take into consideration their needs and taxed without any representation in that parliament.

Mr. President, I ask unanimous consent that the time under control of Senator SCOTT be transferred to me until he arrives.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HATCH. In fact, this city is one

of the best kept and most well financed cities in the world today as a result of the taxes from people all over this country, certainly not here, because only about 29 cents of the taxes here on every dollar pay for the needs of the District of Columbia.

Those who favor House Joint Resolution 554 have accused opponents of being motivated by fear of the "four toos" that the Senators in the District might be "too liberal, too urban, too black, and too Democratic." Such rhetoric completely ignores the serious constitutional flaws which this amendment contains.

Mr. President, I suggest that attaching motives to your opponents which they do not possess undermines the serious purpose of what I hope will be a meaningful debate.

On the other hand, I think there is no question that this is a Federal enclave and a large percentage of residents within the District of Columbia do receive their income and support either directly or indirectly from the Federal Government and indirectly from taxpayers throughout this country.

The District is the only city in the United States with a committee, as we have said, of the House of Representatives and a subcommittee of the Senate wholly devoted to its needs.

As I have repeatedly stated, I am in favor of giving every American citizen the right to vote. There has been no sentiment expressed on my part or on those of my distinguished colleagues who have risen in opposition to this amendment to the effect that those Americans who live within the Federal enclave should not be allowed to participate in our electoral process. As you know, they do except in the area of electing Senators and a Congressman who can vote. The problem, however, lies in the nature of the amendment that is before us, rather than in the intent. My objections stem entirely from the poorly-drafted provisions of House Joint Resolution 554 and the new problems these poorly drafted provisions would create.

In addition, I have lots of problems with the fact that this amendment attacks the very basic foundation of our Federal Republic.

When our Founding Fathers established this country, they were concerned about the strength of a central form of government. They were concerned about putting too much power in a monarch or too much power in a select few people who might govern us, and so they wanted to diffuse this power by establishing various States, 13 at the beginning of this country, and these various geographical entities would determine, through representatives sent to Washington, the limits of that power in Washington. And if the representatives did not determine and circumscribe the limits of the central form of government, then two other ways we have provided for doing it.

No. 1, the Executive, who himself could circumscribe the central form of government, and a number of Presidents of the United States have done just that by not allowing the Federal Government to expand to such unprecedented dimensions as we have today. A number of them have done just the opposite, and we have had, in essence, 42 of the last 46 years of one-philosophy rule, and that is building bigger and bigger and greater and greater government in Washington, D.C.

That was contrary to the ideals of the early Founding Fathers who were afraid of too central a government, and were reacting against too much monarchial control, and so in addition to the President and Congress, they established the Supreme Court of the United States which itself has been continually expanding the power of the Federal Government but on occasion curtailing that power as it should.

As I have said before, the proposed amendment treats three different kinds of voting procedures—electing Members of Congress, electing the President and Vice President of the United States, and ratifying amendments—as one and the same, allowing residents of the District to participate in direct election of the latter two items, privileges which no Americans now possess, including the residents of the District of Columbia. In other words, the District, unlike the States, has no legislature, and the resolution now before us would seem to give District residents the right to ratify or reject constitutional amendments by direct election or direct ratification.

No other citizen in this country has that right. Although section 2 of this amendment vaguely speaks of "The exercise of the rights and powers by the people of the District and as shall be provided by the Congress," it is not at all clear which politcal body would exercise those powers.

If ratification is determined "by the Congress" the Congress suddenly has new power to ratify the amendments it proposes in direct contradiction to the explicit language of article IV of the Constitution.

Similar problems arise with the question of electoral votes which are always cast in the form of electors chosen by State legislatures. Again the District has no State legislature. Congress does not possess the authority to appoint electors, so we must assume that this proposed amendment would endow District voters with the right to choose the President and Vice President by direct popular vote, which no other State can now do.

There are those in Congress today and in the Senate today who would like to have direct election of the President, in spite of the fact that our electoral college system, our system of electing the President, has worked well ever since the beginning of this country, and there are arguments that can be made for direct election of the President.

But the fact of the matter is that as of right now we do not have that, and I think there are very good reasons why we do not have it. I, for one, hope we never have it, because I do believe that our Founding Fathers, in their infinite wisdom, and I believe they were inspired in formulating the Constitution, but in their infinite wisdom, decided to have the electoral college.

All I can say is that as the Federal Government is the single largest interest group in the District, the Senators representing this city would be little more than spokesmen for that interest. They would not face the competing interests which are found in the States themselves, which must be balanced against the national interest.

I would again like to emphasize the fact that my objection has nothing whatever to do with whether Senators from the District would be "too liberal," "too urban," "too black," or "too Democratic." My objection simply focuses on the fact that this amendment ignores the intent and, I think, the intent was a wise one, of the framers to have the seat of the National Government in a neutral enclave, and it would obviously lead to further overrepresentation of an expanding Federal bureaucracy.

When the Founding Fathers decided we would have a representative form of government rather than a monarchical form of government or a super strong central form of government, which, it seems to me, we are now evolving into, and to which this proposal would give even more impetus, that they did so because they realized that the States themselves are geographical entities with diverse populations, many cities with differing intents and viewpoints, residing in counties with diverse interests such as agricultural, mining, manufacturing, and so forth, and that there would be a diversity of representation from each State rather than a solidarity of representation.

In hardly any State in our country today is there a complete solidarity of viewpoint politically, philosophically, morally, ethically, or otherwise.

So when a Senator comes back here to represent his State and his country, this Senator represents a diversity of interests, and he has to balance those diversities of interests in order to be a good Senators. He has to think of all the problems, not just, if he is liberal, establishing a stronger central form of government, establishing a greater bureaucracy, to interfere with all of our lives which is, of course, the hallmark of those, it seems to me, who are called "liberals" today.

They have been the people who have saddled us with this almighty Federal Government that is telling us what to do, when to breathe, how to act, what to fish for, what kinds of plants to establish, and you can go on and on and on.

The Federal Government has interfered so much that the cost of living has escalated to the point where I wonder how people who live on the average income in our society get by. Sometimes I think there is a dividing line where many people feel it is better to be on welfare, better to be on transfer payments, than it is to get out and work, even though

they can have a job and are capable of working.

Not too long ago I met a man who runs a series of dry cleaning shops in this area. He has his people trained, they are essential to his business. It is a year-round business. It is not just a seasonal business. But every spring about 15 percent of his employees in this area just quit.

Now, ordinarily when you quit a job you are not entitled to transfer payments. You are not entitled to unemployment insurance. You are not entitled to some of these benefits that we so often take for granted today.

But these people get them because nobody is going to reject them. Nobody is going to make them stand up and be counted.

He goes down to the unemployment office and says, "Look, I need all these people, I can give them jobs, I will keep them working, and they will be paid well. Why should they just quit and still go on relief or welfare or unemployment compensation?"

He has received some very deaf responses; deaf ears are turned to him, and that is because of some of the liberal central government mentality that continues to demean many citizens in our society by keeping them on welfare and taking away their responsibilities and their obligations to work, and the self-esteem which comes from it.

I remember not too long ago we were arguing about the minimum wage and what we wanted to do was to have a youth opportunity wage differential to give at that time 42 percent of our young black youth an opportunity to work. What we were going to do was allow employers, as an incentive to hire these young people, pay 85 percent of the prevailing minimum wage which, of course, has been expanded from last year, from $2.30 an hour to $2.65; the first of this year $2.90, then $3.15, and then $3.35 an hour. All it would do would be to give them the right, as an incentive, to hire, to pay 85 percent of the prevailing minimum wage for a 6-month period. That bill was shot down in the United States Senate.

Three years ago I filed a bill called the job opportunity bonus bill. That bill is to give people who are structurally unemployed, basically unemployable people, the opportunity of working. What it would do would be to give any employer, as an incentive, a job opportunity bonus at the end of a year if he will employ the structurally unemployed people for a year or better and train them. At the end of that year the employer would be entitled to a job opportunity bonus of between $2,500 and $4,000.

People say, "Well, are you not using the Federal Government to do that?" That is right. But the fact is it will not cost us a dime because we will be taking these people off unemployment rolls, these people who are formerly unemployable, and giving them opportunities to get out and work, and giving them opportunities that they otherwise would not have because, as you know, when a young person is unemployed for 2 years he then becomes unemployable.

You know I am finding that the liberals here in the Congress are not interested in this type of solution because they owe an obligation and fealty, it seems to me, to certain special interest groups that want to keep the marketplace, as they want to keep the employment marketplace, completely monopolized by their particular groups, and not allow the competition that can arise in a free enterprise system, in a free economic system, that is allowed to work as this system should be allowed to work.

Well, I do support the idea of the District of Columbia residents having the right to vote for representation. I do not think that is the issue that needs to be debated. I think they ought to have that right.

But, on the other hand, I notice that some of the liberals here in Congress who know darned well that this amendment has almost no chance at all of being ratified by 38 States—it will be ratified by a number of States, but I think almost anybody would admit it has a very difficult time being ratified by 38 States. It is a good political issue, I suppose, if you can convince people that the four "too's" really are accurate.

I suppose that instead of solving the problem as it could be solved by either retrocessing to Maryland and allowing Maryland to make that decision—I suspect that Maryland would make the decision. I suspect the people would be glad to have these citizens paying taxes into Maryland and participating in Maryland. But nobody will know until they are given the opportunity, which could occur in a matter of a few years rather than the 7 years it would take here, if at all, and the odds are it will not be at all.

So for all the liberality, for all of the desire to give District citizens a right to vote, this simply is not the way to do it. It is a nice political approach, but it is not the way to do it.

I suggested that if you do not like the retrocession idea then why do we not consider allowing the residents of the District of Columbia voting anywhere they want to? They can vote in the State of their choice or if we think that is unconstitutional or unsound let us give District of Columbia citizens the right to vote in the State of their last residence or the residence of their ancestors.

Mr. President, these are issues that I think could be resolved. I think we could have them resolved in a very short period of time, rather than in the lengthy period of time, probably without success, that this approach involved.

Nevertheless, as I say, there is a seeming lack of interest among the liberals to have a short term, good approach that would solve these representation problems for the residents of the District of Columbia.

I think it is pretty important to note that Washington, D.C., is steadily decreasing in population. As a matter of fact, it appears that the number of blacks is decreasing, in proportion to the number of whites, to the point where some are indicating that the proportions will be about 50–50, blacks and whites, probably by the year 1990, certainly by the year 2000. I do not know whether that is true or not, but there is an argument which can be made along those lines.

I think it is important for people to realize that Congress has, through its committees, the committee in the House and the subcommittee in the Senate, made great clinical efforts to keep the District of Columbia in line from a spending standpoint, especially since this Government spends about a billion dollars a year for the District of Columbia, for Washington, D.C.

Let me give you some illustrations. Actually to be appropriated for fiscal year 1979 for the District of Columbia, the appropriations bill demands $1,364,781,500. That is what it is going to take. We have a temporary commission on financial oversight of the District of Columbia that costs us $3 million a year. We have a $238 million Federal payment to the District of Columbia, $10,300,000 for payment in lieu of reimbursement for water and sanitary sewer services furnished the facilities of the U.S. Government; $9,900,000 for repayment of RFK Stadium bonds, added by the Senate committee. As to the division of the money, it has provided for payments such as $1,287,291,500 for general operating expenses, including $265,961,200 for public safety, $283,605,400 for education, $18 million for recreation, $283 million for human resources, $78 million for transportation, $72 million for environmental services, $69 million for personal services, $323,000 for settlement of claims and suits, $120 million for repayment of loans and interest, and $77 million for capital outlays.

The provisions of oversight which Congress has exercised on the District of Columbia are as follows:

First. All vouchers covering expenditures of paid by check issued by designated disbursing official; second, when amount is specified for particular purpose, amount to be considered maximum amount for that purpose; third, funds, when authorized or approved by Mayor, to be used for privately owned conveyances used on official business at 13 cents per mile (but not to exceed $45 per month) for automobiles and at 8 cents per mile (but not to exceed $30 per month) for motorcycle, except that 113 (including 18 for veneral disease investigators) such automobile allowances at not more than $715 per year.

Fourth, funds to be used for travel expenses and dues to organizations concerned with District of Columbia Government work when authorized by Mayor; fifth, no funds to be used in any way with regulation or order of Public Service Commission regarding installation of meters in taxicabs, and so forth; sixth, no funds to be used for payment of rates for electricity for street lighting in excess of 2 cents per kilowatt-hour.

Seventh, funds to be used for payment of any judgment entered by any court against District of Columbia Government except requiring payment for electricity for street lighting at rates in excess of 2 cents per kilowatt-hour; eighth, funds to be used for public assistance from District of Columbia; ninth, funds available for obligation only in fiscal year 1979; tenth, no funds to be used to pay for chauffeur or driver for any District of Columbia officer or employee, except for Mayor, chief of police, and fire chief with $12,000 per year limit on such payment.

Eleventh, pay for overtime or temporary positions may not exceed 4.5 percent of total funds; twelfth limit on authorized travel and per diem costs outside District of Columbia, Maryland, and Virginia to be $225,000; thirteenth, sets personnel ceilings as follows: (a) 37,239 full-time employees appointed to permanent, authorized positions and (b) temporary or part-time employees limited by month to same so employed in same month last fiscal year; fourteenth, no funds to be used for partisan political activities, except school buildings may be used by any community group during nonschool hours; fifteenth, provide annual District of Columbia budget for fiscal year 1980 to be sent to Congress by February 1, 1979; sixteenth, no funds to pay employees whose names and salaries are not available for public inspection.

Seventeenth, no funds to be used for publicity or propaganda, and so forth, dealing with lobbying legislation before Congress or any State legislature; eighteenth, no funds to be used to supplement salary of CETA employee if effect is to provide salary in excess of GS–9, step 1, level (added by Senate committee); nineteenth, no funds to be used to supplement salary of CETA employee if that employee has been CETA employee for total period in excess of 24 months (added by Senate Committee).

Twentieth, no funds to be used to supplement salary of CETA employee who works for an elected official or who works on city council committee staff (added by Senate committee); twenty-first, no funds to be used to supplement salary of CETA employee hired subsequent to passage of bill if that CETA employee is to be assigned to any agency of city government that already has CETA employees in number in excess of 10 percent of its appropriated employment base, except not applicable to agencies with 10 or fewer employees (added by Senate committee); and, twenty-second, provide last four provisions dealing with CETA employees to become inoperative on date of enactment of CETA Amendments of 1978.

This is an incredible degree of control which Congress, both the Senate and the House of Representatives, exercises over the District of Columbia. Why have they wanted to do this? Is it because Congress is vicious, and just wants to mistreat D.C. citizens?

The reason that Congress keeps all these controls is that it has got to. But where do the controls go when you have two Senators and a Representative from a city?

The Founding Fathers never intended cities to become States. They never intended a city to have two Senators. As a matter of fact, the reason why we have Senators is so that they can represent geographical areas with diversity of interests, and represent the whole country as well, so that we have a chance of having people of diverse philosophical interests here in the Senate, and it is not all one point of view, so that we will have true and effective debate in the U.S. Senate. Not cities. It is ludicrous to say that New York will now have a right to argue that it should have Senators. My goodness, why is that so ludicrous? There are 8 million people in New York, or approximately that many, better than 10 times the number of people in this city. I am sure a lot of their boys got shot up in the wars, also.

Why should New York City not have Senators so its citizens can have their interests represented? It is ludicrous to argue that, and yet is it, in light of this amendment? If the Founding Fathers intended cities to have Senators, they would have provided for that. They did not intend them to have Senators; they intended geographical States, with diversity of interests, to have Senators, so that we would have diversity of interests in the U.S. Senate.

That is a tremendous difference.

Some have said here on the floor of the Senate that those who argue against ratifying this amendment giving the District representation in the Congress do so out of a fear that the new Senators may be black. I, for one, would like to see more black Senators here. I do not think it would hurt this body one bit. As a matter of fact, it would be a good thing for this country. Those fears are without justification. Besides, there is no certainty that D.C. Senators will always be nonwhite. Even if blacks are elected, there is no reason to believe that they would not represent the District's white population, which is increasing.

Granting voting representation to the District would demonstrate, it seems to me, this Nation's commitment to equality in human rights. And yet, if the District were to have two voting Senators, without, at the same time, having the attributes of statehood, I think it would be a denigration of the rights of the sovereign States throughout this country. That is something to think about.

It would be contrary to the intent of the framers of the Constitution, as it was the intent of our Founding Fathers, that the seat of the National Government be located in a special area, set aside for that purpose only, outside the jurisdiction of any State, secure from harassment and free of entangling interests. Accordingly, they made provision for the establishment of a Federal district over which the Congress would have exclusive legislative authority and plenary power.

Clause 17 of article I, section 8, was referred to by James Madison in Federalist No. 43 as follows:

> The indispensable necessity of complete authority at the seat of government carries its own evidence with it. It is a power exercised by every legislature of the Union, I might say of the world, by virtue of its general supremacy. Without it not only the public authority might be insulted and its proceedings interrupted with impunity, but a dependence of the members of the general government on the State comprehending the seat of the government for protection in the exercise of their duty might bring on the national councils an imputation of awe or influence equally dishonorable to the government and dissatisfactory to the other members of the Confederacy. This consideration has the more weight as the gradual accumulation of public improvements at the stationary residence of the government would be both too great a public pledge to be left in the hands of a single State. . . .

It is apparent that the District was not intended by the framers to be a "State" in the same as sense as the members of the Union. This would have created another sovereign power in the Nation's Capital which might come in conflict with the Federal Government on some issues. Those elected to represent the residents of the District would place the needs and concerns of Washington, D.C., paramount to the national interest. Giving to District residents the voting leverage in the Congress would enable them to put undue pressure on the Congress.

Because of the framers' notion that the Federal Government should have exclusive jurisdiction over the District, they did not consider the need for representation in the Congress for the residents of the Nation's Capital. Their failure to provide for representation once the District was established as the seat of government was not entirely an accident of history. It was anticipated that the people of Washington could have what Madison in Federalist No. 43 termed "a municipal legislature for local purposes, derived from their own suffrages." On the other hand, representation in the Congress was a privilege exclusively reserved to the States. Had they thought of representation in the Congress the Founding Fathers would probably have rejected it, to prevent the kind of local influence, control and conflict that they wished to avoid in a National Capital.

GRANTING THE DISTRICT FULL REPRESENTATION "AS THOUGH IT WERE A STATE" WOULD VIOLATE THE CONSTITUTION AND WORK A QUALITATIVE CHANGE UPON OUR FEDERAL SYSTEM

The provisions of the Constitution dealing with the Congress and the electoral system make clear that only States can have full representation in the National Legislature. Article I and the 17th amendment use the word "State" in reference to membership in the Senate and the House of Representatives. There is no language to suggest that the District or any political entity other than a State would qualify for voting representation in either Chamber.

The courts have held that the District is a "State" for some purposes and not

for others. No less a constitutional expert than Chief Justice John Marshall held that the term "State" as used in the first and second articles of the Constitution referred only to members of the Union and did not include the District. Subsequent Supreme Court decisions have not overruled that view.

For purposes of representation in the Congress, the District cannot be considered a "State" since it lacks the powers common to States. It is totally unlike these distinct political entities which are independent and sovereign members of the United States.

Under article I, section 8, clause 17, the Congress has the power of "exclusive legislation" over the affairs of the District. Congressional authority over the District is equivalent to that of a State legislature over a State. The Congress can exercise all the police and regulatory powers which a State or municipal government possesses. Even though the District, under home rule, exercises many of the powers of a State—for instance, it can tax and spend, legislate and execute laws, prosecute criminals, administer justice, and the like—it is completely dependent upon the Congress for many things, including its budget and appropriations for the operation of the city. The Congress can, for instance, veto the decisions of the city council. It could even abolish the city government altogether, if it so desired, as it did in the 1870's after some 50 years of home rule. So long as clause 17 of article I, section 8, is in effect and the District remains the seat of the Federal Government, the people of the District will not have the complete right to structure their own government as they like or to legislate on purely internal affairs as they see fit.

Therefore, the District lacks the necessary indicia of sovereignty which would make it a "State" within the meaning of the Constitution. To give it full representation in the Congress and treat it "as though it were a State" would not make it so. The proposed amendment would merely introduce a new political entity within the federal system, a unique creature having rights heretofore accorded only to a State, and, in fact, as we pointed out, rights in addition to those that citizens of States have.

To allow the District to elect a U.S. Representative and two Senators without also elevating its status to that of a State is to treat as a State an area which lacks the essential elements of a sovereign State. To create a "pseudo-State" or "quasi-State" and grant it full representation would do violence to the Constitution and undermine the nature of the federal system in our Republic.

It should be noted that, except for the 13 original States, the only areas which have achieved voting representation in Congress have done so by becoming States pursuant to the congressional power to create new States under article IV, section 3, clause 1 of the Constitution.

I could go on and on, but, Mr. President, I ask unanimous consent that we have a quorum call, with the time proportionately divided between the two parties.

Mr. KENNEDY. I object.

The ACTING PRESIDENT pro tempore. The objection is noted.

Mr. HATCH. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. HATCH. I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. HATCH. I ask unanimous consent that we have a quorum call, with the time to be divided proportionately.

Mr. KENNEDY. Well, it is 1 to 3 in terms of the time.

Mr. HATCH. Then it would be 1 to 3.

Mr. KENNEDY. I should certainly agree to that tomorrow, but just today, with 2 hours versus the 6 hours——

Mr. HATCH. Is it 1 to 3 both days?

Mr. KENNEDY. Yes. I should be glad to do it tomorrow, but we can get to a de minimis situation where the other side has hours and we are changing off minutes.

Mr. HATCH. Let us divide it proportionately, but in any event, I ask unanimous consent that the proponents of the amendment not be reduced below an hour, an hour total time today. In other words, we shall charge it proportionately right now and——

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. MELCHER. Will the Senator inform me on what amendment it is?

Mr. HATCH. What we are going to do is have a quorum call. I have asked unanimous consent to have a quorum call divided proportionately, but that, in any event, the time of the proponents of the amendment not go below an hour on this quorum call.

The ACTING PRESIDENT pro tempore. Is there objection? Without objection, it is so ordered.

The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. MELCHER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. MELCHER. Mr. President, would the manager grant me some time?

Mr. HATCH. I yield 20 minutes to the distinguished Senator from Montana. If he needs more, I will give it to him.

The ACTING PRESIDENT pro tempore. The Senator from Montana.

Mr. MELCHER. I thank the Senator for yielding me the time.

Mr. President, as I said Thursday, I think there is a paramount issue here that is so basic that there should not be much argument over it. That paramount issue is whether or not some citizens of this country can be denied the right of voting for representation in both the House and the Senate.

I have long felt that the framers of the Constitution erred, made a grievous mistake, in requiring that residents of the District not be allowed to vote. It seems a very profound contradiction of many fine concepts on individual liberty, individual justice, and individual citizen's rights we find throughout the Constitution.

So I am very much in favor of ending that wrong. However, it occurs to me there are a number of ways to correct it that have always been available to the Congress, to correct a contitutional flaw, and I consider this a rather grevious constitutional flaw.

I wonder if the Senator from Massachusetts would accommodate me by expressing his opinion on a point or two concerning the historic aspects of this constitutional requirement, or constitutional prohibition, against citizens of the District voting.

Would the Senator yield to me for answering some questions?

Mr. KENNEDY. I am delighted, to the best of my ability.

What I would like to do is yield, though, on the time of either the Senator from Montana or the Senator from Virginia, since there is a three-to-one time differential. Otherwise, if we are going to get into a dialog or discussion, I would be restrained just to respond briefly.

The ACTING PRESIDENT pro tempore. All time on colloquy is being charged to the Senator from Montana's 20 minutes.

Mr. MELCHER. I thank the Chair and I thank the Senator from Massachusetts for agreeing to the colloquy.

Would the Senator agree with me that the Constitution as drawn and accepted had this basic flaw: the prohibition against residents of the District being able to vote for representation in the Congress?

Mr. KENNEDY. The Senator is correct, but it is more an oversight than a prohibition.

Mr. MELCHER. I thank the Senator.

If the framers of the Constitution had not made that error, what would have been the outcome if the District of Columbia had been treated in the Constitution fairly and without that prohibition? What would be the consequence right now?

Mr. KENNEDY. Where would they have voted?

Mr. MELCHER. No. If the Constitution had not prohibited the residents of the District from electing Representatives to the House and operating in the procedure then provided in the Constitution for election of Senators, what would have been the effect precisely? Where would somebody that lived on the other side of the Potomac be voting on now, and where would the resident of the District on this side of the Potomac be voting for House members and Senators?

Mr. KENNEDY. That has to be answered in the context of the history of the period.

The history of the District of Columbia, as I pointed out in the debate last week, began with the Philadelphia

mutiny in 1783, when soldiers from the Continental Army besieged the Continental Congress in Philadelphia. Later at the Constitutional Convention in 1787, the Founding Fathers decided to create a separate Federal district, under the exclusive control of Congress, in order to protect the seat of government.

In the First Congress in 1790, the geographical site was discussed. There was a debate over whether the site was going to be in the northern part of the country or in the South. An accommodation was made under which a southern site was chosen, in return for the agreement of the southern States to allow the Federal Government to take over the debts owed by the States from the Revolutionary War. As a result, Maryland and Virginia ceded certain lands to the Federal Government, from which the site of the District of Columbia was chosen. The two portions are shown on the map at the back of the Senate Chamber.

If we were asking about the understanding at the time Article I was written, there was no understanding, since no site for the capitol had been chosen.

The founders simply did not address the question of whether or not the residents of the capital area would have a vote in the House or Senate. It was an oversight.

The question was asked earlier whether there was a flaw in the Constitution. I would say, "yes," but I believe it was more in the context of a historical oversight. Now, 200 years later, we are dealing with a completely different situation.

Mr. SCOTT. Mr. President, will the distinguished Senator from Montana yield briefly?

Mr. MELCHER. I will yield briefly after making this comment, then perhaps the Senator will want to comment with us.

That does not seem to answer the question I asked: What if there were no prohibition in the Constitution of residents voting for representation in the Congress.

Now I yield to the Senator from Virginia because I suspect he would like to discuss this.

Mr. SCOTT. Mr. President, I want to clarify the allocation of time. If this were a compromise arrived at in which the sponsors of the bill have 5½ hours, if the distinguished Senator from Massachusetts responds to questions I would expect them to be charged against his time because he willingly entered into this agreement, and, to me, if we decide the time we have with the distinguished Senator from Massachusetts, when we had only 5½ hours at the beginning of today's session, for 2 days, we will not have the time we need for the opposition to speak.

So that was the understanding.

Mr. MELCHER. Mr. President, if the Senator will allow me to inform him of what transpired prior to his walking onto the floor, I asked the Senator from Massachusetts whether he would be willing to answer these questions because I think they are pertinent to the whole debate.

I also asked for time, was given 20 minutes, and additional time if I felt it were necessary.

Mr. SCOTT. Mr. President, of course, the distinguished Senator from Montana can use his 20 minutes as he sees fit. After the lapse of 20 minutes, I would ask that the Chair allocate the time in the manner that was agreed upon.

Mr. MELCHER. Mr. President, if I am going to participate in this debate, I would just as soon participate in it on my own terms. I think it is very appropriate that the Senator from Massachusetts, who only has one-third the amount of time that the opposition has, be able to reserve his time. I prefer to use this time on my own, in drawing out what I think are some pertinent points and the basic point that should be debated on this issue. The Senator from Massachusetts has been very kind in agreeing to this.

(Mr. ZORINSKY assumed the chair.)

Mr. KENNEDY. The Senator from Montana, who has followed this debate and has discussed it with enormous interest and with great seriousness, wanted to enter into a dialog. I indicated that I could respond to his questions, but a fuller examination, which I think the Senator from Montana deserves, would take additional time.

We can do it in whatever way the Senator desires, and I will be glad to proceed now to respond to any questions.

Mr. MELCHER. I thank the Senator.

My question is this: If there were not a prohibition in the Constitution against the residents of the District voting for representation, what precisely would be the case with respect to their voting today?

Mr. KENNEDY. The Senator asks a very hypothetical question. He asks, if the Founding Fathers had not created a Federal district, what would they have done instead? I do not know. Perhaps the Capital could have been located in Philadelphia or now as it was for temporary periods at the beginning.

If the Senator is going to ask what else might have been in the minds of the Founding Fathers at the time they did the drafting, he will have to answer me as to whether at that time they anticipated the Capital was going to be somewhere else, in Philadelphia or in New York.

Mr. MELCHER. I will be delighted to answer.

Mr. KENNEDY. Let me complete my question.

If the answer is that it was going to be located in Philadelphia or New York City or Boston, then I imagine that the people who lived in that area would be represented in the House of Representatives and in the Senate of the United States. But it is impossible to determine what else might have been in the minds of the Founding Fathers, if they had not created a Federal district. I suspect that, if they had picked on very populated location, the people in the Capital area would have been given the right to representation in the House and Senate. But that is just a guess. In fact, they left the site open, for Congress to decide a few years later.

Mr. MELCHER. My answer to it—and I invite the Senator to respond to my answer if he disagrees—is this: The Senator says, "What if it had been Philadelphia for the Capital?" My answer is that whether New York, Philadelphia, or the District became the Capital, if there were not a constitutional prohibition against those residents voting for House Members and for Senate Members, they would be voting just exactly the way the people of New York and Philadelphia are voting today; and that is the way they would be voting today in the District of Columbia if there had not been a constitutional prohibition.

Does the Senator disagree with that?

Mr. KENNEDY. It is all speculative. We do not know who they thought would have been representing the people in the Louisiana Purchase area. Would they have been represented in the Congress of the United States? Who is going to be able to say today, looking back to then, how many States actually would have been developed in that area, or how congressional representation would have been worked out. It had to be developed over the years.

What we are talking about is the evolution and development of a federal system. We cannot take the relationship as it exists today, and relate it back to 1787. We cannot say that in their magnificent wisdom, the Founding Fathers—who drafted the greatest document for the protection of individual rights and liberties ever known—intended that the 700,000 people in the District of Columbia in 1978 were not going to vote. We cannot say that, therefore, we should not be overriding their decision. They simply did not, and could not, foresee what 200 years were to bring. As I understand the Senator's question, it is a hypothetical question, and it can only be answered with additional questions.

Mr. MELCHER. I still go back to the same point: It is a prohibition against the residents of the Capital City voting. If such a prohibition had not been in the Constitution—and the Senator from Massachusetts has agreed with me that such a prohibition was wrong at the time and should not have been in there—if the Constitution were silent, rather than the prohibition, obviously wherever the Capital City was, wherever the Federal city was, the residents would be voting, as they do in other cities, for their Representatives and their Senators.

Does the Senator not agree with me?

Mr. KENNEDY. As I have said, it was basically an oversight. The Founding Fathers, at the time they drafted the Constitution, did not understand what the nature of the district was going to be. There was no decision, at the time of the drafting of this, about where the Capital was going to be. It was only several years afterward that the States of Virginia and Maryland actually ceded the land.

And even in the period 1790 to 1800, when the District was being set up as the seat of government, the citizens continued to vote in Maryland and Virginia elections. They voted in that manner in the Presidential election of 1800. But on the date specified for the Federal takeover in the 1790 act—the first Monday in December, 1800—they lost their status as citizens of the States of Maryland or Virginia, and they lost their right of representation. In 1801, there was an immediate outcry by the people against this loss of rights. But they were only two small communities—Georgetown and Alexandria, with populations of about 5,000 each—far too small to be a State or even a congressional district. Their protests were of no avail. But the historical point is that it was not until 1800 that they actually lost out as their right to representation, long after the Constitution was ratified.

At the time of this oversight in 1787, the intent of the Founding Fathers was to deal with the issue presented in Philadelphia, in 1783, when dissident soldiers invaded the Continential Congress and demanded payment. They were attempting to deal with the issue of the right of Congress to protect itself and to protect the capital.

We cannot stretch that point, or suggest they foresaw the fact that, at some time farther down the road, years later, land would be added and rights would be lost.

Mr. MELCHER. The Senator uses this word "oversight" in connection with the Constitution and this prohibition against the residents of the District voting.

Why does the Senator want to use the term "oversight"? "Oversight" would mean something you forgot, something you did not think of.

Mr. KENNEDY. That is correct.

Mr. MELCHER. As I read it, it is explicit, it is a prohibition against those residents voting. That is not forgetting something. That is being firm and saying, "We envision that they are not going to vote."

Does the Senator read the Constitution differently than I do on that point?

Mr. KENNEDY. No. I think any reading of the debates at the Constitutional Convention would not support the Senator's point. There is no specific prohibition. The prohibition arises indirectly, because the Constitution said that States were to be represented by the House and Senate.

Mr. MELCHER. I do not want to go into the debates. I want to go into the principle in the Constitution that we have to live with.

Mr. KENNEDY. The Senator is asking me what the Founding Fathers were thinking. It is my position that it was an oversight. There was no District of Columbia, no large city, no 700,000 people. There is nothing in the constitutional debates or discussions that would indicate anything other than that. There is nothing in there that said, "Look, we will prohibit people who live in the District from participating in the affairs of our country." There is absolutely nothing to indicate that. As a matter of fact, there are important statements to the contrary.

In Federalist 43, Madison refers to the District in this way: He speaks of the fact that the people "will have had their voice in the election of the government which is to exercise authority over them." That is consistent with the view that they should be represented in Congress.

That is what the Founding Fathers were talking about.

. . . as they will have had their voice in the election of the government which is to exercise authority over them; . . . .

Mr. MELCHER. Meaning in the District.

Mr. KENNEDY. Meaning in the Congress and Senate of the United States. That is what those words mean, I say to the Senator. It is a government over them if you can draft them and send them to Vietnam and can make them pay their taxes. These Founding Fathers had been out fighting a revolution. Madison uses the words " * * * as they will have had their voice in the election of the government which is to exercise authority over them; * * *" which suggests a right to be represented.

Mr. MELCHER. I agree completely with the Senator from Massachusetts.

Mr. KENNEDY. That is good.

Mr. MELCHER. We are in agreement on that.

Does the Senator not read a prohibition against that very thing in the Constitution as it was drafted and adopted and is before us today?

Mr. KENNEDY. There is no specific prohibition. They never even thought about this aspect of the District. It was too remote in the future. They were settling the immediate problems.

Mr. MELCHER. In relationship to the seat of the Government where the Federal enclave was and those residents were not to be allowed to vote.

Mr. KENNEDY. No. I do not agree.

Mr. MELCHER. If the Senator does not read it that way why do we want to amend the Constitution?

Mr. KENNEDY. They were talking about the functions of the Government, the institutions of the House and the Senate of the United States, the building of the Capital and their security. We are talking now about the 700,000 people who have bakery shops, supermarkets, and mom and pop stores. Through the accident of being born here or living here and paying taxes here and sending their sons and daughters to war. They should be entitled to vote.

Mr. MELCHER. I agree.

Mr. KENNEDY. That was never foreseen.

The PRESIDING OFFICER. The 20 minutes yielded to the Senator from Montana have expired.

Mr. KENNEDY. It was never foreseen.

Mr. MELCHER. I ask the Senator to yield me another 15 minutes.

Mr. SCOTT. I am glad to yield an additional 5 minutes to the distinguished Senator and regret due to the limitation of time not being able to yield more at this time.

The PRESIDING OFFICER. The Senator from Montana has 5 additional minutes.

Mr. MELCHER. I thank the Senator.

What the Senator states is in perfect agreement with what I espoused, that the people regardless of where the district was going to be, regardless of what you call it, should have the right to vote. Who knows? What if the capital had been in Philadelphia or New York? They would never sell the idea that some enclave within that city would not be allowed to vote. The same is true here in these circumstances in this enclave.

We talk about ceding the land from Virginia to the District and from Maryland to the District. That part that was ceded from Virginia went back to Virginia and those people, of course, have their full voting rights. That part that was ceded from Maryland for the District is still separate. But it would not make any difference if there were not a prohibition within the Constitution. Those people would be voting just the way the rest of the people in Maryland are voting today and they would have been voting in Maryland throughout all the time since the creation of the District.

The Senator from Massachusetts and I do not disagree on the basic concept, but what the Senator from Massachusetts does not agree on is that having that historic background, if the Constitution had not had the prohibition in there, these citizens in the District would be voting in Maryland today as they should have been all during this time. The Senator from Massachusetts agrees with me. There is a flaw in the way the Constitution was drafted. He agrees with me on that point. But what he cannot conceive is that if that flaw had not existed—and to waltz around the point as this being something no one had thought of, no one had conceived there would be so many people living around the Nation's Capital at this time when they drafted the Constitution, that does not mean anything—if that prohibition had not been written into the Constitution, they would have been voting.

We are amending the Constitution because of that prohibition. If it were necessary just to correct some flaw that Congress had made, we would correct that by law by changing the statute. But we are amending the Constitution because it is a constitutional prohibition. I say that the proposition should never have started. The people were denied the right to vote. I say that the correction should be made. Part of the correction was made when part of the District was ceded back.

I now say that a complete correction of that law in the Constitution could be made as if it had never begun in the first place, as if there had never been a constitutional prohibition against those people living here to vote. They would have been voting in Maryland all that time. That correction can be made now.

Does the Senator find fault with that argument?

Mr. KENNEDY. I will respond.

I do find fault with the argument to be very specific.

Mr. MELCHER. I reserve the remainder of my time because I deeply want to listen to the fault of the argument.

The PRESIDING OFFICER. The Senator has 1 minute remaining.

The Senator from Massachusetts.

Mr. KENNEDY. Mr. President, the argument which is made by my friend and colleague from Montana is basically the retrocession argument, which we debated during the past several days. The Founding Fathers established a Federal district. It is quite clear from a reading of the Constitution, as well as the circumstances of the time, that they did not anticipate where the district would be located, what the population of the district would be, or any other factor.

The fact of the matter is that the site of the Nation's Capital was originally swampland and marshland. That was 200 years ago. The argument of the Senator from Montana is, "Well, because it was Maryland swampland and marshland 200 years ago, now we should give it back to Maryland," even though the Maryland Senators and Maryland legislators, the Maryland people, say that this is an unacceptable situation. They understand that the country has changed after 200 years. There has been the development and the fashioning here of an entirely unique and separate entity, a community of 700,000 people, which is no more associated today with Maryland than it is with Virginia, or Montana, or any other State.

The Senator's point is an entirely different thing from the historical background of the retrocession to Virginia in 1846. That was accomplished with the consent of Virginia. There had been no Federal buildings located there. Partly, that fact is attributable to the embarrassment felt by George Washington who had gone outside the scope of the 1790 Act to locate the site of the Capital near Mount Vernon. So he decides not to use Virginia for any functions of the Federal Government. The Virginia retrocession was also involved in the creation of the State of West Virginia. The slaveholding eastern part of the State needed the votes of Alexandria to offset the abolitionist western part of the State. But the retrocession made no difference—in 1863 after the Civil War had begun, West Virginia entered the Union as a separate State.

The retrocession of Virginia is an entirely different historical development.

It is not a precedent in 1978. The lack of congressional representation for the District was an oversight in 1787, and that oversight should be remedied by separate congressional representation for the District now, not by trying to fit the District back into Maryland.

In addition, of course, the concept of political participation has changed a great deal over the years. Women could not vote in 1787. Slavery still existed, and slaves could not vote. So it is hardly surprising that no thought was given to the possible future representation of the District. Probably, if you had asked the Founding Fathers, they would have said, "Let us wait and see how the capital develops."

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. KENNEDY. If I may finish briefly. On this issue, clearly the action of the founders was an oversight. For almost 200 years, they have been denied what Madison felt, at least from his writings, was their rightful voice in the election of the Government which was to exercise authority over them.

They could not have known what this place where we meet today would have actually looked like. Who knows whether it would have become farm and agricultural land? Who knows whether it would have been a community of 50,000 or 500,000? But the reality is that, 200 years later, it is 700,000 people, who are denied their effective voice in the House and Senate of the United States.

Mr. MELCHER. Mr. President, will the Senator yield?

Mr. KENNEDY. I withhold the remainder of my time. Yes, I yield.

The PRESIDING OFFICER. Who yields time? Does the Senator wish to use the remaining 1 minute of his time?

Mr. MELCHER. No, the Senator yielded to me on his own time.

Mr. KENNEDY. I withheld the remainder of my time.

Mr. SCOTT. I will yield 4 minutes to the Senator, and the Senator has 1 minute, so he has 5 minutes.

Mr. MELCHER. The Senator uses the term "oversight" with respect to women not being able to vote in the Constitution as if that were an oversight. That was very deliberate. Slaves could not vote. There was no oversight. That was very deliberate. They were prohibited from voting.

Abigail Adams, I think, wrote to her esteemed husband, who came from a very auspicious State, something which the Senator from Massachusetts shares——

Mr. KENNEDY. The Senator is quite incorrect. That is not what the Constitution provided. It left the qualifications for voting to the States. That was an issue for the States to decide.

Mr. MELCHER. To which point is the Senator referring?

Mr. KENNEDY. The right of slaves to vote.

Mr. MELCHER. Slavery.

Mr. KENNEDY. And the right of women to vote.

Mr. MELCHER. Women, correct. It would not permit them to vote by constitutional mandate, by saying the States cannot deny that right. The Constitution was deliberate on that, and said that the Federal Government is not of a nature to enforce the right of voting for women, for slaves and, thirdly, for those people who live in what became the District of Columbia, the seat of Government.

It is not an oversight, it was a deliberate act, a prohibition.

The question of retrocession is not the argument that I am making. I am not asking for retrocession. Retrocession involves land. I do not think that is practical to give the District back or to force Maryland to accept the District back. What I am talking about is the question which we have had come up in other areas of Federal ownership.

If you live out here at Andrews in the State of Maryland, an Air Force base, the Federal Government owns it. It is there and they run it. If your residency is there, that is where you claim residency, you vote in Maryland.

What this Federal enclave is is not, however, the same as other Federal enclaves of any nature. This is a prohibition against voting for those people who reside in this particular Federal enclave.

The Senator from Massachusetts dares to treat that deliberate prohibition as some sort of an oversight. It was a deliberate prohibition. I happen to think it was wrong at the time and still wrong now. If that mistake had not been made in the Constitution, the people within the District would be voting in Maryland just as the people in Andrews, which is in Maryland, just outside the District line, a Federal ownership, where they vote in Maryland if that is their residency.

I think this correction should be made, but I do not think that we owe it to the people of the District to give them such power, with two Senators, which they would not have had if we had not had that prohibition in the Constitution. I know of other areas that would like to have a Senator of their own.

I have often thought that Exxon probably would love to have one of their own Senators. But we have never found favor with that sort of concept.

I think we ought to make a correction to this historic flaw in the Constitution without overdoing it and to recognize that if that prohibition had not existed from the adoption of, the time of the adoption of, the Constitution, regardless of where the land was ceded for this Federal enclave for the purpose of the seat of the Government, regardless of where it occurred, the people in there, who live in that area, would be voting in the State in which they lived.

It is perfectly fair and proper that the District should have its own representatives in the House of Representatives, and it follows that it is also perfectly fair that the residents of the District be treated just like the residents anywhere else in this country, where they live on Federal property, that they have the right of residency, the right of voting for Senators in that particular State.

I think it is pretty simple.

The PRESIDING OFFICER. The Senator's 5 minutes have expired.

Mr. MELCHER. I thank the Chair and I thank the Senator from Massachusetts for engaging in colloquy, and I thank the Senator from Virginia for granting me the time.

Mr. SCOTT. Mr. President, I regret the necessity of having to limit the allocation of time to the distinguished Senator from Montana. In fact, we have 5½ hours for both today and tomorrow, and in the event that we use the entire 5½ hours today, or use 5 hours, we would have little or no time to utilize tomorrow.

The agreement which was worked out, however, whereby other Senate business has intervened between the debates on

the proposed constitutional amendment to provide full congressional representation for the District of Columbia, has afforded an opportunity over the weekend to probe more deeply into history.

During the Constitutional Convention there were suggestions that there be proportional representation in both Houses of the Congress but the smaller States were dissatisfied with this suggestion and a 5-to-5 deadlock developed between the States. Therefore, the problem was referred to a committee of 11 to effect a compromise. This compromise resulted in the recommendation that each State should have equal representation in the Senate with representation in the House based upon population.

We turn, therefore, to article I, section 3 of the Constitution which provides "the Senate of the United States shall be composed of two Senators from each State, chosen by the legislature thereof, for 6 years; and each Senator shall have one vote." This was subsequently changed in 1913 upon ratification of the 17th amendment to provide for the direct election of Senators.

We should recall, Mr. President, that ours is a Federal Government, composed of the several States, that only States are represented in the Senate, each having two Members, that in order for the District of Columbia, under our system, to have representation in the Senate, it would have to either be a State or be treated as a State.

Just as States are represented in the Senate, people of the States are represented in the House. It would be as equally violative of the Federal principle to admit voting representation in the House from political entities which are not States as to admit nonstate membership in the Senate. Argument could be made that since no State may be deprived without its consent of its equal suffrage in the Senate, an amendment providing for Senators from the District of Columbia could not be made effective without ratification by all 50 States. The contention is that the admission of two Senators from the District would dilute the power of a State. But this dilution would affect all of the States equally, so that none would be deprived of its equal Senate suffrage.

It would appear that admission of Senators from the District would no more deprive a State of equal suffrage in the Senate than would the admission of any new State into the Union.

We might consider, however, the position of our two most recently admitted States. Both Alaska and Hawaii were territories of the United States and as territories they did not have representation in the Senate.

Today, not only does the District of Columbia have a nonvoting delegate in the House but so does Guam, Puerto Rico, and the Virgin Islands. In the event the District of Columbia was given two Senators could not an argument be made that Guam, Puerto Rico, and the Virgin Islands are equally entitled to have two Senators to represent them in the Congress?

Every Senator is aware that during the 19th and 20th centuries, American citizens left the States of their residence and migrated into new lands, which were subject to the jurisdiction of the United States but were not States.

As migration into these areas increased, they were organized into territories, but at no time did the American citizens residing in the territories elect voting members of the Congress; not until the territory was admitted as a State did it have that representation.

As residents of territories the most representation any enjoyed was that of a single territorial delegate who had no vote. Yet, I am not aware of any widespread belief that the people of the territory were discriminated against because they had no direct voting representation in Congress.

In large part they had left the States where they enjoyed direct voting representation in Congress, willingly surrendering the right of direct voting representation for other advantages they sought in the West. By analogy, the large majority of the residents of the District of Columbia are not native Washingtonians but citizens who willingly left their States in order to live at the seat of Government, surrendering the advantages of direct voting representation for other advantages considered by them to be important.

Some, of course who have retained a legal domicile elsewhere vote by absentee ballot in the States from which they came. Be that as it may, direct representation in the Congress by a voting Member has never been a right of U.S. citizenship. Instead the right to be so represented has been the right of citizens of the States. The design of the Federal Union is a union of States.

No power is conferred upon the Congress, Mr. President, more important than that of proposing amendments to the Constitution. None should be exercised with greater care or vision. Inasmuch as the Constitution is the foundation upon which our Federal Government rests, it would appear that deference should be given to the existing structure of Government and it should not be changed unless there is a compelling reason for the change. The Constitution is a declaration of broad governmental powers and should not be utilized, in my judgment, to meet temporary situations.

Our present system is buttressed on our faith in federalism—independent States join together as a union. This system has served us well and should be altered only for the most persuasive of reasons. If the District of Columbia were given two Senators it would be in a position not afforded any other city in the Union. It would also be in a position not afforded any territory of the United States. So, perhaps we should look once again at the District of Columbia while it was once known as the territory of Columbia, its official designation long ago was changed to the District of Columbia.

The District is unique. It is unlike a territory in its status and characteristics in that it is not an ephemeral subdivision of the outlying dominion of the United States, nor is its government temporarily transitory or impermanent, but rather it is a selected area set apart for the enduring purpose of the Federal Government and it is the capital and permanent seat of the Government of the United States, wherein all of the supreme departments of the Government permanently abide and in which all offices attached to the seat of Government are required to be exercised except as otherwise provided by law.

In article I, section 8 of the Constitution, it is provided that—

> The Congress shall have power . . . to exercise exclusive legislation in all cases whatsoever, over such district (not exceeding ten miles square), as may, by cession of particular States, and acceptance of Congress become the seat of Government of the United States . . .

The Founding Fathers' insistence on having as the seat of Government a place over which the Congress would have exclusive jurisdiction and control as you know was due in part to a soldiers' mutiny which threatened the Continental Congress meeting in Philadelphia and the failure of either the city or State to protect the Members. The District of Columbia was choseen as the permanent seat of Government so decisions affecting the entire Nation could be made free from undue influence of any State and immume from harassment or political entanglement.

Mr. President, a few minutes ago during the dialog between the distinguished Senators from Montana and Massachusetts, the question of Madison's remarks was brought up. The distinguished Senator from Massachusetts referred to No. 43 of the Federalist Papers prepared by Madison. Let me just read the paragraph in question in its entirety.

> The indispensable necessity of complete authority at the seat of government carries its own evidence with it. It is power exercised by every legislature of the Union, I might say of the world, by virtue of its general supremacy. Without it not only the public authority might be insulted and its proceedings interrupted with impunity, but a dependence of the members of the general government on the State comprehending the seat of the government for protection in the exercise of their duty might bring on the national councils an imputation of awe or influence equally dishonorable to the government and dissatisfactory to the other members of the Confederacy. This consideration has the more weight as the gradual accumulation of public improvements at the stationary residence of the government would be both too great a public pledge to be left in the hands of a single State, and would create so many obstacles to a removal of the government, as still further to abridge its necessary independence. The extent of this federal district is sufficiently circumscribed to satisfy every jealousy of an opposite nature. And as it is to be appropriated to this use with the consent of the State ceding it; as the State will no doubt provide in the compact for the rights and the consent of the citizens inhabiting it; as the inhabitants will find sufficient inducements of interest to become willing parties to the cession; as they will have had their voice in the election of the government which is to exercise authority over them; as a municipal legislature for local purposes, derived from their own suffrages, will of course be allowed them; and as the authority of the legislature of the State, and of the inhabitants of the ceded part of it, to concur in the cession will be derived from the whole people of the State in their adop-

tion of the Constitution, every imaginable objection seems to be obviated.

Mr. President, I did feel that rather than just to recite a portion of this, the entire paragraph should be read.

Washingtonians are undoubtedly in a far superior position than any territory of the United States. They have authority to elect their own school board, their city council, mayor, participate in Presidential elections, and have a nonvoting delegate in the House of Representatives. Citizens of the District of Columbia in fiscal year 1977 contributed $275.9 million toward Federal grants and received $942.1 million in return. The Library of Congress has confirmed that the Federal Treasury collected only 29 cents for every dollar it provided the city. The per capita income is the second highest in the Nation. The Federal Government employs almost 40 percent of the work force on the city of Washington and an additional 25 percent work in industries servicing the Government. It would appear to be comparable to a "company town" with virtually everyone dependent upon Government for his or her livelihood.

If this proposed resolution were passed and ratified by three-fourths of the States, it would insure the election of Senators sympathetic to the desires and concerns of big Government; Senators who would promote the welfare of Government agencies; Senators who would be under no compulsion to consider the needs of any competing interest such as farmers, miners, manufacturers, or other business and industrial activities as exist throughout the various States. I wonder if the Congress saw fit to move the seat of Government to a more central geographic location if States in the Middle West would not be glad to cede territory for a Federal City with all the benefits that accrue to the city and if the people of the District of Columbia would not raise a hue and cry against moving the capital to another location.

It seems unreasonable, Mr. President, to provide the benefits of statehood to the people of the District of Columbia without corresponding liabilities. Washington even today is a city with decreasing population, a city of less than 700,000 people at the present time but with a news media espousing the views of city residents and Members of Congress being dependent upon the Washington media as a major source of knowledge of events and developments.

Mr. President, I think this has been illustrated in the last few days by the views that have been in the media.

In the event there were two Senators from the District of Columbia, would it not be reasonable to assume that their thoughts and actions would permeate the news most readily available for consumption by the Congress. Two Senators for the city of Washington, in my judgment, would not be in the national interest and would inevitably lead to the kinds of pressure that the framers of the Constitution wanted to avoid when they provided for a Federal City.

Washington is not a State but a city, exceeded in population by 10 other American cities. There is no basis under the Federal concept of government for electing Senators from the District of Columbia. Senators are representatives of their States and the city of Washington is not a State.

Of course, all of us are concerned for the welfare of the people of the Nation's Capital, all of us want a capital city of which we can be proud; all of us represent the people of the District of Columbia, as well as the people of our constituent States.

But our concern for the welfare of the people of the city should not detract from the realization that the welfare of the entire Nation is paramount, and it was concern for the general welfare of the country that caused the Constitutional Convention in 1787 to adopt the Federal City concept. It was a wise decision made by our Founding Fathers. It has served us well for almost 200 years. I see no pressing reason to depart from it now.

In reviewing the House Joint Resolution 554—and that is the resolution before us, Mr. President, because we bypassed the Senate Judiciary Committee, where a Senate bill was pending. We have done this at a time when the chairman of the Senate Judiciary Committee is out of the country. But from looking at the House resolution, it appears there is no provision for the filling of vacancies in the event the proposal should be adopted and the District of Columbia should become entitled to two Members of the Senate. The 17th amendment to the Constitution, providing for the direct election of Senators, provides that the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancy by election as the legislature may direct. Of course, the Congress has exclusive legislative jurisdiction over the District of Columbia and we might well assume that the Congress would have authority to authorize the executive to make temporary appointments but, once again, Washington is a city, not a State, with an elected city council, an elected chairman of the council and an elected mayor. Would the city council authorize the mayor to appoint a Senator or would the Senate authorize the mayor of a city to appoint a Senator? It would appear that the latter would be true or the Senate itself could, acting in its capacity as the legislature for the District of Columbia, appoint someone from the District to serve in the Senate until such time as the people of the District of Columbia could elect a Senator. This adds some confusion to the proposal to provide for two Senators for a city that is not ordinarily present under our constitutional concept of having Senators represent States rather than cities.

The resolution also provides, both in the preamble and in the body of the resolution, that the proposed amendment to the Constitution shall only be valid when ratified by the legislatures of three-fourths of the several States within 7 years from the date of submission by the Congress. The equal rights amendment had a similar provision but a proposal to extend it for an additional period is now upon the Senate Calendar. Almost everyone in the country believes in equality between the sexes, but many have reservations as to the practical effect of ratification of the equal rights amendment and, not knowing its full ramifications, are fearful to vote for ratification. I submit, Mr. President, that in the event the proposal before us were adopted by the Senate, there would be many handicaps to obtaining ratification by the necessary three-fourths of the States. State legislatures are not likely to favor the expansion of the size of the Senate to allow a city to have the same voting strength in both the House and Senate possessed by sovereign States.

Taxpayers could well oppose giving residents of the District, many of them Government employees—and I speak, Mr. President, as one who has been a Government employee for 38 years—preferential treatment to that afforded other cities. Indeed, the city of Washington is a unique city. It is the seat of Government, its business is government. The question would naturally arise as to whether the present membership of the House of Representatives would remain at 435 or whether an additional two House Members would be added for the benefit of the city of Washington. State legislatures would question having 102 Senators and whether this would, in fact, diminish the effectiveness of the Senators from their own States. Opposition would arise from concerns about a number of constitutional provisions.

I believe, Mr. President, it will serve the national interest for the Senate to reject this proposal and not ask the States to resolve this matter, imposing even greater division among the States than presently exists over the equal rights amendment. Mr. President, I should like to review some of the proposed amendments, including two of my own, but I see that the distinguished Senator from North Carolina is presently on the floor and I shall forgo that at the present time and just take a minute or so to conclude my remarks.

At this time, Mr. President, I am not sure whether to bring up two printed amendments that I have. One would permit the States, under their police power, to pass upon the whole question of abortions, as has been the case in the past, under a State's police power, under its right to regulate the health and morals of the people, or whether to bring up the proposed amendment in which tenure would be provided for Federal judges, rather than lifetime appointments that they now enjoy.

We speak of serving during good behavior, but for practical effect, that is lifetime tenure. This can be decided later today or perhaps tomorrow. Nevertheless, with the restriction on time, let me yield the floor at this time so that other Senators will have an opportunity to discuss the pending issue. To me, the issue is so important to the States we represent that every Member of the Senate should have an opportunity to comment on the resolution if he so desires.

Mr. President, I yield such time as he may consume, not exceeding 20 minutes, to the distinguished Senator from North Carolina.

Mr. HELMS. Mr. President, I thank the able Senator from Virginia for yielding and I thank the Chair for recognizing the Senator from North Carolina.

Mr. President, we are assembled in a virtually empty Chamber. If I count correctly, there are five Senators in this Chamber, one of whom is presiding, on a Monday morning, 1 minute before noon, to discuss what surely is one of the most obvious political charades in recent years.

The political boat is loaded with Presidential candidates seeking the support of black citizens on this issue. I am speaking candidly, Mr. President, but I do not want to speak harshly. Still, the facts deserve to be laid out for what they are. I dare say that there is not a Senator in or out of this Chamber who really believes that this constitutional amendment will be ratified by the requisite number of States. Last week, I was talking to my able former colleague from North Carolina, the distinguished Sam Ervin, Jr., about this proposition. The Senator chuckled and said, "Well, Jesse, I guess it is good politics for anybody running for President."

That is precisely what it is—politics. Whether it is good politics or whether it is bad, I shall not attempt to pass judgment. But I say again, Mr. President, there is not a Member of the Senate who, deep in his heart, really believes that this proposed constitutional amendment will be ratified by the requisite number of States.

(Mr. HATHAWAY assumed the chair.)

Mr. HELMS. So what are we doing? The Senate is conducting a charade. There is no way the Senator from North Carolina—or any Senator—can cast a completely intellectually honest vote on this proposition. If he votes for it, he is voting for something that is not wise. If he votes against it, he risks falling prey to the false predicate that was laid down in the beginning of this debate. The assumption is that if we do not support this proposition we are against blacks, we are against liberals, we are against Democrats, and probably against apple pie.

Let me say again, Mr. President, this is a charade. If it were not a charade, this proposal would have gone through the normal processes of the Senate. But instead of going through the committees, it was virtually bludgeoned onto the Calendar. This maneuver ought to be regarded for what it is. The black citizens of the District of Columbia and the black citizens across America should not be deluded by this bit of gamesmanship. Everyone knows that this amendment is not going to be ratified by the requisite number of States.

Of course whether I will be proved right or whether I will be proved wrong will occur far in the distant future—7 years from now. But I say again, I do not believe that one Member of the U.S. Senate today, deep in his heart, feels that this proposed amendment will, indeed, be ratified by the requisite number of States.

The Senate had an opportunity last week to assure representation for the people of the District of Columbia. The distinguished Senator from Montana (Mr. MELCHER) proposed an amendment that made sense. I supported that amendment because I favor the concept of District of Columbia representation.

I think any Senator who is truly worried about the civil rights of the residents of the District of Columbia should have been an enthusiastic supporter of that Melcher amendment, which was defeated last week.

Mr. President, if we examine House Joint Resolution 554, we can see that it is deeply—deeply—flawed in both concept and execution. House Joint Resolution 554, as it stands, distorts the meaning and purpose of Senate representation. In fact, it dilutes the guarantee of article V to the Constitution, which is supposed to protect the equal suffrage of each State in the Senate.

It is obvious that if the 50 States have equal representation, the adding of two more Senators who do not represent a State cheapens the representation and dignity of the States themselves. We all know the inflation that results for the dollar when we expend the money supply to pay the Federal deficit. This proposal is inflation of the vote in the Senate.

Indeed, article V says specifically that "no State without its consent shall be deprived of its equal suffrage in the Senate" as a result of the amendment process.

Now, this being the case, Mr. President, the prospects of this proposed amendment, as it stands, of ever being approved by ratification by the requisite 38 States is remote, to say the least.

In the first place, I reiterate that three-fourths of the States will never approve the dilution of their constitutional rights. We could well end up with another ERA situation. As a matter of fact, Mr. President, if anybody thinks that the battleground across this country today in connection with the equal rights amendment has been heated, just wait until this amendment comes up in the State legislatures around the country. The ERA battle will have been a cakewalk compared to this one, and I think every Senator knows that.

So what are we doing? Are we advancing Presidential campaigns? I say again: The political boat is getting mighty loaded with candidates who are obviously or reportedly running for President in 1980.

Mr. President, we ought to level with the citizens of the District of Columbia and those citizens across the country who view this as a vote against or for their race. We ought to be intellectually honest enough to tell them, "This is not going to do it because this proposed amendment will not be ratified by the requisite number of States."

I am hearing from people all over this country who resent this proposition's having been converted into a racial issue. It is not a racial issue.

Mr. SCOTT. Will the Senator yield briefly at that point?

Mr. HELMS. I am delighted to yield to my friend from Virginia.

Mr. SCOTT. Mr. President, when the provision for the District of Columbia to be the seat of government or for a Federal city concept was developed, as I recall the black situation, it was later determined by the Dred Scott decision, that blacks were not citizens and, therefore, could not vote.

There was no black problem.

Then the suggestion has been made that the city is too urban. The city was not urban at the time that the Founding Fathers at the Constitutional Convention made this decision, or that three-fourths of the States ratified the Constitution.

Then, it was not too liberal at that time. As I recall, George Washington was elected by all of the people, not by any political party.

There is a fourth issue that has been raised, too Democratic.

Well, there were no political parties at that time in this country, as I recall again, the first President being elected by all of the people, and only later that the question of partisan politics arose.

So I rise to agree with the statement of the distinguished Senator from North Carolina. This decision was made, without these factors being considered, and I believe it is a false issue to be raised at this time.

Mr. HELMS. I thank the Senator.

Obviously, it is a charade. That is why the Senator from North Carolina came to this floor this morning because, frankly, I have heard enough of the pious pretense that proponents are doing something to protect the "human rights" of the residents of the District of Columbia. It is time to identify this political charade for what it is.

I mentioned the ERA a moment ago. As the distinguished occupant of the Chair knows, there is an issue looming in the Senate to extend the period of ratification for the equal rights amendment.

At the end of the 7-year period designated for this amendment, House Joint Resolution 554, we can bet our boots there will be an effort to extend that period for ratification, also, because nobody believes that this constitutional amendment will be ratified by the States.

The proponents of the amendment will be back here in 6 or 7 years, asking for an extension; and this process is going to drag on, in agony. It is going to deny the hope to the black citizens who have been assured that, yes, we are going to do this for you.

However, let us assume that all that were not so and that the Senate went along and approved this seriously flawed House Joint Resolution 554. Where would the next pressure come from? Puerto Rico? Guam? The Virgin Islands? The Pacific Trust Territories? You can count on it, Mr. President.

This resolution has so many defects of a constitutional nature that its enactment and ratification will invite unending litigation because of the serious omissions in this legislation—omissions that show clearly that it was drafted without thought as to all the constitutional implications.

Then, too, the proponents of this measure talk about the 700,000 population of the District of Columbia. But I do not recall that anybody has been able to

identify the untold thousands of residents of the District who maintain their legal residencies and vote in various States. Are we really talking about two Senators from 700,000 population, or are we talking about two Senators for 600,000 population, or are we talking about two Senators for 500,000 population? What are we really talking about? The answer to that is that nobody seems to know or care what we are talking about. There is just a mad scramble for political advantage. That is what it boils down to.

If this amendment were approved, any State could challenge—and I jolly well expect that many will challenge—the constitutionality of the process in the Supreme Court of the United States. Article V says that no State, without its consent, shall be deprived of equal suffrage. If one State withholds its consent, that State will have grounds to challenge the adoption of the amendment in the court. And we might as well count on it.

So the constitutional ramifications of this amendment are so complicated and so unjust and so improper that surely we have to realize the fact that this amendment has little chance of ratification by the required 38 States.

I do not like to be in the position of having to come here to say these things this morning. I would much have preferred to stay out of it. But I have read and I have listened to specious arguments to the point that I have had my fill. Somebody needs to speak out. Whether or not I am heeded, I want it on the record that I said this morning, Monday, August 21, 1978, that this amendment is not going to be ratified by the requisite number of States, and that the proponents of this amendment know it.

Mr. President, it is very clear to the Senator from North Carolina that any Senator who is sincere about the voting rights of the residents of the District of Columbia should have supported the Melcher amendment. There was the Senate's opportunity to show good faith to the residents of the District of Columbia. Then was when we had the chance to do something. But the Melcher amendment was tabled, Mr. President. Every Senator who voted to table that amendment was voting against realistic and fair representation for the people of the District of Columbia.

Mr. President, I ask unanimous consent that the rollcall vote on the tabling of the Melcher amendment be printed at this point in the RECORD, so that it will be clear in the future which Senators voted affirmatively to table the Melcher amendment, and kill hope for a realistic constitutional amendment.

There being no objection, the vote was ordered to be printed in the RECORD, as follows:

ROLLCALL VOTE NO. 329 LEGISLATIVE

YEAS—52

Bayh, Bellmon, Bumpers, Robert C. Byrd, Case, Chafee, Chiles, Church, Clark, Cranston, Culver, Danforth, Dole, Durkin, Eagleton, Glenn, Griffin, Hart, Haskell, Hathaway, Heinz, Hodges, Hollings, Huddleston, Humphrey, Inouye, Javits, Kennedy, Leahy, Magnuson, Mathias, Matsunaga, McGovern, Metzenbaum, Morgan, Muskie, Nelson, Packwood, Ribicoff, Riegle, Sarbanes, Sasser, Schmitt, Schweiker, Sparkman, Stafford, Stevenson, Stone, Talmadge, Thurmond, Weicker, and Williams.

NAYS—33

Allen, Bartlett, Bentsen, Burdick, Harry F. Byrd, Jr., Cannon, Curtis, DeConcini, Domenici, Ford, Garn, Gravel, Hansen, Hatch, Paul G. Hatfield, Hayakawa, Helms, Jackson, Laxalt, Long, Lugar, McClure, Melcher, Nunn, Pell, Proxmire, Randolph, Roth, Scott, Stevens, Tower, Wallop, and Zorinsky.

NOT VOTING—15

Abourezk, Anderson, Baker, Biden, Brooke, Eastland, Goldwater, Mark O. Hatfield, Johnston, McIntyre, Moynihan, Pearson, Percy, Stennis, and Young.

So the motion to lay on the table UP amendment No. 1664 was agreed to.

Mr. HELMS. Mr. President, the Melcher amendment, for the first time would have given full representation in the House of Representatives to the people of the District of Columbia. Furthermore, it would have given senatorial representation to the people of the District of Columbia by allowing them to vote in the State of Maryland for two senatorial candidates—that is all those except the undetermined number of residents of the District of Columbia who maintain their official residences in the various States of the Union.

I repeat: This proposition, Mr. President, is a charade. It is misleading the black citizens—not only of the District of Columbia but also the black citizens of North Carolina and all other States. That is why I am here speaking this morning, because I want it a matter of record that they were put on notice as to what is going on.

The Melcher amendment, which was rejected by the Senate last week, would have given senatorial representation to the people of the District of Columbia. It would have allowed them to vote in the State of Maryland for senatorial candidates. But more important than that, it would not have diluted the representation of the 50 States by giving representation to an entity that is not a State.

So we go back to the question of who is next if the Senate makes the mistake of approving this proposed constitutional amendment. Guam? Puerto Rico? How much further would the proponents go in diluting the representation of the existing 50 States? I say again that the Melcher amendment, which was defeated last week by this body, would not—would not—have diluted the representation of the 50 States by giving representation to an entity that is not a State. No State could claim under article V of the U.S. Constitution that its right to equal suffrage had been diluted, had the Melcher amendment been approved.

The PRESIDING OFFICER. The Senator's time has expired. Who yields time?

Mr. SCOTT. Mr. President, I am glad to yield an additional 5 minutes to the distinguished Senator from North Carolina.

The PRESIDING OFFICER. The Senator is recognized for 5 minutes.

Mr. HELMS. I thank the Senator.

Mr. President, had the Melcher amendment been approved, no precedent would have been set for further dilution by granting representation in the Senate to the Virgin Islands or Guam, or any other entity.

In addition, the Melcher amendment would have made it possible for the District of Columbia to be truly self-governing with respect to these rights and these powers.

Finally, the Melcher proposal would have based the District's vote in the electoral college upon population, based upon the number of Representatives. It is plain, therefore, that the Melcher amendment would have gone much further to restore civil rights to the people of the District of Columbia than the original proposal that is now before us.

As the vote was proceeding last week on the Melcher amendment, I found myself wondering, where are the Senators who are so worried about civil rights of the residents of the District of Columbia? Why were they not rushing forward to support the substitute of the Senator from Montana? Why did they not support a proposal that could reasonably be expected to be ratified by the requisite number of States? Why did they support the preposterous idea that entities which are not States should be entitled to the privileges of States?

Mr. President, I thank the able Senator from Virginia for yielding time to me.

Let me say, in conclusion, that I have not intended to reflect unkindly upon any Senator who disagrees with me, but I think that, in the rush of the politics-as-usual process, there has been a little slippage in terms of intellectual integrity. My point here is: At least let us level with the residents of the District of Columbia who believe or who have been led to believe that, if the Senate approves this measure, the citizens of the District of Columbia will be well on their way to obtaining representation in the Senate.

I say again that I cannot believe there is one Senator who belongs to this body today who truly believes that the requisite number of States will ratify this amendment.

I thank the Senator from Virginia.

Mr. SCOTT. Mr. President, the distinguished Senator from Idaho (Mr. MCCLURE) is on his way to the Chamber.

I suggest the absence of a quorum and ask unanimous consent that time not be charged against either side.

The PRESIDING OFFICER. Is there objection.

Mr. KENNEDY. I object.

The PRESIDING OFFICER. Objection is heard.

Who yields time?

Mr. SCOTT. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. On whose time?

Mr. SCOTT. On my time.

The PRESIDING OFFICER. The clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. SCOTT. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SCOTT. Mr. President, we have a number of amendments to the joint resolution presently before us, and there is

one that I was thinking about that has not been put in writing, but I have asked that it be drafted. That would be an addition to section 2, and it would eliminate some uncertainty as to who would appoint a Senator from the District of Columba in the event that a vacancy should occur.

We know that under the Constitution the Governor, the chief executive of the State, may make an appointment if he is authorized by the State legislature to make an appointment. And certainly if he is not authorized why he cannot do it.

The question arises, then, what is the legislature of the District of Columbia?

We have in article I, section 8 of the Constitution that exclusive legislative jurisdiction resides in the Congress of the United States. That would mean both Houses of Congress. So, both Houses of Congress under the Constitution will have to decide whether or not the mayor of the District of Columbia would have the authority to make an appointment to the Senate from the District of Columbia in the event a vacancy should occur. In the absence of some provision in this proposed constitutional amendment, it could well be argued that the City Council for the District of Columbia, being comparable to the State legislature, could decide who should be appointed or whether or not the Mayor should have the power to make appointments to the Senate in the event of a vacancy.

So I am having an amendment prepared that would clarify this.

I hope that the distinguished Senator from Massachusetts might give consideration to this and perhaps we could agree to accept an amendment for the purpose of clarification.

We have a number of other amendments, Mr. President, and I believe that some of them are good amendments. I know that the distinguished Senator from Idaho (Mr. McCLURE), who I am told is on his way to the Chamber, has 21 different amendments. He does not propose to offer all of these amendments, but, as I understand, he intends to propose some of the amendments and certainly it is a question for him to decide how many, if any, of the amendments he will offer.

He has time under the bill to take 20 minutes for each of seven amendments that he indicated, during the compromise we worked out, he would offer.

This amendment that I spoke of a few minutes ago that I have is with regard to the abortion question. This abortion question is something that has taken an awful lot of time of the Senate. We have debated it pro and con. The Senate has been fairly evenly divided. Frankly, I voted on both sides, on one side on most occasions and on the opposite side on another occasion.

Now, I did that just to resolve the question so that we could terminate the debate that was taking up so much time in the Senate.

I can see some merit on both sides of the abortion question. But my proposed amendment would not address this bill to the merits of this question. It provides this, after the preface:

The power to regulate the circumstances under which pregnancy may or may not be terminated is reserved to the respective States and territories of the United States.

That is where it did reside prior to a Supreme Court decision of a few years ago.

I believe this is an appropriate amendment, Mr. President. Under our dual system of sovereignty, the Federal Government, being a Government of limited power, has only the power that is expressly given to it or may reasonably be implied from the powers expressly given, and the powers not given to the Federal Government are reserved to the States and to the people.

It is under this concept that those things that are closest to the people, the question of marriage and divorce, the question of property rights, there are so many things that under the police power of the States are reserved to the people of the respective States.

AMENDMENT NO. 3467

(Purpose: To propose an amendment to the Constitution relating to the termination of pregnancy)

Mr. SCOTT. Mr. President, I call up my amendment No. 3467 and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Virginia (Mr. SCOTT) proposes an amendment numbered 3467.

The amendment is as follows:

At the end of the joint resolution, add the following:

SEC. 2. The following article is proposed as an amendment to the Constitution of the United States, to be valid only if ratified by the legislatures of three-fourths of the several States within seven years after the date of final passage of this joint resolution:

"ARTICLE —

"The power to regulate the circumstances under which pregnancy may or may not be terminated is reserved to the respective States and territories of the United States.".

Amend the title so as to read: "Joint resolution proposing amendments to the Constitution to provide for representation of the District of Columbia in the Congress, and to reserve to the States the power to regulate the circumstances under which pregnancy may or may not be terminated.".

Mr. SCOTT. Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is not a sufficient second.

Mr. SCOTT. Mr. President, since there is not a quorum, I ask that time not be charged against either side and I suggest the absence of a quorum until we can get a sufficient number of Senators on the floor.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The clerk will call the roll.

Mr. KENNEDY. Reserving the right——

Mr. SCOTT. Mr. President, I renew my request.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. SCOTT. Mr. President, I have no desire to prolong the debate on this amendment. I do not know whether the distinguished Senator from Massachusetts desires to discuss it or not. I am ready to vote on it.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order to have the yeas and nays on a tabling motion in just a minute.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, this amendment would kill the District of Columbia representation amendment. I think the Members of this body, as we have seen from past votes, are divided as to what the proper policy on this issue should be. This amendment is really not appropriate as an add-on amendment.

As I mentioned previously, the only time that any constitution amendments were ever considered en bloc was at the time of the submission of the Bill of Rights to the States. Since that time, historically, amendments have been considered individually, one at a time, and it seems to me to be a sound historical precedent.

If the Senator wishes to address this issue, he ought to do so in and of itself. For the reasons I have mentioned here I will move to table his amendment.

Mr. SCOTT. Mr. President, will the Senator withhold his motion temporarily?

Mr. KENNEDY. I will withhold it, reserving the right to the floor. I will yield for a brief comment from the Senator.

Mr. SCOTT. Mr. President, this is an amendment that was considered by the subcommittee of the Senate Judiciary Committee. It failed to carry by an equal vote. The members of the subcommittee were equally divided. So it is a matter that has been under consideration. It was during the 94th Congress that it was considered in the Judiciary Committee.

The matter we have before us today we have had no vote on in the Judiciary Committee. So I think there is more credence to the offering of this amendment than to the amendment that is presently before us, which is a House version of a joint resolution rather than a Senate resolution.

I appreciate the distinguished Senator's delaying his motion to table so that I might have time to speak on this.

Mr. KENNEDY addressed the Chair.

Mr. THURMOND. Mr. President, will the Senator yield me just 2 or 3 minutes?

Mr. KENNEDY. I yield 3 minutes to the Senator from South Carolina.

Mr. THURMOND. Mr. President, I rise in opposition to this amendment being considered at this time and would favor a tabling motion for this reason: I agree with the able and distinguished Senator from Virginia concerning the merits of this amendment. I think he has put his finger right on the question concerning

the solving of the abortion matter from the Federal standpoint.

His amendment reads this way:

The power to regulate the circumstances under which pregnancy may or may not be terminated is reserved to the respective States and territories of the United States.

Mr. President, I was disappointed when the Supreme Court handed down a decision on this question. I was disappointed that they took jurisdiction of this question. The word "abortion" is not even found in the Constitution of the United States. Therefore, the Federal Government really had no jurisdiction in this field, because the Constitution is clear that matters not specifically delegated to the Federal Government are reserved to the States.

Abortion has not been so delegated. Therefore, it is reserved to the States. But since the Supreme Court entered this field anyway, then I feel we should pass an amendment to turn it back to the States. I thoroughly agree with the merits of this amendment as proposed by the distinguished Senator from Virginia.

However, Mr. President, this is a very important question. It is one that ought to stand on its own merits. It is one that should be considered separately, and I am not too sure whether it is offered here to stop the proposed amendment or to be considered on its own merits.

At any rate, whatever the purpose is, I agree with the distinguished Senator from Virginia on this amendment, but I do not think this is the place to offer it. I think he ought to offer it separately and let it be considered separately. I would support it if that is the case. I will vote to table it because I think the amendment is being offered at the wrong time.

Mr. KENNEDY. Mr. President, I thank the Senator from South Carolina for his comments.

As the Senator from Virginia pointed out, the vote was evenly divided in the Subcommittee on The Constitution. I think the issue also divides the Senate.

This amendment for D.C. representation has been overwhelmingly accepted by the House of Representatives. This is the next-to-final action that has to be taken on that issue. If it is approved by the Senate, it goes to the States for ratification.

Therefore, because of the reasons I mentioned earlier, I renew my motion to table the amendment of Mr. SCOTT.

The PRESIDING OFFICER. The question is on agreeing to the motion of the Senator from Massachusetts to lay on the table the amendment of the Senator from Virginia.

The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

(Mr. GLENN assumed the chair.)

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Minnesota (Mr. ANDERSON), the Senator from Indiana (Mr. BAYH), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from California (Mr. CRANSTON), the Senator from Iowa (Mr. CULVER), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Rhode Island (Mr. PELL), the Senator from Maryland (Mr. SARBANES), the Senator from Tennessee (Mr. SASSER), the Senator from Illinois (Mr. STEVENSON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I also announce that the Senator from New Hampshire (Mr. DURKIN) is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. BAKER. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Kansas (Mr. DOLE), the Senator from New Mexico (Mr. DOMENICI), the Senator from Utah (Mr. GARN), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maryland (Mr. MATHIAS), the Senator from Illinois (Mr. PERCY), the Senator from Vermont (Mr. STAFFORD), and the Senator from Alaska (Mr. STEVENS), are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD), would vote "yea."

The result was announced—yeas 48, nays 19, as follows:

[Rollcall Vote No. 332 Leg.]

YEAS—48

Bentsen	Hollings	Nunn
Brooke	Huddleston	Packwood
Byrd, Robert C.	Jackson	Pearson
Cannon	Javits	Proxmire
Case	Kennedy	Randolph
Chiles	Leahy	Ribicoff
Clark	Long	Riegle
Danforth	Lugar	Schmitt
Ford	Magnuson	Sparkman
Glenn	Matsunaga	Stennis
Gravel	McGovern	Thurmond
Hart	Melcher	Wallop
Haskell	Metzenbaum	Weicker
Hathaway	Morgan	Williams
Hayakawa	Moynihan	Young
Hodges	Muskie	Zorinsky

NAYS—19

Baker	Eagleton	Nelson
Bartlett	Goldwater	Roth
Biden	Hansen	Schweiker
Byrd, Harry F., Jr.	Hatch	Scott
	Helms	Stone
Church	Laxalt	Tower
Curtis	McClure	

NOT VOTING—33

Abourezk	Domenici	Johnston
Allen	Durkin	Mathias
Anderson	Eastland	McIntyre
Bayh	Garn	Pell
Bellmon	Griffin	Percy
Bumpers	Hatfield, Mark O.	Sarbanes
Burdick	Hatfield, Paul G.	Sasser
Chafee	Heinz	Stafford
Cranston	Humphrey	Stevens
Culver	Inouye	Stevenson
DeConcini		Talmadge
Dole		

So the motion to lay on the table amendment No. 3467 was agreed to.

(Later the following proceedings occurred:)

Mr. EAGLETON. Mr. President, I ask unanimous consent that on vote No. 332, amendment No. 3467, my vote be recorded as being "no" rather than "aye."

Mr. ROBERT C. BYRD. Reserving the right to object, the Senator knows I am not going to object, but for the record, the Senator has stated that this would not change the outcome. He did vote and, under the rule, the Senator can change his vote, if he has voted.

So, I have no objection.

The PRESIDING OFFICER. Without objection, it so ordered.

(The above rollcall vote reflects the foregoing order.)

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. METZENBAUM. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Who yields time?

UP AMENDMENT NO. 1691

(Purpose: To authorize a State to rescind its ratification prior to adoption of the proposed constitutional amendment)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment No. 1691.

Mr. McCLURE. Mr. President, I wonder if we can have order so that Members can hear the amendment?

The PRESIDING OFFICER. May we have order in the Senate? Will the people wishing to converse please retire to the cloakrooms or the lobbies? The Senator's point is well taken. Will all those not conversing please take their seats or retire to the cloakrooms?

The clerk will state the amendment.

The assistant legislative clerk read as follows:

On page 1, line 9, after "Congress" insert "(but no such ratification by a legislature shall continue to be effective or counted toward the necessary number of ratifications on and after the date of a rescission by the legislature of that ratification, unless this article of amendment has been adopted prior to the date of that rescission)".

On page 2, line 16, after "submission" insert "(but no such ratification by a legislature shall continue to be effective or counted toward the necessary number of ratifications on and after the date of a rescission by the legislature of that ratification, unless this article of amendment has been adopted prior to the date of that rescission)".

UP AMENDMENT NO. 1692

Purpose: To prohibit a State from rescinding its ratification of the proposed constitutional amendment.

Mr. McCLURE. Mr. President, I ask unanimous consent to withdraw that amendment and submit another amendment which I now send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Is there objection?

Will the Senator please use his microphone?

Mr. McCLURE. I ask unanimous consent to withdraw that amendment and submit another amendment which I have sent to the desk and ask the clerk to report.

The PRESIDING OFFICER. Is there objection? Without objection it is so ordered. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1692.

On page 1, line 9, after "Congress" insert "(but no such ratification once made by a State legislature shall be subject to rescission)".

On page 2, line 16, after "submission" insert "(and no such ratification once made by a State legislature shall be subject to rescission)".

Mr. McCLURE. Mr. President, I presented the amendment in that manner so that the Senate could see the alternative that might be presented to us for consideration. As you know, Mr. President, we are involved at this moment in a nationwide debate with respect to the equal rights amendment. One of the debates concerning that equal rights amendment is whether or not a State legislature, once having ratified the proposed amendment, has the right to rescind that ratification, and if they have taken the action to rescind the ratification which they had earlier made, will that be honored by the Congress in the computation of whether or not there have been a sufficient number of States ratifying the amendment.

The first amendment which I offered and then withdrew said very clearly that the States would have the right to consider the second time and change their mind by rescinding a prior ratification. I have withdrawn that amendment.

Mr. SCOTT. Will the distinguished Senator yield for a unanimous-consent request?

Mr. McCLURE. I am very happy to yield to my distinguished friend.

Mr. SCOTT. Mr. President, I am advised that under the previous unanimous-consent agreement, the time allotted to me, only a few minutes remains of that time. I have talked with the distinguished majority leader and the distinguished Senator from Massachusetts, the floor manager of this proposal. I ask unanimous consent, as to 30 minutes of the time that is allocated to me for tomorrow, that I be permitted to utilize it today. Also, Mr. President, I ask unanimous consent that the distinguished Senator from Massachusetts yield 10 minutes to the Senator from Montana (Mr. MELCHER) and I would yield 20 minutes to Mr. MELCHER of the time that is allotted to us respectively so that Senator MELCHER would have a total of 30 minutes.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. SCOTT. I thank the distinguished Senator.

Mr. McCLURE. Mr. President, after having withdrawn the amendment which would have clearly stated that the States had the right to rescind a prior ratification of this amendment, I submitted the amendment that says the alternative, that says the States do not have the right to rescind. People to whom I have been talking and with whom I have discussed the matters pending on this bill are afraid that the submission of either of these amendments will inevitably get involved in the debate over the equal rights amendment, and it is not my purpose to do that.

I know that in discussing the question of rescission, it is inevitably involved in our thinking and we certainly cannot avoid some consideration of this other issue. But I think, as we prepare to submit a constitutional amendment to the people of the United States for action by the State legislatures, that we ought to be as clear as we can be about what we intend at the time we submit it to the State legislatures. We should not wait until a period of time has expired and we are confronted with a specific case as to whether it will aid or prejudice the passage of an amendment or whether it will put more or less pressure upon a given State legislature. We ought to make the decision now as to what it is that we intend to do. What is it that we, as the Congress of the United States, have in mind? What are the rules under which we will determine whether or not that amendment has been ratified?

It is my judgment, Mr. President, that one of the issues which must be considered as we go through this proposed amendment is whether or not we will recognize the right of a State to take a second look. The arguments must inevitably follow the following line: Those who do not wish a State to have that right must inevitably say that, the States once having acted, the Constitution provides that they have the right to act to approve a constitutional amendment, but the Constitution does not specifically say that they have the right to remove that approval.

The argument on the other side of that issue is one of equity and fairness, as well as a construction of the Constitution which says that, certainly, if a legislature can consider and reject an amendment and then reconsider and reject an amendment, and reconsider and reject an amendment, and reconsider and then ratify it and that stops the reconsiderations, it is a one-way street. People who believe in equity and fairness, as well as a proper construction of the Constitution, will say that the State legislatures cannot be constrained in their opportunity to consider, reconsider, and reconsider whatever actions they may wish to take during the time limited by the submission to them and up until the time that the ratification has been certified as having been adopted by the total number of States required by the Constitution to ratify a proposed amendment to the Constitution.

Mr. President, my purpose in offering the amendment is to give the Senate the opportunity to go on record now as to what they desire to do with respect to the question of rescission as it relates to this specific amendment. It is not my deside to try to prejudice the debate over whether or not rescission should be allowed in the equal rights amendment. Every amendment is submitted separately to the people of the United States. Each one is submitted under the rules and subject to the considerations in each individual proposal.

The equal rights amendment was submitted under one resolution; this proposal is being submitted under another. It is not necessary, under the Constitution, that what we decide on this particular proposal is necessarily binding upon the other proposals. It certainly, however, will have some effect upon the considerations by future Congresses and, perhaps, by the courts with respect to the right of the States to reconsider not just the actions that they took in rejecting a proposed amendment, but also the right to reconsider the action taken by a State legislature in supporting the proposed amendment.

Mr. President, I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, as I understand it, we are under the previous time agreement. Am I correct? Twenty minutes for the proponents of the amendment, 10 minutes for the opposition?

The PRESIDING OFFICER. That is correct.

Mr. KENNEDY. I yield myself 5 minutes.

Mr. President, I am at somewhat of a loss to understand the reasoning of the Senator from Idaho. First of all, he has an amendment that permits the rescission; then he withdraws that and submits an amendment to prohibit rescission. He is the sponsor of both amendments, so I am really not quite sure what the strategy is on an issue of very great importance to the Constitution, as well as to the intent of the Founding Fathers.

If we are serious about this particular amendment, and I am sure the Senator is, I think that any fair interpretation of the constitutional and legal history would indicate that the language reflects the law of the land at the present time. I am satisfied to that effect, having given it study as a member of the Committee on the Judiciary. We reviewed the issues and the constitutional arguments that were made to the committee on the issue of rescission. Of course, the issue of rescission as it applies to this amendment is quite a bit different from the same issue as it applies to the equal rights amendment.

Nonetheless, I believe, Mr. President, most of the testimony that the Committee on the Judiciary has heard on this issue would be that the language of this amendment currently is the law of the land. Since it is the law of the land, it does not seem to me that this particular amendment is required to be included. Another reason, of course, would be that its acceptence by us it would require acceptance by the House of Representatives or a conference, and from what we have seen over the period of the last few days, perhaps an extended comment by Members of the Senate if a conference report were to be voted upon.

I feel, Mr. President, that this amendment is merely a restatement of the current law. I do not think it is necessary,

nor do I think it is desirable, so I shall oppose the amendment and, at the appropriate time, make a motion to lay it on the table. I do not know whether the Senator wants additional time to speak on it. I do not want to foreclose that opportunity. If he does not, I intend, at an appropriate time, to make such a request.

Mr. McCLURE. I had hoped the Senator would not offer a motion to table, although I recognize that he has the right, under the rules of the Senate, to do so. Aside from his own sense of strategy, I could appeal to his sense of fairness in allowing us to have a vote on the issue, rather than a vote on the motion to table.

Unlike the Senator from Massachusetts, however, I do not believe that the law of the land is set on this issue. I think any careful reading of the precedents that apply would indicate that the issue is in doubt. The courts have not been clear on that issue. They have not ever ruled in clear fashion on that issue, and it will undoubtedly be the subject of court challenges if, as a matter of fact, there is a rescission that is not recognized by the Congress unless the Congress at this time, as a part of this submission, says it cannot be rescinded, which I think would lay to rest the possibility of court challenges.

But it is my understanding of the law that it is not well set, that in all likelihood the courts would be asked to rule as they have not clearly ruled in the past and that they might again be pushed back into the Congress for decision, which I would view as the most likely result under the current precedents and current rulings of the Supreme Court and the inferior courts of the land.

It is my purpose to avoid having it bounced back to the Congress at some future date, at a time when we would be not involved purely with the constitutional issue of whether or not rescission should be permitted.

But we get involved in all kinds of side and extraneous issues that deal with which States have rescinded, which are likely to, which legislatures can be called upon to reverse their actions in favor of or against a particular amendment.

I think as a matter of policy we ought to state what it is we intend to do.

Mr. President, I do not desire to prolong the debate. But it is my intent to ask for the yeas and nays on the amendment. There are not a sufficient number of Senators on the floor at the moment. I wonder if the Senator from Massachusetts would join with me in getting a sufficient number on the floor that we might get the yeas and nays on the amendment.

Mr. KENNEDY. Yes, but I would just like to make a final comment.

Mr. President, on the question of rescission, which the Judiciary Committee has examined in some considerable detail, I was hopeful my colleague would withdraw this amendment, and the chairman of the Constitutional Rights Subcommittee would be able to join us on the floor at this time, but he is unable to do so.

Nevertheless, the overwhelming opinion of leading constitutional authorities on the issue of rescission is that the issue of rescission is resolved in article V of the Constitution.

The issue of rescission is clearly resolved in article V. If we are going to alter and change article V to any extent, then I think we ought to follow the constitutional process that has been established. We will then have an opportunity in the committees of both the House and the Senate to address that issue.

If this amendment is a restatement of the existing law, it is really unnecessary. I have studied the issue of rescission, and this is my own personal view.

So I do suspect we will probably see this issue presented to us in a different form in several minutes, and the argument will be on that issue again.

For those reasons, Mr. President, I can understand a Senator introducing both sides of the amendment, figuring there must be a majority on one side or the other and, if it is on one side or the other, it may very well be the death of the amendment. I do not conclude that is the motivation of the Senator from Idaho, although I do think if we end up with a complete 180 degrees on the next amendment, that there may be those who feel that way.

But I intend to make a motion to table.

Mr. President, I ask for the yeas and nays on a motion to table.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent it be in order to order the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays on the motion to table.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I move to lay on the table UP amendment No. 1692 of the Senator from Idaho.

Mr. McCLURE. I yield back the remainder of my time.

Mr. KENNEDY. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the motion to lay on the table UP amendment No. 1692 of the Senator from Idaho.

The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mr. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from California (Mr. CRANSTON), the Senator from Iowa (Mr. CULVER), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. McINTYRE), the Senator from Maryland (Mr. SARBANES), the Senator from Alabama (Mr. SPARKMAN), the Senator from Georgia (Mr. TALMADGE), and the Senator from Indiana (Mr. BAYH) are necessarily absent.

I also announce that the Senator from New Hampshire (Mr. DURKIN) is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Oklahoma (Mr. BELLMON), the Senator from Rhode Island (Mr. CHAFEE), the Senator from Kansas (Mr. DOLE), the Senator from Utah (Mr. GARN), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maryland (Mr. MATHIAS), the Senator from Illinois (Mr. PERCY), and the Senator from Vermont (Mr. STAFFORD) are necessarily absent.

The result was announced—yeas 67, nays 5, as follows:

[Rollcall Vote No. 333 Leg.]

YEAS—67

Baker	Haskell	Nelson
Bartlett	Hatch	Nunn
Bentsen	Hathaway	Packwood
Biden	Hayakawa	Pearson
Brooke	Hodges	Pell
Byrd, Harry F., Jr.	Hollings	Proxmire

Bellmon	Garn	McIntyre
Bumpers	Griffin	Percy
Burdick	Hatfield, Mark O.	Sarbanes
Chafee	Hatfield, Paul G.	Sparkman
Cranston		Stafford
Culver		Talmadge

So the motion to table the amendment (UP No. 1692) was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the motion to lay on the table UP amendment No. 1692 was agreed to.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1693

(Purpose: To grant to the people of the District authority to decide how the rights and powers conferred shall be exercised)

Mr. McCLURE. Mr. President, I have

an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1693.

On page 2, line 9, beginning with the comma, strike out all through "Congress." in line 10 and insert a period and the following: "The Congress shall grant to the people of the District the power and authority to establish a mechanism by which the people shall exercise those rights and powers.".

Mr. McCLURE. Mr. President, the purpose of this amendment is to provide clarification and eliminate ambiguities in section 2 of House Joint Resolution 554.

Mr. KENNEDY. Mr. President, does the Senator have an extra copy of the amendment?

Mr. McCLURE. Yes.

Mr. KENNEDY. I thank the Senator.

Mr. McCLURE. I might just mention parenthetically to the Senator from Massachusetts that I talked with him last week and said I would try to get copies of all of these amendments printed in the RECORD. I do apologize to him for failing to have done that on Friday of last week. But we were somewhat involved in a little matter known as the natural gas deregulation bill and the President had a greater call on my time.

The purpose of the amendment is to provide clarification and to eliminate the ambiguity in section 2 of House Joint Resolution 554, in accordance with the intention of the framers of the joint resolution.

The House Judiciary Committee report on this resolution states, and I quote from that report:

Section 2 provides that the people of the District shall exercise the rights and powers conferred by the article and that the Congress, consistent with its power of exclusive legislation (art. I, sec. 8, cl. 17), shall determine the mechanism by which the people of the District exercise those rights and powers. The language of section 2 was chosen to insure that, for example, Congress itself would not ratify constitutional amendments on behalf of the District, set district lines, fill vacancies or choose electors for the offices of President and Vice President; such decisions would be made by the people of the District, but consistent with its article I power the Congress would determine the structure by which those determinations would be made.

The last phrase of section 2—

and as shall be provided by the Congress—

Read together with the first part of the sentence, implies that the exercise of the foregoing "rights and powers" must be made jointly with the "people of the District" and Congress, each holding veto power over the other. The effect of this language might be, for example, that Congress would be required to vote twice on the ratification of a constitutional amendment, first in discharging its constitutional role under article V in proposing an amendment and a second time as a sort of legislative body—since the District lacks a State legislature—endorsing the action taken by the "people of the District" under the proposed amendment.

I think it is obvious that it would be ridiculous to expect ratification of an amendment that starts out with one affirmative vote, because Congress having voted to submit it also votes to affirm it on behalf of the people of the District.

The intent of section 2 was apparently to provide that Congress may enforce the proposed article by appropriate legislation as has been provided in other constitutional amendments.

The intent of section 2 was apparently to provide that the Congress may enforce the proposed article by appropriate legislation, as has been provided in other constitutional amendments. However, the language of House Joint Resolution 554 is unclear on this point and is so ambiguous that it does not accomplish its intended purpose. Such poor draftmanship and ambiguity do not belong in a proposed amendment to the Constitution.

My amendment would prevent confusion in interpretation and assist in the proper execution of the amendment if it is adopted. It would enable Congress to adopt future enabling legislation to provide the District with the necessary authority and power to carry out the purposes of the amendment.

Mr. President, I think it is obvious that the amendment is needed to clarify what the House of Representatives in its report said was the intention of the amendment but which the amendment does not on its face accomplish.

Mr. President, I urge the adoption of the amendment and urge the managers of the proposed legislation to consider seriously the issue that has been raised, and I hope that they will agree with the amendment.

Mr. President, I reserve the remainder of my time.

Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays at this time.

The PRESIDING OFFICER. The yeas and nays on what?

Mr. McCLURE. On this amendment.

Mr. KENNEDY. On this amendment, and I also ask that it be in order that the yeas and nays be in order for a tabling motion as well.

The PRESIDING OFFICER. Without objection, is is so ordered.

Mr. McCLURE. Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Is there a sufficient second on the motion to table? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, the amendment of the Senator from Idaho, as I understand it, would provide that Congress shall grant to the District the power and authority to establish the mechanism by which the people shall exercise their rights and powers under the amendment.

In effect, what he is doing is to give the District the power to implement the provisions of the amendment. For example, the District would divide the boundaries of the various congressional districts, the filling of vacancies, and other matters that would be related to representation in Congress and other issues under the amendment. House Joint Resolution 554 gives Congress the power to decide these questions in future legislation.

Under the language in the current amendment, the power over these matters is retained in the Congress of the United States. The language of section 2 states:

The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of government and as shall be provided by the Congress.

The intent of the section is to require all such issues to be resolved by future legislation enacted by Congress. Such legislation is to provide for appropriate participation of the people of the District. But within that general mandate, the power of Congress would be plenary, by contrast, the Senator's amendment would confer this power on the District itself, and eliminate the oversight of Congress.

That is an unwise step to take in the amendment. What the Senator seeks could be accomplished by statute, later, after the amendment is adopted. For the purpose of this amendment, it would be wise to retain that authority and that power in the Congress of the United States.

I welcome the confidence that the Senator from Idaho has in the ability of the people of the District to make these judgments. By the amendment, he suggests that the people in this community ought to be able to make the regulations and rules implementing the amendment. In effect, the Senator's amendment is a proposal for home rule.

But it does seem, because of the particular nature of the Federal district, to be desirable at this time to retain the final authority in the Congress of the United States, and to decide these questions in the future by legislation, rather than turn over blanket authority in advance.

So, Mr. President, I will offer a motion to table after the Senator from Idaho has made whatever additional comments he would like to make.

Mr. McCLURE. Mr. President, I understand what the Senator from Massachusetts is saying. I hope people will understand that the junior Senator from Idaho, who has been trying to say all along throughout all of this debate and the comments that have been made outside of this Chamber with respect to the pending resolution, that I want the people of the District of Columbia to have full voting representation in the Congress of the United States. That is what the people on the other side of the issue have been saying, too.

Now, curiously enough, when I offer an amendment that says that we are really going to make it full voting representation, these sponsors of the resolution say:

Oh, but we don't trust them quite that much. We have to control what they do

under this amendment. We cannot let them have full rights under this amendment. We have to retain in the Congress the right to direct how they exercise their voting rights.

That seems to me to be so totally absurd as to be beyond the realm of intelligent debate. If we really want to give the people of the District of Columbia full voting rights that other people in this country enjoy, as the junior Senator from Idaho does want to give them, then we should not condition that upon saying, "All right, but we in Congress are going to continue to control how you do it." I do not think that is what the people of the District want. That is certainly not what the junior Senator from Idaho wants.

If we are going to give them a full right to vote, they ought to have the full control over the way in which they vote. I do not believe Congress ought to retain that right, on the one hand, while, on the other hand, saying, "We are giving you the same representation, the same right to vote, as everyone else in the United States has."

I think on the face of it the resolution as submitted to us by the House of Representatives is ambiguous because it does imply that Congress can retain, if it wishes, unto itself the right to do what other citizens throughout the country can do on their own behalf. What an absurdity it would be if, as a matter of fact, Congress should submit an amendment to a resolution for an amendment to the Constitution of the United States and, at the same time, say, "We are retaining the rights on behalf of the people of the District of Columbia to determine whether or not it will be approved."

That is exactly what I understand the import of the argument against the amendment to be.

I do not think that is what the resolution is intended to say. It is clear from the House report that the managers on the part of the House did not intend to say that. They intended to say the opposite. They realized they had not said it clearly in the language of the amendment, so they went to the trouble of writing in the report what it was they meant.

All I am trying to do is on the face of the resolution and the amendment what is clearly the intention of the House of Representatives and what is clearly the intention of the junior Senator from Idaho, and what I believe to be clearly the intention and desire of the people of the District of Columbia.

I am sorry that the managers of the bill have not seen fit to adopt the amendment. While I understand, if indeed they do not wish to, the motion to table will be made, I assume, that as things have been going, the motion to table will probably be agreed to. I hope not.

Mr. President, if the Senator is prepared to offer the motion to table I will be prepared to yield back the remainder of my time.

Mr. KENNEDY. I just want to make a brief comment. If the Senator from Idaho will refer to the Constitution, if he looks at the 18-year-old vote amendment, the XXVI amendment. The amendment states:

> The right of citizens of the United States, who are eighteen years of age or older, to vote shall not be denied or abridged by the United States or by any State on account of age.

Section 2 says:

> The Congress shall have power to enforce this article by appropriate legislation.

Or, take the XV amendment which says:

> The right of citizens of the United States to vote shall not be denied or abridged by the United States or by any State on account of race, color, or previous condition of servitude.

Section 2 says:

> The Congress shall have power to enforce this article by appropriate legislation.

Then in the XIX amendment, giving the women the right to vote, it says the same thing. The fact of the matter is in instance after instance, that has been the basic boilerplate language of constitutional amendments. Congress is given the power to enforce the new constitutional rights. There might never have been a voting rights act if Congress had not been given the power to enforce the XV amendment. Unless Congress retained that kind of authority and power, the job could not be done. It is boilerplate language which has been accepted time and again to secure the effective implementation of constitutional rights. It has been the case in instance after instance in the approval of various constitutional amendments to insure that what has been supported by two-thirds of the Members of Congress and three-quarters of the States, will actually be implemented. Congress has retained this authority, and it has properly done so.

That is the reason for it. There will always be the opportunity to turn those powers back at any time in the future. But in terms of the fashioning and shaping of this particular constitutional amendment, we have accepted what has been boilerplate language in past constitutional amendments. The language is not identical to the language used before, but that is the clear intent.

Mr. McCLURE. Mr. President, I do not mean to prolong the debate, but I must respond to my friend from Massachusetts by pointing out that the language he has referred to in other amendments is not the language which appears in this joint resolution. The language that he quotes is different from the language in the joint resolution.

The second thing that must be pointed out is that the power he was talking about is not the right to write the statute on behalf of the people, but the right of Congress to enforce the provisions. There is a vast difference between enforcing the provisions and actually doing it for them on their behalf.

If, as a matter of fact, it had been simply the desire of the framers of the resolution to enforce the provisions, they would have said so. But, curiously, they did not do that, and I have to assume that that difference was not casual or inadvertent if, as a matter of fact, it is being argued now that my amendment is inappropriate. Because there seems to be a conscious desire to withhold from the people of the District the right to vote the way they want to vote, or the right to set the lines the way they want to set them.

It seems to me that was not the intention of the people in the House of Representatives, who went to very great pains in committee to write in their report precisely the opposite. As a matter of fact, then, there is a difference between the language in the joint resolution as before the Senate and the language of other ratifications of other amendments, that contain the enforcement provision which this one does not contain, but this one contains, rather curiously, the lack of either that language, and apparently the intention on the part of some, though certainly not this Senator and I think not the House of Representatives, to imply that Congress has the right to retain to itself the power to tell the people of the District of Columbia how it will come out, and the power in the Congress of the United States to vote on behalf of the District of Columbia on constitutional amendments.

Mr. President, if the Senator is prepared to make his motion to table, I would be prepared to yield back the remainder of my time.

Mr. KENNEDY. Just this further point, Mr. President——

Mr. McCLURE. I then reserve the remainder of my time.

Mr. KENNEDY. Mr. President, section 2 of this amendment reads as follows:

> The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of government, and as shall be provided by the Congress.

The word "and," which is the eighth word from the end, means "in such manner." As a matter of drafting expertise, I think "in such manner" might have been preferable to the word "and"; but, this is the clear intent, and it was also the intent of the House of Representatives in approving the amendment.

In response to the merits of the argument of the Senator from Idaho, the Senator is quite correct that the language is different from the language I read about retention of the power by Congress to enforce the various other constitutional amendments; but the sum and substance of the language in the joint resolution is the same. It should be interpreted in the same way. It retains authority in Congress to insure that the rights conferred by the amendment are actually implemented in the way they should be. By contrast, the Senator's amendment would turn over all such power to the District.

Congress could act by statute to carry out the Senator's amendment. Congress could delegate all its powers of implementation to the District. But we should not lock such a rule into the amendment itself. Previous constitutional amendments have retained the final authority over implementation for Congress. It is desirable in this case also.

Mr. BAYH. Mr. President, will the Senator permit one observation?

Mr. KENNEDY. I yield——

Mr. BAYH. A couple of minutes would be fine.

The PRESIDING OFFICER. The Senator from Massachusetts has 1 minute remaining.

Mr. KENNEDY. I yield 3 minutes on the bill.

The PRESIDING OFFICER. Time cannot be taken off the bill on these amendments.

Mr. BAYH. I do not think anything I want to say is of great importance, anyway.

Mr. KENNEDY. I ask unanimous consent to yield 3 minutes on the bill.

The PRESIDING OFFICER. Is there objection? Without objection, the Senator from Indiana is recognized for 3 minutes on the bill.

Mr. BAYH. I would just like to point out to our distinguished colleague from Idaho, that I think the thrust of the argument of the Senator from Massachusetts is absolutely on square with everything we have heard in the hearings process over a rather lengthy period of time.

This matter is not a new one to come before Congress; however, it is a new one to actually reach the floor with this degree of legislative history behind us.

The thrust of this is to understand that on this partcular kind of process, the mechanisms of the process must rest with the District. Like all other constitutional amendments, if indeed the State or the District refuses to exercise what is the reasonable intent of the amendment in question, then Congress has the opportunity to have the final word.

By the implementation of this, the election process and all matters of that nature, as the distinguished Senator from Massachusetts has pointed out, shall stay with the District.

Mr. KENNEDY. Mr. President, if I have any further time, I am prepared to yield it back.

Mr. McCLURE. I yield back the remainder of my time.

Mr. KENNEDY. Mr. President, I move that the amendment be laid on the table.

The PRESIDING OFFICER. The question is on the motion to lay on the table the amendment (No. UP 1693) of the Senator from Idaho (Mr. McCLURE). The yeas and nays have previously been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), the Senator from Mississippi (Mr. STENNIS), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that the Senator from New Hampshire (Mr. DURKIN) is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Rhode Island (Mr. CHAFEE), the Senator from Kansas (Mr. DOLE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from Pennsylvania (Mr. HEINZ), the Senator from Maryland (Mr. MATHIAS), and the Senator from Illinois (Mr. PERCY) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 50, nays 28, as follows:

[Rollcall Vote No. 334 Leg.]

YEAS—50

Bayh	Hathaway	Nunn
Bentsen	Hodges	Pell
Biden	Hollings	Proxmire

So the motion to lay on the table UP amendment No. 1693 was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the amendment was laid on the table.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1694

(Purpose: To retrocede the District of Columbia to the State of Maryland, except for lands owned by the United States)

Mr. McCLURE. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. MOYNIHAN). The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes unprinted amendment No. 1694.

On page 2, strike out lines 2 through 10 and insert the following:

"SECTION 1. Except as provided in section 2, the lands comprising the District constituting the seat of the government of the United States on the day before the day on which this article is ratified are retroceded to the State of Maryland.

"SEC. 2. Section 1 shall not apply to lands owned by the United States on the day before the day on which this article is ratified and such lands shall, on and after the day on which this article is ratified, comprise the District constituting the seat of the Government of the United States.

Amend the title so as to read: "Joint Resolution proposing an amendment to the Constitution to retrocede to the State of Maryland all lands within the District of Columbia except lands owned by the United States.".

Mr. McCLURE. Mr. President, this amendment would provide for full retrocession. We touched on this discussion of the retrocession and part of its aspects in the Melcher amendment, but this would provide a complete and full retrocession of all of the area within the District to the State of Maryland except for a small Federal enclave for the seat of the Federal Government.

Mr. President, I offer an amendment which would provide for full retrocession. This proposal would cede back to the State of Maryland the entire District except for a small Federal enclave for the seat of the Federal Government.

The precedent for such action was the District's prior retrocession of lands originally granted by Virginia, constituting the area around the modern city of Alexandria, to the Commonwealth in 1846. That was accomplished by statute; this retrocession would be made by constitutional amendment, thereby requiring the ratification of three-fourths of the State legislatures and avoiding the problems, constitutional or otherwise, inherent in other proposals such as House Joint Resolution 554.

Returning the populated portion of the District to Maryland would afford the residents of the District full voting representation in the Congress through the election of U.S. Representatives and Senators from the State of Maryland.

Retaining a "Federal enclave" would satisfy the provisions of the Constitution and the intention of the framers concerning the seat of government.

Residents of the retroceded area would be able to vote for a Governor, members of the State legislature, and local government officials on the same basis as other residents of Maryland.

Residents of the District would attain, through full retrocession, the full political rights enjoyed by all other citizens of the United States.

Full retrocession can be accomplished without violating the spirit of the Constitution or impairing the Federal system.

The mere fact that the people of the District and Maryland have expressed no interest in this approach is no argument against it. Attention has focused on other constitutional amendments primarily. It is not surprising that District politicians would prefer to have their own U.S. Representatives and Senators. The Constitution should not be arbitrarily amended for every purpose, however questionable. Retrocession is a more reasonable ap-

proach which should be thoroughly examined and discussed before an attempt is made to radically change the Constitution, as House Joint Resolution 554 would do.

Mr. President, I see my colleague from Maryland on the floor and he is on his feet. I assume he will have some comments he wishes to make. Rather than continue my discussion of the amendment at this point, Mr. President, I reserve the remainder of my time.

Mr. KENNEDY. Mr. President, I yield 5 minutes to the Senator from Maryland.

Mr. SARBANES. Mr. President, let me say at the outset that it is gratifying to the people of the State of Maryland that some Members of the Senate now seem so anxious to retrocede one or another part of the District of Columbia, one way or another to the State of Maryland. This has all occurred now that we are confronted with the issue of whether the people of the District of Columbia ought to be given direct representation in the House of Representatives and the Senate of the United States. These proposals have not heretofore been advanced as positive propositions viewed as a reasonable or desirable thing to do. They appear on the scene as a negative diversion; to seek in effect to preclude giving voter representation to the residents of the District of Columbia.

I must say that it is in this perspective that I see this proposal, as I do other similar proposals which have been made. The Members are going to have to face this representation issue squarely. There are reasonable arguments for having a Federal district for the National Capital; in fact if it were proposed to do away with the Federal district altogether, we would then, perhaps, be hearing, from the same people that are putting forward the limited retrocession proposals, the arguments why a National Capital district is desirable and ought not to be completely done away with. The proposals we have had, none of which is complete retrocession, all carry with them inherent problems. This one, which would exclude from retrocession, all land owned by the Federal Government—which I understand amounts to about 40 percent of the present District of Columbia, involves exclusive property that is not contiguous, that is interspersed with private or other public property throughout the District—this proposal would result in an absolute hodge-podge of alternating geographical areas which would result in an impossible situation in terms of trying to make government work.

Very frankly, I think we ought to face squarely the representation issue. If Senators do not want residents of the District of Columbia to be represented in the National Legislature and want them to continue to be disenfranchised, then they ought to put forward the underlying arguments for that position, not divisionary proposals, and let that basic position be accepted or rejected.

But the various retrocession proposals are but a diversion to try and shift the focus and the attention of Members of this body from the central underlying issue.

This amendment does not really move away from that diversionary approach. The exception which it contains for federally owned property is, of course, one that makes the whole proposition utterly unworkable.

The only logical proposition, which would be to retrocede all of the territory, then carries with it problems involving the arguments, reasonable arguments, which can be made as to why there ought to be a Federal district.

I just think Members ought to face that situation and face what is at stake in House Joint Resolution 554, which is to enfranchise 700,000 of our citizens who have been denied representation in the National Legislature of our country, even though they have, of course, been given representation with respect to the choice of the national Executive.

The PRESIDING OFFICER. Who yields time?

Mr. McCLURE. Mr. President, I know how troubling this is to elected representatives in the State of Maryland, not just the Senators from the State of Maryland, but the other Congressmen, the Governor, and, indeed, the political structure of both parties within the State of Maryland.

But, it seems to me, if we are talking about establishing for the people of the District of Columbia their full civil rights, we ought to be attempting to do exactly that when we have the opportunity to do so.

The proposal before the Senate in the form of the House resolution does not do that. It does not grant them the same rights that every other citizen of the United States exercises. It grants them some of the rights that other citizens of the United States exercise. Only by retrocession or by the creation of the 51st State could we give the people of the District of Columbia the same voting rights, the same civil rights, that every other citizen of the United States enjoys.

I know that it is troubling to people who are more concerned about the political structure of the State of Maryland than they are the civil rights of the residents of the District to accept that change. But the fact remains that if they are to get the same right to vote for Senators and Representatives, a Governor, a State legislature, that every other citizen of the United States enjoys, it must be either by statehood or by retrocession.

Mr. SCOTT. Will the Senator yield?

Mr. McCLURE. I am happy to yield to the Senator from Virginia.

Mr. SCOTT. Mr. President, I certainly support the amendment by my distinguished colleague from Idaho. But I would point out, and I know he is aware of this, that there are other American citizens who do not have representation in the Senate.

Only States have representation. There is Puerto Rico. The people of Puerto Rico are citizens of the United States. They do not have a Senator. They have a Delegate. The people from the Virgin Islands, from Guam, have a nonvoting Delegate. The incorporated territories of the United States have this.

The question would logically follow, if we give two Senators to the District of Columbia and we want to be fair to all American citizens, would it not, that we should have two Senators from Puerto Rico, two Senators from the Virgin Islands, and two Senators from Guam?

It seems logical to the Senator from Virginia that we would increase this body by eight Senators rather than two.

Mr. McCLURE. I thank the Senator from Virginia for pointing out that additional argument that can be made with regard to fairness to all people who are under the umbrella of U.S. citizenship.

But, Mr. President, the argument can be even more pointedly focused on the people of the District of Columbia and on the political system in the State of Maryland because I am told very often by various people that we cannot do this because the State of Maryland does not want it.

It was hinted early in the debates on this measure that those of us who were opposed to it are somehow racist. I think my colleague from Massachusetts said that we do not want them to be voting because they are too black and too liberal.

Well, I can tell my friend that I have never opposed voting rights on the basis of either, although I certainly do oppose people who are liberal on their policies. But I have never opposed anybody on the basis of his race, and I shall not do so.

But if, as a matter of fact, there is a resistance to full civil rights for the people of the District of Columbia, if there is any racism in that argument, the racism lies in the political structure of the State of Maryland, not in those who are opposed to investing the people of the District of Columbia with some right which no one else in the United States enjoys.

Mr. SARBANES addressed the Chair.

Mr. McCLURE. Then denying them other rights which every other citizen of the United States presently enjoys.

Mr. SARBANES. Will the Senator yield?

Mr. McCLURE. I will yield briefly.

Mr. SARBANES. I do not think the Senator, because of a sensitivity which he seems to have to the criticisms which have been made, apparently, of him, and perhaps others who oppose this amendment, should then seek to ascribe to the people of the State of Maryland or its political leaders motives completely absent and not present.

The Senator may speak as to his own motivation, but I do not think, out of some sense of apparent resentment on that matter, he should seek to ascribe to the people and the leaders of my State a motivation which is completely absent.

Mr. McCLURE. I understand what the Senator is saying. But I did not see the Senator on his feet when those other suggestions were being made about the motivations of other people.

I understand what he is saying. I just want to get the motivation question, this issue question, in the proper context.

Those who may oppose——

Mr. SARBANES. That is exactly the reason I rose, in an effort to get it into the proper context.

Mr. McCLURE. I understand.

Mr. SARBANES. I appreciate the Senator now seeking to do that and I would hope he would do that.

Mr. McCLURE. I understand what the Senator is saying.

Mr. SARBANES. Has the Senator from Maryland made any charge about either the Senator from Idaho's motivation or that of the people of the State of Idaho?

Mr. McCLURE. I cannot answer that question. I have not heard it myself.

Mr. SARBANES. Certainly, speaking for this Senator, there has been no such charge, and I would be prepared to assert, knowing the character and the quality of my distinguished colleague from the State of Maryland, that there has been no such charge in his instance, either.

Mr. McCLURE. I thank the Senator for his contribution and I understand his concern about the remarks I have made.

I make those remarks out of the strong conviction that people who have tried to inject race as the motivation on either side in these issues ought to have that pointed out, that they are appealing to the emotions and not to the intellect of the voters of this country and of this body.

Mr. SARBANES. If the Senator has that sensitivity, it seems to me the reasonable way to have approached it would have been to deny the presence of such motivation in his instance, if that allegation were made, but not to go beyond that and cast a similar aspersion on the people of my State and on the political leaders of my State. There is no basis for the Senator undertaking to do that.

Mr. McCLURE. Mr. President, I understand the concern of my friend from Maryland.

I am not going to yield further to him at this time on my time to beat that dead horse.

I do want to reiterate that if we are going to invest the people of the District of Columbia with their full civil rights, in absolute equality with every other citizen of this country, we cannot do it and do not do it under the resolution which has been brought to the floor. But we can and would do it under the amendment which the Senator from Idaho has offered. The fact that, for whatever reason, it may be disturbing to the people of Maryland should not be the overriding concern of the Members of this body. If, as a matter of fact, the overriding is concerned, as I think it should be, with the rights of the individual residents of the District of Columbia, then let us address that squarely. Let us not slide around the issue by injecting other issues, such as denial of due process, denial of voting rights, denial of the fact that racism may be a quotient in the arguments and the emotions in this debate.

The Senator from Idaho is as dedicated as any other to the notion that the exclusion of the voting rights of the people of the District is an anachronism from an earlier age, that the reasons it may have existed and may have been valid at an earlier time no longer exist, that the people who vote in the District of Columbia and reside in the District of Columbia do not universally and uniformly work for the Federal Government.

As a matter of fact, I suspect there is a higher number who live in Maryland and in Virginia who work for the Federal Government than the residents of the District itself. Those patterns have shifted over the years. But certainly that, as a major motivation, is no longer reason to deny to the people who live here the full rights of citizenship.

The pending resolution, brought to the floor of the Senate not through the regular processes of the committees in the Senate but directly from the House and directly to the floor of the Senate, would deny the people of the District of Columbia full voting rights, full civil rights—and I think they should have them. There is no reason why the Senate cannot redress that wrong, rather than create two other wrongs by passing the pending resolution.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. McCLURE. Mr. President, before yielding, how much time do I have remaining?

The PRESIDING OFFICER. The Senator has 7 minutes remaining.

Mr. McCLURE. I yield briefly to the Senator from Indiana.

Mr. BAYH. Has the Senator given consideration to how the citizens of the District would be treated in the area of reapportionment as provided under the Constitution? Would their numbers be added to the numbers of the people of Maryland in the reapportionment after the next census?

Mr. McCLURE. Under the amendment I have suggested, the desire of the people of the District as to their separate representation would be accomplished by granting them representation in the House of Representatives as though they were a State, granting them the right to have their Senators voted upon statewide, as all other citizens of this country have their Senators voted upon.

Mr. BAYH. I thought the Senator's amendment just struck section 2, lines 2 through 10.

Mr. McCLURE. This simply corrects an error in the resolution, from my viewpoint.

Mr. BAYH. The Senator is familiar with the fact that the language in the constitution talks in terms of reapportionment within the bounds of the given States. Does the Senator suggest that he is creating some sort of non-State entity, which would not qualify them, under the present language, for reapportionment?

Mr. McCLURE. The Senator is correct. But this would not conform exactly in that respect to the treatment in other areas of the country. It would preserve the identity of the District for the reapportionment and the representation in the House of Representatives.

Mr. BAYH. I thank the Senator.

Mr. President, is there additional time?

Mr. KENNEDY. Mr. President, how much time do I have remaining?

The PRESIDING OFFICER. The Senator from Massachusetts has 6 minutes.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

Mr. KENNEDY. I will take 2 or 3 minutes. I will be glad to yield to the Senator, and then I would like to make a concluding comment. I yield 3 minutes to the Senator.

Mr. BAYH. Mr. President, I have two basic concerns about this kind of resolution.

One is a set of constitutional concerns as to the reapportionment question, which I just raised. The other is the question of qualification, that is, how the qualifications for voters would be established for the House of Representatives, when the Constitution says that the qualifications must be the same as the qualifications for the most numerous branch of the State legislature?

That concern puts the District of Columbia in a no man's land. Would that mean that Annapolis would establish the criteria for the voters in the District? What about where a candidate should come from? Would it be possible for someone who lived in the District of Columbia to serve in the House of Representatives? Suppose Annapolis said you had to live in Maryland, as a right to qualify voters?

I say this because it seems to me that we are establishing a rule here in which we would put into the Constitution something that would create a very confusing situation.

In addition, I think a good case could be made relative to article 4, section 3, and the only precedent we have is retrocession to Virginia, when it was ruled at that time that the State had to determine, under the Constitution, whether or not they could accept that property.

I say to my colleagues that I look at it a little differently from the way the Senator from Idaho looks at it. I think he is giving away part of my property in Indiana. In Indiana we have 5.5 million people who feel that the District of Columbia is part of their Capital; and they want us to find a way in which the people who live here can vote without, in essence, giving away the city. I guess I feel he is doing that. I know he does not.

I hope we will turn this down and support the resolution which is ably supported by the Senator from Massachusetts and the Senator from Maryland.

Mr. MELCHER. Mr. President, will the Senator from Idaho yield?

Mr. McCLURE. I yield to the Senator from Montana.

Mr. MELCHER. I thank the Senator for yielding.

I hardly think this poses the problem that the Senator from Indiana conjectures. The question of voting within a State on a Federal enclave has been addressed many times. A person who lives at Andrews Air Force Base, in the State of Maryland, is not denied his voting rights. In many other instances where one lives on Federal property, he is eligible to vote in that State, and it has been found by the courts that he is eligible to vote in that State.

So we are not really going into unplowed ground or some never-never land that has not been tried and tested before.

The Senator from Idaho, as I understand, would leave the city as it is for that purpose, to exercise those functions, and would allow the residents within the ceded portion of the District to have the opportunity to participate in the procedures granted to other citizens of Maryland.

I would rather that the debate on the Senate floor would be factual as to the case and factual as to what has happened before in a similar instance. It certainly has happened before in similar instances.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. McCLURE. I yield briefly.

Mr. BAYH. I hope the Senator from Montana does not suggest that just because one disagrees with him, one uses the wrong facts.

I ask this of the Senator from Idaho: Who does he think would prescribe the qualifications for people who vote in the District of Columbia when the Constitution says "the most numerous branch of the State Legislature"? Would it be possible for the legislature in Annapolis to prescribe residency qualifications that, in essence, state you could not vote unless you lived in the State in question, which the Constitution says you have the right to do?

That means they could establish residency provisions to vote in Maryland in order to serve in the Senate or in the House, which would deny anybody who lived in the District the chance to do that.

That is the concern I have. I do not know where you would finally come down on that, but I point out that those requirements exist in the Constitution today; they are factual in the Constitution today.

Mr. McCLURE. Mr. President, there is no doubt that the pending resolution before the Senate—not my amendment—contains virtually the same list of uncertainties and ambiguities which my friend has mentioned. I sought to cure some of that ambiguity by the amendment I offered just before this one, which was rejected when a tabling motion by the Senator from Massachusetts was approved by the Senate.

The Senate did not want to resolve those ambiguities. The Senate wanted to leave it within the power of Congress to deal with those ambiguities, and that is where it resides now.

So my friend from Indiana may raise the question of uncertainty, but the question of uncertainty resides in the language of the resolution, not the language of the amendment of the Senator from Idaho.

Mr. President, again we have two choices if we really want to give the residents of the District of Columbia their full civil rights. We must choose either statehood for the District or allow them to vote in a State which does exist because the ambiguities to which the Senator makes reference, the other constitutional provisions that make references to State control and State authority in certain instances over voting by the residents of the State apply equally to the pending resolution.

To simply allow them to have a Senator and a Representative does not lay to rest the other issues which the Senator from Indiana has raised.

Do I understand from the faint tapping at the desk that my time may have expired?

The PRESIDING OFFICER. The Senator's time has expired.

Mr. McCLURE. I thank the Chair.

Mr. KENNEDY. Mr. President, I yield myself 3 minutes.

Mr. President, it seems to me that the argument of the Senator from Idaho would have some consistency if he were suggesting that we substitute a statehood proposal that would effectively conform with what I gather to be his desire at least presented here in the Senate this afternoon. But the fact of the matter is——

Mr. McCLURE. Mr. President, will the Senator yield on that point?

Mr. KENNEDY. I only have 3 minutes.

Mr. McCLURE. Will the Senator yield only briefly?

Mr. KENNEDY. I yield for 15 seconds.

Mr. McCLURE. I have that amendment. If this one is defeated I will offer it.

Mr. KENNEDY. Fine.

Mr. McCLURE. And I hope the Senator will support it.

Mr. KENNEDY. Then we will have a chance to debate and I will not make it now.

Mr. President, home rule and representation for the District of Columbia in Congress have moved along two tracks over the history of our Nation. We should not confuse these two different concepts.

The Senator from Idaho says that we are not doing all the things that we could do for a State. Therefore, he says, the more limited step of providing the citizens of the District of Columbia with the right to elect their own Members of the House and the Senate should not be accepted. That is effectively what his amendment would do, and it is for those reasons that I move to table it.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Does the Senator yield back his time?

Mr. KENNEDY. I yield back the remainder of my time.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table UP amendment No. 1694 of the Senator from Idaho.

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The second assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that the Senator from New Hampshire (Mr. DURKIN) is absent on official business.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Kansas (Mr. DOLE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), the Senator from Maryland (Mr. MATHIAS), and the Senator from Illinois (Mr. PERCY) are necessary absent.

The result was announced—yeas 47, nays 35, as follows:

[Rollcall Vote No. 335 Leg.]

YEAS—47

Bayh	Haskell	Muskie
Bentsen	Hathaway	Nelson
Biden	Heinz	Pearson
Brooke	Hodges	Randolph
Byrd, Robert C.	Hollings	Ribicoff
Case	Huddleston	Riegle
Chafee	Inouye	Sarbanes
Chiles	Jackson	Sasser
Church	Javits	Sparkman
Clark	Kennedy	Stafford
Culver	Leahy	Stevenson

Bumpers	Hatfield, Mark O.	McIntyre
Cranston		Percy
DeConcini	Hatfield, Paul G.	Talmadge
Dole		

So the motion to lay on the table UP amendment No. 1694 was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, under the order entered last week, the Senate was to have turned to the Federal aid highways bill today at no later than 3 o'clock p.m. I ask unanimous consent——

The PRESIDING OFFICER. Will the Senator kindly suspend? The majority

leader has the floor; will the Senate please be in order?

The Senator from West Virginia will kindly proceed.

Mr. ROBERT C. BYRD. I thank the Chair.

Mr. President, I ask unanimous consent that the resumption of debate on the highway bill be delayed temporarily, that the Senate proceed to the consideration of one more amendment by Mr. McCLURE, and the Senator from Virginia (Mr. HARRY F. BYRD, JR.), I think, wants 5 minutes on the D.C. Representation Act, and Mr. MELCHER wishes to speak also this afternoon.

Mr. MELCHER. I would take 10 minutes for my allotment.

Mr. SCOTT. Mr. President, will the Senator yield briefly?

Mr. ROBERT C. BYRD. Yes.

Mr. SCOTT. I have two amendments that I would like to take 5 minutes on, not to offer them, but so that the Senate would know of the two amendments I intend to offer tomorrow.

Mr. ROBERT C. BYRD. Very well. Mr. President, I ask unanimous consent that Senator McCLURE be recognized to offer his amendment.

Mr. McCLURE. Mr. President, did I understand that the Senator from Virginia (Mr. HARRY F. BYRD, JR.) wishes to present his statement at this time?

Mr. ROBERT C. BYRD. Very well.

Mr. McCLURE. And that I would then be recognized to offer my amendment?

Mr. ROBERT C. BYRD. Very well. I ask unanimous consent that after the Senator from Virginia (Mr. HARRY F. BYRD, JR.) is recognized to make his statement, the Senator from Idaho (Mr. McCLURE) be recognized to offer his amendment, that Mr. MELCHER then be recognized for his statement, and that Mr. SCOTT then be recognized for his statement, after which the Senate turn to the consideration of the military construction conference report, on which there be 10 minutes to be equally divided between Mr. HUDDLESTON and Mr. STEVENS, and that after the conference report, the Senate return to the consideration of the highway bill.

Mr. McCLURE. Mr. President, the amendment I shall offer will be one which would grant statehood to the District of Columbia.

Mr. ROBERT C. BYRD. That would require a rollcall vote.

Mr. McCLURE. That would probably require a rollcall vote.

Mr. ROBERT C. BYRD. I ask unanimous consent that it be in order to order the yeas and nays on the amendment of the Senator from Idaho.

The PRESIDING OFFICER. Without objection, it is so ordered. The yeas and nays are not mandatory, unless requested.

Mr. ROBERT C. BYRD. Does Senator McCLURE wish for the yeas and nays on his amendment?

Mr. McCLURE. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order at this time to order the yeas and nays on a motion to table the McClure amendment.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. ROBERT C. BYRD. Now, Mr. President, I renew my unanimous-consent request.

The PRESIDING OFFICER. Is there objection?

Mr. RANDOLPH. Mr. President, reserving the right to object, and I shall not object, it is a little difficult for me to put together the time frame here as to when the highway bill will be resumed for debate and, hopefully, passage.

Mr. ROBERT C. BYRD. Mr. President, that would probably be, if all time is taken on Mr. McCLURE's amendment, in approximately 1 hour and 10 minutes.

Mr. MELCHER. Mr. President, reserving the right to object——

Mr. ROBERT C. BYRD. No, I beg the Senator's pardon. It would be 1 hour and 35 minutes.

Mr. RANDOLPH. Very well. I thank the Senator.

Mr. MORGAN. Mr. President, I wonder if we could have an agreement that it not be before 4:30.

Mr. ROBERT C. BYRD. That would be perfectly agreeable. It will work out that way anyway, but I will include that in the request.

Mr. BAKER. Mr. President, reserving the right to object, I wonder if the majority leader could give us some idea on how long we may stay on the highway bill after we turn to that later today, and at what time might we expect to adjourn or recess for the night.

Mr. ROBERT C. BYRD. I cannot accurately assess that situation, may I say to my distinguished friend the minority leader. I would hope we would be prepared to stay in late, however, so we might finish the highway bill tonight.

Mr. BAKER. It is the majority leader's intention to finish the highway, if possible?

Mr. ROBERT C. BYRD. I would hope so. I would hope we could finish with it, because we have a very full day tomorrow, with the D.C. representation amendment, so that Senators would not have to be in next Monday or Tuesday. As Senators will recall, when the original schedule was announced earlier this year, the holiday was to begin at the close of business next Tuesday. That will probably mean we will have to be in late every day this week, with the likelihood of a Saturday session, but if we accomplish our work that we have targeted, we will not have to be in next Monday and Tuesday.

Mr. HUDDLESTON. Mr. President, will the Senator yield?

Mr. ROBERT C. BYRD. Mr. President, was the request granted?

The PRESIDING OFFICER. Is there objection to the request of the Senator from West Virginia? Without objection, it is so ordered.

Mr. HUDDLESTON. Will the Senator yield?

Mr. ROBERT C. BYRD. I yield the floor.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that Tim Dudgeon, of my staff, be accorded the privilege of the floor during the consideration of the highway bill, when called up.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, I make the same request for Mr. Conley, of Senator NELSON'S staff, during the consideration of the D.C. representation measure.

The PRESIDING OFFICER (Mr. SASSER). Without objection, it is so ordered.

The Senate will be in order.

The Senator from Virginia (Mr. SCOTT) is recognized.

Mr. SCOTT. Mr. President, I yield 5 minutes to my distinguished colleague from Virginia.

Mr. HARRY F. BYRD, JR. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. HARRY F. BYRD, JR. Mr. President, Washington, D.C., is a city. It is a Federal city. Its interest, its economics, its future are tied to the Federal Government.

It has none of the characteristics of a State. It is not a State, nor was it ever meant to be.

It was planned as the seat of the Federal Government, and for nearly 200 years it has served that purpose well.

In area, only two States of the 50 have less than 5,000 square miles. Rhode Island, being the smallest, has approximately 1,200 square miles.

Washington, D.C., has an area of 67 square miles.

Under the Constitution, Members of the House of Representatives represent people divided into congressional districts, with each congressional district at the present time representing roughly 500,000 persons.

But in the Senate, Senators represent States. California with 22 million population has two Senators; Wyoming with 400,000 population has two Senators.

Under the Constitution, only States are permitted to have Senators. Although New York City has a population of 8 million, 10 times greater than Washington, it is not entitled to a Senator.

I see no justification for the pending legislation which would give Washington, D.C., two representatives in the U.S. Senate. This legislation would not confer statehood on Washington, D.C., but would grant it representation in the Senate if it were a State.

I think the pending legislation is wrong in principle and dangerous in precedent.

Will this lead, as it well could, for a demand for two Senators for Puerto Rico whose residents are citizens of the United States? Or Senators for Guam and for the Virgin Islands whose residents likewise are citizens of the United States?

Washington, D.C. is not a State, it is a city. A fine city, but still a city.

There is no diversity of interest, there is no rural population, there are no small towns, there is no agricultural area.

In brief, Washington, D.C., is a densely populated city of 690,000 persons in a 67-square-mile area.

I shall vote against giving two Senators to Washington, D.C., which action would simultaneously distort the Constitution, set a dangerous precedent of city representation, and diminish the influence in the Senate of each of the 50 States.

Mr. President, how much time do I have remaining?

The PRESIDING OFFICER (Mr. HODGES). The Senator has 2 minutes remaining.

Mr. HARRY F. BYRD, JR. I yield that additional 2 minutes to the Senator from Montana (Mr. MELCHER) when his time comes to speak.

Mr. MELCHER. I thank the Senator.

The PRESIDING OFFICER. Under the previous order the Senator from Idaho is recognized to offer his amendment.

UP AMENDMENT NO. 1695

(Purpose: To grant statehood to the District of Columbia)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1695.

On page 2, strike out lines 2 through 10 and insert the following:

"Section 1. The District constituting the seat of government of the United States is hereby admitted into the Union as a State of the United States on an equal footing with the other States in all respects.

"SEC. 2. The Congress shall have power to enforce this article by appropriate legislation.

Mr. McCLURE. Mr. President, during the debate on the previous amendment, which would have retroceded the non-Federal Government in the District to the State of Maryland so that the people of the District might have the opportunity to have full civil rights, it was argued by the distinguished Senator from Massachusetts that we should instead grant them statehood, or at least that that would be more logically consistent.

Without conceding the fact as to where logical consistency might lie as between those two alternatives, certainly the arguments raised by the Senator from Indiana with regard to the difficulties of interpretation and application of voting rights as though they are a State without granting statehood is inherent to the pending resolution granting voting rights without statehood and would be completely solved by granting statehood.

(Mr. SASSER assumed the chair.)

Mr. McCLURE. This, at least, Mr. President, would be logically consistent with the stated thrust and purpose of the sponsors and floor managers of this House Joint Resolution 554.

In my opinion, this is the only way to provide a permanent solution to the issue of extending the full rights of political participation to all citizens of the District and at the same time avoid the insurmountable constitutional objections that mar other proposals, including House Joint Resolution 554.

While statehood is possible by means of a simple majority vote in both Houses of Congress, under article IV, section 3, any attempt to admit the District to the Union as a State without amending the Constitution would pose major legal problems. For one thing, statehood by legislative enactment would abrogate the "exclusive legislation" power of the Congress over the District under article I, section 8, clause 17. Moreover, article IV, section 3, clause 1 makes the consent of the legislatures concerned a prerequisite for forming new States. When Maryland ceded lands to the Federal Government for establishing the District of Columbia, it consented only to the creation of a Federal district, not the creation of a new State. Thus, to make the District by congressional enactment alone would violate that provision of the Constitution.

Under amendment XXIII the District has three votes in the electoral college, that is, no more than the number of electors accorded to the least populous State. however, it could be entitled to as many as four electors, according to the most recent census. Amendment XXIII would become a virtual dead letter since the District would cease to exist. Such a change in the Constitution should be made by amendment, rather than by legislation.

Granting statehood to the District would not only guarantee to D.C. residents voting representation in both Houses of Congress, under article I of the Constitution. They would also be able to participate in the process of ratification of proposed amendments to the Constitution, article V; they would be entitled to as many electors for President and Vice President as they have Senators and Representatives, article 2, section 1; they would be assured of territorial integrity and protection against absorption into other States, article IV, section 3; and they would have complete legislative control over internal matters, free of congressional veto. All congressional authority over the District now provided in article I, section 8, clause 17 would be effectively turned over to the people of the District acting through their elected representatives in a State legislature.

This amendment would not only assure to D.C. residents equal citizenship rights with other Americans; it would grant to the District complete self-government according to the wishes of its own people, without Federal interference. It would free the Federal Government of the responsibilities of providing special treatment for the District at a tremendous expense to other U.S. citizens. The people of the District would not only enjoy the rights and powers of statehood, they would also assume the full burden and responsibilities of citizens of a State of the Union. No longer would District citizens be considered second-class Americans or be victims of "taxation without representation."

Full representation is consistent with the principles of democracy upon which our Nation was founded. Statehood would attest to our commitment to equality and freedom for all American citizens and our concern for guaranteeing human rights thoughout the world.

Mr. President, I reserve the remainder of my time.

Mr. BAYH. Mr. President, I have listened to my good friend and distinguished colleague from Idaho struggling with how this business of representation for the people of the District, some 750,000 of them, can be accomplished. I know he is sincere about this desire. But I say with all respect that it seems to me he is making it an overcomplex issue, a more difficult one to resolve than it really need be.

First of all, those of us who are supporting and have supported for some time the right of representation for the District citizens, have said from the beginning that the District of Columbia is a unique part of the United States of America. It is a unique bit of geography. It is a capital city. For reasons that have already been thoroughly discussed, basically size and security, our Founding Fathers established it to be separate and different from States early on.

Just as this unique characteristic exists, it seems to me that there is no need to go the statehood route in providing representation for the citizens of the District.

As I said earlier, I guess as a Senator from Indiana I hate to see us taking the Nation's Capital from 500,000 Hoosiers. It is part ours. I do not see why the District should be a State because it is, indeed, the Nation's Capital.

As I said earlier, there is no need to go the statehood route in order to resolve the inequities which exist here.

I will not belabor the Senator or the Senate with some of the distinctions between means of approaching statehood and the thrust of the Senator's remarks. The question of statehood is very much up in the air in the District of Columbia.

There is a core of support for statehood here. But nothing approaching the clear majority wishes of the people for representation short of statehood, the majority support for the very resolution which we now have before us.

I say to my good friend from Idaho, it seems to me, if one gets into the whole fundamental study of government, we can see why the approach recommended by the Senator from Massachusetts, the Senator from Indiana and the rest of us in this resolution is more appropriate to the need than statehood.

We have three levels of government, and we are all aware of this, local government, State government, and National Government. The District of Columbia, very clearly, is a local government. It is a city. It has a city structure. Imperfect as it is, it is chosen by the people of this city. The city government controls the confines, the geographic limits of this city, which also happens to be the Nation's Capital.

So there is adequate government, there is representation. Some say it is inadequate, and you could make a good case of that. But at least, there is a participation in the representative process at the local level. I see no reason to have a State government, which would cover the same identical geographic description as the local government. That would be an absolute duplication of governmental responsibilities.

There is no other State in the United States that has a city which covers the total geography of the State; yet we would be establishing one if we went along this particular route.

No, it seems to me that what we are after here is not to create a State level of bureaucracy to deal with problems that are already dealt with by the local government, but to see that the citizens of the District are fully represented at the national Government level. They have the right to vote for the President now, as of the 23d amendment. What we are saying is give the citizens of the District the right to vote for and be represented in this body and our other body, the House of Representatives, to have the chance to affect the outcome of national decisions, national decisions that affect the lives of the people who live here.

Mr. McCLURE addressed the Chair.

Mr. BARTLETT. Will the Senator yield?

Mr. McCLURE. I am happy to yield to the Senator from Oklahoma.

Mr. BARTLETT. Mr. President, I ask unanimous consent that Edward King of my staff may be accorded the privilege of the floor during any vote on this bill and the transportation bill. I further ask that this request not interfere with the dialog that the Senator from Idaho is having.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I shall be very brief. I suspect we can either terminate the debate at this moment or debate for the next week. We cannot adequately cover the subject in a few brief moments and to attempt to cover it in much less than a week, in all of its ramifications, must be an exercise in frustration.

Let me respond to my friend from Indiana in this way: It seems to me that the arguments that have been used by the Senator in opposition to my amendment are really the arguments that the opponents of the resolution have been using. All of the arguments that have been raised against statehood are equally applicable against House Joint Resolution 554. I do not understand the distinction that says they are to be granted full voting rights without voting responsibilities. The effort to establish in people rights unassociated with responsibilities has been proven to be destructive of individual fiber, and it certainly is destructive of government structure as well.

It seems to me that this is really the crux of part of the dilemma, that there is the effort to invest the District of Columbia with all the rights of statehood with none of the responsibilities of statehood. It seems to me that has led us into the impasse of trying to find a way to give them something without giving them everything. We end up saying we are going to give them full civil rights, but we do not give them full civil rights; we give them some civil rights.

My friend from Indiana has indicated that this would be taking something away from the people of Indiana, because they own this Capital City. There are two answers to that. First of all, we could, by legislation, construct a Federal enclave within the city, which would then be a State, and allow them to have statehood and full rights and responsibilities of citizenship under statehood; at the same time, guaranteeing to the people of Indiana their sole share of the hold on the city as a seat of Government.

At the same time, my friend from Indiana is saying that we must pass the resolution granting representation in order to give them their rights as citizens, but whatever tenuous hold the people of Indiana have on the seat of Government is sufficient reason to deny them full rights as citizens.

I wonder if, really, the people of Indiana want to deny the people of the District of Columbia their right to full citizenship, full participation, full civil rights under the Constitution in exchange for, or as the price of, a tenuous hold on some nebulous concept of the Nation's Capital. I do not think the rights of citizenship are to be sold or bartered for such a small consideration as is implied by that statement.

Mr. President, if the Senator from Indiana is prepared to yield back the remainder of his time, I shall yield back the remainder of my time.

Mr. BAYH. I should like to respond.

Mr. McCLURE. Then I shall reserve the remainder of my time.

Mr. BAYH. I should like to say that, although the Senator from Indiana may not be as articulate as the Senator from Idaho, I should hate to see his argument used as my own argument against the resolution, as a cosponsor of the resolution.

I think what we are trying to do here is to say that whenever there is a process of Government that affects the lives of people, the people affected ought to have a right to have some influence on that process. We have wrangled over several things; some of them have been voted up and some have been voted down here this year.

About all the things we have discussed are going to affect the lives of the citizens of the District, but they will not have any representative here to help resolve that problem. That is what we are after. Inasmuch as there are not State responsibilities as far as the citizens of the District of Columbia are concerned, I do not know that we ought to give them States rights. What we are after is to see that they are represented in this form of Government which affects their lives, as far as taking their sons in war and taking their taxes in times of peace.

Mr. WALLOP. Will the Senator yield for a question?

Mr. BAYH. I am glad to yield. I do not know how much time I have; this is a one-sided apportionment. I am not complaining, but recognizing the facts of life.

Mr. WALLOP. I just have one question, on hearing what he is saying and the Senator from Idaho is saying. How do we square what the senior Senator from Virginia asked rhetorically: What do we now do, granting this on this basis, about the citizens of American Samoa, of Puerto Rico, or the Virgin Islands, who are subject to draft, who have all the other problems, whose sons go to war and other things? How do we now say they are not entitled to voting representation on the same basis that the District is?

I really ask that in all sincerity.

Mr. BAYH. I must say that I have asked myself that same question as the chairman of the committee that handles constitutional questions. I frankly believe, if the Senator from Wyoming is asking the Senator from Indiana, I think they are entitled to have a chance to vote for President. Whether they should be represented in Congress or not depends upon the size of the entity involved and the disposition of the people involved.

The fact of the matter is, we have a distinction here. We do not have any other territory urging to be heard as a State. We have had territories that have asked to be included in this direct popular vote amendment so they will have a chance to vote for President. Frankly, I think they ought to be. From a practical standpoint, I do not think there is any way of including them in there.

If the Senator would address himself to the real distinction, in all but Puerto Rico, there is a real distinction of size. That was one of the distinctions that caused the Founding Fathers to treat the District differently than they did other States.

Another distinction is that they are not a contiguous part of the United States. You could say the same thing about Alaska and Hawaii, but there again, you get into distinct size situation, with the exception of Puerto Rico.

If the time comes when the people of Puerto Rico can, by unanimous vote, decide that issue and then petition us and ask us to accept them, then I think we have a real question that we must deal with. Frankly, I would say we either have to fish or cut bait. I am not for having territories against their will.

Mr. BARTLETT. Will the Senator yield?

Mr. BAYH. Yes.

Mr. BARTLETT. As I understand it, the distinguished Senator from Indiana said that the citizens of the District need representation and need to have a person or two in this body representing them. As I understand it, at the present time, they are represented by all Members of this body and they are represented by specific Senators who serve on the District Committee.

My question is, If this resolution is passed and ratified by the States and becomes part of our Constitution and our basic law, then does it also provide that this extra representation that the Dis-

trict still has by virtue of having its own subcommittee here, by having the entire Senate and the House responsible for much of the care of its own citizens, is it written into this resolution that the District will no longer receive this extra representation they now have?

Mr. BAYH. I must say to my friend from Oklahoma, I do not think they have extra representation. I do not see how we can say the people in the District are represented by the Senator from Indiana, the Senator from Oklahoma, the Senator from Wyoming, and other places.

It is like saying the Senator's State can be represented by Senators from Texas or mine can be represented by Senators from Illinois.

Mr. BARTLETT. Let me say to the fine Senator from Indiana, that in the first 2 years I was here I was on the District Committee. I felt that I did a halfway decent job of representing the District, at least I tried to.

The PRESIDING OFFICER. The time of the Senator from Indiana has expired.

Mr. BAYH. Will someone else yield me some time to respond?

Mr. SCOTT. Mr. President, I yield myself time on the bill.

The PRESIDING OFFICER. Under the unanimous-consent agreement, there is no provision which would allow the Senator to do that without unanimous consent.

Mr. McCLURE. Mr. President, I ask unanimous consent the Senator from Virginia may yield himself time on the bill.

The PRESIDING OFFICER. Is there objection?

Without objection, it is so ordered.

Mr. SCOTT. Mr. President, I had 18 minutes some time ago, and I agree with the ruling of the Chair.

But I just want to say to my distinguished friend from Wyoming, the questions he posed were discussed by the junior Senator from Virginia in some detail earlier this morning when we had almost an empty Chamber.

I have asked my staff to prepare copies to put on every Senator's desk, and it will be available later in the afternoon.

It addresses itself to these very questions and to the various States where they did have Senators and went into the territories throughout the 19th and 20th centuries.

Mr. President, I just thought I should clarify that.

Mr. BAYH. Mr. President, I ask unanimous consent to have 5 minutes on the bill to respond to some of these questions, if I might, only to the questions which were posed.

Mr. BARTLETT. Would the Senator from Idaho yield 2 minutes to the Senator from Indiana to respond to my question?

Mr. McCLURE. Mr. President, I understand he asked for 5 minutes on the bill, and I have no objection.

The PRESIDING OFFICER. Is there objection to the Senator from Indiana having 5 minutes on the bill?

Without objection, it is so ordered.

Mr. BAYH. I appreciate that.

I do not want to unnecessarily belabor the Senate, but I think we all want these questions out on the table so we can make a decision.

I say, after hearing the remarks of my friend from Virginia, that if this has any relevance to people leaving other States and going out into the territories, is to ignore the fact that when enough of them got out there they could become a State.

I say to my my friend from Oklahoma, with all respect to the kind of service he represented as a member of the District Committee, that I had the distinction of being the chairman of the Appropriations Subcommittee of the District. So we both had that responsibility and we tried our best.

But it is contrary to the basic premise of the Democratic principles of our society to suggest we can ever be fully represented, but not from the constituency being represented.

Try as we will, it seems to me the people who live here have a right to determine how their representatives are going to be chosen, and if they do not like them, get rid of them and send us other representatives.

I say to my good friend from Oklahoma, they cannot do this.

Mr. BARTLETT. Let me say to my good friend from Indiana, the point I was making was that if this resolution is ratified into the Constitution as basic law, then the District, in addition to two Senators and some Representatives, will have the District subcommittees representing the District. They will also have responsibilities of the Congress to the District in addition to what is normally a responsibility of the Congress to the other States.

So what we are creating is a hybrid State, sort of a hybrid super State, which is different from going out to the territories, as the Senator was talking about earlier.

The original colonies, when they conveyed sovereignty to the National Government, also conveyed the right to extend that sovereignty by extending statehood, but not for this kind of hybrid super State.

Mr. BAYH. I think we should say super city, not super State. Because in the District, the Federal City, if one wants to address himself to the reason why there would be a District of Columbia Committee, it seems to me they have an entirely different issue than saying the people of the District can be adequately represented by Senators and Congressmen they do not choose, cannot effect, cannot get rid of, cannot have, and whose views may be entirely different on the issues than all of the people who actually live here and are affected by the taxation, war-making, and all those kinds of things.

The District of Columbia Committee, I assume, will continue to exist as long as the Congress feels there is a need to address special attention to the aspects of the District government which are unique. Because of the fact that it is the Nation's Capital, large parts of the territory are, indeed, consigned to the Federal Government. They cannot be taxed. The large percentages of the District's revenues are assessed for police and fire, for protecting Federal properties, and providing some of the regalia and pomp and circumstance of the foreign dignitaries that are part of the National Capital, not of the city of Washington, D.C.

Mr. BARTLETT. But this could be done with other committees.

But what the Senator sets up here is extra representation and also a hybrid State that does not have the responsibilities a State has.

Mr. BAYH. May I ask the Senator a question, would he support this resolution if we do away with the District Committee in the House and Senate?

Mr. BARTLETT. No, and I have other reasons for it.

But I am giving the Senator one argument based on what he was saying earlier about representation, because what we are doing is creating a hybrid State. It is not a hybrid city or supercity.

I think, if we were, New York City could later on look forward to better representation or direct representation as a supercity, because they certainly qualify, I believe, to a greater extent, because of their large population, than does Washington, D.C.

Mr. BAYH. I do not think I will persuade my friend from Oklahoma by making the same argument a third time when I have not the first two times.

I respect his judgment, but I respectfully disagree with his conclusions.

Mr. BARTLETT. I do not think I will persuade my good friend to change his amendment.

Mr. McCLURE. Mr. President, how much time do I have remaining on this amendment?

The PRESIDING OFFICER. The Senator from Idaho has 10 minutes remaining.

Mr. McCLURE. Mr. President, I do not expect to use all that time.

Let me respond to only two points that have been raised in the colloquy since I last addressed the Senate.

One, the argument that the Senator from Wyoming had raised with respect to the territories, invalid because of the size.

On size, I do not see anything in the Constitution that deals with the question of size. If the question of size were involved, Rhode Island would not have equal representation in this body with Alaska or Texas.

Certainly, size is not a matter that was addressed in the Constitution of the United States.

The Constitution addressed two principles: one was the representation of States within this body and the other was the representation of individuals in the other body. The pending resolution before us does not do either of those things correctly. It does not grant representation in this body as a State. It does not give full rights and responsibilities to the citizens of the District of Columbia with regard to statehood. It does not give them full civil rights as individual citizens of this country.

The pending resolution that they have

asked us to adopt simply creates, as the Senator from Oklahoma has suggested, a city-State, a new entity, different from any other that this country has known. It is being done under the guise of presenting to the people of the District their full civil rights, and it fails to do that.

There are only two means by which full civil rights can be granted to the residents of the District, and the Senate had better face up to that. One is by retrocession, so that they can vote within an existing State, the State of Maryland, which ceded the territory in the first place—and, incidentally, where the residents voted for the first several years after the creation of the District; and the second is the creation of another State, invested with all the rights, the duties, the responsibilities, and the full civil rights of its residents as citizens of this country. This resolution does neither.

The Senate has rejected the amendment I offered, which would have allowed them to exercise all those full civil rights within the State of Maryland; so I have offered this amendment, to allow them to exercise all their full civil rights, at the same time accepting all their full responsibilities as a State. To do less is unfair and unequal treatment with respect to all the other States and all the citizens of the other States. It does not achieve equity and equality. It creates a new inequity and a new inequality.

Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back. The question is on agreeing to the amendment.

Mr. BAYH. Mr. President, I move to table the amendment of the distinguished Senator from Idaho. I think the yeas and nays have been called for already.

The PRESIDING OFFICER. The Senator from Indiana is correct.

The question is on agreeing to the motion to table the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. ROBERT C. BYRD. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from California (Mr. CRANSTON), the Senator from Arizona (Mr DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that, if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Kansas (Mr. DOLE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon (Mr. HATFIELD), and the Senator from Illinois (Mr. PERCY) are necessarily absent.

I further announce that, if present and voting, the Senator from Oregon (Mr. HATFIELD) would vote "yea."

The result was announced—yeas 67, nays 17, as follows:

[Rollcall Vote No. 336 Leg.]

YEAS—67

Bayh	Hart	Muskie
Bellmon	Haskell	Nelson
Bentsen	Hathaway	Nunn
Biden	Hayakawa	Pearson
Brooke	Heinz	Pell
Burdick	Hodges	Proxmire
Byrd, Harry F., Jr.	Hollings	Randolph
	Huddleston	Ribicoff
Byrd, Robert C.	Inouye	Riegle
Case	Jackson	Sarbanes
Chiles	Javits	Schweiker
Church	Kennedy	Sparkman
Clark	Leahy	Stafford
Culver	Long	Stennis
Curtis	Lugar	Stevenson
Danforth	Magnuson	Stone
Durkin	Mathias	Thurmond
Eagleton	Matsunaga	Tower
Ford	McGovern	Weicker
Glenn	Melcher	Williams

Gravel	Morgan	Zorinsky
Hansen	Moynihan	

NAYS—17

Baker	Hatch	Sasser
Bartlett	Helms	Schmitt
Cannon	Laxalt	Scott
Chafee	McClure	Stevens
Domenici	Packwood	Wallop
Garn	Roth	

NOT VOTING—16

Abourezk	Eastland	Johnston
Allen	Griffin	McIntyre
Anderson	Hatfield, Mark O.	Percy
Bumpers		Talmadge
Cranston	Hatfield, Paul G.	
DeConcini		
Dole	Humphrey	

So the motion to lay on the table UP amendment 1695 was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Under the previous order, the Senator from Montana is recognized for 10 minutes.

Mr. MELCHER. I thank the Chair.

Mr. President, earlier today we discussed whether or not the situation wherein the Constitution does not provide for D.C. voting for the House and Senate, whether it was deliberate or whether it was an oversight, whether it was a prohibition or whether it was something that slipped through.

Well, it certainly was not——

The PRESIDING OFFICER. The Senate is not in order. The Senate will be in order. Senators will confine their conversations to the cloakrooms. The Senator from Montana.

Mr. MELCHER. The Constitution, I think, is extremely clear on this, and I see little reason for prolonging discussion on whether or not it was a deliberate prohibition. The clause of article I, section 8, that deals with the District is clause 17. It mentions that "The District shall not exceed 10 miles square."

It mentions that it will not exceed 10 miles square, and that it will be a Federal district, the seat of the Government.

The Constitution is explicit on who gets membership in the House of Representatives. It says very simply that Representatives "shall be apportioned among several States according to their respective numbers," according to their population.

The District is not a State. It has no representation in the House. The District is not a State and it has no representation in the Senate, because the language of the Constitution says that each State will have two Senators.

There is little reason to quibble over whether that is an oversight, as the Senator from Massachusetts chooses to say, or whether it is deliberate. I maintain it was a deliberate, a conscious, decision.

I have no reason at all not to want the remedy to be applied now, and I have voted for it on previous occasions. I voted for it in 1976 in the House of Representatives, where it failed.

But representative government should be provided for the District, and it should be done now. There should be a remedy and it should be a proper remedy.

The Senator from Massachusetts, my friend Senator KENNEDY, argues for a special deal for the District in order to enlarge the Senate, to provide equal representation for the District on the basis of not making a mistake but on the basis of just saying in this special instance they may have two Senators.

On that point I disagree. There are other remedies available to us that are more proper and are more likely to succeed.

(Mr. METZENBAUM assumed the chair.)

Mr. MELCHER. If there is any merit to the argument that the opponents of the constitutional amendment believe that the District is either one or more of these: too liberal, too democratic, too black, or too urban, I do not think there is much merit to it. But if there was merit to that argument, would not the converse be true? In order to give the District representation in the Senate then it would be an opportunity for more liberalism, more Democrats, more blacks, and more urban?

I would discount either argument. I would not uphold either argument. In fact, I disagree with either argument.

How are the State legislatures going to view this? Jefferson said that a State represents both expansiveness and diversity. Our procedure here will be, if it is approved by a two-thirds vote, that the State legislatures look at it where three-fourths of them must ratify. What is going to be their view of it? I think the States, or at least many States, will view this constitutional amendment pretty much in the same light as Jefferson envisioned it. He envisioned the makeup of the Senate to be different, to allow for a truly bicameral type of legislature, a legislature where the House is represented on the basis of population and the Senate is represented on the basis of States to properly reflect the expansiveness and the diversity of the States.

The legislatures, if the Senate will bear with me, are debating this issue of whether or not that legislature or those legislatures should approve this constitutional amendment if it is presented to them. The legislators will argue un-

doubtedly on the question of whether or not the District, having two Senators would dilute the Senate by how much to their particular State? Will not the argument be made in many cases that a State that is primarily interested in agriculture, which is its basic industry, along with all of its other interests, along with all of its diversity, will not the argument be made in the legislature of such a State that two Senators from the District will cancel out their States' two Senators' vote on a question, for instance, of farm prices? Will not the aspects of a farm State's Senators' representing a basic industry in their State be different from the District's two Senators who represent no diversity in terms of agriculture within the District? Will they not be voting on, perhaps, the side of what seems to be consumerism to, say, farm prices should be lowered?

What about other issues, such as mining or forest products or what about the basic argument of rural interests versus urban interests? Of course, there is a difference that will have to be debated by each individual State legislature.

It is a rather compelling argument that the State legislature could view that very seriously in terms of the basic industry to recognize that, perhaps—no certainty but, perhaps—the District's two Senators would view it entirely contrary to the interests of that basic industry or several basic industries within a State?

So I say to my colleagues that a better remedy should be found that can get the overwhelming approval of the Senate and assure its rapid ratification among the 50 State legislatures to at least three-fourths, and then by that process to rapidly allow the enfranchisement of the District residents in both the House and in the Senate.

For that reason I offered on Thursday the amendment that would treat the District on the question of population exactly as they wish to be treated, exactly on the basis of population as if they were a State, recognizing the validity of the bicameral situation where diversity and expansiveness are indicative of a State and should be represented here in a different light in the Senate.

I call for the voters of the District to vote in Maryland for their Senators as if they were residents of Maryland. That was exactly the case the way it was here in the District prior to 1800, when in 1800 the United States accepted the ceded land from the State of Maryland.

From that point on, article I, section 8, clause 17 forbade, and the residents that were here at that time were no longer permitted to vote for their Representatives for the House of Representatives, or for their Senators for the Senate.

I think that was an error. I think it was a fault within the Constitution itself, one that should be corrected and corrected properly, in the manner I have described.

I yield 30 seconds to the Senator from Wyoming.

Mr. HANSEN. Mr. President, I appreciate——

The PRESIDING OFFICER. The time of the Senator from Montana has expired.

Mr. MELCHER. Mr. President, I have 2 additional minutes yielded to me by the Senator from Virginia.

The PRESIDING OFFICER. The Senator is correct.

Mr. MELCHER. I yield 30 seconds to the Senator from Wyoming.

Mr. HANSEN. Mr. President, I would like to associate myself with the remarks made by the distinguished Senator from Montana. I think he is eminently accurate and fair in his assessment.

I think the proposition he has offered to the Senate makes good sense. It would seem to me to achieve all of the rights it is heard in both bodies of this Congress that residents of the District of Columbia are yearning for, without incorporating in it the shortcomings that would flow from the kind of proposal we are faced with now.

I hope very much that the proposition as it now seems to be before the Senate will not be adopted. I thank the Senator from Montana.

Mr. MELCHER. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator's time has expired.

PROPOSED AMENDMENTS BY MR. SCOTT

Mr. SCOTT. Mr. President, the 17th amendment provided that when vacancies happen in the representation of any State in the Senate, the executive authority of such State shall issue writs of election to fill such vacancies, provided that the legislature of any State may empower the executive thereof to make temporary appointments until the people fill the vacancy by election, as the legislature may direct.

Mr. President, under the joint resolution before, House Joint Resolution 554, there is no provision for the filling of vacancies. We know that under article I, section 8 of the Constitution, Congress has exclusive legislative jurisdiction over the seat of Government, but that we have passed an act within the past several years delegating a portion of our legislative jurisdiction to the Council of the District of Columbia, subject to the right of Congress to override any decision that might be made by the City Council of the city of Washington.

So there is doubt, under this joint resolution, as to whether the legislature that is spoken of in the 17th amendment, the legislature of the State—if we apply that to the District of Columbia, are we talking about the U.S. Congress, both bodies of Congress, or are we talking about the City Council of the District of Columbia?

Mr. President, in order to clarify this, I send to the desk two amendments and ask that they be received and printed. It is not my intention to call up these amendments today, but I want them to be before the Senate so that Senators will know the purpose.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. SCOTT. Certainly.

Mr. ROBERT C. BYRD. Does the Senator intend to ask for a roll call vote on either or both of those?

Mr. SCOTT. It is my intention tomorrow, at the proper time, to ask for roll call votes on the amendments.

Mr. ROBERT C. BYRD. Would it be possible for the Senator to begin on those amendments in the morning, to lay them down at the close of business today?

Let me say it this way: Will it be possible to lay them down now, as we prepare to move off this bill, so that it would be possible to go to them in the morning?

Mr. SCOTT. You know, some of us Members of the Senate are late people, some of us are early people. Some of us get up at 6 o'clock in the morning, and some get up late and stay up late. I frequently do not go to bed until 1 o'clock, so I am one of the late people.

I would prefer not to do that, because I do not know—I believe the distinguished Senator is going to convene the Senate at 10 o'clock in the morning?

Mr. ROBERT C. BYRD. Perhaps we can get Mr. MCCLURE, then, to lay down an amendment. Let us leave it at that.

Mr. KENNEDY. Maybe we ought to find out whether he is an early one or a late one.

Mr. SCOTT. Mr. President, as long as we are speaking in a somewhat humorous vein, let me say that when I come back to the floor of the Senate in a few minutes I will have a patch over one of my eyes. I hasten to say that has nothing to do with the business pending before the Senate. Over the weekend, I was riding on a lawnmower, and I got a piece of bark from a tree in one of my eyes. It is gone now, but there is a little scratch on there, and the doctor is going to put a patch over it. I just thought I would explain to the Senate that it has nothing to do with the matter before the Senate.

Mr. BAYH. Mr. President, will the Senator yield?

Mr. SCOTT. I would rather complete my explanation of these amendments. If the distinguished Senator wants to talk about my eye, I am happy to yield.

Mr. BAYH. I thank the Senator. I am talking about your health. When you say, "It is gone now," are you talking about the bark, or your eye?

Mr. SCOTT. I hope it is the bark.

Mr. HANSEN. Can the Senator from Virginia tell us whether that will improve his vision?

Mr. SCOTT. I hope so.

If I may continue here for a moment—Mr. President, the amendments that I have sent to the desk are offered on behalf of myself and the distinguished Senator from Wyoming (Mr. WALLOP).

The first amendment would provide a new section 3 in the joint resolution before us that says that when vacancies happen in the representation of the District of Columbia in the Senate or the House of Represenatives, the Mayor of the District of Columbia shall issue writs of election to fill such vacancies, except that the Council of the District of Columbia may empower the Mayor thereof to make temporary appointments until the people of the District of Columbia fill the vacancies by election, as the Council of the District of Columbia may direct.

Then it provides technical changes to renumber the paragraphs.

In other words, the first amendment would put the District of Columbia, insofar as the appointment of Senators to fill vacancies is concerned, on the same level with the legislatures and the executives of the States.

The second amendment that would be offered is to add to section 2, which now reads:

The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of government, and as shall be provided by Congress.

It does not indicate which shall be superior, the Congress or the people of the District of Columbia. I would add a phrase to make it read thusly:

SEC. 2. The exercise of the rights and powers conferred under this article shall be by the people of the District constituting the seat of Government and to the extent not in conflict with the people of the District of Columbia as shall be provided by the Congress.

The proponents of this joint resolution seem to want to give the people of the District of Columbia authority to elect the Senators and it seems to me that it should be clarified so that Congress will be taken completely out of the picture insofar as the selection of Senators for the District of Columbia is concerned. These are both clarifying amendments. They do not add to the substance of the joint resolution, but they do clarify some inconsistencies or some vagueness in the joint resolution.

Mr. President, I yield back the remainder of my time.

Mr. President, for purposes of clarification, I yield back the remainder of my time allocated for today.

Mr. KENNEDY. Mr. President, as I understand with the agreement of the Senator from Virginia we have concluded the discussion on District of Columbia representation today and will now move, as the leader mentioned, to the Federal-Aid Highway Act. That is my understanding.

The PRESIDING OFFICER. It is in order to proceed for 10 minutes on the conference report on military construction.

TIME-LIMITATION AGREEMENT—OUTER CONTINENTAL SHELF CONFERENCE REPORT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be an overall time limitation on the OCS conference report to be equally divided as follows: 15 minutes under the control of Mr. JACKSON; 15 minutes under the control of Mr. HANSEN; 10 minutes under the control of Mr. BARTLETT at such time as the conference report is called up. That is on the Outer Continental Shelf.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. ROBERT C. BYRD. I thank the Chair and the Senators.

MILITARY CONSTRUCTION APPROPRIATIONS, 1979—CONFERENCE REPORT

Mr. HUDDLESTON. Mr. President, I submit a report of the committee of conference on H.R. 12927 and ask for its immediate consideration.

The PRESIDING OFFICER. The report will be stated.

The legislative clerk read as follows:

The committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H.R. 12927) making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1979, and for other purposes, having met, after full and free conference, have agreed to recommend and do recommend to their respective Houses this report, signed by all of the conferees.

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the conference report.

(The conference report is printed in the House proceedings of the RECORD of August 15, 1978.)

Mr. HUDDLESTON. Mr. President, this conference agreement provides $3,880,863,000 in new budget authority for fiscal year 1979 military construction and family housing programs of the Department of Defense. This amount is $83,883,000 below the bill as it passed the Senate, and $35,976,000 above the House level. It is, in total, $372,137,000 below the original budget estimate, a reduction of almost 9 percent.

I ask unanimous consent that a table displaying these comparisons by appropriation be printed in the RECORD immediately following my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. HUDDLESTON. Although this year's House and Senate bills were only $119 million apart, there were actually more than 200 items and over $750 million in disagreement. Considering this difference, of course, neither House was able to sustain all of the items contained in its bill. On balance, however, I believe that the conference agreement represents a fair compromise which I do not hesitate to endorse.

In the interests of time, I do not plan to address the details of the agreement; the conference report was printed in full in the CONGRESSIONAL RECORD of August 15. I do, however, wish to again call the attention of my colleagues to the fact that new fiscal year 1979 appropriations constitute a $372 million, or almost 9 percent, decrease to the budget request. I emphasize this point because, during floor debate on the Senate bill, I argued that a proposed 2-percent general reduction was not only inappropriate, but unnecessary in light of probable conference outcome. I think we have a case in point here which members might bear in mind for future bills.

At this point, I would like to publicly commend my House counterpart, the Honorable GUNN MCKAY of Utah, whose spirit of cooperation materially expedited what would have otherwise been a difficult conference. And, while it almost goes without saying, I owe a considerable debt to my colleague from Alaska (Mr. STEVENS) for his untiring support as ranking minority member of our subcommittee. He has played a direct and active role in the formulation of this bill, and I thank him.

In conclusion, Mr. President, I urge that the Senate adopt the conference agreement on military construction appropriations for fiscal year 1979.

EXHIBIT 1

COMPARATIVE STATEMENT OF NEW BUDGET AUTHORITY

	Budget authority					Conference compared with—			
	Enacted, fiscal year 1978	Estimates, fiscal year 1979	House, fiscal year 1979	Senate, fiscal year 1979	Conference, fiscal year 1979	Fiscal year 1978 enacted	Fiscal year 1979 estimate	House bill	Senate bill

Grand total, new budget (obligational) authority	2,977,720,000	4,253,000,000	3,844,887,000	3,964,746,000	3,880,863,000	+903,143,000	−372,137,000	+35,976,000	−83,883,000

Mr. HUDDLESTON. If there is to be a response from the other side of the aisle, Mr. President, I will yield at this point.

Mr. STEVENS. Mr. President, the distinguished chairman of our subcommittee, Mr. HUDDLESTON, has provided us with the details of the conference agreement on the fiscal year 1979 military construction appropriations bill.

The conferees diligently reviewed the items in disagreement and have appropriated $3.8 billion for military construction in fiscal year 1979. I think it is commendable on the part of the committees of both the House and Senate that this bill is about $372 million under the President's budget and yet still provides for the necessary construction as requested by the Defense Department.

I would like to thank our able chairman (Mr. HUDDLESTON) for his leadership in getting this bill through the Senate as well as for his mood of cooperation when we went to conference. Under his leadership and with the cooperation of the House subcommittee chairman, Mr. MCKAY, we were able to settle the differences without major difficulty.

The military construction appropriations bill for fiscal year 1979 is a sound bill. I urge adoption of the conference report by the Senate.

Mr. HUDDLESTON. Mr. President, I move the adoption of the conference report.

Mr. STEVENS. Mr. President, I have been requested to ask for the yeas and nays. I previously indicated I thought it would not be necessary, but there has been a request on our side. I do ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. Do the Senators yield back the remainder of their time?

Mr. STEVENS. I yield back the remainder of my time.

Mr. HUDDLESTON. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the conference report. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announced that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Arkansas (Mr. HODGES), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Hampshire (Mr. MCINTYRE), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

I further announce that if present and voting, the Senator from Minnesota (Mrs. HUMPHREY) would vote "yea."

Mr. STEVENS. I announce that the Senator from Kansas (Mr. DOLE), the Senator from Michigan (Mr. GRIFFIN), the Senator from Oregon Mr. HATFIELD), and the Senator from Illinois (Mr. PERCY) are necessarily absent.

I further announce that, if present and voting, the Senator from Illinois (Mr. PERCY) and the Senator from Michigan (Mr. GRIFFIN) would each vote "yea."

The result was announced—yeas 83, nays 1, as follows:

[Rollcall Vote No. 337 Leg.]

YEAS—83

Baker	Gravel	Nelson
Bartlett	Hansen	Nunn
Bayh	Hart	Packwood
Bellmon	Haskell	Pearson
Bentsen	Hatch	Pell
Biden	Hathaway	Proxmire
Brooke	Hayakawa	Randolph
Burdick	Heinz	Ribicoff
Byrd, Harry F., Jr.	Helms	Riegle
	Hollings	Roth
Byrd, Robert C.	Huddleston	Sarbanes

NOT VOTING—16

Abourezk	Eastland	Hodges
Allen	Griffin	Humphrey
Anderson	Hatfield, Mark O.	Johnston
Bumpers		McIntyre
DeConcini	Hatfield, Paul G.	Percy
Dole		Talmadge

So the conference report was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the conference report was agreed to.

Mr. METZENBAUM. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. HUDDLESTON. Mr. President, there are amendments in technical disagreement. Since they are not controversial, I ask unanimous consent they be considered en bloc.

The PRESIDING OFFICER. (Mr. MUSKIE). Without objection, it is so ordered. The clerk will state the amendments in disagreement.

The legislative clerk read as follows:

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 3 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by the said amendment, insert: "1983: *Provided*, That of this amount, not to exceed $64,400,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations for both Houses of Congress of his determination and the reasons therefor".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 5 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "1983: *Provided*, That of this amount, not to exceed $46,300,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 7 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the matter inserted by said amendment, insert: "1983: *Provided*, That of this amount, not to exceed $52,000,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 8 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed in said amendment, insert "$194,880,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 9 to the aforesaid bill, and

concur therein with an amendment as follows:

In lieu of the matter proposed by said amendment, insert: "designate: *Provided further*, That of the amount appropriated, not to exceed $9,400,000 shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 15 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed in said amendment, insert "$1,679,865,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 17 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed in said amendment, insert "$33,446,000".

Resolved, That the House recede from its disagreement to the amendment of the Senate numbered 20 to the aforesaid bill, and concur therein with an amendment as follows:

In lieu of the sum proposed in said amendment, insert "$1,399,400,000".

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the Senate concur in the amendments of the House to the amendments of the Senate as stated by the clerk.

The PRESIDING OFFICER. Without objection, it is so ordered.

The motion was agreed to.

FEDERAL-AID HIGHWAY ACT OF 1978

The PRESIDING OFFICER. The Senate will now resume the consideration of S. 3073, which the clerk will state by title.

The second assistant legislative clerk read as follows:

A bill (S. 3073) to amend title 23, United States Code, to authorize Federal-aid highway programs through fiscal year 1980, and for other purposes.

The Senate resumed the consideration of the bill.

Mr. CHILES. Mr. President, on Friday I had the opportunity to read an opening statement of the Senator from Texas on the highway bill. It was one of the most incisive and precise statements that I have ever read. I was very much impressed with it. I think it is the kind of statement that this body really needs to hear.

The Senator from Texas stood in the Senate Chamber last Friday and felt moved to make a statement that I think will be of great help to this body. I merely wish to call the attention of all Senators to the speech to make sure they were alert and listening. I certainly associate myself with the remarks.

Mr. ROBERT C. BYRD. Mr. President, if the Senator from Kentucky will allow me, I also want to express appreciation to the Senator from Texas. He did well to stand on his feet, even, last Friday. He had a terrible sore throat, yet he stood here all day and disposed of 19 or 20 amendments on Friday.

I thank the Senator from Kentucky.

Mr. BENTSEN. I thank the distinguished Senator from Florida.

Mr. BARTLETT. I ask unanimous consent that the amendment submitted by me and Mr. BELLMON, amendment No. 3513, be withdrawn.

The PRESIDING OFFICER. Is there objection to withdrawing the amendment? Without objection, it is so ordered.

AMENDMENT NO. 3507

The PRESIDING OFFICER. The pending business is the amendment of the Senator from Kentucky (Mr. HUDDLESTON).

Who seeks time?

Mr. HUDDLESTON. Mr. President, would the Chair indicate how much time there is and how it is divided?

The PRESIDING OFFICER. There are 21 minutes of the Senator from Kentucky and 45 minutes of the Senator from Texas.

Mr. BENTSEN. Let me say to the Senator from Kentucky, we wanted to get along as far as we could on Friday. If the Senator would like some more time I can give him some of my time.

Mr. HUDDLESTON. It is my opinion right now that this will be adequate time.

Mr. BENTSEN. If the Senator finds he wants more time, we will rediscuss it.

Mr. HUDDLESTON. I regret I was not here on Friday. I had the distinct understanding the amendment would not be called up until today.

Mr. BENTSEN. I do not know who the Senator had the understanding with. It was not with this manager of the bill.

Mr. HUDDLESTON. That is correct. It was not with this manager of the bill.

Mr. President, I am extremely pleased to join with the distinguished chairman of the Senate Environment and Public Works Committee, Senator RANDOLPH, and our other colleagues in introducing this most important amendment to S. 3073, the 1978 Federal-Aid Highway Act. Our amendment, if adopted, will address a critical situation with respect to the adequacy of our Nation's highway system and the increasing amount of energy supplies that this system must carry.

No one can argue that highways play a major role in the energy transportation system. The establishment of the program called for in our amendment should serve as the first plank in the development of such a system. Though I will place the emphasis in this statement on the importance of our highways in transporting coal, the amendment before us makes it clear that routes used for transportation of not only coal but also uranium, oil, and gas, as well as related resource recovery and exploration equipment used to increase national energy supplies would be eligible for the program.

Particularly in coal-producing regions, the Nation's extensive road and highway network allows trucks to extend the reach of railroads and waterways. The effort to meet projected increases in energy production will place unprecedented demands upon our highway system. There will undoubtedly be major challenges with respect to construction of new routes to carry energy supplies and perhaps more importantly to the reconstruction and maintenance of the existing impacted highway network.

We all know that a truly significant problem exists. As long as 5 years ago the Kentucky Department of Transportation made an assessment of the needs in the Commonwealth and came up with projections that have held true through today; the Appalachian Regional Commission completed a review of the problems in January of this year; the Department of Interior has issued a very detailed national energy transportation "atlas"; the U.S. Department of Transportation in a "preliminary assessment report" to the Secretary of Transportation has at long last noted the Federal Government's responsibility in this area. The following are quotes from the DOT's preliminary assessment:

There's every indication that coal road problems will become even more severe in the future unless existing federal policies are altered.

Coal road problems could well become so severe as to become a bottleneck on coal production.

Present apportionment formulas for federal highway aid do not recognize that many states have significant special needs attributable to coal production.

Immediate consideration should be given to the establishment of a coal roads and highways program to assure that near term highway transportation problems will not seriously hamper coal production.

Unless reconstruction and repair of the energy impacted routes is undertaken quickly, there will undoubtedly be bottlenecks in coal deliveries to the Nation's consumers.

In addition to the possibility that there will be bottlenecks for consumers, it should be pointed out that implementation of an energy impacted road program would provide a most valuable aspect for the population of producing regions. It is the men, women, and children who inhabit these regions that must employ the energy-impacted road system as their lifeline to the rest of the world. It is the energy-impacted road system that carries other industrial goods to and from these regions. It is the energy-impacted road system, now in a tragic state of disrepair, that carry the youth of the region to and from their schools. To be sure, the Nation as a whole benefits by increased energy supplies. However, there are just as certainly immediate negative impacts which are evident in several regions. Several legislative proposals have been introduced in an effort to offset social and economic boomtown situations, however, no one has yet adequately addressed the physical deterioration of the roads and accompanying safety problems in these areas. Our amendment is an attempt to do that. We feel that the short-term relief offered in this amendment will prevent further deterioration of our highway network as well as provide the basis for the development of an overall energy transportation system.

I believe certain facets of our amendment merit close attention. First, in an effort to make certain that States are shouldering their fair share of the costs involved, we have asked that they con-

tribute a 30-percent matching share for each project which is approved.

Additionally, to be absolutely sure that overloaded trucks do not contribute to further damage to the highways involved, we have mandated that the State enforce applicable vehicle weight limitations to the satisfaction of the Secretary of Transportation in order for that State to be eligible. We have placed this language in the amendment to emphasize our desire to see vehicle weight laws strictly enforced. Our language is an addition to the very effective language already in section 126 of S. 3073.

To assure that our Nation's energy producing capabilities will not be stifled, because of a lack of transportation capabilities, we urge that Senators join us in supporting this amendment.

Mr. President, the amendment we are addressing is really very simple in nature. It is designed to meet a very desperate need that exists in much of the Nation and which will undoubtedly exist in much more of the Nation as we seek to meet our energy requirements in this country.

The President has called for, and all energy experts have confirmed, that if we are to meet our energy problems in the short term, it will be necessary to increase vastly the production and utilization of coal. To achieve that requires a number of things. It cannot be done simply by Government fiat or Presidential decree. Getting coal out of the ground is a consideration. Further, once it is taken out of the ground in environmentally acceptable ways, it has to be transported to the points where it is to be used.

A very important chain in that transportation link is the highways over which that coal must be transported, whether it is transported to the ultimate user by highway or whether it is transported to a rail center, where it then is transported by rail, or whether it is transported to a river port, where then it is carried by barge.

The fact is that already we are seeing that this vastly increased production is placing an unbearable strain upon the roads and highways over which coal must be transported.

I point out that we are not talking only about coal. This amendment has been referred to variously as a coal-haul amendment or coal-road amendment. Actually, we are talking about energy resources of any kind. We are talking about the need for opening up new oilfields and new gasfields. We are talking about the need to recover uranium and transport it to markets.

So what we have had is a situation that is now becoming intolerable in certain areas of the country and certainly will grow much worse, in which the addition of the many extra tons of energy that have to be transported has deteriorated the highway system, has made the highways extremely hazardous for other citizens who must use the same highways, and has impaired seriously the ability to move the coal from the place it is produced to the place where it is going to be used.

As I pointed out, the President has indicated that the national interest requires that we have this greatly increased production and utilization of coal and other resources. So the national interest is involved, and in my judgment it is in the national interest that the highways and roads be available to transport the coal from the production areas to the areas where it is consumed.

I know there have been arguments that this is an amendment that affects only a few States because only a few States benefit, according to one school of thought. That is not true, because the entire Nation benefits from the production and utilization of energy resources, wherever they may come from.

If we look at our State of Kentucky—and we are a major coal-producing State, the largest in the United States right now—we produce the coal that goes all over the United States, virtually. Incidentally, we produce the coal that provides the electricity to light and heat and cool this very building we are standing, in because the Potomac Electric & Power Co. is a customer of Kentucky coal. The coal has to be transported here.

As far back as 1970, we were supplying 8.4 million tons of coal per year to the State of Michigan to heat and light the homes there; 6.4 million tons for the same purposes in Georgia; 9.9 million for North Carolina; 7.2 million for Florida. Alabama and Mississippi also receive coal produced in Kentucky, as does Wisconsin.

So we are not talking about a regionalized problem. We are talking about the national interest and the way best to serve that interest and what the national interest dictates the Federal Government's participation and share should be in providing the means of moving these energy supplies from production to consumption.

It also has been argued that this is a problem that the individual States should solve, that the States where production occurs are not doing enough. I cannot speak for all the States that produce coal or oil or uranium, or whatever energy supply is necessary, but I know that in Kentucky we addressed this problem some time ago.

The Department of Transportation in the State of Kentucky, in 1974, completed an extensive coal-haul study entitled "Kentucky Coal and Its Transportation Impact."

We established a coal severance tax in Kentucky. The current rate is 4.5 percent of the value of the coal being produced; the minimum tax of 50 cents a ton.

In 1974, an industrial haul-road program was established and funded with $22 million, the primary purpose being to reconstruct certain essential haul roads. An energy road fund has been established in Kentucky for the purpose of concentrating money on the repair of coal-haul roads. This program was funded in the 1976–78 biennium with $25 million.

A new program has been established, called "The Resource Recovery Road Program," which enabled bonds to be sold for the construction and reconstruction of critical resource recovery roads in the Commonwealth. Kentucky Highway 80 was the first project under which this program has been funded with $212 million worth of funds, more than twice what we are asking for on an annual basis in this bill for the entire Nation.

A special appropriation of $30 million was made last year in Kentucky for extremely critical road damage due to floods, coal hauling, and winter damage.

The completion of the Daniel Boone Parkway, which extends to the heart of the eastern Kentucky coalfields, was accomplished with a funding level of $110 million of State funds.

For 1978 through 1980, the resource recovery roads program has authorized 15 major projects, with funding of $240 million.

The 1977–78 fiscal year resurfacing budget for the Kentucky Department of Transportation has increased from $7 to $8 million, and the budget has been increased from $8 to $13 million for 1978–79.

The point is, Mr. President, that Kentucky is doing what it can. Kentucky is doing, and already has committed, much more than this amendment is asking the entire Nation to do to meet this critical problem.

We recognize, as has been argued, that perhaps this problem exists, because the States have allowed overweight trucks on these roads. Certainly, overweight trucks have exacerbated the problem, but that in itself is not the total problem. It is the number of trucks that are traveling. Also, even if the surface of the road were not damaged, we still would have an almost impossible situation, as the large number of trucks necessary to transport the increased fuel production is in frequent conflict, constant conflict, with the need of the citizens in the area to use those roads. The idea that this is somehow an amendment that will benefit only coal producers, and that they should be carrying this burden, should be dispelled by the fact that it is the citizens in the area who are faced with the hazardous task of traveling these roads in order to get from place to place.

I point out that this amendment recognizes the overweight problem and mandates that the State must enforce weight limits in order to participate in the funding made available here.

This amendment does not ask for new funds, any spent beyond what the bill calls for. It simply asks for a category of energy impact roads where the Federal Government will participate on a 70–30 percent sharing basis to help areas of this country provide the means of transporting energy whether it is coal, oil, gas, or uranium from the area of production to the area of consumption.

I think it is vital. It is vital to the Nation's effort to produce energy that it needs and utilize that energy here in the short term as we try to find alternate sources and try to reduce our dependence on energy from abroad.

So I believe, Mr. President, that upon consideration of this amendment by Members from whatever section of the country, whether they are depending on the importation of energy from some other section of the Nation, or whether they are in fact the major producing

areas of this energy, it is in the interests of each section that we provide the method to get the coal or get the energy to where it needs to be used in the most efficient, most effective, most cost-effective way. I know that we need to consider all of our energy problems in this country. We really do need a comprehensive transportation policy for the country, taking into account all the various modes. But our immediate need, and certainly this will not be contrary at all to the overall and comprehensive plan, is to make sure that we can move what is necessary to move so that it can be utilized in the most efficient and effective way.

This amendment is designed to accomplish that short-term need.

Mr. President, I yield at this point to the Senator from West Virginia who I believe is ready to make some remarks.

Mr. RANDOLPH. Yes, if agreeable.

How much time, may I inquire, is allotted to the able Senator from Kentucky?

The PRESIDING OFFICER. The Senator has 8 minutes remaining.

Mr. RANDOLPH. I thank the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. BAYH addressed the Chair.

Mr. RANDOLPH. Will the Senator yield?

Mr. HUDDLESTON. I yield such time as the Senator from West Virginia may require.

The PRESIDING OFFICER. The Senator from West Virginia is recognized.

Mr. RANDOLPH. Did the Senator want unanimous consent?

I yield to my colleague from Indiana.

Mr. BAYH. I want a couple minutes after the Senator from West Virginia. I wish to join him in supporting the amendment which we coauthored with the Senator from Kentucky.

Mr. RANDOLPH. I wish to be notified at the end of 5 minutes, if it will be agreeable to the Chair.

Mr. President, I thank the knowledgeable Senator from the leading coal-producing State of the Nation. A West Virginian finds it a little difficult to say that Kentucky is the leader, but we are very close in production. We vary back and forth in the volume of production. The amendment under consideration, as the able manager of the bill, Senator BENTSEN, has indicated was discussed for a considerable time on Friday.

I am always reluctant to oppose the chairman of the Transportation Subcommittee. As the chairman of the full committee, I try to work constantly with the subcommittee, and in this case it is difficult for me to work for an amendment with which he is in disagreement.

I hope, perhaps, that there might be an inclination on the part of the manager of the bill for our committee to perhaps accommodate this need not because it is offered by the Senators from coal-producing States, but because there is the need, a very real need, to formulate not only an energy policy but a transportation policy also. The means of moving the coal from mine to the market, to the consumers of this abundant fossil fuel is as important as is the production of the coal.

The magnitude of the problem in certain areas of our country is almost staggering, as we attempt to look at it. We do know that there will be an increased production of coal and other energy supplies. Frankly that means that we are not against other forms of energy that will come along later, but now, now is the time when the coal must be moved from, of course, the miles to the marketplace.

This has meant an unprecedented use of our highway system and in the several States, not just Kentucky and West Virginia. The roads, of course, have deteriorated by the coal hauling which has been absolutely necessary, and we are also faced with the fact that at the present time there is a strike which is now in its 6th week which affects the Norfolk and Western, one of the greatest, perhaps the greatest, rail hauler of coal in the country.

As we think of the construction of roads and the reconstruction of roads, it is not wrong for me to say that I think the immediacy of the problem can only be met by, let us say, a substantial sum of money, not an excessive sum of money.

The PRESIDING OFFICER (Mr. CULVER). The Senator's 5 minutes have expired.

Mr. RANDOLPH. I have no further statement to make except to say that I do hope and I know the manager of the bill will give careful consideration to his position on behalf of the reported bill from the Senator from Texas.

Mr. BENTSEN. Mr. President, I yield such time as he desires to the Senator from Maine.

Mr. MUSKIE. Mr. President, a little later in the debate on this pending measure I will make a more extensive statement with respect to the budget implications of the Highway Act.

For the moment, I regret that I find myself in opposition to the amendment of my good friend and colleague from Kentucky, Senator HUDDLESTON, and my colleague, the chairman of my committee, my good friend, Senator RANDOLPH, who, as chairman of the Public Works Committee, is proceeding in very responsible fashion from the point of view of the budget resolution with respect to the pending bill.

But the amendment of my good friend from Kentucky, Senator HUDDLESTON, simply creates budget problems and it is my responsibility as budget chairman to point them out. His proposal would add funding of $100 million per year from the Highway Trust Fund for energy-impacted roads. The bill reported by the Public Works Committee is a fiscally responsible bill as I will say at greater length later. The reported bill is consistent with the budget resolution for fiscal 1979, but there is very little leeway to increase the authorizations. The Senate already approved a $75 million increase for bridges, as was pointed out by Senator RANDOLPH, using up what little room there was. Therefore, Mr. President, I must oppose further add-ons to this bill.

Furthermore, Mr. President, to accept this special program is to create a "wedge" for future increases which it is difficult to estimate. A report from the Appalachian Regional Commission projects needs of $4 billion to $5 billion to rehabilitate and redesign these roads to carry heavy coal trucks. Mr. President, the reason we have the problem of energy-impacted roads is clear—energy traffic involves very heavy loads, often exceeding statutory weight limits as Senator HUDDLESTON has suggested. Hearings earlier this year before the Oversight Subcommittee of the House Ways and Means Committee showed that in many places coal trucks were consistently in excess of legal weights. Senator BENTSEN's subcommittee also heard testimony on the inadequacy of State weight enforcement.

Mr. President, if it is true as seems the case, that a principal reason for coal road deterioration is inadequate enforcement of truck weight limits, then if we remove from the States the major burden of repairing the damage, would we not also be removing the incentive for them to improve their policing of truck weight limits? Indeed, might not the problems caused by overweight trucks become even more severe if the Federal Government assumes the major cost for repairing the damage caused to local roads?

Before we create a special-purpose highway program, taking user taxes collected from across the country to pay for road improvements unique to a few areas, I think other alternatives should be explored. For example, the committee bill has several provisions which would strengthen enforcement of weight limits, and these provisions properly address the problem at its source. Further, it seems to me also pertinent to recognize that increased extraction of coal generates employment, profits, and State collection of severance taxes, presenting alternative funding sources. In addition, we already have a special program for Appalachian highways for which more than $2 billion has been appropriated from general funds since 1965.

I urge the Senate, therefore, Mr. President, considering the potential magnitude of the program that may be generated by this wedge, and considering the tightness of present budget considerations, to resist adding further authorizations to the highway bill, and to vote against this amendment.

Mr. BENTSEN. I thank the distinguished Senator. Mr. President, I yield myself 10 minutes.

I, too, Mr. President, oppose the amendment, and I must say with some regret because of my high esteem for the Senators from Kentucky and from West Virginia. But my friend, the Senator from Maine, has referred to what has been done for Appalachia before. If the people of West Virginia and the people of Appalachia really knew and understood what the chairman of the committee has done for Appalachia they would duplicate Mount Rushmore in Appalachia with Senator RANDOLPH at the head of that team.

I do not begrudge them any of it. I think it is well deserved, and it has helped that area immensely, and it should be so understood by everyone here.

But, Mr. President, I would like to dispel the notion that we are talking about anything here other than a program for coal-damaged roads. The sponsors of this amendment have attempted to broaden its appeal by referring "energy-impacted" highways; by not limiting its scope to coal-haul roads. This is little more than a smokescreen. According to a study by the Department of Transportation, once a program like this is implemented, noncoal-producing States will be left holding an empty bag. By and large, energy-impacted roads are coal-haul roads.

This amendment would target its funds to the restoration and repair of existing roads damaged by energy transportation and development. The Department of Transportation study indicated that 95 percent of the energy damaged roads are in seven Appalachian States; 60 percent of the needs are in Kentucky alone. If these funds are distributed on the basis of current needs, as we assume they would be, only 5 percent would be left for the rest of the Nation after these seven States have taken their share. Its obvious we are really talking about coal-haul roads. There is not much oil, uranium, or natural gas in Appalachia. Furthermore, because the Western coal-producing States have not permitted their coal roads to deteriorate, they also would be left out of the picture as the amendment is drafted.

It should be understood that this amendment will address a regional problem at best, one which has arisen primarily because these States have been lax in enforcing their own State laws on highway weight limitations. It is common knowledge that overweight trucks pose the greatest threat to the life and durability of road surfaces. When you consistently permit trucks to exceed a road's designed weight limitations, you quickly destroy it.

The State of Kentucky, which would be the primary beneficiary of this amendment, has not enforced its own weight limitations on coal trucks. Trucks weighing as much as 130,000 pounds—which is 50,000 pounds over the interstate weight limit and two or three times the limit of most primary and secondary roads—have been permitted to abuse these highways with virtual impunity from the law. The Governor of Kentucky, testifying before the Public Works Committee, apologized for the situation by saying,

". . . Local courts are understandably reluctant to restrict the activities of their best, sometimes only, industry."

Well, Mr. President, I am equally reluctant to reward those same local courts for their unwillingness to enforce the law. Although the sponsors of this amendment have attempted to cast this as a national problem, it is really a regional problem brought on by the negligence of their own local law enforcement officials.

Furthermore, the same States that would benefit from this amendment are already the target of special highway assistance—assistance which is not available to other States. Thirteen years ago we were singling out Appalachia for special treatment because it was distressed. We created a new program—the Appalachian Development Highway System—and authorized the construction of 2,350 new miles of highways and 1,000 miles of access roads. Since then, we have added an additional 550 highway miles and 400 miles of access roads. By 1981, when the present funding for the Appalachian Highway System expires, these seven States will have received over $2 billion in extra Federal highway assistance. Even the $100 million price tag on this amendment looks small in comparison to the special Federal assistance they are already receiving.

Although the Appalachia Highway System was created to promote economic development in the region, the funds from this program have greatly assisted these States in providing for coal transportation. This point was clearly made by the distinguished senior Senator from West Virginia and the Governor of Kentucky in hearings held by the Public Works Committee in 1976

Now, today, we are being asked to target the same region for special assistance because it is growing, because the area is developing its resources and destroying its roads in the process. If this amendment is accepted, Appalachia will continue to receive one pool of Federal funds because it is underdeveloped, and a second pool of funds because it is developing and cannot keep up with the rapid growth of its major industry.

Mr. President, when you have an $8 billion kitty like the highway trust fund, it is tempting to think that you can grab off a hundred million here and a hundred million there without destroying the integrity of the fund. Well, that just is not so. There is no fat in the highway trust fund and there is no fat in this highway bill. We are working off a Federal gasoline tax that has not been raised in 19 years. We are trying to do the best we can with the limited funds we have. We are trying to serve national needs while providing State and local governments the flexibility to address their own peculiar needs. We cannot afford to divert substantial chunks of money into special categories to address regional problems.

I am sympathetic to the problem of coal-haul roads; I understand the importance of these roads to the economy and prosperity of millions of Americans.

There exists a remedy to the coal-haul road problem, but the answer is not found in this amendment. We all realize that the easiest solution to any local problem is to turn to Uncle Sam for help, but in this case it would not be fair to those States which have stretched thin their Federal highway dollars to meet their own special needs.

The answer to the coal-haul road problem lies in the judicious use of a combination of existing resources including:

Their regular Federal highway assistance, which provides the flexibility to shift funds to address regional problems such as this,

Their special Federal highway assistance from the Appalachian development highway program, and

Their revenues from severance taxes and other energy-related income. In a study released Friday by the Department of Transportation, the severance tax is recommended as the most appropriate source of revenues for repairing energy-related road damage.

Finally, this problem can never successfully be addressed until coal producing States like Kentucky get their acts together and begin enforcing their own State weight laws. As long as these States permit coal trucks to operate with impunity from the law, the plight of coal-haul roads will persist. But clearly, this is a local problem, and one that cannot be solved by throwing Federal money at it.

Mr. President, I join the good people of Kentucky in commending their junior Senator for his imaginative solution to a very serious local problem. If he succeeds with this amendment, I am sure other Members of this body will attempt to follow his lead, and rush forth with their own amendments to address the special problems of the States they represent. We can look forward to the establishment of a patchwork of Federal programs for coal-haul roads in Kentucky and Appalachia, grain-haul roads for the plains States, timber-impacted roads for the Pacific Northwest, and citrus-impacted roads for Florida and the lower Rio Grande valley of Texas.

Each region of the country has its own unique economic climate and specific transportation requirements. But rather than establishing individual categories to address each of these special problems, the committee has attempted to develop an extremely flexible highway program that gives each State the ability to apply its Federal assistance to addressing its own peculiar transportation needs. The bill we have reported to the Senate includes several changes designed to even further increase the flexibility of the progam. It consolidates 6 special funding categories, and provides for up to 50 percent transferability from one category to another. Our efforts in this area have been applauded by all participants in the highway program; from the Department of Transportation to the State and local governments that are recipients of the funds.

But the amendment offered by the Senator from Kentucky would fly directly in the face of the reforms we have accomplished in this bill. It would establish yet another special category to address a particular regional problem; and would do so at the expense of program flexibility and at the expense of every other region of the country.

Therefore, I urge the defeat of this amendment.

Mr. BAYH. Mr. President, what is the time situation? I ask my friend from West Virginia for some time as a cosponsor of this amendment. Will he yield me 3 minutes?

Mr. President, I hesitate to take issue

with my distinguished friend from Texas not only because I respect him but I know how difficult it is to fill the role which he now fills with such admiration, inasmuch as I had the good fortune to have a similar capacity some time ago, and I want to salute him for the prudent way in which he has ironed out all of the problems and presented them to us. My cosponsoring of this amendment in no way reflects my attitude toward him or the good work he has done as the chairman of the subcommittee.

I think it is important for us to look at the impact of this amendment as one that goes beyond Appalachia. There are some who may like to think of southern Indiana as part of Appalachia. I do not know whether that is a compliment or an indictment. I accept it either way. But we produce a good chunk of coal down in that part of our State, and it just so happens that I was down in that part of the State this last weekend.

The road conditions between the present mine operations and the points of distribution are almost impossible to describe. I think "chuckhole" is the most often used word in the vocabulary of most Hoosiers. And I think we need to understand that this is going to get worse in those areas where coal is presently being produced.

I notice from the report that we produced 23 million tons of coal, and the Department suggests that it will be 27 million tons by 1985, but the State feels it will be 50 million tons. So the problem is going to get worse, much worse, instead of better.

When I think of this bill, I think in terms of the importance of the contribution the coal conservation bill and the coal conservation effort are going to make to the solution of our energy problems. We have to find a way to get all possible uses of oil and gas off those short commodities and on to coal. We have a bill to accomplish that, which hopefully will be passed by Congress and signed into law.

If we are going to do something about the shortage of oil and something about the shortage of natural gas, we had better see that the line between the production and the end use of coal is a strong one. Right now we find the roads breaking down. It is going to get worse instead of better, and as I see it, this amendment is an important part of the energy package, to see that the pipeline of distribution from miner to user is a strong one.

The condition of our roads as they now are cannot be tolerated. We have to do something about strengthening them. I think the whole country will benefit by this amendment, not just the particular States involved in coal production.

Mr. FORD. Mr. President, could I have 3 minutes?

Mr. BENTSEN. Mr. President, what is the time situation?

The PRESIDING OFFICER. The Senator from Kentucky has utilized the time available to him. There is 31 minutes remaining on the side of the Senator from Texas.

Mr. BENTSEN. I am happy to give the Senator from Kentucky 5 minutes of my time.

Mr. HUDDLESTON. I would like to have about 10 minutes, but half of it belongs to my colleague.

Mr. FORD. I will take 3.

Mr. BENTSEN. How much time remains?

The PRESIDING OFFICER. Thirty-one minutes.

Mr. BENTSEN. All right. I give 10 minutes of my time to the Senators from Kentucky.

Mr. HUDDLESTON. I yield my colleague 3 minutes.

Mr. FORD. Mr. President, I ask to be notified when 3 minutes have expired.

The PRESIDING OFFICER. The Senator from Kentucky (Mr. FORD) is recognized for 3 minutes.

Mr. FORD. Mr. President, I rise in support of the Huddleston amendment, but before addressing it, would like to make clear a few points about my State.

Mr. President, I represent the State with the largest coal production in the Nation. Kentucky now mines 147 million tons of coal annually with over 200 million tons annually projected in the future. We have both low and high sulphur coal: coal for now, coal for later, coal for use in synthetic solvent refining, coal for liquefaction, coal for gasification. Kentucky can meet existing environmental standards in all of these categories and can help keep the country supplied with energy for years to come.

Over the past decade, the amount of coal mined in Kentucky has more than doubled. As a result of this upsurge in production, the State's coal-haul road system has been subjected to excessive demands. Existing roads are not adequate to sustain their increased burden and all of the Kentucky highway system—Federal, State and local, have suffered extensive damage.

For the sake of the Nation, the President has asked Kentucky to double current coal production by 1985. At best, this will be a difficult task, but we believe we can handle the production part of this equation provided that we have an effective energy delivery system.

The amendment before us would earmark $100 million annually of the Highway Trust Fund for reconstruction and repair of roads impacted by energy transportation. When spread among energy producing States, this money will amount to only a drop in the bucket. But, it is a start and a desperately needed one at that.

In a "Dear Colleague" letter sent 2 weeks ago, the managers of the bill wrote of their opposition to the Huddleston amendment because it, and I quote:

> • • • diverts funds from throughout the nation to utilize them for a problem in a limited number of states.

End quote. A limited number of States.

Mr. President, since when has the energy crisis been a limited problem? Opponents of the amendment act as though it is the responsibility, even the privilege, of energy-producing States to tear up their land, destabilize their communities, and ruin their highways so that the rest of the country can drive cars and keep warm in winter. They seem to think it is quite fair that the citizens of these States foot the bill for road repair and reconstruction so that the rest of the country can have energy.

I do not agree.

The energy problem is everyone's problem and it is not right to ask the citizens of the energy-producing States to assume responsibility for the interests of an entire Nation.

I would remind the managers of the bill that it is not the people of the Southwest who bear the full cost of transporting natural gas to the rest of the Nation. It is all the people of America who share the cost of gas transmission lines.

I am sure the Senator from Texas will say they are producing the natural gas and oil, but you have to take into consideration that the rest of the country pays for that transportation, and it is included in their charges.

I would remind the managers of the bill that it is not the people of New England who bear the full cost of the entitlement program that fuels that region's energy. It is all the people of America who share the cost of that program.

We will be asked, why give money to the ARC, when many of the Appalachian States have had 100 percent Federal funds? I remind the managers of the bill that a lot of these roads being torn up were built with 100 percent State money. There is some 50–50 money being spent, also some 70–30. I do not agree that any of it is 100 percent Federal funds; there is also State money. The State of Kentucky raised over $100 million last year for its road program. Since 1959, they have put $1 billion into Appalachia, but that is much less than we are working on, for our State, in the amount of $100 million a year.

They are trying to blame the State for not enforcing the Federal speed limit. There may be other States which might be interested to know that Kentucky has passed a judicial reform bill, and it is now in place. We now have district judges. The county judges do not handle these cases, and I have a press clipping today showing where the district judges are doing an excellent job, the court procedure has been accelerated, and we have tried our best to eliminate the problem we are being accused of here today.

So, Mr. President, I think, as we try to do the job, the next thing is gasification, liquefaction. These things will come from coal, and they will be the items we will lean on to help this country solve its energy problem.

We are grateful to the other States for natural gas, and we are grateful to the other States for oil, but I hope you will allow those States which have coal to produce it and be able to transport it.

In closing, I would like to point out to my colleagues that the energy crisis is upon us and that the demand for national energy sources will only increase. We are on the verge of reaching consensus here in the Congress on a national energy policy, but to increase our domestic energy supply without maintaining the mechanisms to move that energy to the

people would be a totally meaningless act.

I urge the adoption of the amendment.

Mr. METZENBAUM. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. BENTSEN. I yield.

Mr. METZENBAUM. I ask unanimous consent that Rick Sloan and Rick Wilson of my staff be accorded the privilege of the floor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Several Senators addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas has the floor.

Mr. DURKIN. Mr. President, a parliamentary inquiry.

The PRESIDING OFFICER. The Senator will state it.

Mr. DURKIN. What is the time situation?

The PRESIDING OFFICER. Twenty-seven minutes remains on the amendment. It is in the possession of the Senator from Texas.

Mr. BENTSEN. Mr. President, I yield 10 minutes to the Senator from Rhode Island.

Mr. CHAFEE. Mr. President, if I may respond briefly to the comments of the Senator from Kentucky, it appears that under this amendment the money can only go to those roads in the Federal-aid system. Second, it can only go for the repair of roads which have incurred a substantial increase in use and subsequent deterioration as a result of the transportation of coal. In other words, we are talking in the past tense.

The Secretary of Transportation has come up with a survey of those roads that qualify, and the Western States do not qualify under the survey by the Secretary of Transportation. The only States that qualify are the States primarily in the Appalachian region. That is why the Senator from Texas has been talking about the Appalachian situation particularly.

It seems to me the points to be made, Mr. President, are that in this area where we are primarily going to give the aid for these roads, the Appalachian area—since 1965 that area has received $3 billion for authorized Federal-aid roads, in addition to the national highway program from the Trust Fund, which the rest of the Nation has not participated in at all. In other words, the area we are talking about has received a substantial bonanza from the Federal Government in the form of $3 billion. That is point 1.

Point 2 is that when you have coal in an area, you are getting something out of it. The State is getting a very substantial return in the form of taxes and in the form of jobs that come with mining of the coal. I wish we had a bonanza like that in our State. Unfortunately, we do not. Sometimes when you have a bonanza like that, some problems come along with it.

We are asking only that all these problems, in other words, the construction and repair of roads, over which the coal is hauled, not be turned over to the Federal Government; that the local communities in the State carry them; that these problems not be turned over to the highway trust fund to carry that burden from which the States have a dividend returned.

So, Mr. President, I think this $100 million is something that should not come from the income of the highway trust fund. It is going beyond what we expect of the fund. It is something very, very special for an area which is already receiving a form of benefit because they have the coal.

Mr. President, I hope the amendment would be defeated.

Mr. HUDDLESTON. Mr. President, I will respond to the statements which have been made. First of all, as to the budget implications, it is somewhat difficult to get hard and fast figures on the estimate of the trust fund, but we do have from the Secretary of Transportation, the Honorable Brock Adams, a table which suggests that the revised fiscal year 1979 estimates are $9.1 billion.

The bill we are dealing with is in the neighborhood of $8 billion. So it would seem that there certainly is a likelihood that there is enough flexibility there to accommodate this modest increase we are talking about at the present time.

The distinguished Senator from Maine made the point that if the Federal Government assumes this responsibility, it will take the burden off the States and decrease their incentive for doing what they can and ought to do.

I think I dispelled that notion by pointing out that the State of Kentucky alone is already spending several times what we are asking the entire Nation to spend on this particular problem. There is no thought that this approach is going to take care of all of the need. As the distinguished Senator has pointed out, many of these roads are off the Federal system and the States and counties are hard pressed to meet the needs there at the present time.

The suggestion has been made that already the Federal Government is doing enough through the Appalachian program, the Appalachian Regional Commission. But I would point out that the need there and the programs there were developed before the doubling of coal production became a national mandate. Those roads are set for other purposes, a wide variety of things—economic development—and are not necessarily applicable to the kinds of roads we are talking about at the present time.

The Department of Transportation study, which has been quoted as saying that 75 percent of the need exists in the Appalachian area, was a 1975 study and did not take into account the new energy development which is going to be necessary in the vast areas of the West where the production of coal, the production of oil, and the production of other energy resources will certainly be accelerated in the coming year. There will be a need there, too.

My colleague from Kentucky (Mr. FORD) has already addressed the weight limit problem. I would point out again that the amendment we have before us mandates that the States enforce the weight limits that are in effect.

In talking about the regional concept, I am delighted that the Senator from Indiana, a State which is outside of the Appalachian Regional Commission, and the chairman of the Subcommittee on Appropriations, is a cosponsor and has spoken in favor of this bill. Other cosponsors are from Montana and South Dakota. Those are certainly areas far away from the few States which comprise the Applachian region of this country.

Let me say finally that we are talking about a situation that exists now, a need which exists now, and conditions which can only get worse day by day and hour by hour as we try to meet our energy needs.

I have read the study by the Department of Transportation. It makes some suggestions for meeting the current need, short-term suggestions. Well, aside from being illegal, they are also somewhat impractical when they suggest that we take from the reclamation fund, established by the Surface Mining Act, funds to build and construct these necessary energy impacted roads.

As I say, the Department of the Interior was quick to point out that that is not within the scope of the legislation, it is not a priority. They will not have enough funds to come close to meeting the reclamation needs, much less meet these critical needs which exist at the present time.

The study did say that in the long term a national severance tax ought to be considered as providing the necessary funding for this kind of a need. I think that is worthy of consideration. But that cannot be done overnight. By the time that kind of legislation could be enacted, and that kind of program put into place, we would be so hopelessly far behind there would be no chance of ever catching up. In the meantime, our ability to move energy resources will be severely restricted.

This is the manner in which we can address this problem immediately. The need is there and has been demonstrated. It is my judgment that there is enough flexibility in the highway trust fund to supply these modest amounts without any undue hardship, without any great budget impact. It seems to me it is appropriate to move now to address this problem before it gets so totally out of hand that we will not be able to ever, ever catch up with it.

Mr. MELCHER. Will the Senator yield me 2 minutes?

Mr. HUDDLESTON. I will yield if I have 2 minutes remaining from the time the manager of the bill so generously gave me a moment ago.

The PRESIDING OFFICER. The Senator has 2 minutes.

Mr. HUDDLESTON. I yield 2 minutes to the Senator.

Mr. MELCHER. I thank the Senator.

I would hope that no argument against the amendment would be lodged when a question of safety is involved. We had a discussion during the D.C. representation debate concerning the number of lives of D.C. residents lost during the Vietnam war. That is an argument which carries a lot of weight.

In my own county in Montana we have 30 miles of road where we have had over 30 lives lost in the last 20 years. It is a situation which should not continue to exist. It should be corrected. The amendment offered by the Senator from Kentucky, which I am delighted to cosponsor, addresses a problem where a 30–70 matching fund can be arrived at for critical needs.

We have such a critical need. If the amendment is adopted, I would hope that the Secretary of Transportation would look at our need. The State can make the 30 percent. We have scratched around trying to find where we could draw up some more money and we simply have not been able to come up with it, even though safety is involved and it is a very serious situation in that regard.

I think the amendment is a meritorious amendment and I think in the light of the vast needs which have been described, the Senate should adopt the amendment. I thank the Senator for yielding.

Mr. CHAFEE. How much time remains, Mr. President?

The PRESIDING OFFICER. The Senator from Texas has 18 minutes remaining.

Mr. BENTSEN. I yield 3 minutes to the Senator from Rhode Island.

Mr. CHAFEE. I would like to make one point, if I might, Mr. President. It is terribly important to look at the language of the amendment with which we are dealing. The Secretary of Transportation has said that seven Appalachian States account for over 98 percent of the reported backlog needs. The Senator from Montana may hope that his State is going to get something out of this, but it is very clear that they are not going to get anything. If they do get something, it will be so small it will not amount to very much.

Over 98 percent of this amount is for roads to be used for coal hauling, with the Appalachian States again reporting the greatest needs.

Mr. MELCHER. Will the Senator yield?

Mr. CHAFEE. If I might continue, please.

That is a quote from the Secretary of Transportation. The point we are making here, Mr. President, is that, first of all, this proposal that we have before us presents a fiscal issue, in that there is already a question whether there is going to be adequate funding for the highway programs that are already in place.

Second, it is very clear that the Appalachian States that are going to receive this money have already received some $3 billion extra, outside of what the rest of the Nation gets, for roads.

Finally, to suggest that States that have roads that are hauling coal get nothing out of it seems to me to be a very odd suggestion. Obviously, the States are receiving a return in the form of taxes and jobs. To ask the Federal Government to step in and cover this as an added bonus seems to me to be stretching it a little far.

I thank the Senator.

Mr. MELCHER. Will the Senator yield?

Mr. BENTSEN. For a question? Yes, without losing the floor.

Mr. MELCHER. The question I should like to propound is, is not the study that the Senator from Rhode Island referred to based on the previous amendmcnt and not the amendment before us, which deals, in a broader concept, with energy?

Mr. BENTSEN. I did not get the question.

Mr. MELCHER. The Senator from Rhode Island referred to a study undertaken by the Secretary of Transportation, which was based on the narrow concept of coal-hauling roads.

Mr. BENTSEN. That is not correct.

Mr. MELCHER. That is not correct?

Mr. BENTSEN. No, it is energy-impacted roads. That is why it is my judgment and the judgment of the Senator from Rhode Island that the Senator will get little or nothing from it.

Mr. MELCHER. The point of my question was, was the study based and applied to the other amendment of the Senator from Kentucky and not to the broader concept of the amendment that we are looking at today, at this time?

Mr. BENTSEN. The information was based on replies from the States themselves. The States were surveyed regarding the impact on highways from all forms of energy production. The Department of Transportation assimilated the information that came out of the survey. It reported that all repair needs were associated with coal haul roads. Based on the needs described in the report 60 percent of the funds generated by this amendment would go to Kentucky, 95 to 98 percent to seven Appalachian States. I would say the Senator's State would get little, if anything.

Mr. DURKIN. Will the Senator yield?

Mr. BENTSEN. If I may make my comments now, please; I have yielded quite a bit today.

Mr. President, in recent years the Federal Government has assumed a responsibility for providing financial assistance to communities and regions of the country that are suffering from social and economic decline. Although many of our efforts in this area have been costly. We have decided that it is in the national interest to focus Federal assistance on economically disadvantaged areas.

But Senator HUDDLESTON'S amendment would do just the opposite; it would direct Federal assistance to a part of the country that is on the threshold of economic development and prosperity. Instead of giving aid to declining communities, it would award Federal funds to areas that are facing tremendous economic growth—the type of growth that every other State would like for itself.

In Texas, we are familiar with both the benefits and problems that come with rapid development of energy resources. And although there is no question that the discovery of oil brought with it a bundle of problems, I doubt, if many Texans would want our "black gold" to go away. The growth of the oil industry in Texas brought with it a period of unprecedented economic growth and prosperity. With the increase in State revenues from the expanded economic activity and severance taxes, Texas has managed to maintain the lowest per capital tax burden in the Nation.

The black gold of the 1980's, however, will not be oil, but coal. We have had our shot at prosperity, and wish Kentucky well with its promising future. Our only regret is that when we struck it big at spindletop, we did not have the inventiveness to appeal to the U.S. Senate for special impact assistance.

Mr. President, each day the Members of this body must make difficult decisions on how to allocate limited Federal resources among a wide variety of worthy programs. Given the tremendous competition for Federal assistance, I think it would be irresponsible to embark on a new course of directing Federal tax dollars to developing areas with growth-related problems, but also which have expanding resources for addressing those problems.

I do not argue that coal-haul roads are not a serious problem, but I do not think that declining communities should see their tax dollars directed to solving the problems of States which are expecting unprecedented growth and new prosperity.

I yield back the remainder of my time.

Mr. HEINZ. Mr. President, will the Senator yield?

The PRESIDING OFFICER. All time having been yielded back and all time on the amendment therefore having been used, it is now in order——

Mr. HEINZ. Mr. President, I ask for 1 minute on the bill.

The PRESIDING OFFICER. Does time remain on the bill? Who is in charge of the time?

Mr. BENTSEN. Mr. President, we have debated this thing now for 2 days. We would like to get to a vote, if we can.

Mr. HEINZ. I ask for 30 seconds on the bill.

Mr. BENTSEN. For 30 seconds on the bill, I yield to the distinguished Senator from Pennsylvania.

Mr. HEINZ. I thank my distinguished colleague. I shall take 29 seconds to commend the Senator from Texas and 1 second to commend similarly Senator HUDDLESTON and Senator RANDOLPH.

Mr. President, transporting energy-related materials is only one of a number of complex demands which have been placed on our highway system. I congratulate the distinguished chairman of the Subcommittee on Transportation (Mr. BENTSEN) and the capable ranking minority member of the subcommittee (Mr. CHAFEE) for the commitment and effort they have made, along with all of the members of the committee, to present the Senate with the well-focused, balanced legislation we are considering today. But that does not mean that the legislation is perfect. Indeed, when the question of matching this Nation's energy priorities with our transportation system is concerned, I believe we are making a grave mistake. Our amendment seeks to correct this shortsighted error.

Mr. President, I commend the Senator from West Virginia (Mr. RANDOLPH), and the Senator from Kentucky (Mr. HUDDLESTON) for the diligence and dedication which they have shown in the

development of the energy impact road rehabilitation program which would be established by the amendment we are considering. This amendment addresses a problem not only of West Virginia, Kentucky, and Pennsylvania, but of States throughout the Nation whose roads are presently deteriorating because of increased usage of them to transport coal and other energy-related materials.

The need for this energy impact road rehabilitation program was dramatically pointed to in a report entitled "Transporting the Nation's Coal—A Preliminary Assessment," which was published by the Department of Transportation earlier this year. The report stated:

Significant increases in coal truck traffic on the nation's highways and particularly on Appalachian roads (will require) new roads to be built and increased maintenance on the existing network.

A separate report issued by the Appalachian Regional Commission indicated coal-hauling trucks in the region now travel over 6,800 miles of roadway and 900 bridges that were not designed for such heavy traffic. This same report estimated that, by 1980, more than 8,500 miles of roadways and between 1,100 and 1,300 bridges will be unsafe for coal-hauling purposes.

The problem of coal transportation affects more than just Appalachian States. By 1985, increased production of coal west of the Mississippi River and in the South will place new demands on our national transportation system, especially on our roads. I stress the immediacy of the problem. There is no doubt that our Nation will eventually depend heavily on coal. Without adequate transportation to move it, energy plans will be impeded. All States, even if they do not produce coal themselves, will be affected. The DOT report indicated that while rail, water, and pipeline problems are either addressed by existing legislation or will not be severe, highway inadequacies will be a significant problem. The report recommends "immediate consideration" of a coal road and highway program. If Congress does not act to establish a program this year, our inadequate coal road system may prevent us from transporting the amounts of coal which we must produce in order to meet our energy needs without spending billions of dollars annually on foreign oil.

I have seen the deplorable conditions of roads which are extensively used to transport coal. Approximately 1 year ago today, I inspected coal haul roads in Cambria County, Pa. These deteriorating roads are a threat to public safety. It was possible to crumble the pavement with your bare hands. Similarly unsafe, unacceptable conditions exist in other counties throughout Pennsylvania and the Nation. We must act now to provide assistance for the repair of these roads. The residents of Cambria County and other counties should not be forced to sacrifice their safety, their roads, and their own wages as increased taxes for road repair to produce the energy which all Americans need.

Mr. President, this amendment will help us realize two goals: First, maintaining and improving highways which will be used to transport the increased amounts of coal which we must produce in order to meet the energy needs of a strong, growing economy and second, protecting the public safety by repairing roads which are presently in unacceptably bad condition because of heavy, necessary use by coal trucks. These are worthy objectives and I urge my colleagues to support this amendment.

Mr. McGOVERN. Mr. President, I appreciate this opportunity to join with my colleagues, Senator HUDDLESTON and Senator RANDOLPH, in introducing this important amendment.

I am especially pleased at the success of our efforts to expand this proposal to include assistance for roads rapidly deteriorating from not only coal production but also uranium, oil and gas development. This modified amendment is also designed to allow State and local governments flexibility to designate those areas within their jurisdiction as facing the most critical needs for road impact aid.

The necessity of this program is well established in the numerous energy impact aid proposals that Congress has attempted to legislate, some of them with full support of the administration.

However, the vast majority of programs presently being considered by Congress concern the serious social and economic impacts being faced by energy boomtowns and not with the transportation dilemma created by resource development. In order to fully present this issue, I would like to briefly discuss the relationship between resource development and energy impacts.

Over the past decade, States throughout the Nation have experienced dramatic increases in energy resource production in an attempt to alleviate potential national energy shortages through increased development of our conventional fuels. I firmly believe this production, in conjunction with rapid development of our renewable energy resources, is essential to assure adequate short-term energy supplies and to reduce our dependence on imported fuels.

Yet, due to the rapid expansion of domestic energy production and the accompanying population increases, hundreds of communities in the heart of these developments have experienced wide ranging impacts, straining their capacity to provide minimum essential services.

One of the key problems is that energy developments often locate in rural areas. Consequently, any increase in population and traffic creates some strain on community services and transportation.

While several legislative proposals have been introduced to offset socio-economic impacts experienced by boomtown communities, virtually no proposals for impacted and deteriorating roads and highways have received similar consideration.

A key issue at stake is that impacted roads may not be eligible for any of the pending energy impact assistance programs. Most of these roads do not fall within community boundaries and roads obviously do not experience population increase, a major requirement for much of the proposed impact assistance.

The majority of the affected roads were never designed to accommodate the weight and frequency of travel of drilling rigs, seismic trucks, coal trucks, and exploration rigs. Critics of this proposal contend that if State vehicle weight limit laws were properly enforced, these road deterioration problems would not exist.

This is not true.

If weight limit laws were enforced without special overweight vehicle permits, we would have little energy production and would jeopardize our future national energy needs.

For example, many States allow a maximum weight on State roads of 90,000 pounds, and between 70,000 and 80,000 pounds on interstates. Consequently, under the law, heavier loads may and do travel on the more poorly constructed highways. However, the average weight of drilling rigs in South Dakota is well over 100,000 pounds, while the oil, water, and cement vehicles used to service oil wells are generally between 50,000 and 70,000 pounds.

Additionally, while some of these vehicles may be marginally within the legal limit, the frequency of their travel on these roads contributes substantially to their rapid deterioration. It is not unusual for cement and water trucks to make 120 to 180 trips to each producing oil well.

The Buffalo oilfield in South Dakota is a comparatively small oilfield and has over 45 producing wells alone. The frequency and weight of oil related vehicles on roads near major oilfields is staggering. The county in which this field is located has estimated that road repairs stemming from existing resource development could amount to over $500,000. This amendment at least would make some assistance available to these seriously impacted areas.

With regard to coal transportation, several companies are now finding it cheaper and faster to ship western coal for short hauls by truck rather than in coal unit trains. Several companies in South Dakota are now contracting for truck shipments from the coalfields in northeastern Wyoming. Coal trucks weigh as much as 75,000 pounds and it takes several truckloads of coal to transport the same amount in one rail hopper car. Many trucks in my region use the more poorly constructed non-interstate routes to transport coal shipments.

South Dakota has already documented serious road impacts due to increasing coal truck shipments from northeastern Wyoming and North Dakota, and such shipments are anticipated to increase greatly in the near future.

The administration and other critics of this amendment have stated that the proposal would result in trust fund revenues flowing to only a few States, primarily Kentucky and West Virginia. Under the modified amendment, expanded to include several energy resources and resource recovery equipment, the benefits would flow to a large

number of States, including Colorado, Wyoming, New Mexico, Utah, Idaho, Montana, North Dakota, South Dakota, Texas, Louisiana, Indiana and Illinois, as well as the Eastern coal States and other Northern and Western energy producing States.

Additionally, the administration has opposed this amendment based on the need to keep a lid on the expenditures from the highway trust fund. I am well aware of and sensitive to that need.

It would be folly to increase expenditures that may cripple the trust fund. However, we are not requesting a massive or crippling amount of revenue. We are not legislating handouts to a few communities. We are attempting to legislate a fair and equitable proposal to assure adequate and safe transportation on these roads. I believe this proposal is essential to assure adequate and safe transportation on these roads.

I am also aware that the Department of Transportation would appreciate additional time to study the problem. The Department was scheduled to release a study on this dilemma over a year ago, and today it is still not available. However, we do have studies conducted by several States and local governments conclusively documenting the severity of deteriorating road conditions.

Additionally, while we do not have the Department's study, we do know that the problems have grown worse and they will continue to worsen unless we take immediate action. Several counties in South Dakota have already attributed a number of accidents to the deteriorating conditions on roads in energy development areas.

I do not believe we can afford to further jeopardize human lives for the sake of a long overdue agency study. It is imperative to act now to assure the safety to those who travel these highways and to facilitate the energy development in these areas.

The PRESIDING OFFICER. The vote now occurs on agreeing to the amendment of the Senator from Kentucky.

Mr. BENTSEN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? Evidently, there is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. PAUL G. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Kansas (Mr. DOLE) and the Senator from Michigan (Mr. GRIFFIN) are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan (Mr. GRIFFIN) would vote "nay."

The result was announced—yeas 37, nays 51, as follows:

[Rollcall Vote No. 338 Leg.]

YEAS—37

Baker	Inouye	Percy
Bayh	Javits	Randolph
Byrd, Robert C.	Kennedy	Riegle
Case	Long	Sarbanes
Chiles	Lugar	Sasser
Cranston	Magnuson	Schweiker
Domenici	Mathias	Scott

NOT VOTING—12

Abourezk	Dole	Humphrey
Allen	Eastland	Johnston
Anderson	Griffin	Talmadge
Bumpers	Hatfield, Paul G.	
DeConcini		

So the amendment (No. 3507) was rejected.

Mr. BENTSEN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1696

(Purpose: Relating to the continuation of certain establishments serving Interstate motor vehicle users)

Mr. METZENBAUM. Mr. President, I call up my amendment which is at the desk.

The PRESIDING OFFICER (Mr. MATSUNAGA). The amendment will be stated.

The legislative clerk read as follows:

The Senator from Ohio (Mr. METZENBAUM) proposes an unprinted amendment numbered 1696.

Mr. METZENBAUM. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, insert the following:

SEC. . Section 111 of title 23, United States Code, is amended by adding at the end thereof the following new sentence: "Nothing in this section, or in any agreement entered into under this section, shall require the discontinuance, obstruction, or removal of any establishment for serving motor vehicle users on any highway which has been, or is hereafter, designated as a highway or route on the Interstate System (1) if such establishment (A) was in existence before January 1, 1960, (B) is owned by a State, and (C) is operated through concessionaires or otherwise, and (2) if all access to, and exits from, such establishment conform to the standards established for such a highway under this title.".

Mr. BENTSEN. Mr. President, may we have order, so that the Senator can be heard?

The PRESIDING OFFICER. The point is well taken. The Senate will be in order. Members will cease conversations. Authorized staff will retire to the rear of the Chamber.

Mr. METZENBAUM. Mr. President, this amendment will preserve existing service plazas on the Ohio Turnpike, the Kentucky Turnpike, and several other State turnpikes which soon will become a part of the interstate highway system. This amendment has been approved by the Department of Transportation and by the Office of Management and Budget. I have also been told that this amendment is acceptable to the committee.

This amendment will not require any new Federal funds. Instead, it is designed to protect the substantial investment that taxpayers have already made for service plazas on State turnpikes that were built before 1960 and which predated the development of our national interstate highway system. These plazas have been serving the public safely for 20 years. But unless this amendment is approved, those service plazas, which are worth millions of dollars, must be torn down because of one provision in the existing law.

Under the present law, title 23, section 111, all Federal interstate highways must be free of commercial service plazas in order to become eligible for 90 percent Federal improvement funds. In Ohio, this means that 16 service plazas that now operate along the Ohio Turnpike must be torn down before that road can become part of the interstate highway system.

According to the Ohio Turnpike Commission, the 16 plazas along the 241-mile Ohio Turnpike were originally constructed at a cost of $16 million. Since that time another $25 million worth of construction has taken place at those plazas. The commission estimates that it would cost taxpayers today more than $50 million to duplicate those facilities. Those plazas employ 2,000 people and generate about $6 million a year for the State in rental fees. But all of this would be lost if this amendment is not approved. This would be a tremendous and unnecessary waste of taxpayers dollars. The present law was never intended to eliminate the existing State-owned service areas. It was intended to prevent unsightly and possible unsafe commercial development along the interstate highways. This amendment would preserve the integrity of our interstate roads without forcing us to lose these needed service plazas along State turnpikes.

Mr. President, I point out that this is not an idle threat. The State of Kentucky Turnpike Commission has already been informed by the Federal Highway

Administration that access to one service plaza along I–65, formerly the Kentucky Turnpike, must be eliminated to conform with title 23. The Ohio Turnpike Commission has already announced its intention to remove tolls from the Ohio Turnpike by 1981 and allow it to become part of the Interstate Highway System. Ohio would face the same problems that Kentucky has already encountered unless this amendment is accepted.

This amendment would preserve only those service plazas that were constructed before 1960 and which are owned by the State. It will not allow new commercial development. It will also help other States, possibly including Maine, West Virginia, and others, which may decide to remove their turnpike tolls in the future. This amendment will prevent the unnecessary and wasteful destruction of existing service plazas that have been serving the driving public for the past two decades. I urge my colleagues to support this amendment.

Mr. BENTSEN. Mr. President, the manager for the majority on this measure has discussed this amendment with the Senator from Ohio and finds that it improves the proposed legislation and that it should be accepted, subject to the comments of the minority manager.

Mr. CHAFEE. The minority has the same position as the majority on this, Mr. President.

Mr. METZENBAUM. I appreciate that.

Mr. President, I yield back the remainder of my time.

Mr. BENTSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment offered by the distinguished Senator from Ohio.

The amendment was agreed to.

UP AMENDMENT NO. 1697

Mr. MORGAN. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. MORGAN) proposes an unprinted amendment numbered 1697.

Mr. MORGAN. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, after line 25 add the following new subsection:

"(c) Section 101 of title 23, United States Code, is further amended by adding at the end thereof the following new subsection:

"'(f) It is hereby declared to be the national policy that annual authorizations for programs to be financed from Highway Trust Fund be closely related to anticipated annual receipts accruing to the fund in order that the decision on appropriate program levels and the decision on sources of revenue to finance the program be made in conjunction with each other.

"'It is further declared that whenever authorizing legislation provides for growth in program levels, such growth should be consistent with (1) the rate of growth of revenues from existing sources, (2) the ability of States responsibly to obligate increased Federal funds, and (3) a sound overall Federal fiscal policy.'"

Mr. MORGAN. Mr. President, I am submitting an amendment to the Highway Assistance Act to insure that the highway trust fund remains on a fiscally sound basis in the years ahead. Ever since its creation in 1956, the highway trust fund has been on sound financial footing. My amendment would insure that this continues to be the case.

The fiscal integrity of the Federal highway assistance program is today under serious assault. There is a move afoot in the House of Representatives to violate the most simple principles of sound fiscal management. Simply stated the House wants to authorize expenditures far beyond the revenues which can reasonably be expected to be available to the trust fund from the Federal gasoline excise tax. The unsound practice has been dubbed "anticipatory financing." "Anticipatory financing" is a new word for deficit spending; let there be no doubt about that. To extend deficit spending to the highway assistance program at a time when the economy is already reeling under the impact of massive Federal deficits is the height of irresponsibility.

Congress has tried the route recommended by the House of Representatives. Several years ago this Congress increased social security benefits without a corresponding increase in taxes. The result of this folly was that last December we faced the prospect of a bankruptcy of the social security system. To cover the benefits we had voted before, we had to vote a major tax increase. If we do not take positive action today to stem the tide of misdirected generosity, we will face the same problem we faced last December. We must not embark upon an expanded spending program unless we are willing to increase taxes to pay for the additional services.

I commend the Highway Subcommittee of the Environment and Public Works Committee for reporting to the Senate a bill which sets expenditure levels near the levels of expected revenues. If the pressures for increased spending I have felt are any indication, the members of this subcommittee are to be congratulated for their adherence to the principles of fiscal responsibility.

Unfortunately, the House of Representatives has not shown similar restraint. Although the exact totals have not been agreed upon, all indications are that the House will send to conference a bill spending several billion a year more than will be available from the excise tax. Reasonable predictions place the revenues available from the gasoline excise tax at about $8 billion per year. The Senate bill authorizes about $8 billion a year, but the House wants to authorize around $11 billion a year. This $3 billion a year shortfall between expenditures and revenues will bankrupt the trust fund by the early 1980's. To pay for this $11 billion a year expenditure, Congress will have to raise taxes or use general revenues to prevent the bankruptcy of the highway trust fund. Passage of this amendment will set the Senate clearly on record in opposition to this departure from the principles of sound fiscal management.

I emphasize that this amendment does not establish a ceiling on highway expenditures. It only requires that expenditures not exceed revenues over the period of the program. If Congress sees fit to increase taxes in order to spend more on the highways, then Congress should explicitly and clearly do so. We should not spend the money and then be put in a position where we have to increase taxes. We in this country must return to the tradition that public services must be paid for by taxes. In my view there is no better way to separate the wheat from the chaff in Federal spending than to link the decision to spend with the decision to tax. I think we would all be much more realistic in our evaluation of the value of Federal programs if we had to explicitly and clearly levy a tax for each expenditure.

The highway trust fund has been one of the few parts of the Federal budget that has remained on sound fiscal footing over the years. Organized around a "pay as you go" user fee system, the highway trust fund has served us well since its creation 20 years ago. I think it would be a national tragedy of the first magnitude if we destroyed the soundness of this institution for the sake of short-term expediency. At a time when the public is awakening to the consequences of Federal fiscal irresponsibility, the Senate should go firmly on record against new spending that we are not willing to pay for. I hope that my colleagues will reaffirm the fiscal integrity of the highway trust fund by agreeing to this amendment.

Mr. MUSKIE and Mr. BENTSEN addressed the Chair.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. I yield such time as he may desire to the Senator from Maine, the chairman of the Budget Committee.

The PRESIDING OFFICER. The Senator from Maine is recognized.

Mr. MUSKIE. Mr. President, the Senate has before it S. 3073, the Federal-Aid Highway Act of 1978. I shall take a few minutes to comment upon the major budgetary aspects of this legislation, particularly as they relate to the spending targets which Congress established in the first budget resolution for fiscal year 1979.

As reported in the Senate, S. 3073 provides highway program authorizations for fiscal years 1979 and 1980 of $8.4 billion each year. The bulk of these authorizations, $7.9 billion in fiscal 1979 and $7.8 billion in fiscal 1980, provide contract authority from the highway trust fund, and thus represent direct spending authorizations not requiring appropriations except for liquidation. The balance of the authorizations are for appropriated highway programs, some of which are funded from the trust fund and some from the general fund.

I am pleased to be able to report to the Senate that these reported authorizations are consistent with the budget

resolution for fiscal 1979. Further, the spending pattern established by the bill suggests that highway spending through fiscal 1983 also will be consistent with the 5-year targets set forth in the report on the first budget resolution. I feel I must warn the Senate, however, that very little leeway exists to increase the reported authorizations.

Mr. President, I take this opportunity to compliment the Committee on Environment and Public Works, and particularly its distinguished chairman, Senator RANDOLPH, its ranking minority member, Senator STAFFORD, and its excellent Transportation Subcommittee, led by Senators BENTSEN and CHAFEE, for the exceptionally fine job they have done in writing this 1978 highway bill. Rarely in the time I have been in the Senate—and never in the time I have served as chairman of the Budget Committee—have I seen a Senate committee approach such a difficult task in a more deliberate, objective and fiscally responsible manner. It is because of their efforts that S. 3073 is such a responsible piece of legislation, and one which the Senate can be proud to support.

I base my compliments for this legislation and for its authors on three major features of S. 3073—its budget totals which are consistent with the congressional budget; its rejection of policy changes which could lead to an unnecessarily expanded role for the Federal Government in highway development and maintenance; and its preservation and protection of the fiscal integrity of the highway trust fund.

First, as I have indicated, S. 3073 is within and totally consistent with the congressional budget. The reason for this is not blind good fortune. Rather it is that the Public Works Committee intended that to be the result and consciously worked to achieve it. In the early months of this year the committee's members were faced with two proposals, both representing significant departures from current Federal highway policy. On the one hand, the administration proposed only a moderate increase in highway spending for fiscal year 1979, but recommended substantial policy changes which if enacted would create pressures to increase Federal highway spending significantly in the future. The leadership of the House Public Works Committee, meanwhile, was proposing to increase Federal highway spending by billions of dollars per year, starting immediately.

Exerting its independence and drawing upon its own substantial knowledge and resources, the Public Works Committee charted its own course and drafted legislation that represents its own more realistic and viable judgment of the appropriate future of Federal highway assistance. The committee carefully assessed the need for increased Federal financial assistance, and concluded that some increase above the administration's request is warranted. It wisely rejected, however, the excessive multibillion-dollar increase proposed in House legislation. The committee then reported its recommendation to the Committee on the Budget, which concurred and included similar budget targets for highway spending in the first budget resolution approved by the Congress. Thus, the fact that S. 3073 is consistent with the congressionally approved budget is no accident. Rather it is because of the good judgment and effective leadership of the Committee on Environment and Public Works.

A second reason to compliment the authorizing committee relates to the policy direction the reported bill establishes. The Department of Transportation's proposal submitted to the Congress in January contained a number of policy changes which, if enacted, would seem certain to result in a new and significantly expanded role for the Federal Government in highway spending. These proposals included: Extension of eligibility for Federal assistance under the urban highway program to all urban roads; extension of eligibility for assistance under the small urban and rural grant program to any public road; expansion of eligibility under the special bridge program to bridges off as well as on the Federal-aid highway systems; and, perhaps most significant of all, a further increase in the Federal share of noninterstate projects from the current 70 to 80 percent.

Wisely, the Senate Committee chose to reject most of these proposals. The only one which it incorporated into S. 3373 is the one that would open Federal assistance for bridge repair and replacement to bridges not on a Federal-aid system. I remain somewhat concerned about the implications of the precedent this provision establishes, but for now I accept the recommendation of the Public Works Subcommittee which has studied this issue more thoroughly than I, and which has concluded that this new policy is necessary in order to deal with a unique and serious problem. I would not, however, that while the Senate bill as reported included a reasonable authorization of $450 million to fund this expanded bridge program, this amount already has been increased to $525 million on the Senate floor, so that the authorization now exceeds the maximum amount which DOT says can responsibly be obligated in fiscal 1979. And if this is not sufficiently frightening, the House bill as reported provides a $2 billion authorization for fiscal 1979.

I strongly urge the Senate conferees to stand firm against any further increases to the bridge program above the Senate figure. Further, I believe that the Senate should take the House's proposed authorization level as a warning of what could happen to this program if we are not careful. Clearly, the program warrants continued examination to assure that what is intended to be a limited expansion of eligibility for Federal assistance does not produce undesired and unintended financial impacts on the Federal budget.

While I am on this topic of questionable policy changes, I would note also that while the Senate authorizing committee has prudently rejected the Transportation Secretary's proposal to increase the Federal matching share to 80 percent, its House counterpart has not. This means that the provision will be an important issue in conference, and I would therefore like to take this opportunity to encourage the Senate conferees to hold fact to the Senate position that the Federal share should remain at 70 percent. Were it to increase to 80 percent, it would be certain to stimulate significant increases in Federal highway spending in the near future. This is because of the increased leverage it provides to program beneficiaries.

To be more specific, $1 billion of State and local spending on noninterstate products currently can produce $2.3 billion in matching Federal expenditures. With an increase in the Federal share to 80 percent, however, that same $1 billion could produce $4 billion of matching Federal expenditures. Thus, what looks like a 10-percent change could increase Federal expenditures by 74 percent without an additional cent of State and local spending.

Such a shifting of the highway spending burden to the Federal Government is not warranted, particularly when State and local governments are, collectively, in a much more liquid financial position than is the Federal Government. Further, I would remind the Senate that it has been only 5 years since we increased the Federal share on noninterstate projects from 50 to 70 percent. The push for that increase also came from the House, and as I recall it, the principal argument was that Federal spending on the interstate system was about to drop sharply, and it was therefore necessary to increase noninterstate spending in order to preserve prevailing overall highway spending levels. Of course, no such sharp reduction in interstate spending ever materialized. Total Federal highway spending rose steadily, and is projected to continue to do so. In the face of this, however, the House is now proposing yet a further increase in the Federal matching share. If they were consistent in their approach, they should be suggesting instead that the Federal share be returned to its previous 50 percent level.

Mr. President, the third reason—this is really the point I wanted to get at in connection with Senator MORGAN'S amendment—I see for complimenting the Public Works Committee is that its reported bill preserves the fiscal integrity and fundamental soundness of the Highway Trust Fund. It does this by preserving a policy which has long prevailed in the management of the Federal highway program, that there should be a basic equality of projected trust fund expenditures and receipts.

This is pretty fundamental. But the House-reported bill proposes to ignore this established policy, and to provide annual expenditure authorizations for programs financed from the trust fund at levels which exceed projected trust fund receipts by more than $3 billion per year!

Those critical of former Redskins coach George Allen's financial management skills claim that "he was given an unlimited budget and he exceeded it." Well, considering what the House is doing with the 1978 highway bill, I would

say that in comparison George Allen looks like Ebenezer Scrooge.

Were the new policy proposed in the House bill to be enacted, CBO projects that the highway trust fund would be broke by fiscal 1985. At best, there would be an excessive accumulation of unfunded liabilities mortgaging several years of future revenues. More likely, the cash would be exhausted and the program seriously disrupted.

Financial calamity could be avoided only by one of four means, none of which would be acceptable. One option would be for Congress to again surrender the power of purse to the executive branch by allowing the President to protect the trust fund by impounding highway funds. Or, the Congress could temporarily suspend all or a significant portion of Federal highway spending. Or, it could enact sharp increases in highway excise taxes to finance the "unexpected emergency," which in fact was entirely predictable. Or, it could use appropriations from the general fund to bail out the trust fund.

If this sounds familiar, it is for the simple reason that it is very similar to the financing mess in which we find ourselves in the case of the social security program and its trust fund.

Mr. President, I believe the Senate must do its best to assure that the House cannot "social securitize" the Federal highway program and highway trust fund.

Further, I believe we can strengthen the conference position of the Senate by stating in statutory language the policy implicit in the Senate bill's responsible approach to managing the highway trust fund. The amendment offered by Senator MORGAN does this. It provides simply that trust fund spending policy and revenue policy should be consistent, and that significant alterations to one cannot responsibly be considered without considering compatible alterations in the other.

Overwhelming approval of the bill before us, amended to include the policy statement proposed by Senator MORGAN, will demonstrate to the House the Senate's concern that the fiscal integrity of the trust fund be protected. I therefore urge my fellow Senators to vote in favor of the amendment offered by Senator MORGAN and for the Senate bill as thus amended.

Mr. BENTSEN. Mr. President, I appreciate the remarks of the distinguished chairman of the Budget Committee and those of my able friend, the Senator from North Carolina. In reading his amendments, it is a very sound statement of principle in budget fiscal prudence, one that we have tried very much to comply with, and it has not been easy. But I believe it is a contribution to the legislation and I for one am pleased to accept it subject to the comments of the minority manager of the bill.

Mr. CHAFEE. Mr. President, first, I ask unanimous consent that Patty White of Senator HAYAKAWA's staff, and Donna Maddox of Senator PERCY's staff have the privileges of the floor during the consideration of this measure and the votes thereon.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, I would like to join with the Senator from North Carolina in support of this amendment. It sets forth a philosophy to which we can adhere in the future. So I join with my colleague from Texas in support of this amendment.

Mr. BENTSEN. I yield back the remainder of my time.

Mr. MORGAN. I am willing to yield back the remainder of my time, but to strengthen the hand of the conference committee, some of those who support the amendment with whom I have talked feel that a rollcall vote would be helpful in that committee and, for that reason, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. RANDOLPH. Mr. President, will the Senator from North Carolina add me to his amendment as a cosponsor?

Mr. MORGAN. I would be happy to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Alaska (Mr. GRAVEL), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Louisiana (Mr. JOHNSTON), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Kansas (Mr. DOLE), the Senator from Michigan (Mr. GRIFFIN), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting, the Senator from Michigan (Mr. GRIFFIN) would vote "yea."

The result was announced—yeas 86, nays 0, as follows:

[Rollcall Vote No. 339 Leg.]

So the amendment (UP amendment No. 1697) was agreed to.

The PRESIDING OFFICER. The Senator from Texas.

Mr. BENTSEN. Mr. President, I yield for a unanimous-consent request to the Senator from Vermont.

Mr. LEAHY. Mr. President, I ask unanimous consent that Susan Branigan of my staff may have the privilege of the floor for the rest of the evening, throughout the debate and votes.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1698

(Purpose: Terminating the Highway Trust Fund)

Mr. KENNEDY. Mr. President, I send an unprinted amendment to the desk in behalf of myself and the Senator from Connecticut (Mr. WEICKER).

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY, for himself and Mr. WEICKER), proposes an unprinted amendment numbered 1698.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the end of the bill, insert the following:

HIGHWAY TRUST FUND

SEC. 146. Effective after September 30, 1978—

(1) the Highway Trust Fund is terminated and the amount in such Fund, including any obligations held in such a Fund, shall be covered into the general fund of the Treasury;

(2) any outstanding appropriations from, or obligations of, such Trust Fund shall be paid from such general fund;

(3) any authorizations for appropriations to be made from such Trust Fund shall be considered to be authorizations for appropriations from such general fund; and

(4) section 209 of the Highway Revenue Act of 1956 is repealed.

The PRESIDING OFFICER. The Chair inquires of the Senator from Massachusetts whether this is the amendment on which there has been an agreed time limitation of 1½ hours.

Mr. KENNEDY. The Chair is correct. I yield myself 7 minutes.

Mr. BENTSEN. Mr. President, will the Senator yield for a question?

Mr. KENNEDY. I yield.

Mr. BENTSEN. The manager of the bill would inquire how long the Senator expects us to be here.

Mr. KENNEDY. I do not know how long my colleague and cosponsor (Mr. WEICKER) wishes to speak, but this is an

issue which has been before the Senate many times. I do not think it will require more than 10 minutes on my part to explain the amendment. It is well understood, I think; the Members are familiar with the subject matter.

Mr. BENTSEN. Would the Senator care to agree to limit the time?

Mr. KENNEDY. As soon as my cosponsor arrives, I would be glad to inquire how much time he would require; but for my part, I would be more than willing to cut it in half. I do not intend to take a long time.

Mr. President, I yield myself 7 minutes. First of all, I wish to express my appreciation to the managers of the bill, the Senator from Texas (Mr. BENTSEN) and the Senator from Rhode Island (Mr. CHAFEE), and to the Senator from West Virginia (Mr. RANDOLPH) and the Senator from Vermont (Mr. STAFFORD) and the other members of the committee for the accommodations they have made to a number of different suggestions and recommendations that have come before the committee. They have, I think, been extraordinarily responsive and helpful to those of us who have followed this issue.

Their attitude has made a very important and significant difference in the whole development of transportation, in my State and in other parts of the country. The interstate transfer provisions, for example, the reduced number of highway categories, the ability to transfer within various road categories, have, I think, given greater flexibility and insured important accommodations of different interests in the field of transportation.

I am very much appreciative of the reception with which a number of these ideas have been received by my colleagues on the committee.

The amendment that we offer today, myself and the Senator from Connecticut, is an amendment which we have offered, each congress for a period of 8 years, since 1970. It would abolish the highway trust fund.

The highway trust fund and the funds which it keeps from the general revenues make an enormous impact on our budget. Income to the highway trust fund is around $10 billion a year. Expenses are over $8 billion.

The total cost for the Interstate Highway System is now projected to be $104.3 billion.

This enormous amount of money should not be reserved to one mode of transportation or to transportation as a whole regardless of conditions. Rather, funding should be subject to the regular authorization and appropriations process. If that process is good enough for our national defense, if it is good enough for our health expenditures, if it is good encugh for our education programs, it shouid be good enough for highways.

Flexible funding is especially important now:

The most essential parts of the interstate system have been completed. Of a total system of 42,500 miles, 91.9 percent—39,050—have been finished. Another 1,432 miles are under construction, leaving less than 2,000 which have not yet been started.

Meanwhile, the drawbacks of private auto transportation have become of greater concern. The private auto uses far more energy than public transportation. The average auto uses over three times the energy of a bus, over twice the energy of light rail systems like trolleys, and over twice the energy of commuter rails.

The private auto creates more pollution. The private auto requires a great investment of our lands, including downtown areas and farm lands.

And, a separate fund for any construction project—which is the primary mission of the highway fund—is dangerous to the economy as a whole. The costs of construction have been rising the fastest in the last couple of years and have been a primary factor in the inflation rate. It was for this reason that the Senate voted last month to take $600 million out of the authorization for federally subsidized housing. We should also be able to control construction expenditures here.

The Congressional Budget Office in a report issued in March clearly called for the liquidation of the highway trust fund. It said:

> The existing financing practices have several serious shortcomings and relatively few strengths. Current Federal practices are not conducive either to coordinated policy making or to sound fiscal control, and they are highly uneven in their treatment of different modes. By far the most significant practical advantage of the current system is that it already exists.

CBO concluded:

> The option of no trust funds appears to be the most promising of those reviewed here because it substantially strengthens the ability of the Congress to make policy and to exercise fiscal control. By placing all modes on an equal and flexible footing, the Congress would increase its coordination of transportation policies through both the authorizing and appropriating committees.

Mr. President, for these reasons, I am hopeful that the amendment will be accepted by the Senate. It seems to me that for reasons of good transportation policy, for reasons of sound expenditure policy, and for reasons of prudent economic policy; for all these reasons, this particular amendment deserves to be accepted.

Hopefully those who support this amendment recognize that there must be important support for automotive transportation, and certainly the importance of trucking and trucking transportation is fundamental to the commerce of this Nation.

We believe those resources ought to be devoted to both the completion of the system and providing within the States, within the rural areas and the urban areas of this country, the kinds of transportation services which are absolutely essential for the American people. This definitely includes a strong component for roads. But our transportation funding should be put in the context where the committees themselves can view other alternative means of transportation and make final judgments on what should be authorized and what should be appropriated in the different forms of transportation. I would hope this amendment would be accepted.

Mr. President, before I yield such time as the Senator from Connecticut desires, I would like to make special mention of a few of the valuable features of the bill now before us.

For many years I have introduced highway legislation along with the distinguished Senator from Connecticut (Mr. WEICKER).

In this legislation we have recommended many changes in the way the Federal Government assists in the construction and operation of roadways. We have advocated the consolidation of many aid categories, the establishment of the interstate transfer provision and the elimination of the trust fund form of funding.

In many of these areas we have been successful in convincing others that the Federal-aid system should be changed. When the administration introduced its bill reauthorizing expenditures from the highway trust fund, Senator WEICKER and I introduced an act, S. 2953, the Highway and Public Transportation Improvement Act of 1978, which incorporated a series of amendments in that bill.

Mr. President, Senator BENTSEN and Senator CHAFEE for the Transportation Subcommittee of the Environment and Public Works Committee, and Senator RANDOLPH and Senator STAFFORD for the full committee have given thoughtful consideration to different transportation needs and to the effect of our transportation policies on energy and the environment. I am pleased to see that many of our ideas have been incorporated in S. 3073, the bill before us today.

I would like to enumerate some of the proposals that we made in our bill which have also been incorporated into the committee bill.

We consolidated a number of existing highway programs into four Federal-aid systems, the interstate, primary, urban and small urban and rural. We allowed great transferability of funds among the system. The committee also consolidated down to four transit categories and it too allows the transferability of up to 50 percent of the funds in one category to another category.

The committee also showed its dedication to the concept of flexible transit planning by setting the Federal match for an interstate transfer at 90 percent of the cost. Previously, the Federal match was set at the match for the mode into which the funds were being switched. This was usually 80 percent of the total cost.

Our next amendment restored the sentence to section 103(e)(4) which the administration took out of its proposed bill which says that any funds transferred from an interstate project would be a supplement to and not a substitute for money due under UMTA. We certainly do not want to penalize those who make the decision to switch funds from highways to mass transit. Yet, deleting this sentence might suggest that DOT has the authority to do so. We want to allow a State to transfer money but without the sentence DOT might be able to force the State into merely choosing whether to forsake a highway.

We also restored to the act another provision involving the obligation to match funds for those projects transferred between 1973 and 1976, between the time when the interstate transfer provision was first put in and the 1976 amendments to the Highway Act. Under the 1973 interstate transfer amendment the Federal Government undertook a contractual obligation to fund the Federal share of any transferred project. Under the 1976 amendments, subsequent transferors were not guaranteed that the Federal Government would continue to provide its share till completion. The administration bill took the contractual obligation off of the Federal Government for the projects switched between 1973 and 1976. But, the Federal Government should maintain its terms after a State has irretrievably committed to a transfer.

In both of these areas, the Environment and Public Works Committee maintained current law, so that interstate transfer funds remain a supplement to UMTA funds and not a susbtitute for them and so that the Federal commitment to meet its transfer obligations remains as strong as ever.

S. 2953 also changed the law to allow a State to impose a toll on Federal aid system highways for purposes of managing peakload demands. The Clean Air Act allows use of such tolls in nonattainment areas, where air pollution is too great. But the Highway Act currently disallows such tolls. The purpose of these tolls is to set a price on the use of the road equal to the external costs that the use produces at peak hours.

The committee now allows States and metropolitan areas in nonattainment areas to impose tolls in order to help reduce air pollution.

Finally, Mr. President, on the floor last Friday, the committee accepted an amendment which repeals section 142(k) of the act. This section would terminate interstate transfer projects if a mass transit trust fund were set up. But, the section could not assure us of the size of the mass transit fund, the conditions under which it would operate, or that localities which have switched funds would in any way be reimbursed for the interstate transfer funds they would no longer be allowed to invest in alternative projects. I was glad to see this amendment accepted.

The committee has made some important improvements in this act. I thank the committee for the careful review it has given in reauthorizing the Federal-Aid Highway Act.

Mr. President, I still believe that the funding mechanism that we use for our transportation expenditures should be changed. The current system of financing freezes congressional review. We should abolish the Highway Trust Fund.

I yield to the Senator from Connecticut.

The PRESIDING OFFICER. The Senator from Connecticut is recognized.

Mr. WEICKER. I thank the Senator from Massachusetts.

I rise to support the amendment.

In reminiscing a moment ago with my staff, I noted that it has been 9 years since the Senator from Massachusetts and I first proposed this principle in the form of an amendment or one bill or another. For 9 years we have been defeated. I do not know what the result will be this evening. I have a feeling it might adhere to past historical patterns.

I think it has to be pointed out that certainly life in this country and around the world has very much changed within that period of time. And yet the highway trust fund is still with us in basically its original form.

I have read a great deal as to the concern of the administration as it relates to the failure of this Nation to adopt any sort of an energy program. Yet in its initial presentation to the country and the Congress, the administration's energy program specifically skirted around the issue of mass transit and public transportation, as a conservation measure. That is still the case today. Not just so far as the administration is concerned, but also the Congress.

There is nothing that we can do that would further the cause of conservation more than to make available to the citizens of this country transportation other than the automobile. Yet that has not been the will of the Congress, nor has it been the will of the President.

I realize that this is not the forum for legislation to discuss the production side as a solution to the energy crisis. It is, however, the forum to discuss the demand side, the consumption side.

The Senator from Massachusetts and I have, for 9 years, put forth the idea that there are means with which to move about this Nation other than the automobile.

We do not insist that you take a subway or that you take a train or that you take a bus. What we are saying is that, in the resolution of our transportation difficulties, at least, let us have the option to decide what is the best solution. Right now, the best solution is a highway, because you can be guaranteed 90 percent Federal dollars if you adopt a highway solution. Well, that is not good traffic engineering; it is good politics. In my State of Connecticut, we have almost totally completed our highway system, but we desperately need bus transportation. None of our cities is big enough for mass transit rail, but we need mass transit bus. Indeed, as the population centers shift to many of the cities of the South and Southwest and the West, believe me, what will be demanded there is rail facilities in order to move people about.

Today, in Los Angeles, Calif., they are stuck with the automobile, period. There is nothing else that they can do, even though it chokes them to death; not just in the sense of the early morning commuter hour, but in the sense of their bodies. They are getting choked to death.

It is not a situation we have to live with.

Mr. President, I am pleased to have joined with the Senator from Massachusetts (Mr. KENNEDY) in offering this amendment to abolish the highway trust fund. Since the trust fund was created 22 years ago, the needs of our society have been drastically affected by changing energy, safety, and environmental considerations. In 1956, energy was plentiful and cheap. In 1978, our national security is threatened by heavy reliance on insecure sources of foreign oil. In 1956, air pollution alerts were virtually unheard of.

Today, auto emissions are among the main pollutants in our cities and are considered the cause of millions of illnesses annually. In 1956, our road system was obviously deficient. Today, the Interstate System is 92 percent complete and we have the finest highway system in the world. Yet our Federal transportation programs continue to allocate funds according to the priorities of 22 years ago. The stumbling block here is the highway trust fund, and the problem we face is this:

The revenues flowing into the fund tend to become the driving force for allocations of transportation dollars rather than having Congress, together with the States and localities, set our transportation needs. If the fund generates $10 billion of revenue, then it is easy for Congress to spend that $10 billion. The process should operate the other way around: Congress should review the transportation needs and provide funding up to the levels it considers appropriate. This is how we act on all other programs and how we should act on transportation.

The trust fund tends to operate like an automatic pilot which pumps billions of dollars into a separate and sacred pool; the levels of revenue are arbitrary and bear no logical relation to the need for further highway construction. I am not trying to stop highway construction or maintenance or bridge repair, or any other highway programs, and so forth. All this amendment is trying to do is to give Congress a chance to exercise its proper responsibility in reviewing annual transportation funding needs through the appropriations process. We may decide that even more money is needed for roads or repairs or bridges. But whatever is decided, I would rather Congress make that decision than have it dictated by the arbitrary mechanism of a trust fund.

Senator KENNEDY and I first introduced this kind of amendment back in 1973. This Nation's economic situation has changed dramatically since then, and I am talking here in an energy context. At that time, our transportation program—legitimately perhaps—focused on the automobile and its needs. Our dependence on the automobile is almost total: 90 percent of all urban travel is by car or truck. More than 4 out of 5 American families own cars. Of the 18 million barrels of oil that this Nation consumes per day, cars and trucks burn up nearly 45 percent or over 8 million barrels. The message here is clear: as a nation we have to try and balance our transportation system. Energy considerations, along with environmental and safety considerations, need to be given a higher visibility in the overall transportation equation. I repeat: This does not necessarily mean less money for highways. It may mean more coordinated intermodal planning so that we do not

duplicate our spending by building both a new road and a new mass transit system in the same corridor. But whatever the final decisions on spending, we should not put ourselves in the straitjacket of the trust fund which reduces the flexibility we need to move funds to those areas of greatest need.

Mr. President, there are too many sacred cows already clogging up the Halls of Congress. The highway trust fund is one sacred cow which has been milked for too long by highway interests. It is ready for the slaughter. But let us make this a mercy killing—we do not want to strangle our highway programs because our Nation needs a strong road system and will need it as far into the future as we can see. But let us give ourselves the flexibility and control we need here in the Congress to make our transportation system more balanced and more responsive to the needs of this Nation as we enter the 1980's.

My purpose in taking the floor at this moment to support this amendment is to ask that we do the unusual. That is to apply a little logic, a little common sense to a problem, a little grasp of the facts as they exist today in the year 1978, rather than as they existed at the end of World War II. I am afraid that 9 years of frustration will not end here this evening, but it really makes no sense to continue a system in 1978 that was based on 1946 and 1947 facts. I shall be more than delighted to debate any of the advocates of the highway trust fund as to why it is that we have to continue with this mechanism rather than applying the regular appropriation and budgetary process to the needs as they come before us in a highway sense.

The fact is that logic cannot sustain their arguments any longer. Facts cannot sustain their arguments any longer. So the only thing that they raise is a trust fund concept, with all the fiduciary obligations that go along with that. Purely and simply today, it is insane, it is illogical, and it is a payoff to the lobbying groups. It certainly cannot be explained in terms of supplying a logical transportation system to the United States of America.

I yield the floor, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. CHAFEE. Mr. President, I should like to speak in favor of the amendment. Who is in control of the time?

Mr. KENNEDY. I yield the Senator whatever time he needs.

Mr. CHAFEE. Five minutes will be plenty, Mr. President.

It seems to me that, in running any kind of government, those in charge of the government, be they Congress or the State legislatures or whatever government it might be, should be able to take all the money into a common pool and then decide what their top priorities are for spending that money, what the needs of the State are or, as in this case, of the Nation, that should be met. The trouble with restricted funds is that those funds do not take their position in line, seeking their priority. Such funds work with a set amount of money—in this case, some $8 billion. Whether the program covered by the restricted fund is the top priority of the Nation is not considered. All that is considered is that the fund has x dollars and they can spend x dollars, on the program under the fund, roads in the instance.

Mr. President, I feel strongly that the amendment of the Senators from Massachusetts and Connecticut is a good one. It would force all that money to go into a common fund. Then the President, through the OMB and the Congress, could decide on whether, that year, the highest priority of the Nation indeed was to spend it on highways. Perhaps it might be, in that particular year, that it could be better spent on other programs. Or at least, the total amount may not be needed. But these funds are beyond the reach of Congress as to whether they should be spent in this particular manner or that particular manner, and they have to be spent on highways. I agree with the amendment of the Senators from Connecticut and Massachusetts.

The PRESIDING OFFICER. Who yields time?

Mr. BENTSEN. Mr. President, in this changing world of ours, an uncertain world, it is very comforting and helpful to know that there is a certain sense of order, a certain discipline; that every 2 years we are going to have a highway bill, and every 2 years we are going to have an amendment to end the highway trust fund; and that the Senator from Massachusetts and the Senator from Connecticut will make their very able and impassioned speeches to carry out that initiative. Fortunately, in each instance, logic has prevailed in this body and the amendment has been defeated.

Let me say to my friend from Connecticut, who talks about this hulk of a highway trust fund, this inflexible hulk. Much has been done, because of the initiative of the Senator from Connecticut and the Senator from Massachusetts, insofar as adapting this trust fund to the needs of the people: The great fight that they made in 1973 on the urban trust fund, allowing that to go to mass transit.

Let me say that I think that time has overcome the idea of ending the trust fund because, as the Senator from Connecticut has said, times have changed. We have found, through our experience, that there are very few areas that are really adaptable to rail mass transit; that you really have to have concentrations along population corridors for it to work.

The Interstate Highway System, Mr. President, is one of the great public works achievements of this century; it is of enormous significance to every citizen and every business in this country. The highway trust fund has always been essential to the success of this program. To abolish the trust fund would be to gut the highway program.

Over time, we have developed new additions to our transportation needs. We have given special lanes for buses going out the Shirley Highway. Nothing has the psychological impact of having a fellow driving on a freeway at 16 miles an hour, breathing the fumes of a car in front of him, then having a bus go by in a special lane, with some fellow sitting there reading a newspaper and grinning at him as he goes by. Those kinds of things have been proving themselves as we go along.

We have seen a situation where, to develop just the needs of the highways and hold them to the 1975 standards of use, between now and 1990, we will need $21.8 billion. But we can forsee only $16.9 billion that will be available to it. When it comes to the question of priorities and trying to fulfill those priorities, we are not going to have enough money in the trust fund to accomplish that.

We do have a "user pays" principle that we are using here. One of the interesting things about this particular program that sets it apart from some other Government programs is that this one happens to work. It has been effective. But we are now having a study made by the Department of Transportation to be sure that we are really fairly allocating that cost, that the user who burns up those highways is the one who pays the full share of the cost.

Mr. President, the most persuasive arguments in favor of abolishing the trust fund have been overtaken by events. Trust fund termination is an issue whose time has come and gone.

For example, it has become apparent that the all-too-familiar "either/or" mentality that pitted highway transportation against mass transit in the past has largely disappeared. During our extensive deliberations on S. 3073 both sides to this controversy came to recognize that these modes are not inherently competitive, but are in fact complementary. This is especially true when we have a national commitment today to reduce air pollution and to save energy.

We have seen that only a limited number of metropolitan areas possess the population density to support nonhighway mass transportation. In other areas, mass transportation must take the form of multipassenger motor vehicles which traverse the regional road and highway network. Any significant departures in small urban and rural public transportation will depend on good roads and highways.

Now, Mr. President, opponents of the trust fund have long maintained that it serves as a straitjacket inhibiting Federal flexibility in meeting national transportation requirements. This argument may have had relevance in the past, but recent legislative developments have demonstrated the enormous adaptability of this funding concept in responding to our ever-changing pattern of highway-related needs.

Consider, for example, some of the innovations contained in the 1973 Federal-Aid Highway Act. The act broke with past practice by permitting the transfer of highway funds for the purchase of buses, for the construction of bus lanes, highway traffic control devices, bus passenger loading facilities, and fringe parking lots to serve mass transportation passengers. The 1973 act, for the first time, permitted urban areas to substitute a mass transit project for an unwanted interstate segment. Contingent on approval by the Secretary of Transportation.

The 1976 act gave the trust fund even greater flexibility. It authorized financing for the resurfacing rehabilitation of interstate and other Federal-aid routes; it gave urban areas the ability to reject an unwanted interstate segment and use equivalent funds for mass transit projects or a noninterstate highway, if they so desired.

Clearly, there is a great deal of flexibility in the highway trust fund; it is not some "incredible hulk" that stands in the path of legislative innovation. And let me point out that S. 3073, the bill before the Senate today, continues this process of flexibility and innovation.

We worked hard at it. We have even included a program now to encourage the use of bicycles.

It provides trust fund financing for capital improvements to facilitate State enforcement of weight limits; for projects to encourage the use of carpools and vanpools; and for programs to encourage the use of bicycles.

It is also argued, Mr. President, that the trust fund stands as an obstacle to effective congressional control over expenditures. This argument is without merit. There is nothing in the trust fund that requires highway authorizations to keep pace with revenues. Congress has always been free to provide authorizations that fall short of revenue levels. We have generally not done so, because highway needs have generally far exceeded revenue generated by the fund. But neither, Mr. President, have we made it a practice to provide authorizations that exceed revenues. In this respect the trust fund has operated as a cap on highway expenditures.

During this decade Congress has also moved to control highway spending. The Congressional Budget and Impoundment Control Act of 1974 eliminated funding commitments in advance of appropriations, or contract authority, for those Federal highway programs not funded by the trust fund. As a result, programs like highway beautification, territorial highways, and safer off-svstem roads must now await appropriations before obligations can be incurred.

Two years later, in 1976, Congress took another step toward controlling highway expenditures. The DOT Appropriations Act, for the first time, imposed an overall limitation on obligations for the Federal aid program. In subsequent acts, both overall and specific program limitations have been utilized.

In this manner, Congress has evolved a mechanism for controlling highway spending, and the trust fund has not been an obstacle. And finally, Mr. President, the Senate today, at this very moment, has total control over highway expenditures for the coming 2 years. We are recommending $8.3 billion a year. If the Senate feels the figure is too high or too low, the legislation can be amended.

I mentioned earlier in my remarks that the concept of "user pays" has been fundamental to the trust fund. I said this is a principle worth preserving; it is also a principle worth improving. We have sought to improve it by directing the Secretary of Transportation to undertake a study of the design, construction, rehabilitation, and maintenance costs for Federal aid highways occasioned by the use of vehicles of different specifications and the proportional share of such costs attributable to each class of persons and vehicles using the highways. We want to make sure that each highway user is paying his fair share of the construction and maintenance costs.

Mr. President, perhaps the strongest argument in favor of retaining the trust fund is that it is urgently needed to finance outstanding highway needs. Typically, highway-related projects have long leadtimes. The ability to enter into obligations without waiting for appropriations allows State agencies to plan their programs far in advance and make the necessary financial arrangements. To abolish the trust fund would be to replace a proven, effective program with uncertainty—uncertainty that we can ill afford.

The fact of the matter is that we are living within the constraints of revenues generated from the trust fund, revenues that simply are not commensurate with the magnitude of our highway needs.

What is the measure of these needs? First and foremost is the completion of the Interstate System, which is now 90 percent finished at current funding levels, certain segments may not be open to traffic before the end of the century. With current rates of inflation, the outstanding 10 percent could cost as much as the 90 percent of the system already completed.

S. 3073 contains a number of important provisions designed to accelerate interstate completion; this has been one of our priority objectives, and it is an objective that can only be frustrated if the trust fund were to be terminated at this time. I think it is safe to assert that such an action would delay interstate completion by at least a decade.

We have an enormous investment—over $100 billion—in the Interstate System, an investment that must be protected. You protect a highway network through maintenance, and maintenance costs money, a lot of money. More money than we have available. A recent FHA study estimates that there is a $2.3 billion backlog of work in this area.

Many of the bridges in this country are critically deficient or functionally obsolete. Many of our bridges, both on and off the Federal-aid system, are downright dangerous. S. 3073, with revenue from the trust fund, devotes $450 million to bridge repair and replacement; that is a 250 percent increase over last year.

What I am saying, Mr. President, is that we have a job to do; an important job. We must complete the Interstate System as rapidly as possible and we must maintain what we have built.

Take away the trust fund and you will inhibit—perhaps cripple—our ability to do the job.

For these reasons, I strongly urge rejection of the Kennedy amendment.

Mr. RANDOLPH. Will the Senator yield?

Mr. BENTSEN. I am glad to yield to the chairman of the full committee.

Mr. RANDOLPH. Mr. President, I urge the Senate to reject the amendment to terminate the highway trust fund offered by the distinguished Senator from Massachusetts, my friend Senator KENNEDY and the able Senator from Connecticut (Mr. WEICKER). I stress that the trust fund has proved a valuable as well as a flexible asset in meeting the highway needs of the Nation over more than 20 years.

It has afforded financing for the greatest public works program ever undertaken by any country in any age—the construction of the Interstate Highway System. I am sure we recognize that this task is not yet completed. This is not the time to terminate the existance of the mechanism which has been responsible for the monumental accomplishment already achieved in this program.

We must also remember that the priority accorded interstate construction—a justified priority, I add—has obscured a number of other pressing highway needs. I speak of such needs as bridge replacement and rehabilitation, roadway resurfacing and repair and highway safety. I repeat, we should not terminate a financing source which has proven itself equal to the task of addressing needs of the magnitude of our highway transportation system.

Mr. BENTSEN. I fully agree with the observations of the chairman. It is through his leadership that we have been able to further the highway program and develop our mobility.

Mr. President, I see that my colleague from Vermont desires to speak and I will reserve the remainder of my time. I yield to the Senator from Vermont.

Mr. STAFFORD. Will the distinguished manager yield me a couple of minutes?

Mr. BENTSEN. I am delighted to yield 5 minutes if the Senator desires it.

The PRESIDING OFFICER. The Senator from Vermont is recognized for 2 minutes.

Mr. STAFFORD. Mr. President, I will start by saying that I do take some comfort from the fact it has been pointed out earlier that the highway trust fund is one of the few funds in the Federal Government in which in the past income has equaled outgo. This Senate has just voted unanimously to emphasize its commitment to having income and outgo in the highway trust fund equal in the future.

I think that is a very worthwhile thing and something that we should keep in mind with the rest of the future history here in the U.S. Congress.

Mr. President, I also take the position on the amendment of the distinguished Senator from Massachusetts and his colleague from Connecticut that I was one of those who helped bring about the change in the Federal highway trust fund in the summer of 1973 when we had a very long committee of conference with the House, and I was one of those who held out to open up the highway trust fund to give urban areas an option as to whether they spent their urban systems highway trust fund for highways or for other mass transit, rail or bus.

So I believe that that was a good time to make that change and open up the trust fund to that degree.

But I do not believe, Mr. President, that the time has come to abolish the trust fund and turn that money into the general fund of the Treasury as proposed by the distinguished authors of the amendment.

Mr. President, I agree with much the distinguished minority floor manager has said with one exception: I believe it is a least one step too early—too early, Mr. President—to abolish the highway trust fund.

The 92 percent of the system is open to traffic, but only 26 percent is essentially complete. There remain 1,891 miles that still require major improvements. And well over 2,000 miles of so-called "essential gaps" remain to be completed.

With this large a portion of interstate work still to be done, it seems premature to abolish the funding mechanism created to do the job. By 1982, under the terms of this bill, States will have to decide which interstate routes to complete and which to withdraw.

By 1982 a substantial amount of work on essential gaps will have been finished. We will be turning our attention even more to rehabilitation needs. Such a change in emphasis should necessitate less assurance of long term funding than was needed to undertake the Interstate System.

At the time we next consider highway legislation I think it will be clear that we can consider ending the trust fund without doing damage to the highway program. At present however, I think we should continue to make flexible the use of trust funds while continuing to earmark user taxes for completion of the Interstate System.

Mr. President, I yield the remainder of my 2 minutes, if I have any, back to the manager of the bill and I yield the floor.

Mr. WEICKER. Mr. President, I intend to be brief. I do not know whether my distinguished colleague, the Senator from Massachusetts, expects to speak any further on the matter and I am quite prepared to go to a roll call vote.

Mr. President, I ask for the yeas and nays on this amendment.

The PRESIDING OFFICER (Mr. SARBANES). Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. WEICKER. Mr. President, there are several points that I think are worthy of response, insofar as they have been raised. First of all, let us understand this.

I drive, at the present time, an automobile. That is just about all that is left for me to do with the exception of airplane travel. Therefore, I pay the Federal tax on gasoline.

I want it understood, as a member of the motoring public, that I am not paying my Federal tax for highways. I am paying my Federal tax to move—to move—and many times I would prefer moving in something other than an automobile.

We are prisoners of the system.

But I daresay, of course, as to anybody that pays the user taxes, that that phrase is a favorite expression of the lobbying which is also behind maintaining the trust fund. For some reason or another, everybody that drives an automobile appears, by that phrase, to be part of their organization. I am not. I would far prefer to take a bus.

In many areas of my own State and in many other areas of the Nation bus systems are not available. Indeed, in the State of Connecticut, which is relatively small geographically—the third smallest in the country—the bus systems existant in the year 1978 are probably one-half of what they used to be 20 years ago.

This is within a time when we are supposed to be geared toward mass transit.

We had far better bus systems in the State of Connecticut 20 years ago.

So let us get that point clear. The highway lobby, as it is represented by tire manufacturers, automobile manufacturers, cement manufacturers, asphalt manufacturers, and truckers, does not represent me when I pay my tax at the gas pump. They represent their own special interests.

I, like most Americans, want to be able to move in the safest and most expeditious way.

Now we get to the point raised, since I have mentioned buses, and it has been mentioned by the distinguished Senator from Texas: The bus lanes are not the issue. The fact is that if a State wants to go ahead and enhance its bus service, it cannot use Federal funds to purchase that equipment. Make clear that all that is there is the highway, not the means to travel across it, and certainly not an enhanced bus system.

Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. WEICKER. Finally—and then I will conclude by an attempted exercise in logic and fact and subject it to the forces of irrelevancy—here we are in a day and age when gasoline is scarcer in supply and more expensive insofar as the product is concerned, when we know from statistics that, since the Arab oil embargo, we have become more and more dependent on the automobile. These are the facts, not the opinions of this Senator. We continue to vote through legislation that causes the United States to become more dependent on the automobile, by virtue of where the Federal dollars go. Mind you, this is not something being imposed upon us by the OPEC cartel. This is not something being thrust upon the United States of America. This is something America is doing to itself. The Federal dollars should go where the crises exist.

Yes, we need more rail systems. Yes, we need more mass transit systems, and we need more buses. We might very well need better airports, and so forth. But none of these options is available to the American public, because Congress insists that, regardless of the energy crisis, we will continue to feed the taxpayers' dollar to those who control this particular form of energy. In that sense, nothing has changed since 1946, and it is the reason why we cannot change anything that has occurred since 1974.

I yield the floor.

SEVERAL SENATORS. Vote! Vote!

Mr. BENTSEN. Mr. President, I yield such time as he may require to the senior Senator from Texas.

Mr. TOWER. Mr. President, I have discovered that everybody is ready to vote; therefore, I will be extremely brief.

My good friend from Connecticut proceeds on the assumption that if alternative transportation were available, all the people who travel by highway would travel by some other means. I think that is not supportable by verifiable data.

I further note that goods and services move along the highways, and this benefits the people; and the better our highways are, the more expeditiously these goods and services are going to move over these highways. Therefore, I see nothing in the argument of the distinguished Senator from Texas that I think would lie strongly against the maintenance of the highway trust fund.

Mr. WEICKER. Mr. President, I should like to respond to the two distinguished Senators from Texas—Senator TOWER and Senator BENTSEN.

Mr. TOWER. I apologize to everybody here for starting this.

[Laughter.]

Mr. WEICKER. Contra to what has been the traditional, popular view of my section of the country, I always have responded very favorably to the pleas of both distinguished Senators from Texas when it comes to the production side of our energy crisis. So far as the consumption side is concerned, not only do I disagree, but I would suggest that perhaps the time has come on this matter that you start voting contra to what had been the subsidy interests of your constituency; and, believe me, when we both do that, we will have a solution to the energy crisis.

SEVERAL SENATORS. Vote! Vote!

Mr. BENTSEN. Mr. President, if the proponents are ready to yield back their time, I am ready to yield back the remainder of my time.

The PRESIDING OFFICER. Is all time yielded back?

Mr. KENNEDY. I yield back the remainder of my time.

Mr. BENTSEN. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. The question is on agreeing to the amendment. On this question the yeas and nays have been ordered, and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Arkansas (Mr. BUMPERS), the Senator from Arizona (Mr. DECONCINI), the Senator from Mississippi (Mr. EASTLAND), the Senator from Montana (Mr. HATFIELD), the Senator from Minnesota (Mrs. HUMPHREY), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Tennessee (Mr. SASSER), the Senator from Georgia (Mr. TALMADGE), and the

Senator from Minnesota (Mr. ANDERSON) are necessarily absent.

Mr. STEVENS. I announce that the Senator from Kansas (Mr. DOLE), the Senator from Michigan (Mr. GRIFFIN), and the Senator from North Dakota (Mr. YOUNG) are necessarily absent.

I further announce that, if present and voting the Senator from Michigan (Mr. GRIFFIN) would vote "nay."

The result was announced—yeas 10, nays 75, as follows:

[Rollcall Vote No. 340 Leg.]

YEAS—10

Brooke	Kennedy	Proxmire
Chafee	Mathias	Weicker
Cranston	Pell	
Javits	Percy	

NAYS—75

Baker	Hansen	Moynihan
Bartlett	Hart	Muskie
Bayh	Haskell	Nelson
Bellmon	Hatch	Nunn
Bentsen	Hatfield, Mark O.	Packwood
Biden	Hathaway	Pearson
Burdick	Hayakawa	Randolph
Byrd, Harry F., Jr.	Heinz	Ribicoff
Byrd, Robert C.	Helms	Riegle
Cannon	Hodges	Roth
Case	Hollings	Sarbanes
Chiles	Huddleston	Schmitt

NOT VOTING—15

Abourezk	Eastland	Johnston
Allen	Griffin	Sasser
Anderson	Hatfield, Paul G.	Talmadge
Bumpers	Humphrey	Young
DeConcini	Inouye	
Dole		

So the amendment (UP No. 1698) was rejected.

Mr. BENTSEN. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. RANDOLPH. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GRAVEL and Mr. MAGNUSON addressed the Chair.

UP AMENDMENT NO. 1699

(Purpose: To provide for a study concerning urban blight)

Mr. MAGNUSON. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment. Will the clerk suspend momentarily so that we can have order in the Chamber? Will the Senator suspend for a moment until we obtain order? Will Members please clear the well.

The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Washington (Mr. MAGNUSON) proposes an unprinted amendment numbered 1699.

Mr. MAGNUSON. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 29, after line 19 insert the following new section and redesignate the following sections accordingly:

"SEC. 123. The Secretary shall conduct a study of the potential for reducing urban blight adjacent to federal-aid primary and interstate highways located in central business districts, which shall include but not be limited to the following—

(a) a catalogue and evaluation of adverse impacts on adjacent land use;

(b) development of a list of potential ways that these adverse impacts could be eliminated or reduced;

(c) estimates of potential increases in value of adjacent land and air rights resulting from reduction of adverse highway impacts together with estimates of potential costs of highway improvements and related measures needed to reduce adverse impacts;

(d) an assessment of the feasibility of using air rights and adjacent land after the improvements are completed to contribute to urban employment, recreational opportunities, low and moderate income housing, and commercial, retail, institutional and higher income residential development;

(e) the development of financing proposals, including legislative proposals, involving all appropriate levels of government and private capital where appropriate, which would finance improvements identified as desirable;

(f) such other matters as the Secretary shall deem appropriate.

Mr. MAGNUSON. Mr. President, this amendment would require the Federal Highway Administration to conduct a thorough study of the potential benefits and costs of special projects that would bring certain blighted areas adjacent to urban freeways into more productive use. In many urban areas of our Nation, we have built elevated or otherwise dominant freeways, and they have brought us both significant benefits and in some cases significant costs in terms of blight and decay to areas that are immediately adjacent to them. These blight areas of our cities could possibly be brought back to more productive use, contributing to the revitalization of urban life and adding to the urban tax base. This amendment is intended to help identify the benefits and costs of such projects, and also to identify potential financing mechanisms to carry them out.

Mr. President, in the city of Seattle in my State we have examples of both the problem of urban freeway related decay and an example of some of the possible ways in which local jurisdictions, together with the Federal Government, can act to alleviate that decay. We have an elevated freeway along the city's waterfront that has caused substantial blight in what would otherwise be valuable properties nearby. On the other hand, we also have recently completed a park—called Freeway Park—which has covered over a depressed freeway in the center of the city with a public facility that not only is an asset to all who use it, but has also led to the revitalization of an entire area. It has led to significant interest in further private development in adjacent properties, which will assist in providing more housing, a greater urban tax base, and so forth.

Mr. President, I am informed that there are several other cities in the Nation which have similar problems and which could also benefit from the study that would be required by this amendment. San Antonio, Boston, and San Francisco have elevated freeways similar to Seattle's, and could benefit from this study. I am hopeful that the study results will lead to the development of a program that is addressed to this need.

I am informed that the committee is aware of this amendment and is prepared to accept it.

Mr. BENTSEN. Mr. President, the manager for the majority has studied the amendment and is ready to accept it, subject to the comment of the manager for the minority.

Mr. STAFFORD. We would be glad to accept it for the minority.

Mr. BENTSEN. Mr. President, I yield back the remainder of my time.

Mr. MAGNUSON. I yield back the remainder of my time.

The PRESIDING OFFICER. All time is yielded back, and the question is on agreeing to the amendment of the Senator from Washington.

The amendment was agreed to.

Mr. MAGNUSON. I thank the Senator.

UP AMENDMENT NO. 1700

(Purpose: Amendment to essential gaps language)

Mr. KENNEDY. Mr. President, I have an amendment which I send to the desk.

The PRESIDING OFFICER. The clerk will report the amendment.

The assistant legislative clerk read as follows:

The Senator from Massachusetts (Mr. KENNEDY) proposed an unprinted amendment numbered 1700.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15, insert after the word "Code" in line 20 the following: "and shall also include those routes in urbanized areas which are on the Interstate System on the date of enactment of the Federal-aid Highway Act of 1978, which were constructed prior to 1960 without Federal highway funds, which are substandard with reference to the standards for the Interstate System adopted by the Secretary under section 109(b) of this title, and which are, prior to September 30, 1982, jointly determined by the Governor and the local governments concerned to be a route which is essential to the sound functioning of the Interstate System in such urbanized area.

Mr. KENNEDY. Mr. President, I had an opportunity to talk with the manager of the bill as well as the ranking member on this. This amendment adds to the definition of essentiality to include gaps within city areas that were built before 1960, that were so important to the State involved that they were built completely with local and State funds and which are now substandard according to Interstate System criteria.

This would permit certain parts of the Interstate System, if they can meet these factors, to be eligible for funding under the essential gap category.

Mr. BENTSEN. Mr. President, the manager of the bill for the majority has examined the amendment and feels it is a good amendment, makes a contribution and helps the transportation needs in that State, and we will be pleased to

accept the amendment on behalf of the majority.

Mr. CHAFEE. Mr. President, on behalf of the minority, we have examined the amendment and agree with it and recommend its adoption.

Mr. KENNEDY. I yield back the remainder of my time.

Mr. BENTSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. All time being yielded back, the question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment was agreed to.

UP AMENDMENT NO. 1701

(Purpose: To authorize use of highway funds for rail operations in non-highway areas)

Mr. GRAVEL. Mr. President, I send to the desk an amendment and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment of the Senator from Alaska.

The assistant legislative clerk read as follows:

The Senator from Alaska (Mr. GRAVEL) proposes an unprinted amendment numbered 1701.

Mr. GRAVEL. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The amendment is as follows:

At the end of the bill insert a new section as follows:

RAIL OPERATION PROJECTS IN NON-HIGHWAY AREAS

SEC. 146. (a) Chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following section:

"157. Rail operation projects in non-highway areas

"The Secretary may approve for Federal financial assistance from funds apportioned under section 104, projects to provide such assistance for the operation of those portions of a publicly or privately owned railroad serving an area not served by a highway, and on which portions, automobiles are transported for the purpose of linking highways or other transportation modes receiving Federal financial assistance from funds apportioned under such section.

Any such approval shall be subject to the conditions that—

"(1) fares or other charges made in such operations shall be under the control of a Federal or State agency or official; and

"(2) all revenues derived from operation of such portions shall be used to pay for the cost of construction or acquisition of the railroad (including equipment) involved in such operation, debt service thereon, and actual and necessary costs of operation, maintenance, repair, and replacement.

"(b) A project authorized by this section shall be subject to and carried out in accordance with all provisions of this title, except those provisions which the Secretary determines are inconsistent with this section.".

(b) The analysis of chapter 1 of title 23 is amended by inserting at the end thereof the following:

"157. Rail operation projects in non-highway areas.".

Mr. BENTSEN. Mr. President, will the Senator yield for a question?

Mr. GRAVEL. I would be happy to yield.

Mr. BENTSEN. Because of the lateness of the hour is the Senator ready to accept a limitation on time somewhat less than that which had been ordered? I believe the Senator talked about 30 minutes, 15 minutes to each side.

Mr. GRAVEL. I think that would be more than adequate, and I would be happy to agree to that time limitation. I would be happy to agree to 15 minutes to each side. I ask unanimous consent that there be such time limitation.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. GRAVEL. Mr. President, I would like to have the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second for the yeas and nays? There is a sufficient second.

The yeas and nays were ordered.

Mr. GRAVEL. Mr. President, it is my intention to call for a vote unless there can be some persuasive argument propounded by the managers of the bill as to why this amendment I am offering is not reasonable. It does not cost a dime. All it speaks to is the flexibility of a highway program within a State. Of course, flexibility in government cannot be a bad thing. So I am waiting with bated breath as to why the managers of the bill chose not to accept this amendment.

Mr. President, today I am offering an amendment which would allow States to use Federal-aid highway funds for rail operations in those areas of the country where no highway exists.

Additionally, the amendment requires that those portions of a railroad to receive such funds must be used for the transporting of automobiles between linking highways or other transportation modes receiving Federal-aid highway funds. Highway dollars are apportioned to the States, who must decide which highways projects should receive attention each year. Federal-aid system apportionments can be used for all expenses incidental to the construction or reconstruction of a highway—surveying, mapping, rights-of-way acquisition, and improvements which directly facilitate and control traffic flow, such as grade separation of intersections, widening of lanes, channelization of traffic, traffic control systems, and passenger loading and unloading areas in Alaska, however, the majority of communities are unconnected by the highway system. It will be some time before Alaska's transportation system reaches the level of advancement now enjoyed by systems throughout the continental United States.

In many areas, Alaskan citizens must rely on whatever single mode of transportation is available, be it airplane, ferry, train, or automobile. They often do not have the option of choosing between flying or driving or catching the train. For this reason, I am asking that the State be allowed to use Federal-aid highway moneys for the operation of those portions of a railroad, publicly or privately owned, in an area not served by a highway—areas where the railroad could be the only means to travel in and out.

The rail service of particular need is the Portage-Whittier section of the Alaska railroad. The Alaska railroad is presently the only method of transportation between these two communities. The ferry docks at Whittier, and a highway leads out of Portage. Automobiles are transported to and from Whittier via the ferry and are then transported by train in and out of Portage where a highway leads to Anchorage.

My amendment would give the State the flexibility to use highway funds to insure that passengers traveling by automobile will continue to be able to take the train from Portage to Whittier. At present, the train operates every day in the summer and will operate three times per week this winter. There is no increase in the bill's authorization level; more flexibility is simply granted for use of the funds already authorized.

There are relatively few areas of the country where this amendment could actually be applied. Most localities throughout the country are connected to some form of highway system. This would allow only those areas of the country not served by a highway to use the available Federal-aid highway funds on a rail system if such rail system transports automobiles. This provision would not subsequently apply if a roadway were later constructed into the region. Such construction would require recission of such funding.

A similar precedent was established in 1970 when States were allowed to apply highway funds for use on marine highway facilities. Alaska now has 773 miles of ferry routes included in its Federal-aid primary system. By granting this flexibility in 1970, Alaska has been able to use highway dollars on the marine highway rather than undertaking the expensive construction of bridges and roadways connecting the many islands of southeast Alaska. The ferry system also operates in Prince William Sound and down to Kodiak Island. Granting this flexibility to the Portage-Whittier shuttle would again prove to be a much more cost-effective alternative.

Many aspects of Alaska's transportation system, although limited, are quite multimodal. In 1977, 7,332 passengers and 1,659 motor vehicles boarded the ferry liner, the Bartlett, which serves the port of Whittier. Eight thousand four hundred and sixty-eight passengers and 1,862 motor vehicles disembarked the Bartlett at Whittier. In arriving or departing Whittier, these individuals and vehicles had to use the railroad. The marine highway system and rail system truly complement eath other at present and I would like to continue to encourage this concept. When the Environment and Public Works Committee was considering the urban transportation planning section of this bill, the need to include various objectives in such planning was discussed. As a result, the bill now before us includes the language declaring it to be "national transportation policy to encourage and promote the development of transportation systems embracing various modes of transportation that will serve the States and local communities efficiently and effectively * * *"

I would suggest that adoption of my amendment would contribute to the achievement of such goals.

ALASKA AND THE FEDERAL-AID HIGHWAY SYSTEM

In all the 586,400 square miles of Alaska, only 6,430 miles of Federal-aid highway exist. Much of that remains unpaved; only this summer will the Alaska highway paving begin and interior Alaska will be connected to southeast, which contains Juneau, by more than a dusty gravel road. This is only one indication of how far Alaska is below the standards expected and demanded by U.S. citizens in the other 49 States.

Alaska was simply not included when the first Federal Aid Highway Act was passed in 1916 and it continued to be excluded for 40 years, although Alaska paid all Federal taxes throughout those years. In 1956, Alaska was asked to pay further taxes on tires, trucks, trailers, and gasoline to pay for highways throughout the lower 48. Finally, in 1956, however, Alaska was given one-third the amount it should have been entitled to as a public domain State. This inequitable arrangement continued for 3 years until statehood.

In 1959, the Bureau of Public Roads within the Department of Commerce estimated that if Alaska had received equitable treatment for all those years, it would have received $575 million. As it was, Alaska was 50 years behind the rest of the Nation in development of its highway system.

As Alaska undertook the huge task of developing a highway system, the general policy was to build as many highways as possible with the minimal funds available. For this reason, the existing highway system is still built to minimum standards and is finding it difficult to meet the needs of a developing State with increased population and economic activity. It is only recently that Alaska and her abundance of resources have been recognized as important to States throughout the United States. More strain than was ever anticipated was placed on the highway system with construction of the Alaska oil pipeline and the State has suffered accordingly.

The Department of Transportation has issued a draft study on the impact of the pipeline on Alaska roads which attributes $40 million of repair on Alaska roads directly to construction of the pipeline. From 1972–75 (the time of the study), motor vehicle traffic increased by 68 percent in the State. It has increased by another 84 percent since then. On the pipeline routes studied, total truck equivalent wheel loadings increased an average of 170 percent. Alaskan roads were not constructed to absorb this much increased traffic in such a short time and they are requiring the extra attention.

Alaska receives 96 percent Federal funding on highway projects usually assigned 70 percent.

Alaska receives 96/4 ratio because 96.4 percent of its lands is held by the Federal Government. There are only four States which do not receive more than 70 percent due to this adjustment for Federal land.

This percentage will decrease after passage of D–2 next year when more land is transferred into national parks, national forests, and national monuments—land which is not included when calculating this ratio for clause A States, such as Alaska.

Alaska was given funds in committee for maintenance of interstate mileage which it does not have.

Alaska is the only State in the Union without Interstate mileage. It already receives Interstate construction money for use on its primary and secondary roads. It is only reasonable that it receive the funds to maintain the roads built with the construction money.

Alaska was discriminated against in the past, which is why there is no Interstate mileage and less than 10,000 miles of road—paved and unpaved—in a State of 586,000 square miles. Only 4,102 miles of Federal-aid highway.

For every $1 Alaska contributes to the highway trust fund, it receives $9.77.

This is a misleading figure. Ratios do not build highways, dollars do. Roads must still connect our 430,000 people and across much more land area than any other State. The population centers are separated.

Alaskans pay a larger per capita Federal income tax than any other State—$3,011. No other State comes close. These go into general Treasury moneys which fund many highway programs. For example, outdoor advertising control, territorial highways, parkways, Indian reservation roads, forest development roads and trails, park roads and trails.

What this amendment says is the State of Alaska or any State, if they have a unique situation of a community that cannot be reached by air and cannot be reached by highways and is only reached by railroad, that you can use highway moneys to help the transportation of vehicles over that railroad system for the part in question.

When and if in the future you can reach this community by air or by highways, then there is a rescission, and you cannot do that with these funds. That is the only flexibility involved.

Let me tell you the community which is affected. It is a community by the name of Whittier, Alaska. It sits in the bowl of Prince William Sound. There is no way to have an airport because it is almost all vertical ground.

It has 2,000 people. It used to be a military base, and it is a port where you bring in materiel into this port and it goes onto the railroad and goes into Anchorage and then out to Fairbanks.

There is a tunnel into this town so there are no roads into the town. All you have is a railroad tunnel. We have a ferry system that goes through all of the Prince William Sound area, hits Valdez and Cordova, and Seward, and then Whittier, and tourists and cars get off the ferry and then drive immediately onto railroad flatcars and then are brought into a place called Portage or taken off of the flatcars and they then drive their way on up to Anchorage or Fairbanks or the Alcan Highway, whatever they choose to do.

So all I am asking for is, because of this unique situation—and we have many unfortunate unique situations in Alaska, because it is a unique part of our national geography—all we are asking for is not any extra money to do this, and I am prepared to put any kind of limitations on this exception that might be reasonable to effect the proposition—one of the possible things we might be able to do is take wood and go inside this trestle and build a wooden highway so cars can drive in and out.

We are not talking about a lot of trains a day—at most, in peak season, one or two a day, and in winter two or three times a week. But it becomes quite a burden; if you come in with a ferry and leave your car, you have to wait two or three days to get out.

That reasonable people cannot come forward with reasonable employment of government resources to transcend these natural difficulties strikes me as odd.

That, essentially, is my amendment. It does not add one single sou to the budget, and when this unique situation disappears, the exception would disappear. I do not know what could be a more reasonable request.

I reserve the remainder of my time, waiting to see the logic of the managers of the bill in opposing what I consider to be a most reasonable amendment to accommodate the many thousands of visitors to my State and those who live in my State.

Mr. BENTSEN. Mr. President, I rise in opposition to the amendment of my good friend from Alaska.

Alaska is a unique State, and we have recognized that time and time again before our committee and before the Senate. Let me give you a few examples of that.

Over the 20-year life of highway trust fund, Alaska has received $9.46 in return for every dollar it has contributed. That, I submit, is not a bad investment for Alaska. It is a rate of return almost 10 times better than that received by the average State; no other State can even approach Alaska in this regard.

Let us also understand that S. 3073 already contains a provision, inserted by Senator GRAVEL in committee, that would further increase Alaska's already disproportionate share of the trust fund dollar. Under this legislation, Alaska will receive $1.25 million in interstate maintenance money, despite the fact that there is not 1 mile of interstate highway in Alaska. Senator GRAVEL has convinced the committee of the wisdom of counting ferry miles for maintenance purposes; if he were to succeed in passing this amendment, so as to also include rail miles, Alaska would receive more interstate 3R funds than eight States; States like West Virginia and Vermont and Delaware.

I acknowledge that rail transportation is particularly important in Alaska. That fact alone argues in favor of a well-maintained system. It does not, however, present an adequate justification for the use of highway trust fund revenues to maintain Alaska's rail system.

Users of the Alaska railroad pay fees for use of the system, but they do not contribute to the highway trust fund. If revenues from the railroad are insufficient to cover operating costs, then the people of Alaska can determine whether they should increase the fees or subsidize the railroad from State funds.

I see no good reason for making the Alaska Railway a ward of the Federal

Government, especially at the expense of the highway trust fund.

Mr. CHAFEE. Mr. President, I would like to stress a couple of the points that the Senator from Texas has made.

Alaska has no interstate roads; yet it receives interstate funds. Currently Alaska has received $16.8 million in interstate construction funds, although it has no interstate mileage, and this money can be used for primary, secondary, or urban roads.

As has been mentioned, this authorization has been used not only for good road needs, but extended to include the purchase of ferries. There has not been a limit on where they can go with this.

Under this amendment, the money would not go for the purchase of railroads or the construction of railroads, but for the operation of a railroad. Mr. President, I share with the chairman of the subcommittee the view that that is just going too far. The purpose of the primary highway program is to provide Federal assistance chiefly for needs of the Nation's major highways, and I join in opposition to the amendment.

Mr. BENTSEN. Mr. President, if the proponent of the amendment is prepared to yield back his time, I am prepared to yield back the remainder of mine.

Mr. GRAVEL. No, I am not prepared to yield back the remainder of my time.

I might say that neither one of you has addressed yourself to this amendment. You make a big case as to what I got in committee and what Alaska is receiving. Let me tell you, we pay twice as much tax per capita as anyone else in the United States. Many times we get put upon by saying Alaska is getting so much of this and so much of that.

We do not have interstates in Alaska. All you have to do is drive the roads to find out we do not have any interstates.

It is not my fault that Alaska is one-fifth the size of the United States, and that it costs us more to build roads than anyone else.

You give me all the ratios you want, but let me tell you, ratios do not build roads, dollars build roads. If you want to build a road from Anchorage to Fairbanks, it costs a lot more than it costs to build a road from Dallas or Houston to San Antonio, by a big factor.

I do not think you can argue what you have given me and not address yourself to what the amendment does. It does not cost anybody one penny. All it is saying is that in Alaska we get a little flexibility because we have an unusual situation. You have not responded to that argument.

So often we are quick to beat on the bureaucracies because they are inflexible, unresponsive, and have rigor mortis. But what about what is being demonstrated here? I am not asking for anything. If you want to limit it to one community, you can limit it. But here is a community that cannot get an airport because of the configuration of its location; you cannot get a highway to it; all it has is a railroad tunnel, and you people are all upset because of the principle that you cannot use highway moneys to fix up the inside of this railroad tunnel.

You have not addressed yourselves to the simpleness of this amendment, except to say how much Alaska is getting. Alaska is not getting all that much.

I would remind my colleagues that we were left out of the highway funds all through our territorial days, and at one time were were authorized $70 million of highway money, but we were rescinded 2 years ago, and now you have a program to pay for everybody else's highways, but you say we are getting too much money. I admit the numbers do look unusual on a per capita basis, because unfortunately when you measure distances in Alaska in numbers of people, these are very unusual numbers, and there is nothing I can do about it.

Mr. LONG. Mr. President, will the Senator yield for a question?

Mr. GRAVEL. I yield.

Mr. LONG. Am I to understand that if the Senator's amendment is agreed to, Alaska would not get $1 of additional revenue?

Mr. GRAVEL. Not one penny more.

Mr. LONG. Do I understand also that Alaska has no interstate highways?

Mr. GRAVEL. That is correct.

Mr. LONG. Then, if Alaska has no interstate highways and it cannot benefit from that program, would it not stand to reason that whatever money might be made available should be made available the way the Alaskans think they can use it?

Mr. GRAVEL. I thank my colleague for making a very simple point. That is all we are asking, and I am prepared to limit it to just this one community. In fact, the amendment limits it to the extent that if the community later develops a road where you can get to it, you rule out the money in conjunction with the railroad.

You have to see this community. You can get in and out of it by railroad three times a week in the wintertime. That means you walk out. Or if you have a friend on the railroad, you ride out on the railroad car, you know the kind I mean, a little bus-like thing. This is preposterous, to make life so inflexible to these people. For what? I do not see the principle involved.

Mr. LONG. The Senator and I are together. I heard Alaska was using some money for a ferry boat rather than building a bridge. My impression was that if you had a choice, you would build a bridge. But if you cannot find enough money for a bridge, you would have a ferry boat. I cannot understand why Alaska would be using a ferry boat, when anyone would prefer a bridge if you had the money to built it with.

Mr. GRAVEL. We have ferries because the cost of building roads are preposterous and the cost of building bridges is preposterous. We do not get any extra money for the ferries. This charge that because we use highway moneys for ferries violates something is ridiculous. We get money through a formula like anybody else, and we choose to use it for ferries because it is preposterous to build roads.

In the bill, and this is something really unusual for Alaska—well, it is not in this bill. Hopefully, we hope to use hover craft to be able to use the Yukon River for a ferry system that will stop us from building roads, so that we would not have to build an expensive road. We cannot afford it and we know it.

We come in asking for the same kind of formula anybody else has, but we ask for flexibility in using the money. What we are fed up with is a reference that we are ripping off something that, one, we do not deserve, and, two, it is unfair we are getting it. That is the argument we have just heard.

There was no addressing this amendment that is trying to help out 2,000 people—well, it is more than 2,000 people because this is part of our tourist system when people come in on tours and come into this community, get off the ferry, and then have to get on a train, put their cars on flat cars, and come out.

I cannot understand why anybody would be opposed to flexibility in governmental action so people can do something intelligent.

It would be different if I were standing here asking for money to do this which really altered principle, which was mixing railroads with roads. I am not. I am being very precise in this amendment saying if you have a community anywhere in the United States that meets the criteria of Whittier, then you ought to have this intelligent flexibility.

I hope my colleagues will vote for me. There is such a thing as opposing an amendment because it should be opposed and there is a reasonable argument for opposing it. But when there is rigor mortis and you oppose it just because you do not want to pick up the amendment, then I think there is something vitally wrong in the legislative process.

Mr. MATSUNAGA. Will the Senator yield?

Mr. GRAVEL. I yield.

Mr. MATSUNAGA. I rise in support of the amendment because I find Alaska's situation is very much like the situation in Hawaii. We are not connected to the mainland United States. We find ourselves uniquely situated as noncontiguous States, both Alaska and Hawaii. As the Senator has stated, he is not asking for additional funds, but he is simply asking that those funds allocated to Alaska be allowed to be used for the improvement of railroad service to provide access to this town of 2,000 people.

May I pose this question to the Senator from Alaska: As I understand it, that railroad is used by tourists from other States of the Union. Is that correct?

Mr. GRAVEL. Very much so, and this would provide a convenience to those people from Texas, Rhode Island, and Louisiana who come to Alaska in the summertime, and Hawaii.

Mr. MATSUNAGA. So, in fact, the proposal does affect interstate commerce.

Mr. GRAVEL. Very much so.

Mr. MATSUNAGA. Would it, in fact, promote better relations between Alaska and the other States of the Union?

Mr. GRAVEL. I would hope it would with the State of Texas as we have a considerable number of Texans who come to Alaska.

Mr. MATSUNAGA. I thank the Senator.

Mr. GRAVEL. I want to add that whenever one stands here from Alaska and pleads flexibility with respect to highways, our highways in Alaska minimally cost $300,000 a mile. Now you can begin to believe that we try to find new ways of moving people.

Mr. BENTSEN. Will the Senator yield?

Mr. GRAVEL. I would be happy to yield.

Mr. BENTSEN. My concern is precedent in the user tax. If the Senator will limit this to Whittier, I would be happy to talk to the minority manager to see if we can accept the amendment.

Mr. GRAVEL. I would be happy to do that.

Mr. BENTSEN. And we would vitiate the yeas and nays?

Mr. GRAVEL. Yes.

Mr. BENTSEN. The manager from the minority is agreeable to that.

Mr. GRAVEL. I will yield back the remainder of my time and work out the language.

The PRESIDING OFFICER. Does the Senator from Alaska seek to modify his amendment?

Mr. GRAVEL. I do, but I will need a few minutes to find a location.

The PRESIDING OFFICER. Is there objection to vitiating the yeas and nays which have been ordered on the amendment?

Hearing no objection, it is so ordered.

Mr. GRAVEL. I would consider this a technical amendment. If the body would be willing, I will ask unanimous consent that the exclusion in this amendment be to Whittier, Alaska, because of its unusual arrangement. There is probably no other city in the United States which could meet this requirement. We could then treat this as a technical amendment.

Mr. BENTSEN. The manager of the bill is agreeable to that.

The PRESIDING OFFICER. The Senator now has the right to modify his amendment, and it will be so modified when we receive the modification.

Mr. BENTSEN. Mr. President, I ask unanimous consent that the following members of the Committee on Environment and Public Works be added as cosponsors of the pending measure, S. 3073: Senators RANDOLPH, MUSKIE, GRAVEL, BURDICK, CULVER, HART, MOYNIHAN, HODGES, STAFFORD, BAKER, MCCLURE, DOMENICI, CHAFEE, and WALLOP.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 1701, AS MODIFIED

Mr. GRAVEL. Mr. President, I send my modification to the desk.

The PRESIDING OFFICER. The modification will be stated.

The legislative clerk read the modification.

The amendment, as modified, is as follows:

At the end of the bill insert a new section as follows:

RAIL OPERATION PROJECTS IN NON-HIGHWAY AREAS

Sec. 146. (a) Chapter 1 of title 23, United States Code, is amended by adding at the end thereof the following section:

"157. Rail operation projects in non-highway areas

"The Secretary may approve for Federal financial assistance from funds apportioned under section 104, projects to provide such assistance for the operation of those portions of the Alaska Railroad from Whittier to Portage, Alaska for the purpose of linking highways or other transportation modes receiving Federal financial assistance from funds apportioned under such section. Any such approval shall be subject to the conditions that—

"(1) fares or other charges made in such operations shall be under the control of a Federal or State agency or official; and

"(2) all revenues derived from operation of such portions shall be used to pay for the cost of construction or acquisition of the railroad (including equipment) involved in such operation, debt service thereon, and actual and necessary costs of operation, maintenance, repair, and replacement.

"(b) A project authorized by this section shall be subject to and carried out in accordance with all provisions of this title, except those provisions which the Secretary determines are inconsistent with this section.".

(b) The analysis of chapter 1 of title 23 is amended by inserting at the end thereof the following:

"157. Rail operation projects in non-highway areas.".

The PRESIDING OFFICER. Is all time yielded back?

Mr. GRAVEL. I yield back the remainder of my time.

Mr. BENTSEN. I yield back the remainder of my time.

The PRESIDING OFFICER. The question is on agreeing to the amendment, as modified.

The amendment, as modified, was agreed to.

The PRESIDING OFFICER. Are there further amendments to title I?

If not, the Senator from Nevada is recognized to call up title II of the bill.

UP AMENDMENT NO. 1702

(Purpose: To add Highway Safety (S. 2541) as Title II of the Highway Aid bill)

Mr. CANNON. Mr. President, I send to the desk S. 2541, to be designated as title II of the bill S. 3073, pursuant to the unanimous-consent agreement entered into on August 15.

Mr. BENTSEN. Mr. President, would it be in order to ask unanimous consent that title I be agreed to?

The PRESIDING OFFICER. The Chair will inform the manager that title I does not have to be agreed to. The Senate has now moved on to title II of the bill.

Mr. BENTSEN. And there would be no further amendment to title I, as I understand it?

The PRESIDING OFFICER. Under the unanimous-consent agreement, no further amendments to title I are in order, the Senate now having moved on to title II.

The clerk will state the amendment.

The legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) proposes an unprinted amendment numbered 1702.

Mr. CANNON. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 58, immediately after line 7, insert the following:

TITLE II—HIGHWAY SAFETY

SEC. 201. Chapter 4 of title 23 of the United States Code is amended to read as follows:

"Chapter 4.—HIGHWAY SAFETY

"Sec.
"401. Authority of the Secretary.
"402. Highway safety programs.
"403. Apportionment.
"404. State highway safety agency.
"405. Local programs.
"406. Program submission and approval.
"407. Federal share payable.
"408. Federal agency assistance.
"409. Indian programs.
"410. Highway safety research and development.
"411. National Highway Safety Advisory Committee.
"412. Authorization of appropriations.

"§ 401. Authority of the Secretary

"The Secretary is authorized and directed to assist and cooperate with other Federal departments and agencies, State and local governments, private industry, and other interested parties, to increase highway safety. For the purposes of this chapter, the term 'State' means any one of the 50 States, the District of Columbia, Puerto Rico, the Virgin Islands, Guam, and American Samoa.

"§ 402. Highway safety programs

"Each State shall have a highway safety program designed to reduce traffic deaths and injuries by identifying the causes of motor vehicle accidents, by adopting measures to reduce the frequency and severity of accidents, and by evaluating the effectiveness of such measures. As part of its highway safety program, each State shall achieve uniformity in the collection of data related to highway safety through compliance with standards to be issued by the Secretary on such subjects as driver licensing, vehicle titling and registration, theft prevention, and traffic records. Each State shall also achieve uniformity in laws and practices that affect interstate motorists, through compliance with standards to be issued by the Secretary on such subjects as the rules of the road, traffic control devices, and highway design, construction, and maintenance. As part of its highway safety program, each State shall also consider guidelines which the Secretary is authorized to issue on all aspects of highway safety, including traffic safety education, motorcycle safety, pedestrian safety, emergency medical services, traffic adjudication systems, vehicle inspection and maintenance, pupil transportation, and identification of high accident rate locations. The Secretary shall develop the standards and guidelines specified in this section in cooperation with the States, their political subdivisions, appropriate Federal departments and agencies, and such other public and private organizations as the Secretary deems appropriate.

"§ 403. Apportionment

"(a) Funds authorized to be appropriated to carry out section 402 of this chapter shall be used to aid the States to conduct the highway safety programs approved in accordance with section 406 of this chapter. Funds authorized to be appropriated to carry out section 402 shall be subject to a deduction not to exceed 5 percent for the necessary costs of administering the provisions of the section, and the remainder shall be apportioned among the several States. Such funds shall be apportioned 75 percent in the ratio which the population of each State bears to the total population of all the States, as shown by the latest available Federal census, and 25 percent in the ratio which the public road mileage in each State bears to the total public road mileage in all States. For the purposes of this section, the term 'public road' means any road under the jurisdiction of and main-

tained by a public authority and open to public travel. Public road mileage as used in this subsection shall be determined as of the end of the calendar year preceding the year in which the funds are apportioned and shall be certified to by the Governor of the State and subject to approval by the Secretary. The annual apportionment to each State shall not be less than one-half of 1 percent of the total apportionment, except that the apportionments to the Virgin Islands, Guam, and American Samoa shall not be less than one-third of 1 percent of the total apportionment.

"(b) Notwithstanding the apportionment specified by subsection (a) of this section, up to 25 percent of the funds to be appropriated for any fiscal year may be separately apportioned by the Secretary to the States for carrying out high priority safety programs, including expanded enforcement of the 55 mile per hour speed limits and programs to increase safety belt use, in accordance with an apportionment formula to be determined by the Secretary.

"(c) On October 1 of each fiscal year, the Secretary shall apportion the highway safety funds in accordance with subsection (a) of this section, at which time the funds shall be available for obligation under the provisions of section 406.

"(d) Sums apportioned to a State for its highway safety program shall continue to be available for obligations in that State for a period of 3 years after the close of the fiscal year for which such sums are authorized and any amounts remaining unexpended at the end of such period shall lapse.

"(e) Nothing in this chapter authorizes the appropriation or expenditure of funds for highway construction, maintenance, or design (other than design of safety features of highways to be incorporated into standards).

"§ 404. State highway safety agency

"Each State shall provide that the Governor shall be responsible for the highway safety program and shall administer the program through a highway safety agency which shall have the authority, facilities, and organization to carry out the highway safety program to the satisfaction of the Secretary.

"§ 405. Local programs

"(a) Each State shall authorize its political subdivisions to develop and carry out local highway safety programs within their jurisdictions as a part of the State highway safety program if such local highway safety programs are approved by the Governor and are in accordance with this chapter, and shall assist political subdivisions in identifying highway safety problems and developing measures to reduce the frequency and severity of accidents.

"(b) Each State shall provide that from the Federal funds apportioned under section 403 to such State for any fiscal year, not less than 40 percent shall be expended by the political subdivisions of such State in carrying out local highway safety programs developed by the political subdivisions in accordance with subsection (a) of this section.

"(c) The Secretary is authorized to waive the requirement of subsection (b) of this section, in whole or in part, for a fiscal year for any State whenever he determines that there is an insufficient number of local highway safety programs to justify the expenditure in such State of such percentage of Federal funds during such fiscal year.

"§ 406. Program submission and approval

"(a) In each fiscal year, the State highway safety agency shall submit to the Secretary for his approval a proposed highway safety program for the ensuing fiscal year together with a projection of future highway safety efforts. The program shall describe the highway safety activities to be undertaken by the State with such specificity as the Secretary may require. The Secretary shall promptly review the State's compliance with the program development process specified by section 402 of this chapter and its compliance with the uniform requirements issued pursuant to such section. He may approve the program in whole or in part, on the basis of his review. His approval of the program, or portions of the program, shall be deemed a contractual obligation of the Federal Government for the payment of its proportional contribution thereto, subject to the availability of funds.

"(b) Concurrent with the obligation of Federal funds, the Secretary shall enter into a formal Federal-Aid agreement with the State. Such agreement shall designate the Federal, State, and local pro rata shares required for the execution of the program.

"(c) The Secretary shall not withhold approval of a State's program in its entirety except upon a finding that the State is failing to make reasonable progress toward implementation of the requirements specified in section 402, considered as a whole, or upon a finding that the State's performance has been substantially deficient in identifying highway safety problems, developing countermeasures, and evaluating results.

"§ 407. Federal share payable

"(a) Except as provided in section 409 of this chapter the Federal share payable on account of any program shall not exceed 70 percent of the total cost of such program.

"(b) The Secretary may, in his discretion, from time to time as work progresses, make payments to any State for the Federal share of costs incurred by the State or its subgrantee.

"(c) The Secretary may advance to any State, out of existing appropriations, the Federal share of costs incurred. Such advance financing shall be through letter of credit in conformity with United States Treasury Department regulations.

"(d) Such payments or advances of Federal funds shall be made to such official or officials or depository designated by the State and authorized under the laws of the State to receive public funds of the State.

"(e) The aggregate of all expenditures made during any fiscal year by a State and its political subdivisions for carrying out the State highway safety program shall be available for the purpose of crediting such State during such fiscal year for the non-Federal share of the cost of any program under this chapter without regard to whether such expenditures were actually made in connection with such program, except that if any funds apportioned under section 403 are to be expended by the State for the planning and administrative functions of the State highway safety agency, the State shall provide matching funds for such functions of at least 20 percent of the total funds so expended.

"§ 408. Federal agency assistance

"The Secretary may make arrangements with other Federal departments and agencies for assistance in the preparation of uniform requirements for the highway safety programs contemplated by section 402 and in the administration of such programs. Such departments and agencies are directed to cooperate in such preparation and administration, on a reimbursable basis.

"§ 409. Indian programs

"For the purpose of the application of this chapter on Indian reservations, the terms 'State' and 'Governor of a State' includes the Secretary of the Interior; and the term 'political subdivision of a State' includes an Indian tribe except that, notwithstanding the provisions of section 405(b) of this chapter, 95 percent of the funds apportioned to the Secretary of the Interior after the date of enactment of this chaper shall be expended by Indian tribes to carry out highway safety programs within their jurisdictions.

"§ 410. Highway safety research and development

"(a) The Secretary is authorized to use funds appropriated to carry out this subsection to carry out safety research which he is authorized to conduct by section 307(a) of this title. In addition, the Secretary may use the funds appropriated to carry out this section, either independently or in cooperation with other Federal departments or agencies, for making grants to or contracting with State or local agencies, institutions, and individuals for (1) training or education of highway safety personnel, (2) research fellowships in highway safety, (3) development of improved accident investigation procedures, (4) emergency service plans, (5) demonstration projects, and (6) related activities which the Secretary deems will promote the purposes of this section.

"(b) In addition to the research authorized by subsection (a) of this section, the Secretary, in consultation with such other Government and private agencies as may be necessary, is authorized to carry out safety research on the following:

"(1) The relationship between the consumption and use of drugs and their effect upon highway safety and drivers of motor vehicles.

"(2) Driver behavior research, including the characteristics of driver performance, the relationships of mental and physical abilities or disabilities to the driving task, and the relationship of frequency of driver accident involvement to highway safety.

"(c) The research authorized by subsection (b) of this section may be conducted by the Secretary through grants and contracts with public and private agencies, institutions, and individuals.

"(d) The Secretary may, where he deems it to be in furtherance of the purposes of section 402 of this chapter, vest in State or local agencies, on such terms and conditions as he deems appropriate, title to equipment purchased for demonstration projects with funds authorized by this section.

"(e)(1) In addition to the other demonstration programs authorized by subsection (a) of this section, the Secretary shall make grants each fiscal year to those States which develop the most innovative approaches to highway safety problems in accordance with criteria to be devised by the Secretary in consultation with the States, their political subdivisions, appropriate Federal departments and agencies, and private sector organizations.

"(2) There are authorized, to carry out the purposes of paragraph (1) of this subsection, not to exceed $5,000,000 for the fiscal year ending September 30, 1980, not to exceed $10,000,000 for the fiscal year ending September 30, 1981, and not to exceed $15,000,000 for the fiscal year ending September 30, 1982.

"§ 411. National Highway Safety Advisory Committee

"(a)(1) There is established in the Department of Transportation a National Highway Safety Advisory Committee, composed of the Secretary or an officer of the Department appointed by him, the Federal Highway Administrator, the National Highway Traffic Safety Administrator, and thirty-five members appointed by the President, no more than four of whom shall be Federal officers or employees. The Secretary shall select the Chairman of the Committee from among the Committee members. The appointed members, having due regard for the purposes of this chapter, shall be selected from among representatives of various State and local governments, including State legislatures, of public and private interests contributing to, affected by, or concerned with highway safety, including the national organizations of passenger cars, bus, and

truck owners, and of other public and private agencies, organizations, or groups demonstrating an active interest in highway safety, as well as research scientists and other individuals who are experts in this field.

"(2)(A) Each member appointed by the President shall hold office for a term of three years, except that (i) any member appointed to fill a vacancy occurring prior to the expiration of the term for which his predecessor was appointed shall be appointed for the remaider of such term, and (ii) the terms of office of members first taking office after the date of enactment of this section shall expire as follows: Twelve at the end of 1 year after the date such committee members are appointed by the President, 12 at the end of 2 years after the date such committee members are appointed by the President, and 11 at the end of 3 years after the date such committee members are appointed, as designated by the President at the time of appointment, and (iii) the term of any member shall be extended until the date on which the successor's appointment is effective. Any member appointed by the President who is not a Federal officer or employee and who has served on the Committee for 3 years shall not be eligible for reappointment as a member of the Committee during the 1 year immediately following the last year during which he served as such a member.

"(B) Members of the Committee who are not officers or employees of the United States shall, while attending meetings or conferences of such Committee or otherwise engaged in the business of such Committee, be entitled to receive compensation at a rate fixed by the Secretary, but not exceeding $100 per diem, including traveltime, and while away from their homes or regular places of business they may be allowed travel expenses, including per diem in lieu of subsistence, as authorized in section 5703 of title 5 of the United States Code for persons in the Government service employed intermittently. Payments under this section shall not render members of the Committee employees or officials of the United States for any purpose.

"(b) The National Highway Safety Advisory Committee shall advise, consult with, and make recommendations to, the Secretary on matters relating to the activities and functions of the Department in the field of highway safety. The Committee is authorized (1) to review research projects or programs submitted to or recommended by it in the field of highway safety and to recommend to the Secretary, for prosecution under this title, any such projects which it believes show promise of making valuable contributions to human knowledge with respect to the cause and prevention of highway accident; and (2) to review, prior to issuance, requirements proposed to be issued by order of the Secretary under the provisions of section 402 of this chapter and to make recommendations thereon. Such recommendations shall be published in connection with the Secretary's determination or order.

"(c) The National Highway Safety Advisory Committee shall meet from time to time as the Secretary shall direct, but at least once each year.

"(d) The Secretary shall provide to the National Highway Safety Committee from among the personnel and facilities of the Department of Transportation such staff and facilities as are necessary to carry out the functions of such Committee.

"§ 412. Authorization of appropriations

"(a) There is authorized to be appropriated, for carrying out the provisions of section 402 of this chapter (relating to highway safety programs), by the National Highway Traffic Safety Administration, out of the Highway Trust Fund, $175,000,000 for the fiscal year ending September 30, 1979, $175,000,000 for the fiscal year ending September 30, 1980, $200,000,000 for the fiscal year ending September 30, 1981, and $200,000,000 for the fiscal year ending September 30, 1982.

"(b) For carrying out the provision of section 402 of this chapter (relating to highway safety programs), by the Federal Highway Administration, funds shall be provided in accordance with provisions of section 151 of this title.

"(c) There is authorized to be appropriated, for carrying out the provisions of section 411 of this chapter (relating to highway safety research and development), by the National Highway Traffic Safety Administration, out of the Highway Trust Fund $50,000,000 for the fiscal year ending September 30, 1979, $50,000,000 for the fiscal year ending September 30, 1980, $50,000,000 for the fiscal year ending September 30, 1981, and $50,000,000 for the fiscal year ending September 30, 1982.".

SEC. 3. Section 154 of title 23 of the United States Code is amended by adding at the end thereof the following new subsections:

"(e) Each State shall certify to the Secretary before January 1 of each year that it is enforcing all speed limits on public highways in accordance with this section. The certification statement shall consist of such data as the Secretary determines by rule is necessary to support the statement for the 12-month period ending on September 30 before the date the statement is required, including data on the percentage of motor vehicles exceeding 55 miles per hour on public highways with speed limits posted at 55 miles per hour in accordance with criteria to be established by the Secretary.

"(f)(1) For the 12-month period ending September 30, 1979, if the data submitted by a State pursuant to subsection (e) of this section show that the percentage of motor vehicles exceeding 55 miles per hour is greater than 60 per centum, the Secretary shall reduce the State's apportionment of Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 5 percent of the amount to be apportioned for the fiscal year ending September 30, 1981.

"(2) For the 12-month period ending September 30, 1980, if the data submitted by a State pursuant to subsection (e) of this section show that the percentage of motor vehicles exceeding 55 miles per hour is greater than 50 percent the Secretary shall reduce the State's apportionment of Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 5 percent of the amount to be apportioned for the fiscal year ending September 30, 1982.

"(3) For the 12-month period ending September 30, 1981, if the data submitted by a State pursuant to subsection (e) of this section for that year show that the percentage of motor vehicles exceeding 55 miles per hour is greater than 40 percent, the Secretary shall reduce the State's apportionment of the Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 5 percent of the amount to be apportioned for the fiscal year ending September 30, 1983.

"(4) For the 12-month period ending September 30, 1982, and for each succeeding twelve-month period thereafter, if the data submitted by a State pursuant to subsection (e) of this section for that year show that the percentage of motor vehicles exceeding 55 miles per hour is greater than 25 percent, the Secretary shall reduce the State's apportionment of Federal-aid highway funds under each of sections 104(b)(1), 104(b)(2), and 104(b)(6) of this title in an aggregate amount of up to 10 percent of the amount to be apportioned for the fiscal year ending September 30, 1984, and for each succeeding fiscal year thereafter.

"(g) The Secretary shall promptly apportion to a State any funds which have been withheld pursuant to subsection (f) of this section if he determines that the percentage of motor vehicles in such State exceeding 55 miles per hour has dropped to the level specified for the fiscal year for which the funds were withheld.".

SEC. 4. There are authorized to be appropriated, for carrying out sections 307(a) and 410 of title 23, United States Code (relating to highway safety research and development), by the Federal Highway Administration, out of the Highway Trust Fund, $10,000,000 for the fiscal year ending September 30, 1979, $10,000,000 for the fiscal year ending September 30, 1980, $10,000,000 for the fiscal year ending September 30, 1981, and $10,000,000 for the fiscal year ending September 30, 1982.

The PRESIDING OFFICER. Under the agreement, the amendment now before the Senate is agreed to as original text and will be called title II.

Will the Senator suspend until we have order in the Chamber? Will Senators clear the aisle and take their seats?

The PRESIDING OFFICER. On this title, there is a 1-hour time limit. Who yields time?

Mr. CANNON. Mr. President, I yield myself 5 minutes. I have no intention of asking for the yeas and nays on this amendment, but I cannot insure that someone else may not ask for them.

The PRESIDING OFFICER. The Senator from Nevada is recognized for 5 minutes.

Mr. CANNON. Mr. President, I have offered S. 2541, the Highway Safety Act of 1978 as title II of S. 3073. Title II provides the authorizations for funding of the various States' highway safety programs. Pursuant to Senate Resolution No. 4, the Senate Committee on Commerce, Science, and Transportation has been designated the jurisdictional responsibility for highway safety matters.

As my colleagues know, the Highway Safety Act was passed as a response to the increasing carnage on our Nation's highways, which spiraled to more than 53,000 highway deaths per year in 1966. Since the institution of this program, although vehicle miles traveled and number of registered motorists have continued to increase, the death toll has decreased during the last decade.

In order to accelerate this trend, S. 2541 provides a number of important changes to the Highway Safety Act, which the committee believes will significantly strengthen this legislation. These changes are an outgrowth of a comprehensive review of the Highway Safety Act mandated in 1976 by the Congress. Howard Dugoff, Deputy Administrator of the National Highway Traffic Safety Administration, discussing this review of the Highway Safety Act stated:

> The report's principal recommendations which is incorporate in S. 2541, is that the time has come to shift the emphasis of the program away from compliance with standards and towards the development by the states of methods to identify their own most pressing safety problems and to develop their own specific solutions. . . . In view of the greater sophistication and experience of the states in highway safety, insistence on nationwide uniformity and standards no longer serves the remedial purposes these standards once served in the past.

The Senate Commerce, Science, and Transportation Committee, responding

to the need to allow the States to play a larger role in developing their own highway safety programs to meet their specialized needs, reduced the areas and number of mandatory highway safety standards required under the Highway Safety Act. The committee determined that highway safety standards should be continued as mandatory standards only in the following two circumstances:

First, in those areas of data collection and analysis in which uniformity is critical, such as traffic records, drivers licensing, and vehicle registration;

Second, in those areas where uniform rules of the road and uniform traffic control devices should be required in order to facilitate safe interstate driving.

However, in order to provide greater flexibility to the States in identifying their own needs and solutions and to assist the States in responding to their unique highway safety problems, the committee accepted the Department of Transportation's recommendations and changed a number of previously mandatory highway safety standards into guidelines for the States.

This action to change mandatory standards into guidelines received broad support in the committee's hearings. The American Association of Motor Vehicle Administrators, for example, stated:

> The AAMVA feels that one of the most significant provisions of S. 2541 is the one which would permit states substantially more flexibility in administering their highway safety programs by moving away from mandatory highway safety program standards. We are convinced that the states are able to draw from their own experience—experience gained in the decade that the Highway Safety Act has been in effect—and identify their own problems, devise their own remedies, and to evaluate the results.

The Highway Users Federation also supported this approach by stating:

> The bill wisely provides that each state be permitted to identify their priorities and develop accident countermeasures, in accordance with their specific needs. . . . We believe that the states and communities have developed sufficient administrative and technical skills to carry out a flexible program effectively.

The National Association of Governors' Highway Safety Representatives and Citizens for Highway Safety also supported the guidelines approach.

Mr. President, allowing certain mandatory safety standards to become guidelines does not mean that these programs where appropriate will not continue to be emphasized. Under the provisions of the Highway Safety Act, each State is required to develop a highway safety program designed to reduce traffic deaths and injuries by identifying the major causes of motor vehicle accidents in their particular State and by targeting measures to reduce the frequency and severity of accidents to meet their special needs.

The States, in developing these plans, are to take careful cognizance of the guidelines promulgated by the Secretary of Transportation. It was at the specific request of the National Association of Governors' Highway Safety Representatives that each of these guidelines was to be specifically made a part of the act.

The Secretary of Transportation is directed to evaluate each State's safety program and may "approve the program in whole or in part." The Secretary cannot disapprove a State program merely because it does not meet a specific guideline but only if the program clearly fails to provide adequate highway safety protection.

The guideline approach does not place a State in a straitjacket where it must emphasize a long set of standards whether these standards meet the primary safety needs of that particular State or not. The States, by being required to identify their own priority highway safety needs, will provide the context for an evaluation of their own safety programs.

The committee's actions in regard to the modification of certain mandatory safety standards into highway safety guidelines is, as Howard Dugoff, Deputy Administrator of NHTSA, pointed out in our hearings, merely the completion of a long-term trend by the Congress. Mr. Dugoff stated:

> In our view, S. 2541's treatment of the standards continues a process that has been underway for some time. The Highway Safety Act of 1976 began the move away from the requirement of the strict compliance with the uniform standards by reducing the sanctions which could be imposed for noncompliance with the standards and by making it clear that the Secretary did not have to insist on compliance with every element of every standard. S. 2541 carries the process a step further—an appropriate step further.

The committee believes that providing the States added flexibility in the highway safety area will lead to a more innovative and invigorated program. The States deserve the opportunity to develop their own programs to meet their own special needs, and the fiction that all expertise in the highway safety area resides in Washington, if it ever had currency, should be dispelled once and for all.

To carry out the purposes of the Highway Safety Act of 1978, the committee has provided for a slight increase in the level of authorizations for the various highway safety programs.

Furthermore, the authorizations have been designed to permit a concentration of effort on innovative and high-priority safety programs to be developed and carried out by the States. S. 2541 provides $175 million for fiscal year 1979, $175 million for fiscal year 1980, $200 million for fiscal year 1981, and $200 million for fiscal year 1982 to carry out the purposes of section 402 of the act relating to the authorization of funding of State highway safety programs.

The Secretary of Transportation is provided discretionary authority to provide up to 25 percent of the funding appropriated for the section 402 State highway safety programs to assist the States in carrying out the so-called high-priority highway safety projects.

Although there is no limitation placed on the States in developing other high-priority programs, the Highway Safety Act specifically lists State programs to encourage automobile safety belt use and to expand the enforcement of the national maximum speed limit as high-priority safety programs.

S. 2541 also authorizes the Secretary of Transportation to facilitate highway safety research and development through the National Highway Traffic Safety Administration and the Federal Highway Administration. Continuing research and development in the highway safety area is critical if we are to improve our ability to avoid unnecessary deaths and injuries on our highways.

Also, S. 2541 provides a new program to encourage innovative highway safety programs within the States. This program replaced the incentives grant program that had been previously instituted by the Highway Safety Act. The American Association of Motor Vehicle Administrators strongly supported this new approach stating:

> Incentive grants were one of the methods proposed in the Highway Safety Act in 1973 as a positive means of offsetting the negative concepts inherent in funding sanctions. However, states have found that decreases in traffic fatalities and mileage death rates are not necessarily appropriate measures of a States overall commitment to highway safety. The incentive program has beeen controversial from the outset and has evolved into a virtual lottery for the funding that has been appropriated. Therefore, our Association supports the concept of authorizing the Secretary of Transportation to award grants for innovative approaches to highway safety problems to supplant the incentive programs.

The legislation also provides a program for increased enforcement of the 55 mph national maximum speed limit. It has been shown that the maximum national speed limit not only saves energy, but lives as well. The legislation provides for graduated minimum standards to measure the effectivness of States speed limit programs. The Secretary of Transportation is directed to reduce the States apportionment of its noninterstate highway construction funds in the amount of up to 5 percent in fiscal year 1981 through 1983 and up to 10 percent in fiscal year 1984 and all succeeding fiscal years, in the event that a State does not meet the minimum compliance goals of the 55 mph speed limit.

To assist the States in meeting these minimum standards. The compliance standards have been delayed for a year and the final compliance level has been lowered from 85 percent, as originally provided to a 75 percent compliance level beginning in 1982. Furthermore, the Secretary of Transportation is directed to promptly apportion to a State any funds which have been withheld due to failure to meet the percentage requirements if subsequently the Secretary determines that the percentage of motor vehicles in such State exceeding 55 miles per hour has dropped to the level specified for the fiscal year for which the funds were withheld.

The 55 mph maximum national speed limit has imposed a new and significantly increased enforcement responsibility on the State agencies charged with assuring compliance. Therefore, the committee has provided a funding mechanism to assist the States in carrying out this important program. The Department of Transportation has reported that their studies demonstrate that to an ever increasing degree motorists are ignoring the 55 mph maximum speed

limit. If the Federal Government does not provide assistance to the States in order to enforce these provisions, it is likely that the life saving and energy saving protections of the speed limit will be seriously diminished.

The International Association of Chiefs of Police have strongly argued that the States will need assistance from the Federal Government if they are to be able to meet these requirements. Mr. Richard L. Burke, the general chairman of the International Association of Chiefs of Police, has stated:

The national maximum speed limit program will fail if the required Federal assistance is not forthcoming." Thus, State police organizations strongly support authorizations of funding to assist the States in carrying out their 55 mph maximum speed limit enforcement programs as provided in our legislation. Joe Howell, Vice President for Government Relations of the All State Insurance Company, has also written in support of this need for funding stating, "Without adequate Federal assistance to the States, it is unlikely that this program can accomplish the needed results.

There is no question in regard to the safety impact of the 55 miles per hour maximum speed limit. Vincent L. Tofany, President of the National Safety Council testified at our hearings that:

The National Safety Council was one of the most ardent proponents of the 55 mph speed limit when it was initially proposed. Council studies in 1974 and 1975 after the speed limit became national—demonstrate conclusively that speed reduction accounted for more than half of the fatality reductions.

But if the 55 miles per hour program is allowed to become a mockery, which is ignored by the vast majority of motorists, then its salutary effects will be completely destroyed. These provisions will assist in assuring its adequate enforcement.

Mr. President, I believe that S. 2541 provides the basis for a well balanced and strengthened highway safety program. I strongly urge my colleagues to lend it their support.

Mr. President, I now yield to the Senator from New Mexico, minority manager on this subject.

Mr. SCHMITT. Mr. President, I want to congratulate the Committee on Commerce and its distinguished chairman (Mr. CANNON) for their action on this measure. There is no question, as the distinguished Senator from Nevada has said, that the Federal Government and the States must work together and share the responsibility to the people of their States to seek ways to make our highways more safe. Thousands die on the highways each year, and many, many more are injured. It has always troubled this Senator to see the care with which we treat, for example, our activities in space in order to prevent the loss of even one life and yet continue to allow, as the Senator has indicated, in 1977, 49,200 persons killed and 1,900,000 injured on our highways.

Mr. President I feel, as I am sure all Americans feel, that this toll of death and injury on our highways is totally unacceptable.

I believe that if the people of this country, the States, and the Congress work together, there is no question that we can make great progress in reducing these far too great numbers.

In 1966, Congress enacted the Highway Safety Act. This act directed the Secretary of Transportation to issue standards for State highway safety programs. The amount of Federal funding a State received under this program depended upon its compliance with the standards issued by the Secretary. As a result, the States have developed a framework for their highway safety programs which has helped to reduce highway fatalities and injuries.

States are now seeking more flexibility for their highway safety programs. The National Highway Traffic Safety Administration has been most responsive to the recommendations that the Highway Safety Act be amended to allow for such flexibility. The Senate Committee on Commerce, Science, and Transportation has worked with the National Highway Traffic Safety Administration to develop a bill which has the support of the National Safety Council, the Highway Users Federation, Citizens for Highway Safety, the American Driver and Traffic Safety Education Association, and many State transportation departments.

S. 2541, the Highway Safety Act of 1978, will strengthen State highway programs by encouraging States to identify and pursue programs which are most suitable for their needs.

The bill requires each State to have a highway safety program to reduce traffic deaths and injuries. However, the areas in which uniformity through compliance with Federal standards is required is restricted to those areas for which State-by-State uniformity is essential.

Mr. President, I cannot emphasize that particular aspect of this bill too much.

Apportionment of Federal funds under S. 2541 is the same except for two important differences. One difference is that the Secretary is not allowed to withhold funds for a State highway program if he approves the program in whole or in part. The prior act allowed the Secretary to reduce a State's apportionment if the State did not have an approved program or was not implementing the approved program.

Another difference is that S. 2541 allows the Secretary to apportion up to 25 percent of the funds appropriated to the States for carrying out high priority safety programs.

S. 2541 requires that States apportion funds to its political subdivisions and that they assist their political subdivisions in the effective use of funds.

The bill provides authorization for appropriations for highway safety research and development. It also authorizes appropriations allowing the Secretary to make grants to those States which develop the most innovative approaches to highway safety problems.

S. 2541 is a progressive step in highway safety and reflects the Federal Government's responsiveness to the individuality of the States. I urge the Senate to approve this measure.

Mr. President, I want to thank Senator FORD, who is chairman of the Consumer Subcommittee which held hearings on this bill, and Senator RIEGLE, who, in particular, was active in hearings on this bill, for their efforts.

I thank the Senator from Nevada for yielding.

AMENDMENT 1703

(Purpose: To delete section 3 of the bill relating to the 55 m.p.h. speed limit. To clarify that appropriations for grants relating to innovative highway safety problem resolution are from the Highway Trust Fund)

Mr. CANNON. Mr. President, I send to the desk two technical amendments and ask that they be stated and treated en bloc.

The PRESIDING OFFICER. The amendment will be read.

The legislative clerk read as follows:

The Senator from Nevada (Mr. CANNON) proposes an unprinted amendment numbered 1703

Strike all from page 17, line 17, through page 20, line 11, and on page 20, line 12, strike "4" and insert "202".

On page 12, line 24, insert immediately after "subsection," the following "out of the Highway Trust Fund".

Mr. CANNON. Mr. President, the first technical amendment would effectuate the colloquy which Senator RANDOLPH and I held earlier regarding the deletion of the provisions from the second title (relating to highway safety) of the 55-mile-per-hour national maximum speed limit enforcement standards. This deletion is requested by the committee due to the fact that an identical provision is already contained in title I. This deletion will, therefore, avoid duplication.

The second technical amendment to the Highway Safety Act is offered in order to clarify that authorizations for appropriations from the Highway Safety Act for grants to States for innovative safety programs in section 410(e)(2) of the act would be derived from the highway trust fund. This amendment would conform these provisions to the rest of the act.

The PRESIDING OFFICER. Is all time yielded back?

Mr. CANNON. I yield all time back on the amendments.

Mr. SCHMITT. Mr. President, I yield back the time of the Senator from New Mexico.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CANNON. Mr. President, I am prepared to yield all time back on title II.

Mr. SCHMITT. Mr. President, I yield back my time, also.

The PRESIDING OFFICER. Are there further amendments to title II? There being no further amendments, the bill is automatically set aside.

● Mr. HATHAWAY. Mr. President, I very much appreciate the work of the Committee on Environment and Public Works with regard to the authorization measure for Federal-aid highway programs through fiscal year 1980, the Senate report of which is now pending.

I particularly appreciate the efforts of the committee with respect to section 139 which authorizes a discretionary bridge fund from which the Secretary may pro-

vide assistance for costly, high traffic volume bridges over major waterways.

As the committee acknowledged in its report language, a prime example of the need for this discretionary fund is the drawbridge across the Fore River between Portland and South Portland, Maine. The present bridge has four traffic lanes and provides the major transportation link between Portland, Maine's largest city, and the cities and towns to the south and southwest.

The Fore River under the bridge is an important commercial waterway. Tankers carrying the vast majority of petroleum products for the State pass through the navigation opening in the bridge for offloading at receiving docks upriver and subsequent distribution throughout the State. The navigation opening in the bridge consists of two bascule leaves which are raised to create a maximum horizontal opening of 98 feet. This clearance restricts the size of the vessels which can navigate the upper portion of the Fore River. The heavy traffic through the narrow passage in the bridge has resulted in many collisions with damages to the bridge structure and to ships. Each collision brings problems and causes prolonged delays for vehicular traffic across the bridge, including ambulances and emergency equipment.

The threat of oil spills and the potential for permanent closing of the bridge and blockage of the channel providing almost all of the petroleum products consumed in Maine are of great concern. Collision with the bridge or malfunctions in the drawbridge have already caused extensive traffic congestion. Each time the bridge is closed for repairs approximately 30,000 vehicles daily are detoured.

The Portland bridge was included on the inventory of structurally deficient and functionally obsolete bridges prepared by the U.S. Department of Transportation. Officials in the Maine Department of Transportation, and the communities of Portland and South Portland have recognized the need for a new high-level bridge which can accommodate the increased volume of both vehicular and ship traffic. The lack of funding for the project has been the major concern of those faced with replacing the bridge. Present estimates for replacement costs have been as high as $70 million.

I am hopeful that the discretionary fund established under section 139 will enable the communities of Portland and South Portland to address a problem which otherwise might be beyond their financial capability.●

BIKEWAY PROGRAM

● Mr. PACKWOOD. Mr. President, today the Senate will enact new legislation to correct two longstanding defects in U.S. transportation policy. Not only have we not encouraged bicycle use as an alternative to energy guzzling cars, we have not developed, to any significant extent, the means for bicycle safety.

Countless cycling deaths and injuries are caused each year, because of this country's past failure to plan ahead for safe bicycle use. Only today the Washington Post reported two additional fatalities caused by car/bicycle collisions.

The bicycle program, section 134 of S. 3073, of the Federal Aid Highway Act of 1978 is a significant advance in U.S. transportation alternatives. It creates for the first time in our history a commitment to expanded use of bicycles and bike safety.

In brief, the Secretary of Transportation would accept applications from State and local governments for deserving projects to advance bicycle use. Seventy percent of approved projects would be funded by the Federal Government and 30 percent would come from the applicant. The $20 million authorized under this plan would be available only for bikeway projects, not highways or other transportation.

Several people deserve our gratitude for this provision. First, the members of the Senate Environment and Public Works Committee who unanimously accepted the concepts of my original bill, S. 1495. Second, I would like to thank the 23 cosponsors of that bill who have continually helped me gain support for the plan. They are Senators ABOUREZK, BELLMON, CASE, CHAFEE, DOMENICI, DURKIN, GRAVEL, HART, MARK HATFIELD, HATHAWAY, JAVITS, JOHNSTON, LEAHY, MCGOVERN, MOYNIHAN, PELL, RIBICOFF, SARBANES, SPARKMAN, STAFFORD, STEVENS, STONE, and THURMOND.

More importantly, I should thank the many cycling enthusiasts of Oregon to whom I dedicate this new measure. The State has spent 1 percent of its highway budget on bikeways for several years now and with this Federal legislation the benefits of that expenditure could be tripled.

I ask that the bicycle program, section 134 of S. 3073, be printed at this point.

The material follows:

BICYCLE PROGRAM

SEC. 134. (a) Not more than one year after the date of enactment of this Act, the Secretary shall publish guidelines for the submission of applications for grants under subsection (b) of this section. Such guidelines shall include, but are not limited to, information on—

(1) improvements to elements of existing transportation systems such as roads and shoulders, traffic control devices, and transit vehicles, which improvements enhance the safety of bicycling and enourage the use of bicycles as a means of transportation; and

(2) design criteria for bikeways, including criteria for pavements, adequate widths, sight distances, lighting and maintenance, and appropriate design speeds and grades.

(b) The Secretary is authorized to make grants to States and to political subdivisions thereof for projects and programs which (1) are consistent with guidelines published pursuant to subsection (a), or (2) prior to publication of such guidelines, reflect current state of the art design or educational standards, and which can reasonably be expected to enhance the safety and use of bicycles.

(c) The Federal share of any project or program for which a grant is made under subsection (b) shall not exceed 70 per centum.

(d) Grants made under this section shall be in addition to any sums available for bicycle projects under section 217 of title 23, United States Code.

(e) There is authorized to be appropriated to the Secretary to carry out subsection (b), for each of the fiscal years ending September 30, 1979, and September 30, 1980, $20,000,000 out of the Highway Trust Fund, to remain available until expended.

(f) Section 109(f) of title 23 United States Code, is amended by adding after the words "median strips", the following: "accommodation of bicycle and pedestrian traffic,".

(g) Section 109 of title 23, United States Code, is amended by adding a new subsection as follows:

"(l) The Secretary shall not approve any project which reduces bicycle or pedestrian access to or use of routes for travel from one place to another to any greater extent than access to motorized vehicles is reduced unless the project includes or unless there already exists a safe, direct, and convenient alternative route for bicyclists and pedestrians.".

(h) Section 217 (a) of title 23, United States Code, is amended to read as follows:

"(a) To encourage energy conservation and the multiple use of highway rights-of-way, including the development, improvement, and use of bicycle transportation and the development and improvement of pedestrian walkways on or in conjunction with highway rights-of-way, the States may, as Federal-aid highway projects or in conjunction or connection with other Federal-aid highway projects, construct new or improved lanes, paths, or shoulders; traffic control devices; shelters; and parking facilities to serve bicycles and persons using bicycles, and pedestrian walkways. Sums apportioned in accordance with paragraphs (1), (2), and (6) of section 104 (b) of this title shall be available for bicycle projects and pedestrian walkways authorized under this section and such projects shall be located and designed pursuant to an overall plan which will provide due consideration for safety and contiguous routes.".

(i) Section 217(d) of title 23, United States Code, is amended to read as follows:

"(d) The Secretary shall establish by regulation, design and construction standards for bicycle projects authorized under this section including criteria for pavements, adequate widths, sight distances, lighting, appropriate design speeds and grades, and provisions for adequate maintenance to be set forth in the project agreement entered into pursuant to section 110 of this title. No motorized vehicles shall be permitted on trails and walkways authorized under this section except for maintenance purposes and, when snow conditions and State or local regulations permit, snowmobiles.".●

THE ESSENTIAL GAP PROGRAM OF THE FEDERAL HIGHWAY ADMINISTRATION (FHWA) AND S. 3073

● Mr. INOUYE. Mr. President, my distinguished colleagues, I would like to bring an issue of great importance to my State, the 50th State of the United States, Hawaii, to the attention of the chairman of the Transportation Subcommittee of the Environment and Public Works Committee, Mr. LLOYD BENTSEN of Texas.

The executive branch of Hawaii's State government recently completed a review of Federal laws and regulations, in response to my request and that of Governor Ariyoshi, which may be discriminatory toward Hawaii.

One of the programs targeted, as a result of this study, is the interstate gap program of the Federal Highway Administration (FHWA), under the Federal-aid Highways Act of 1976.

Although this matter is thoroughly discussed in a memorandum from the State director of transportation, Dr. Ryokichi Higashionna, to the State director of the department of budget and finance, Ms. Eileen Anderson, I would like to highlight a few pertinent items from this document and I ask that the document,

itself, be made a part of the RECORD at the appropriate place.

Section 102(b) of the Federal-aid Highway Act of 1976 requires that at least 30 percent of the interstate apportionments made to each State for each of the fiscal years ending September 30, 1978 and 1979, be expended for the construction of intercity portions. These portions are intended to close what are termed, "essential gaps." The objective of this provision is to expedite the construction of gaps on a basic system of interconnected interstate routes to accommodate long-distance interstate travel in order to provide a continuous system.

The report to the Congress, dated October 1976, on the interstate gap study prepared by the Federal Highway Administration (FHWA), indicated that Hawaii does not have essential segments on its interstate system. The report determined this on the basis that—

All interstate routes in Hawaii were excluded from consideration in this report, since they are not connected to the continental portion of the Interstate System.

I believe that this action on the part of the Federal Highway Administration is blatantly unfair. I do not agree with this criteria as I believe, along with Hawaii's officials, that insularity alone should not automatically preclude Hawaii from qualifying for essential segments.

Mr. BENTSEN. Mr. INOUYE, it is my understanding that this matter could then be resolved administratively by the Federal Highway Administration. That is, FHWA officials could simply make a determination in-house that Hawaii could qualify for funding under the essential gap program. Is that not correct?

Mr. INOUYE. Mr. BENTSEN, it is my understanding that responsible officials in the State of Hawaii have appealed to the FHWA to add the uncompleted portions of H–1 and H–3 to the subject gap program and that their appeals have been rejected by the FHWA.

Their principal reason for the rejection is that the gap program is to complete interstate rather than intrastate gaps.

FHWA has stated that it will hold its position on rejection based on their initial interpretation of section 102(b) of the Federal-aid Highway Act of 1976. They have suggested, in fact, that any further appeal would best be made through Hawaii's congressional delegation.

Mr. BENTSEN. Mr. INOUYE, for the record, if Hawaii were a contiguous State, do you believe that it would qualify for funding under the essential gap program?

Mr. INOUYE. Yes, I believe that it would for several reasons.

In regard to the unconstructed portions of Interstate Routes H–1 and H–3 the reasons are as follows:

A. H–1: Pearl Harbor Interchange to Kahauiki Interchange (Middle Street).

One. This is the last remaining link on H–1 to be implemented. Portions of it are under construction now, and others will be ready for construction soon.

As indicated in the "Report to Congress" of October 1976, page 1, last paragraph, titled "Route Selection and Criteria," some of the principal criteria are:

A. Connecting routes to major transportation terminals such as International seaports, airports . . .

B. In urban areas portions already open to traffic or portions with the highest probability of early completion or the least unconstructed mileages . . .

I believe that this section of H–1 more than meets these two criteria. In addition, there are other pertinent reasons:

Second. The completion of this final "link" will also relieve the heavily congested traffic that currently exists on Moanalua Road. Moanalua Road, is the only other major facility that parallels H–1, which interconnects Leeward and central Oahu with Metropolitan Honolulu.

Third. With the center of population being shifted toward central Oahu (which is consistent with the city's growth policy), closing of this essential gap will provide the needed service to the motorists between leeward and central Oahu, and urban Honolulu.

Fourth. This "link" has the potential of providing multimodal service. In the high occupancy vehicle (HOV) context and specifically in terms of the pending action to dedicate exclusive HOV lanes from Kunia Interchange all the way to the vicinity to Aiea, the essentiality of this link cannot be overstated. This would be particularly relevant should the fixed guideways system not materialize for whatever reasons.

B. H–3 TRANS-KOOLUA SECTION

First. This is the portion that was delayed for many years. The final environmental impact statement (EIS) is now being finalized, and the State will be ready for preparation of construction plans immediately after approval of the EIS.

With Hawaii (specifically Oahu) being the defense center of the Pacific, the completion of H–3 will be vital in that it will provide the most direct connection with the major military installations of Schofield Barracks, Hickham Air Force Base, Pearl Harbor Naval Shipyard, and the Kaneohe Marine Corps Air Station, as well as with the CINCPAC Headquarters in Camp Smith.

Second. Completion of H–3 will relieve the present congestion on Pali and Likelike Highways.

Third. H–3 will provide the mass transit capability. Pali and Likelike Highways lack the flexibility for such a transportation mode.

Fourth. Windward Oahu will continue to develop, because the Oahu general plan permits further development.

Fifth. H–3 will provide the needed intercity connectivity between the two major population centers—Metropolitan Honolulu and Kailua-Kaneohe.

Based on the above reasons, I feel that the exclusion of Hawaii from the essential gap program may not be fair from the standpoint of application of the FHWA's own criteria, as well as the potential of delaying needed transportation services to our citizens.

In addition, the situation, from the standpoint of the State government, may be much more critical if the final 1978 highway-transit legislation continues to contain the stipulation that 50 percent of the interstate apportionment will be based on cost to complete essential gaps.

Mr. BENTSEN. Well, I can see your point about H–1 and I think that the Federal Highway Administration should make an about-face on its determination, because it appears that it does discriminate against Hawaii solely on the basis of its uniqueness as an island State and a noncontiguous State. In addition, it is my understanding that FHWA officials have approved as essential gaps every other route connecting cities with major airports.

With regard to your points about H–3 and the justification for its consideration as an essential gaps based on, I believe, national security reasons, we will have to have the FHWA look into the matter further.

I thank the Senator for bringing these matters to my attention.●

● Mr. HOLLINGS. Mr. President, in matters of fundamental justice and human rights involving the citizens of our Nation, there should be no left or right, liberal or conservative. But today, under the Constitution and laws of the United States there exists an injustice, a denial of democracy so blatant that it can no longer be ignored. Over 700,000 Americans living in the District of Columbia have no voice in the decisions of the U.S. Senate and House of Representatives.

This should not be a Democratic issue or a Republican issue. It should be an American issue. At least 115 nations of the world have elected national legislatures. Virtually without exception, they do not discriminate against residents of their capital cities with respect to representation in the national legislature. Of 17 nations with Federal systems of government, only 3 have capital cities unrepresented in the legislature and one of these, Nigeria, is currently formulating plans to provide representation. That leaves only Brazil and the United States in the position of denying their citizens a basic tenet of liberty.

This very sad commentary on the political rights of Americans in the Nation's Capital needs to be corrected without delay.

The goal I favor is full voter representation in Congress for the District of Columbia—two Senators and two Representatives based on the area's current population. The proposal has been endorsed by both parties and national polls show strong support for this action across the country. A look at the alternative brings home the necessity of passage of this bill.

Enfranchisement of the District was not an issue our Founding Fathers had to face. They could hardly foresee that the sparsely settled marshy area along the Potomac River selected in 1800 for our National Capital would one day be home to over 700,000 people. In the late 1700's, there were only a few thousand residents, who came to Washington on short-term basis while keeping their voting rights in their native States.

But today, the District of Columbia pays more Federal taxes than 19 of our States and more per capita than the residents of 47 States. District citizens have fought and died in all the Nation's wars. They have endured both taxation and conscription without representation.

Yet, what do the opponents of this amendment offer the District residents in lieu of full voting representation? They want to carve up the area and "return" the non-Federal land to Maryland. But the District has not been a part of Maryland since 1800. Its people do not identify with Maryland. They want and deserve representation in their own right, not as an artificial combination in a State with which they have no historical attachment.

Thanks to the dedicated efforts of bipartisan supporters in the House of Representatives, the U.S. Senate has an opportunity to renew our commitment to the fundamentals upon which our Nation was founded. Two hundred years ago, Edmund Burke warned Parliament that:

> Taxation without representation is injustice and oppression. It brought on the American Revolution and gave birth to a free and mighty nation.

Perhaps we need to pause and reflect on these words of wisdom as we have a chance to once again end injustice and oppression in the capital of freedom.●

HIGHWAY BRIDGE REPLACEMENT

● Mr. CULVER. Mr. President, I would like to ask Mr. RANDOLPH, the distinguished chairman of the Committee on Environment and Public Works and author of the special bridge replacement program to clarify for the record the legislative intent concerning the use of funds under this program to replace structures that accommodate both vehicular and railroad traffic.

The No. 2 priority for replacement in the State of Iowa under the special bridge replacement program is the bridge at Keokuk. The Federal Highway Administration considers this bridge—which is only 17 feet, 10 inches wide—to be functionally obsolescent for vehicular traffic. The Iowa Department of Transportation (IDOT) is in the final stages of selecting a consultant for preliminary planning of a new bridge and will soon undertake the necessary environmental impact statement study. IDOT's timetable calls for construction of a new bridge to begin in 1981.

IDOT has entered into an agreement with the city of Keokuk to allow continued use of the present bridge as a railroad crossing. This is possible since the bridge, although obsolete for motor vehicle traffic, is capable of accommodating railroad traffic in an effective and orderly fashion.

There has been concern that special bridge replacement funds might not be used to construct a new replacement bridge if the existing one is to remain in use. The special bridge replacement program was instituted to enable States to replace their worst structurally deficient or obsolete bridges. the Federal Highway Administration program manual, Transmittal 50, August 7, 1974, states:

> Whenever a deficient bridge is replaced by a new bridge under the special bridge replacement program the deficient bridge will be closed to vehicular traffic at the earliest possible date following the opening of the replacement bridge.

These guidelines clearly indicate that only vehicular traffic must be phased out on the existing bridge. Nothing in these guidelines, or the legislative history of the special bridge replacement program, suggests that an existing bridge must be closed to nonvehicular traffic such as railroads.

The continued ability of the Keokuk bridge to safely and efficiently accommodate railroad traffic is unquestioned. The Senate's consideration of the Federal-aid highway legislation provides a good opportunity to reaffirm that a new bridge can be constructed with special bridge replacement program funds while the existing structure can remain open to railroad traffic.

I would appreciate the thoughts of the distinguished chairman of the Committee on Environment and Public Works on this subject.

Mr. RANDOLPH. Mr. President, I say to the distinguished Senator from Iowa (Mr. CULVER) that he raises an important question. Under the special bridge program, we have not addressed the issue of joint use bridges. It is not the intent under this program to force the closing of a bridge which could be used for a nonhighway transportation mode.

The Keokuk bridge certainly should not be closed when it can be used for rail transportation across the Mississippi River.●

ORDER OF PROCEDURE

Mr. ROBERT C. BYRD. Mr. President, there will be no more rollcall votes today. There will be rollcall votes beginning early tomorrow on the District of Columbia representation amendment, however.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business, and that Senators may speak during routine morning business for up to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

REPORT ON INTERNATIONAL TRANSFERS OF TECHNOLOGY—MESSAGE FROM THE PRESIDENT—PM 212

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred to the Committee on Foreign Relations:

To the Congress of the United States:

I transmit herewith the report on international transfers of technology required by section 24(c) of Public Law 95–92, the International Security Assistance Act of 1977.

JIMMY CARTER.

THE WHITE HOUSE, *August 21, 1978.*

COMMUNICATIONS

The PRESIDING OFFICER laid before the Senate the following communications, together with accompanying reports, documents, and papers, which were referred as indicated:

EC–4211. A communication from the Acting Director, Defense Security Assistance Agency, reporting, pursuant to law, on the Navy's proposed Letter of Offer to Iran for Defense Articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–4212. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), reporting pursuant to law, on five construction projects to be undertaken by the Air National Guard; to the Committee on Armed Services.:

EC–4213. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), reporting, pursuant to law, on a construction project to be undertaken by the Naval and Marine Corps Reserve; to the Committee on Armed Services.

EC–4214. A communication from the Acting Secretary of the Navy, transmitting a draft of proposed legislation permitting ten persons, citizens and subjects of the Kingdom of Saudi Arabia to receive instruction at the United States Naval Academy, and for other purposes; to the Committee on Armed Services.

EC–4215. A communication from the Acting Secretary of the Navy, transmitting a draft of proposed legislation to amend title 10, United States Code, to remove the statutory restriction on the strength and distribution in grade of officers designated for limited duty on the active lists of the Navy and the Marine Corps; to the Committee on Armed Services.

EC–4216. A communication from the Secretary of Transportation, transmitting, pursuant to law, a report entitled "Highway Needs to Solve Energy Problems"; to the Committee on Environment and Public Works.

EC–4217. A communication from the Secretary of Agriculture, reporting, pursuant to law, on review of primitive areas in the National Forest System and appropriate areas for redesignation to Class I where air quality related values are important attributes of the area; to the Committee on Environment and Public Works.

EC–4218. A communication from the chairman, Agricultural Technical Advisory Committee for Trade Negotiations on Dairy, transmitting, pursuant to law, the committee's report on the Agreement on Trade Matters Between the United States and the United Mexican States, signed in Washington, D.C., on December 2, 1977; to the Committee on Finance.

EC–4219. A communication from the Assistant Secretary (Legislative Affairs), Department of State, transmitting, pursuant to law, project performance audit reports prepared by the International Bank for Reconstruction and Development (IBRD), the Group of Controllers' evaluation reports by the Inter-American Development Bank (IDB), and post-evaluation reports by the Asian Development Bank (ADB); to the Committee on Foreign Relations.

EC–4220. A communication from the Assistant Administrator for Legislative Affairs, Agency for International Development, Department of State, transmitting, pursuant to

law, notification of an increase in the funding level of the proposed 1978 Caribbean Regional program; to the Committee on Foreign Relations.

EC–4221. A communication from the Assistant Administrator for Legislative Affairs, Agency for International Development, Department of State, transmitting, pursuant to law, notification of an increase in the funding level of the proposed fiscal year 1978 program in Guyana; to the Committee on Foreign Relations.

EC–4222. A communication from the Acting Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting, pursuant to law, international agreements other than treaties entered into by the United States within 60 days after the execution thereof; to the Committee on Foreign Relations.

EC–4223. A communication from the Deputy Assistant Secretary, Policy, Budget, and Administration, Department of the Interior, reporting, pursuant to law, modification to a system of records for personnel research records, Interior OS–98, published April 14, 1978; to the Committee on Governmental Affairs.

EC–4224. A communication from the Assistant Secretary for Administration, Department of Housing and Urban Development, transmitting, pursuant to law, a report on a Privacy Act System of Records; to the Committee on Governmental Affairs.

EC–4225. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Import Duties and Taxes: Improved Collection, Accounting, and Cash Management Needed," August 21, 1978; to the Committee on Governmental Affairs.

EC–4226. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "U.S. Economic Assistance for Israel," August 18, 1978; to the Committee on Governmental Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. LONG, from the Committee on Finance, with an amendment and an amendment to the title:

H.R. 1337. An act to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera (Rept. No. 95–1127).

By Mr. CANNON, from the Committee on Commerce, Science, and Transportation, without amendment:

H.R. 13235. An act for the relief of James Thomas Lantz, Jr., David D. Bulkley, and Arthur J. Abshire (Rept. No. 95–1128).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ROBERT C. BYRD (for Mr. EASTLAND), from the Committee on the Judiciary:

William E. Pitt, of Utah, to be U.S. marshal for the district of Utah.

(The above nomination from the Committee on the Judiciary was reported with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first time and, by unanimous consent, the second time, and referred as indicated:

By Mr. RIEGLE:

S. 3438. A bill for the relief of Sonia Maria Alvarado Marin and Maria Virginia Alvarado Marin; to the Committee on the Judiciary.

By Mr. CHAFEE:

S. 3439. A bill to amend the Controlled Substances Import and Export Act to exercise more fully the jurisdiction of the United States; to the Committee on the Judiciary.

By Mr. LAXALT:

S. 3440. A bill to transfer the administration of Ruby Lake National Wildlife Refuge, Nevada, in the State of Nevada; to the Committee on Energy and Natural Resources.

By Mr. ZORINSKY (for himself, Mr. ANDERSON, Mr. ABOUREZK, and Mr. MELCHER):

S.J. Res. 155. A joint resolution to increase the price support for milk, wheat, corn, soybeans, and cotton to not less than 90 per centum of the respective parity prices therefor, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. CHAFEE:

S. 3439. A bill to amend the Controlled Substances Import and Export Act to exercise more fully the jurisdiction of the United States; to the Committee on the Judiciary.

CONTROLLED SUBSTANCES IMPORT-EXPORT ACT AMENDMENTS OF 1978

● Mr. CHAFEE. Mr. President, I was astounded to discover that loopholes in U.S. drug laws have prevented U.S. authorities from prosecuting nearly all drug smugglers apprehended beyond the territorial waters of the United States. This has opened the door to the safest and most lucrative smuggling techniques now used by international drug runners.

One of the primary reasons we find ourselves in this situation is that Congress left gaps in the law when it passed the Controlled Substances Import and Export Act in 1970 (Public Law 91–513).

Under that law, the United States has authority over any individual apprehended within the U.S. territorial waters which extend 3 miles off our coast. We also have criminal jurisdiction over American citizens or anyone aboard an American-owned vessel on the high seas if it can be proved that there was intent to smuggle contraband into the United States. But because intent is difficult to prove in a court of law, there are few successful prosecutions in such cases.

We do not, however, have jurisdiction over U.S. citizens or foreign nationals who simply possess drugs in international waters. While the law permits seizure of contraband and seizure of vessels transporting it, there are virtually no prosecutions of individuals apprehended for smuggling on the high seas.

Mr. President, today I am introducing S. 3439, the Controlled Substance Import and Export Act Amendments of 1978, a bill which will bring many of these international smugglers under jurisdiction of U.S. criminal law for the first time. No longer will drug runners be able to lurk outside the arbitrary line of a 3- or 12-mile territoral line and operate with inpunity.

I think most Americans would be amazed to know the magnitude of these smuggling operations. There is a well-organized, well-financed multibillion dollar a year industry in the import of illicit drugs. We are not talking any more about kids who drive across the border to Mexico and come back with a few pounds of marihuana and cocaine stuffed under the floorboards of their van.

We are now seeing a new kind of smuggling operation involving full scale, commercial freighters known as "mothership." These vessels range from 100 to 300 feet in length. Their primary cargo, loaded on the coast of Colombia, is commonly 50 to 60 tons of marihuana and smaller, though valuable, quantities of cocaine. The vessels are usually registered in a foreign country, and some of them, while not officially registered, fly the flags of a number of nations. The crews are usually of South American nationality.

Typically, these "motherships" take one of several routes from Colombia, between or around the Carribean Islands, to the United States. They remain carefully outside the 12-mile Customs enforcement zone, and thereby, outside U.S. criminal jurisdiction. At various designated points along the coast, anywhere from Brownsville, Tex., to the tip of Maine, the "motherships" rendezvous with smaller, faster boats which pick up portions of the cargo and run them back to shore. The runner boats are usually owned and operated by U.S. citizens and easily blend in with the thousands of pleasure craft and fishing boats along our coastline.

Obviously, Mr. President, the slim risk of being caught and prosecuted does not deter many individuals from the enormous profits that are made from a successful operation. Despite the fact that U.S. drug enforcement officials have confiscated more than 3.1 million pounds of marihuana during the first three-quarters of fiscal year 1978—twice as much as was seized all last year—there has been no noticeable effect on its price at the retail level. And U.S. officials estimate that they intercept only about 10 percent of the flow.

In testimony presented before a House Subcommittee on July 27, 1978, Stuart Seidel, Assistant Chief Counsel for the U.S. Customs Service, commented on the new style of operation:

> There are several factors accounting for this new trend by the marijuana smuggler—the continuing Mexican eradication program has made the Colombian marijuana more attractive, the use of large vessels enable the smuggler to transport vast quantities of the bulky marijuana relatively cheaply, the extensive Southeastern coastline offers easy, undetected access to the United States, and gaps and inadequacies in our present law make successful prosecutions difficult. Thus, smuggling by vessel has become the new modus operandi of the drug smuggler.

It is interesting to note that as recently as 1976, marihuana seizures along our Mexican border accounted for 60 percent of the total seizures made by Customs in the United States. By 1978, however, that figure dropped to a mere 7 percent, while seizures in the Gulf and Southeastern Atlantic equaled 89 percent of the national total. It is also interesting that, while the actual number of seizures

of heroin, cocaine, and marihuana have decreased in the first three-quarters of fiscal year 1978 from the same time a year ago, the quantities seized have increased dramatically.

No other single incident has illustrated this trend more vividly than the August 6, 1978 seizure of a stateless vessel called the "Heidi". The vessel, 165 feet in length, contained a record 225,469 pounds of marihuana. The crew members, all South Americans, will simply be deported and given a free plane ride back home.

In a coordinated enforcement action called Operation Stopgap earlier this year, the U.S. officials confiscated 900,000 pounds of Colombian marihuana, 33 vessels, 6 aircraft, 18 land vehicles, 3 hydraulic presses and $15,000 in cash in a 45-day period. The brilliant success of Operation Stopgap is only dimmed by the fact that of the 220 persons apprehended, only 4 have been or will be prosecuted—all Americans arrested in U.S. territory. The rest have been deported. Some of these individuals, Mr. President, have been apprehended five times before under similar circumstances. They are sent home and they are back up here on the next boat.

So, what does all this mean? What are we being called upon to do about it?

I do not have any visions about ridding the world of heroin, cocaine, marihuana, and other contraband. But I do think that we in Congress have the responsibility to bring the individuals who manufacture, possess or distribute illegal drugs for import to the United States, both our citizens and foreign nationals, as far within the grasp of U.S. criminal law as possible.

The legislation I have introduced will accomplish a large part of that objective. I am also happy to be a cosponsor of a bill by Senator CULVER which takes other important steps in that direction.

My bill has been carefully worked out over the past 6 weeks with officials of the U.S. Customs Service and with the Senate Legislative Counsel, and I would like to take a moment to outline its provisions.

DEFINITIONS

My bill first adds new definitions to the opening section of the Controlled Substances Import and Export Act. In its current form, the act fails to include the broadest possible definition of a "vessel under the jurisdiction of the United States," and herein lies one of its major weaknesses.

My language would bring under U.S. jurisdiction the following:

First. Any vessel documented under laws of the United States, or owned in whole or in part by a citizen or corporation of the United States;

Second. Any vessel on the high seas registered in a foreign country if that country authorizes the United States to assert jurisdiction;

Third. Any vessel without nationality;

Fourth. Any vessel within U.S. customs waters, which currently extend 12 miles off shore, or within a U.S. customs enforcement area which may be established pursuant to the Anti-Smuggling Act of 1935 (49 Stat. 517);

Fifth. Any vessel which is a hovering vessel, described in the Tariff Act of 1930 as a vessel which is kept off the U.S. coast, either inside or outside customs waters, if it is reasonable to believe that it is being or may be used for smuggling; and

Sixth. Any vessel which flies more than one flag and thereby loses the right to claim any nationality under article 6 of the Convention on the High Seas.

TRANSPORTATION

Section 3 of my bill tightens the Controlled Substances Import and Export Act by adding a prohibition against transporting illegal drugs into or within U.S. customs waters. This accompanies the current provision against importing contraband into U.S. territory.

POSSESSION

Section 4 of my bill is perhaps the key provision. For the first time, it makes possession of illicit drugs on board any vessel, aircraft or vehicle that is subject to jurisdiction of the United States a Federal offense, regardless of where it may be located.

UNLAWFUL TRANSFER

Section 5 makes it unlawful for any person to transfer a controlled substance to any vessel under jurisdiction of the United States or any vessel bound for the United States.

UNLAWFUL IMPORTATION

Section 6 makes it illegal to manufacture, possess or distribute any controlled substance intending or knowing that it will be unlawfully imported into the United States.

PENALTIES

Section 7 simply brings the new factors introduced by my bill—the transportation, the transfer from one vessel to another, and the possession of controlled substances—under the penalties of the existing law. In the case of narcotic substances, it calls for the person committing a violation to be imprisoned up to 15 years, or fined $25,000, or both.

Mr. President, I believe my bill presents the most complete set of amendments to the Controlled Substances Import and Export Act yet devised for the purpose of closing loopholes in the law which inhibit the prosecution of professional, large-scale drug smugglers. I strongly urge the Senate to adopt my proposal along with others which are being developed for a coordinated approach to the growing problem of international drug trafficking.

I ask unanimous consent that the text of my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 3439

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Controlled Substances Import and Export Act Amendments of 1978".

DEFINITIONS

SEC. 2. Section 1001(a) of the Controlled Substances Import and Export Act is amended by adding at the end thereof the following:

"(3) The term 'high seas' includes all parts of the sea included in such term by Article 1 of the Convention on the High Seas, done on April 29, 1958.

"(4) The term 'vessel of the United States' means—

"(A) any vessel documented under the laws of the United States, or numbered as provided by the Federal Boat Safety Act of 1971;

"(B) any vessel owned in whole or in part by the United States, by any citizen of the United States, or by any corporation created by or under the laws of the United States, or by or under the laws of any State, territory, district, commonwealth, or possession thereof; or

"(C) any vessel of United States nationality within the meaning of Article 5 of the Convention on the High Seas, done on April 29, 1958.

"(5) The term 'vessel subject to the jurisdiction of the United States' includes—

"(A) any vessel without nationality;

"(B) any vessel assimilated to a vessel without nationality in accordance with the provisions of paragraph (2) of Article 6 of the Convention on the High Seas, done on April 29, 1958;

"(C) any vessel within the customs waters, as defined in section 401 of the Tariff Act of 1930, of the United States and any vessel within a customs enforcement area established pursuant to section 1 of the Act entitled 'An Act to protect the revenue of the United States and provide measures for the more effective enforcement of the laws respecting the revenue, to prevent smuggling, to authorize customs-enforcement areas, and for other purposes', approved August 5, 1935 (49 Stat. 517);

"(D) any vessel on the high seas registered in a foreign country if such country authorizes the United States to assert jurisdiction on such vessel for the purposes of enforcing this title;

"(E) any vessel of the United States; or

"(F) any vessel which is a hovering vessel within the meaning of section 401 of the Tariff Act of 1930.".

UNLAWFUL IMPORTATION OR TRANSPORTATION

SEC. 3. Section 1002 of the Controlled Substances Import and Export Act is amended—

(1) by amending the heading to read as follows:

"IMPORTATION OR TRANSPORTATION OF CONTROLLED SUBSTANCES";

(2) in subsection (a), by striking out "It shall be unlawful to import into the customs territory of the United States from any place outside thereof (but within the United States), or to import into the United States from any place outside thereof," and inserting in lieu thereof "It shall be unlawful for any person within or without the United States to import or transport into the customs territory of the United States from any place outside thereof, or for any person within or without the United States to import or transport into the United State from any place outside thereof,";

(3) in subsection (b), by striking out "It shall be unlawful to import into the customs territory of the United States from any place outside thereof (but within the United States), or to import into the United States from any place outside thereof," and inserting in lieu thereof "It shall be unlawful for any person within or without the United States to import or transport into the customs territory of the United States from any place outside thereof, or for any person within or without the United States to import or transport into the United States from any place outside thereof,"; and

(4) by adding at the end thereof the following:

"(d) It shall be unlawful for any person within or without the United States to aid or facilitate the commission of any offense de-

scribed in subsection (a) or (b) of this section.".

POSSESSION ON BOARD VESSELS, AIRCRAFT, OR VEHICLES

SEC. 4. Section 1005 of the Controlled Substances Import and Export Act is amended—

(1) by amending the heading to read as follows:

"POSSESSION ON BOARD VESSELS, AIRCRAFT, OR VEHICLES";

(2) by inserting immediately after "customs territory of the United States," the following: "or on board any vessel or aircraft, or on board any vehicle of a carrier, subject to the jurisdiction of the United States, wherever such vessel, aircraft, or vehicle is located,".

UNLAWFUL TRANSFER

SEC. 5. The Controlled Substances Import and Export Act is amended by inserting after section 1005 the following:

"UNLAWFUL TRANSFER

"SEC. 1005A. It shall be unlawful for any person outside the United States to transfer a controlled substance from any vessel to a vessel bound for the United States and for any person within or without the United States to transfer any such substance from any vessel to a vessel subject to the jurisdiction of the United States.".

MANUFACTURE, DISTRIBUTION, OR POSSESSION FOR PURPOSES OF UNLAWFUL IMPORTATION

SEC. 6. Section 1009 of the Controlled Substances Import and Export Act is amended—

(1) by striking out in the heading "MANUFACTURE OR DISTRIBUTION" and inserting in lieu thereof "MANUFACTURE, DISTRIBUTION, OR POSSESSION";

(2) by inserting in the first sentence immediately after "schedule I or II" a comma and the following: "or to possess a controlled substance in schedule I or II aboard a vessel subject to the jurisdiction of the United States"; and

(3) by striking out in the second sentence "manufacture or distribution" and inserting in lieu thereof "manufacture, distribution, or possession".

PROHIBITED ACTS—PENALITIES

SEC. 7. Section 1010 of the Controlled Substances Import and Export Act is amended—

(1) by striking out "imports or exports" and inserting in lieu thereof "imports, transports, or exports" in paragraph (1);

(2) by striking out "or" at the end of paragraph (2); and

(3) by striking out paragraph (3) and inserting in lieu thereof the following:

"(3) contrary to section 1005A, transfers from one vessel to another a controlled substance, or

"(4) contrary to section 1009, manufactures, distributes, or possesses a controlled substance.".

By Mr. LAXALT:

S. 3440. A bill to transfer the administration of Ruby Lake National Wildlife Refuge, Nevada, to the State of Nevada; to the Committee on Energy and Natural Resources.

● Mr. LAXALT. Mr. President, today, I am introducing legislation which will transfer management authority of the Ruby Lake National Wildlife Refuge, Nevada, from the U.S. Fish and Wildlife Service to the State of Nevada's Fish and Game Department. A recent permanent restraining order issued by the U.S. District Court, District of Columbia, prohibiting the use of powerboats unless they are 10 horsepower or less in the Ruby Lake Wildlife Refuge has compelled me to take this action.

Mr. President, this decision to severely restrict recreational boating activities at the refuge, resulted from the environmental impact assessment on boating at the Ruby Marshes completed by the U.S. Fish and Wildlife Service. The EIA maintained that boating is adversely affecting the nesting canvasback and redhead ducks with conflicts occurring during site selection, initial and renesting attempts, and the brooding period. Since that time, Mr. President, my eastern Nevada constituents as well as myself, have been wrangling constantly over the past several years with the U.S. Fish and Wildlife Service over regulations sharply restricting recreational powerboating on the Ruby Marshes.

At this point, I would like to point out that all Nevadans agree that the wildlife at the Ruby Marshes should be protected, and that the Fish and Wildlife Service, after listening to State and local concerns, had drawn up regulations that would have protected the wildlife and its habitat and still allowed some recreational opportunities for my eastern Nevada constituents. Additionally, my discussions with people who have long experience with the Ruby Marshes, and whose judgment I have always considered to be sound, has led me to the opinion that this proposed action is taken without justification or valid scientific supporting data. Information provided to me about waterfowl populations at the Ruby Marshes reveals that waterfowl production has not been adversely impacted by the recreational usage as claimed.

The Fish and Wildlife Service released figures which prove that there has been no significant interference with waterfowl production. Waterfowl production figures prepared by the then Ruby Marsh Wildlife Refuge manager during January 1976, show that the redhead and canvasback duck production has increased 209 percent over the 10-year period 1964 to 1974. Mr. President, I ask that the Ruby Lake National Wildlife Refuge waterfowl production figures be printed in the RECORD at the end of my statement.

Further, Mr. President, I directed my staff to research this matter. A book was brought to my attention entitled "Ducks, Geese, and Swans of North America". It is a textbook written by Frank C. Belrose, a research associate in the Illinois National History Survey and author of more than 60 articles and papers devoted to waterfowl, makes some pertinent points.

The book, sponsored by the Wildlife Management Institute, maintains there are only about 900 canvasbacks breeding in Nevada, of about 10,000 breeding in the intermountain region. Although the text is no more specific, a chart in the book, which breaks down breeding population areas to locations of 5,000 canvasbacks, areas less than 5,000 are "minor breeding areas". The book shows eastern Nevada with "less than 5,000", thus the Ruby Marshes barely qualifies as a "minor breeding areas."

Concerning redheads, the book says that only "minor breeding populations occur in the Ruby Mountains of eastern Nevada." This indicates fewer than 1,000 birds. Here again, the accompanying charts in the text indicates the Ruby Marshes as only a "minor breeding area."

Further, it was brought to my attention that the duck population figures used by the U.S. Fish and Wildlife Service and others are highly misleading and are a result of airplane flights over the marshes, which the birds were eyeballed by "trained" observers. Consequently, as a result of this research I could not support the conclusions of the U.S. Fish and Wildlife. I feel the Environmental Impact Assessment is biased. It is without adequate factual data upon which a sound decision for a policy change can be based, and it is without solid evidence of any need for such a change.

Mr. President, the restraining order prohibiting the use of powerboats unless they are 10 horsepower or less will practically eliminate boating at the Ruby Marshes. It will eliminate use of the marshes by women, small children, disabled people, and senior citizens who do not want to risk the hazard of small boat usage or the physical strain of rowing.

As I previously mentioned, Mr. President, the Fish and Wildlife Service has persisted in this campaign to restrict recreational boating at the Ruby Marshes for the past several years, and the recent maneuver in the district court is obviously, at least to me, a result of a collusion between the U.S. Fish and Wildlife Service and the defenders of wildlife. Quitely frankly, my eastern Nevada constituents and I did not expect the Fish and Wildlife Services to perform a very admirable job of defending our interests in the Washington court, which has proved to be the case.

Almost every one of my eastern Nevada constituents that I have talked to in regard to this matter is seriously concerned about the recreational loss that will be suffered. They are not only disturbed, but angry about this action which will deny them access to one of the two areas within reasonable travel time providing them with water recreational activities. It is obvious to me that eastern Nevadans want the policies regarding the management of the Ruby Marshes to be in terms of a multiple-use concept. I, as their elected representative, am concerned with their desires, and wish to go on record at this time supporting policies and procedures that will develop a multiple-use concept at the Ruby Marshes.

At this point, I would like to point out that on a national scale the Ruby Marshes are not significant in size. On the local level, however, the Ruby Marshes is extremely significant in view of the lack of sufficient water resources for recreational use in the area. It contains only 37,631 acres, which is insignificant when compared to the total refuge system. And of these 37,631 acres, boating is allowed in the 7,000-acre south sump. Powerboating is effectively permitted on only about 3,500 acres, with 30 acres used as a ski pond. Mr. President, I cannot believe this could cause any serious disruption of the whole marsh or disrupt waterfowl populations.

Let me assure my colleagues, Mr. Pres-

ident, that my eastern Nevada constituents are interested in the wildlife and the waterfowl aspects of the Ruby Marshes and are not attempting to harm the wildlife or reduce the production of waterfowl. Rather, we mutually believe that the Ruby Marshes can accommodate wildlife habitats, waterfowl production, powerboat fishing, and recreational boating without an impact of serious consequences on the wildlife and waterfowl.

Mr. President, the EIA used for the district court's restraining order was inconclusive as far as determining the effects of boating recreational use on duck production and brood survival at the Ruby Marshes. The EIA gave no consideration to the fact that fluctuations in nesting and brood survival are also related to weather conditions, food availability, predator loss, and alternative routes. It is also my understanding that the majority of canvasback and redhead nesting is completed by the time powerboating is allowed and becomes popular at the Ruby Marshes. There is just a lack of solid evidence that can positively identify boat disturbances as the cause of canvasback and redhead nesting or brood failure. Thus, Mr. President, it is my view that the court's decision was prejudiced and not based on adequate information.

Mr. President, the legislation I am now introducing will insure that the problems of the Ruby Marshes will be dealt with by Nevadans who are familiar with these problems. In my view, the Nevada Department of Fish and Game is well qualified to deal with these problems rather than Washington bureaucrats. There is no doubt in my mind that both ducks and eastern Nevada sportsmen will benefit from this proposal to transfer authority for managing the Ruby Marshes to the State of Nevada.

Mr. President, I sincerely hope that the committee and the Senate will act expeditiously on this legislation. I ask unanimous consent that the bill be printed in the RECORD.

There being no objection, the table and bill were ordered to be printed in the RECORD, as follows:

RUBY LAKE NATIONAL WILDLIFE REFUGE WATERFOWL PRODUCTION

Year	Redheads	Canvasbacks	Total other ducks	Coots
1938	(1)	(1)	(1)	(1)
1939	(1)	(1)	(1)	(1)
1940	(1)	(1)	(1)	(1)

(1) No data.

S. 3440

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That on or before the expiration of the twelve-month period following the date of submission to the Secretary of the Interior of an application by the State of Nevada requesting the Secretary of the Interior to take such action as may be necessary to transfer to the State of Nevada all control and jurisdiction over tne area comprising Ruby Lake National Wildlife Refuge, Nevada, the Secretary of the Interior shall transfer such control and jurisdiction over such Wildlife Refuge to the State of Nevada and such refuge shall be administered by such State agency as may be designated by the Governor of the State of Nevada, and in accordance with the applicable laws of the State of Nevada.

SEC. 2. The following laws and conventions shall not be applicable to Ruby Lake National Wildlife Refuge, Nevada:

(1) Act of September 28, 1962, as amended (16 U.S.C. 460k);

(2) Endangered Species Act of 1973;

(3) Migratory Bird Conservation Act;

(4) Migratory Bird Treaty Act;

(5) Chapters 5 and 7 of title 5, United States Code;

(6) Fishery Conservation and Management Act of 1976;

(7) Marine Mammal Protection Act of 1972;

(8) Minnesota Valley National Wildlife Refuge Act;

(9) National Wildlife Refuge System Administration Act of 1966;

(10) Executive Order Numbered 7923, dated July 7, 1938;

(11) Convention for the Protection of Migratory Birds of August 16, 1916;

(12) Convention for the Protection of Migratory Birds and Game Mammals of February 7, 1936; and

(13) Convention for the Protection of Migratory Birds and Birds in Danger of Extinction, and Their Environment of March 4, 1972.

By Mr. ZORINSKY (for himself, Mr. ANDERSON, Mr. ABOUREZK, and Mr. MELCHER):

S.J. Res. 155. A joint resolution to increase the price support for milk, wheat, corn, soybeans, and cotton to not less than 90 per centum of the respective parity prices therefor, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

● Mr. ZORINSKY. Mr. President, today I am introducing a joint resolution to dictate price supports of at least 90 percent of parity for several major commodities.

Congress long ago gave the Secretary of Agriculture authority to raise price support loan levels to 90 percent of parity for wheat, corn, soybeans, cotton, and milk. Until the Agricultural Act of 1949, as amended, he has the necessary authority to adjust Commodity Credit Corporation loan levels to keep pace with inflation and increasing costs of production. However, the administration has chosen not to use this authority. Instead the President and Secretary Bergland have elected to maintain inadequate and outdated price supports for these vital commodities.

The American Agriculture Movement has worked tirelessly during this past year to convince Congress and the American consumer that the survival of the family farm depends upon higher prices for their produce. The movement's efforts were in many ways successful. They have publicized the plight of American agriculture. They have won public backing for higher farm prices. Surveys conducted this spring by a national pollster indicated that most American consumers would be willing to pay a few more cents for basic food stuffs so that the farmer could receive an adequate price for his goods. The AAM gained Senate approval of a scheme to provide farmers with 100 percent of parity.

Nevertheless, farm prices remain abysmally low. The administration has done nothing to raise price support levels. American farmers still wonder how they can scrape together enough cash to eke out a living one more year.

Today, Mr. President, I raise once again the need for more realistic price supports. America's farmers cannot afford to let this critical issue die. At the request of the American Agriculture Movement I am introducing this joint resolution, which parallels a resolution introduced in the House by Congressman RICHARD NOLAN of Minnesota.

There is little need to reiterate here the arguments in favor of parity prices. It suffices to say that the cogent reasons presented by our Nation's farmers only a few months ago are the same today. Despite the claims of the Carter administration, grain, cotton, and milk prices remain depressed. Production costs continue to climb well above current prices.

American farmers want and need parity prices. They deserve them. The economic health of the Nation and one of our largest and most productive industries depends on more realistic price supports. We have delayed long enough. We now should hasten to support the hand that feeds us.●

ADDITIONAL COSPONSORS

S. 2388

At the request of Mr. JAVITS, the Senator from Montana (Mr. MELCHER), the Senator from California (Mr. HAYAKAWA), and the Senator from Indiana (Mr. BAYH) were added as cosponsors of S. 2388, a bill to amend the Internal Revenue Code of 1954 to provide for the exclusion from gross income of certain employer educational assistance programs.

S. 3285

At the request of Mr. TOWER, the Senator from Idaho (Mr. MCCLURE) was added as a cosponsor of S. 3285, a bill to amend the Internal Revenue Code by extending the investment tax credit to certain agricultural structures.

AMENDMENT NO. 3241

At the request of Mr. FORD, the Senator from South Carolina (Mr. HOLLINGS), the Senator from Texas (Mr. BENTSEN), the Senator from Montana (Mr. MELCHER), the Senator from Missouri (Mr. DANFORTH), and the Senator from New Hampshire (Mr. DURKIN) were added as cosponsors of amendment No. 3241, intended to be proposed to S. 3229, a bill to amend title 39 of the United States Code to improve the organizational structure of the U.S. Postal Service, and for other purposes.

AMENDMENT NO. 3409

At the request of Mr. PERCY, the Senator from Ohio (Mr. METZENBAUM), the Senator from Idaho (Mr. CHURCH), and the Senator from Colorado (Mr. HASKELL) were added as cosponsors of Amendment No. 3409 intended to be proposed to S. 991, to prevent the transfer of child nutrition programs from USDA to the Department of Education.

AMENDMENT NO. 3458

At the request of Mr. MUSKIE, the Senator from Indiana (Mr. BAYH), the Senator from New Mexico (Mr. DOMENICI), the Senator from Tennessee (Mr. SASSER), and the Senator from North Carolina (Mr. MORGAN) were added as cosponsors of Amendment No. 3458 intended to be proposed to S. 2441, a bill to amend the Urban Mass Transportation Act of 1964.

SENATE RESOLUTION 431

At the request of Mr. PERCY, the Senator from Oklahoma (Mr. BELLMON) was added as a cosponsor of Senate Resolution 431, the Lee Metcalf Fair Employment Relations Resolution.

AMENDMENTS SUBMITTED FOR PRINTING

CIVIL SERVICE REFORM ACT OF 1978—S. 2640

AMENDMENT NO. 3514

(Ordered to be printed and to lie on the table.)

Mr. PELL submitted an amendment intended to be proposed by him to S. 2640, a bill to reform the civil service laws.

● Mr. PELL. Mr. President, the Senate will soon be considering S. 2640, the Civil Service Reform Act of 1978. Legislation to modernize the civil service is long overdue, and I support this bill. I believe, however, that the Foreign Service should be exempted from its provisions just as the uniformed military services, the intelligence agencies, and the FBI are. I am, today, submitting an amendment to accomplish that objective; and I ask unanimous consent that the text of my amendment as well as an analysis of it be printed in the RECORD immediately following my remarks.

The Foreign Service is an "excepted service" established originally under the Rogers Act of 1924 and now governed by the Foreign Service Act of 1946, as amended. The centerpiece of S. 2640 is the creation of a new Senior Executive Service (SES), a governmentwide senior management pool consisting of civil servants above GS–15 or its equivalent, which in the Foreign Service is FSO–3. In the case of the Foreign Service, the SES would be superimposed on an existing personnel structure that is totally different from the Civil Service. Such an action, I submit, would do severe damage to the Foreign Service and undermine the conduct of American diplomacy.

The fundamental difference between the Foreign Service and the civil service is that the former is a vertically oriented career service organized along the lines of the military services with a comparable rank structure with grades equivalent to second lieutenants and ensigns on up to to four-star generals and admirals. The Foreign Service, along with the military services, operates on the basis of a rank-in-person system with mandatory rotation among jobs on a worldwide availability basis and with recruitment at the bottom and advancement up the career ladder as the individual officer's experience and performance merit it. The civil service, on the other hand, is organized laterally on the basis of categories such as "senior management"; and its personnel are recruited to fill a particular job in a particular location. Advancement is accomplished in the civil service's rank-in-job structure by applying for and obtaining a higher ranked position.

The SES would embody a rank-in-person system allowing—but not mandating as does the Foreign Service—periodic reassignments, and then only at the senior levels. This is a step forward as compared with the present civil service system, but there is no need to impose it on an already existing Foreign Service system which employs these concepts at all grade levels.

Not only is there no need to superimpose the SES on the Foreign Service, but to do so would destroy the unified nature of the Foreign Service and thus weaken it as a tool for the conduct of our country's diplomacy.

The pursuit of our national objectives in the area of foreign policy requires a Foreign Service system which trains people in diplomacy throughout their careers, which provides essential experience in service abroad, and which can count on the availability of professionally trained and experienced personnel to senior positions in Washington and abroad. This, of course, requires the availability of senior positions to be filled by personnel who spend their professional lives developing the necessary skills and experience to assume senior responsibilities. If, in addition to political appointees, another non-Foreign Service route to the top in the foreign affairs field is created, I fear that much of the incentive for able people to enter and then to put up with the many hardships of Foreign Service life would disappear.

A decrease in opportunities for Ambassadors would be particularly harmful. In recent years, about 70 percent of our Embassies have been headed by career Foreign Service officers, and the remaining 30 percent by political appointees. Application of the SES system to the Foreign Service could further reduce the percentage of Ambassadorships held by Foreign Service officers. Such a reduction would not only reduce the incentive for people to enter and remain in the Foreign Service, but it would also further dilute the ranks of professionally trained and experienced diplomats holding Ambassadorships. That, in my view, would be harmful to the conduct of American diplomacy.

It could be argued that for every lost opportunity for ambassadorships or senior posts in the Washington foreign affairs agencies a new opportunity would be opened elsewhere in the Government for Foreign Service personnel entering the SES. Once, however, a Foreign Service officer is appointed to a position in another agency under the SES system, there is no guarantee that he will ever return to his parent foreign affairs agency; thus his or her skills could be lost forever to the Department of State, the International Communication Agency, or the Agency for International Development. I favor assignments of Foreign Service personnel to other agencies, but it would be better, in my view, to continue with the present system whereby a certain number of Foreign Service officers are detailed to other agencies for a specific, limited period of time and then return to Foreign Service positions.

In addition to the SES, other provisions of S. 2640 should not apply to the Foreign Service, because comparable provisions already apply to the Foreign Service under the Foreign Service Act of 1946. These other provisions of S. 2640 relate to merit system principles, prohibited personnel practices, personnel oversight, grievance handling, and adverse actions. My amendment would exempt the Foreign Service from these provisions as well.

Mr. President, the need for a disciplined and unified Foreign Service is as strong today as it was when the Foreign Service Act of 1946 was passed. Unless the Foreign Service is exempted from S. 2640, it would face the same problem that would confront the military services if their senior ranks above colonel and Navy captain were put into a separate organization. A disciplined service has to be a unified service. The congressional founders of the Foreign Service realized that, and my amendment will serve to keep intact the structure which they considered so important to the conduct of our foreign relations.

There being no objection, the amendment and analyses were ordered to be printed in the RECORD, as follows:

ANALYSIS OF AMENDMENT TO S. 2640

(1) On page 133, line 21, immediately before the semicolon, insert ", the Foreign Service of the United States".

ANALYSIS

This amendment excludes the Foreign Service from the chapter on merit system principles, prohibited personnel practices, and General Accounting Office responsibilities. The Foreign Service has its own merit system, personnel practices, and oversight under separate statute and regulations directed toward the special needs and responsibilities of the Service. The Foreign Service is a rank-in-person system requiring different approaches to achievement of merit and

other personnel objectives than those based upon a rank-in-job system such as the Civil Service.

(2) On page 167, after line 7, insert the following new section:

"S. 1208. Exception for the Foreign Service

"This chapter shall not apply to the Foreign Service of the United States.".

ANALYSIS

This section would except the Foreign Service from the authority of the Merit Systems Protection Board and Special Counsel since the Foreign Service has its own such body (the Board of the Foreign Service) and officer (Director General of the Foreign Service) to oversee personnel policies and practices. This includes disciplinary authority (section 637 of the Foreign Service Act) and a special grievance system for protection of employees (sections 691–694 of the Foreign Service Act).

(3) On page 175, line 15, strike out ", and" and insert in lieu thereof:

"; or"

"(D) an individual whose position is in the Foreign Service of the United States; and".

ANALYSIS

This amendment would exempt the Foreign Service from the adverse action provisions of the bill carrying a penalty of suspension for 30 days or less. The Foreign Service differs from the Civil Service both in what may constitute adverse actions and in procedures for initiating and appealing them. Under section 637 of the Foreign Service Act separation for cause procedures include a hearing and other special steps designed for the Service. In addition, the provisions of the bill would duplicate remedies available to the Service through the statutory grievance system designed for it.

(4) On page 178, line 14, strike out the period and insert in lieu thereof:

"; or

"(5) whose position is in the Foreign Service of the United States.".

ANALYSIS

The first amendment excludes members of the Foreign Service from the Senior Executive Service. The second is consequential to the first. The Foreign Service is by law an excepted, rank-in-person service already, but it is subject to special requirements and has its own oversight body, disciplinary provisions, and performance incentives which make inclusion of some of its members in the Senior Executive Service undesirable. The inclusion of top Foreign Service officers in the Senior Executive Service, for example, would disrupt the Foreign Service promotion system, which is designed to move people from entry level to the top through competition with their peers in the Foreign Service.

(5) On page 203,

(a) at line 2, immediately after "position", insert: "(other than a position in the Foreign Service of the United States)".

(b) at line 17, strike out "Except for a position in the Foreign Service" and capitalize "the" immediately after the deleted phrase.

ANALYSIS

The first amendment excludes members of the Foreign Service from the Senior Executive Service. This makes the exception at line 17 unnecessary, so the second amendment deletes it. The Foreign Service is by law an excepted, rank-in-person service already but it is subject to special requirements and has its own oversight body, disciplinary provisions, and performance incentives which make inclusion of some of its members in the Senior Executive Service undesirable. The inclusion of top Foreign Service officers in the Senior Executive Service, for example, would disrupt the Foreign Service promotion system, which is designed to move people from entry level to the top through competition with their peers in the Foreign Service.

(6) On page 258, line 13, immediately after "individual" insert "(other than an individual in the Foreign Service of the United States)".

ANALYSIS

This amendment excepts individual members of the Foreign Service from the categories subject to personnel research and demonstration projects under the direction of the Office of Personnel Management.

These provisions are directed toward improvement of the Civil Service System, and their application to members of the Foreign Service is inappropriate.●

ELEMENTARY AND SECONDARY EDUCATION AMENDMENTS OF 1978—S. 1753

AMENDMENT NO. 3515

(Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted an amendment intended to be proposed by him to S. 1753, a bill to extend the Elementary and Secondary Education Act of 1965, and for other purposes.

● Mr. HEINZ. Mr. President, today I am submitting an amendment to S. 1753, the Elementary and Secondary Amendment of 1978. This amendment seeks to educate our children to employ energy conservation measures in their normal daily activities.

The energy problem facing our Nation today will only worsen as time passes. In the face of our growing dependence on foreign sources and our dwindling supplies, the uncontrollable American appetite for energy must be addressed. I believe it is essential that we instill in our children during their early, formative years the importance of conserving our precious resources whenever possible.

Youngsters can be taught to be less wasteful of energy at home, in the classroom, at play. They can be taught to close the door while the air conditioner is running; to turn out the light when leaving a room; to conserve water. There are hundreds of practical, useful energy saving measures that can be taught to our children. Energy conservation measures can also be woven into regular high school coursework in such classes as home economics and drivers' education. For example, I am aware of high school students in Delaware County, Pa., who have been taught to do energy audits of existing buildings. It has also been demonstrated that young people taught to drive using energy efficient techniques repeatedly exceed the EPA mileage estimates for miles per gallon of gasoline.

The amendment I introduce today would place specific emphasis on use of the discretionary fund of the Commissioner of Education for the purpose of making grants and contracts to develop curricula and disseminate information on energy conservation and to train personnel to teach energy conservation subject matter to elementary and secondary school children.

I believe the adoption of this amendment, which addresses one of the most critical concerns of our Nation today, will help to insure that our Nation's energy supplies will be used in the wisest, most efficient way.

Mr. President, I ask unanimous consent that the text of my amendment be printed in the RECORD.

There being no objection, the amendment was ordered to be printed in the RECORD, as follows:

AMENDMENT No. 3515

On page 134, between lines 15 and 16 insert the following:

"(c) The Commissioner is also authorized, from the amount available for the purpose of this section, to make grants and enter into contracts for the development of curricula, and the dissemination of information relating to the improvement of teaching energy conservation to elementary and secondary school children and for the training of personnel to teach energy conservation to such children. In carrying out the provisions of this subsection, the Commissioner shall use to the maximum extent practicable materials developed by the Department of Energy, the Community Services Administration, and the Department of Housing and Urban Development.

On page 134, line 16, strike out "(c)" and insert in lieu thereof "(d)".●

AMENDMENT NO. 3516

(Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted an amendment intended to be proposed by him to S. 1753, supra.

● Mr. HEINZ. Mr. President, the amendment which I submit today to the Elementary and Secondary Education Act amendments, S. 1743, is intended to insure that television programs developed under title VI, the Emergency School Aid Act, be of high quality.

I am aware that over the past several years the Office of Education has been successful in the production and development of children's television programs under this act. A recent report from the Office of Education indicated that more than 400 hours of children's television programing have already been produced. This is a sincere effort on the part of OE to employ the most effective medium of instruction in this country to eliminate or prevent segregation and discrimination. It is my intention by this amendment to see that this fine effort continues.

We are all aware that television is having a tremendous impact on our children today. TV competes with us for the attention of our children. TV entertains them; TV instructs them; and TV sometimes misinforms them.

Every week young children in this country spend an average of 23 hours watching TV, and according to a 1976 report, black children watch TV more than white. Much of that time is spent with "adult" rather than "children's" shows. And I am concerned about the unknown effects TV is having on our children.

Our school systems do a fine job of teaching children to comprehend and critically evaluate what they read in books. Book reports are a regular part of a fourth grader's learning activities. But our children are not taught to critically analyze or interpret what they see and hear on TV. I am concerned that TV is

teaching our children that most problems can be solved by violence, and those that are not can be solved by guessing the "Secret Square" and winning a lifetime of prizes.

Considering that TV plays such a crucial role in shaping the emotional and intellectual development of our children, we have a duty to seek and stimulate the highest quality in TV developed and supported by the Government on our children's behalf. TV can be sensitive to the special needs and vulnerabilities of those whom we seek to strengthen.

Mr. President, I hope that by adding the words "high quality" to this section of ESEA, the Office of Education will be encouraged to continue in its quest for excellence in the use of this incredibly effective learning tool.●

AMENDMENT NO. 3517

(Ordered to be printed and to lie on the table.)

Mr. HEINZ submitted an amendment intended to be proposed by him to S. 1753, supra.

AMENDMENT NO. 3518

(Ordered to be printed and to lie on the table.)

Mr. GLENN submitted an amendment intended to be proposed by him to S. 1753, supra.

● Mr. GLENN. Mr. President, the amendment which I now submit to S. 1753, the Elementary and Secondary Education Act Amendments, would insure that individual not be permitted to unfairly benefit from several duplicative educational assistance programs. In short, it would insure that the tuition tax credit, which the Senate has just recently passed, be reduced by the amount of direct Federal higher educational grant assistance.

My amendment would have the same effect as a provision included in the Senate-passed tuition tax credit bill. However, since the House-passed tuition tax credit bill specifically provided that there not be an offset, it cannot be assumed that the Senate conferees will be successful in retaining that provision. With the Senate passage of both the tuition tax credit and the expanded college grant program, there would be an opportunity to double-dip if both bills are subsequently enacted without an offset provision. I believe that we must insure that double-dipping cannot take place. Therefore, I am offering my amendment in order to provide the Senate with an additional opportunity to enact an offset provision.●

AMENDMENTS NOS. 3519 AND 3520

(Ordered to be printed and to lie on the table.)

Mr. ROBERT C. BYRD (for Mr. ABOUREZK) submitted two amendments intended to be proposed to S. 1753, supra.

Mr. ROBERT C. BYRD. Mr. President, on behalf of Senator ABOUREZK, I submit two amendments intended to be proposed by him to S. 1753, the Elementary and Secondary Education Amendments of 1978.

I ask unanimous consent that a statement by Senator ABOUREZK be printed in the RECORD, together with the text of the amendments and a section-by-section analysis.

There being no objection, the statement, amendments, and analysis were ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR JAMES ABOUREZK

INDIAN EDUCATION AMENDMENT

Before long, we will have the opportunity to consider and vote on the bill, S. 1753, the bill extending the Elementary and Secondary Education Act of 1965. I, along with the Ranking Minority Member of the Select Committee on Indian Affairs which I chair, intend to offer a floor amendment to S. 1753 in the form of an additional Title V.

Our proposed amendment contains important provisions designed to constructively address the present deficiencies in Indian educational programs administered by the Departments of the Interior and Health, Education, and Welfare by implementing long-needed reforms, and by providing the direction and support necessary to realize the attainment of equal educational opportunity for all Indian children. A general description of the bill follows:

Part A amends P.L. 81–874, an HEW program commonly referred to as the Impact Aid Act, by directing that regulations be esbtablished to guarantee local parental and tribal involvement in the education of their children provided by local public schools, a responsibility they specifically desire. Regretfully, such guarantees are needed in those instances where Indians have heretofore been ignored or otherwise restricted from equal participation in the development of educational policies and programs in public schools. In conjunction with this are provisions increasing the resources with which public schools can improve the quality of education they offer to Indian children who reside on non-taxable trust land by increasing the entitlement formulas as applied to such children.

Part B would direct that Interior's Bureau of Indian Affairs establish and implement uniform educational standards and policies in all its schools. It requires the BIA to bring all its educational facilities into compliance with health and safety codes, streamlines the BIA's administrative functions with regard to education, and establishes a uniform and objective formula to equitably distribute funds directly to the schools for their local operations. It states the overall BIA educational policy to be that of facilitating Indian control of Indian education and establishes a special education personnel structure designed to increase local control, responsibility, and accountability for the daily operation and management of educational programs. Finally, Part B requires an annual report to Congress on the status of Indian education, sets up a management information system, and calls for a program to encourage the recruitment of Indian educators.

Part C contains several amendments to existing HEW programs, the purposes of which are to generally improve and perfect these programs administered by the Office of Indian Education.

Without doubt, Mr. President the quality of educational programs being offered to Indian children today is simply and unjustifiably bad. Despite the special relationships existing between the Federal government and Indian tribes, and the resulting Federal trust obligations to provide for Indian educational services, being Indian has meant accepting less than equal educational opportunity. The American Indian Policy Review Commission, established by Congress in 1975, found that—

a. Indians are substantially less educated than non-Indians;

b. education provided to Indians is often irrelevant to their needs and culture;

c. Indians in public schools often fall 2 to 3 years behind non-Indians in achievement levels; and

d. the majority of Indian people have no mechanism for input in the education of their children.

The Commission's special Task Force on Indian Education further found that estimates of Indian dropouts from both BIA and public schools ranged from 25 percent to 75 percent.

In a recently released Issue Brief on Indian Education, the Congressional Research Service of the Library of Congress (Issue Brief No. IB 77111, updated 07/21/78) states that an estimated 360,000 Indian children (including Alaska Natives) received elementary and secondary instruction while enrolled in one of four school systems during the 1975–76 school year. These four school systems include:

The BIA (Bureau of Indian Affairs) Federal Indian school system that enrolled approximately 43,000 Indian students;

The public school systems operated by the various States that enrolled over 300,000 Indian students;

A small, but growing number of previously private "contract schools" operated by Indian-controlled school boards, under agreement with the BIA, that enrolled about 3,000 Indian students; and

Various mission and other private schools that enrolled an estimated 12,000 Indian students.

Within the past 10 years, various studies and reports have expressed dissatisfaction with the direction and quality of the Indian education effort in the United States and have offered various suggestions for improvement. In general, such studies and reports have found that the education opportunities and attainments of Indian students have remained below national averages and that assimilation of the Indian student into the majority society has been overemphasized at the expense of cultural heritage. In 1969, the Senate Special Subcommittee on Indian Education in a summary report, Indian Education: A National Tragedy—A National Challenge, sharply criticized both Federal and public school efforts in Indian education and made 60 specific policy, administrative, and programmatic recommendations. The following year, the USOE-supported National Study of American Indian Education evaluated the various sources of problems in Indian education and the kind of education that Indians want. The National Study also included recommendations in areas such as the Federal responsibility in Indian education, strengthening the Indian curriculum, improving career development programs and teacher recruitment, selection, and training, and Indian school finance. In 1972 and again in 1977, the GAO (General Accounting Office) reported that the BIA needed to improve the quality of its Federal Indian schools to meet the needs of Indian students. Also in 1977, the American Indian Policy Review Commission, established by Congress in 1975 to conduct a 2-year, comprehensive study of the Indian relationship with the Federal Government, issued a final Report on Indian Education that detailed the background of the Federal and State involvement in Indian education and criticized the existing education delivery system as inadequate to meet the needs of Indian people. . . .

With respect to the quality and efficiency of the BIA education system, CRS states that:

In 1975–76, the BIA operated 188 schools that enrolled approximately 45,600 students. Of this total enrollment, about 43,000 were elementary and secondary Indian students attending 144 day schools and 71 boarding schools. In addition, 2,600 postsecondary Indian students were enrolled in three BIA postsecondary schools: Haskell Indian Junior College, the Institute of American Indian Arts, and Southwest Indian Polytechnic Institute.

Despite the efforts of a number of BIA teachers and administrators, the BIA educa-

tion record has been marked over the years by the lower than average achievement and retention rates that characterize Indian education in general. For example, the National Study of American Indian Education reported on a 1968 study of Indian achievement in several BIA schools that found that Indian students scored below the national norm at all grades tested (2, 3, 4, and 5).

The BIA has defined "Indian education" in terms of a process designed to fill the gap between Indian and non-Indian cultures. However, a recent GAO report, Concerted Effort Needed to Improve Indian Education (Jan. 17, 1977), concluded that the BIA education system ". . . has not been designed to fill the gap." Specifically, the GAO report and other investigations found that the BIA education effort appears hampered by a number of administrative and organizational problems, including:

Lack of a comprehensive, up-to-date education policy and strategy designed to meet the various educational needs of Indian students in all BIA schools. (Current BIA educational goals and objectives were last revised in 1953.)

An inadequate management information system for pupil and staff accounting, curriculum assessment, and financial management.

Lack of a BIA-funded program for the handicapped and inadequate counseling resources.

A slow and cumbersome teacher recruitment and replacement process that can take from 2 months to over a year to replace a full-time classroom teacher.

Lack of policy direction and leadership from the BIA central office, due, in part, to constant turnover in the position of Director of Education with 15 different individuals holding this position between 1966 and 1976.

Division of responsibility within BIA that places school construction as well as maintenance and repair outside of the Office of Indian Education and beyond the direct control of a local BIA school principal.

Some also argue that the BIA education effort has been hindered by an overall lack of sufficient funds in recent years, whereas others stress that available funds have been used inefficiently . . . .

With regard to the degree of Indian attainment in the public schools, CRS states that: the largest number of school-aged Indian children, over 300,000 in 1975–76, were enrolled in the elementary and secondary public schools operated within the States. As in the case of the BIA schools, Indian students in the public schools are also characterized by lower achievement and high dropout statistics. The 1966 Coleman report (On Equality of Educational Opportunity), for example, found that Indian children achieved at a lower level than white children at all grade levels tested (grades 1, 3, 6, 9, and 12) and at an increasing rate of underachievement. While accurate dropout statistics for Indian students in the public schools are difficult to obtain, recent Indian dropout estimates from several States with concentrations of Indian students have ranged from 25 percent to over 50 percent.

Of the 300,000 Indian students in public schools in 1975–76, approximately 145,000 were from tribes federally recognized as eligible for special educational assistance from the BIA in addition to any other special educational services from the USOE. The remaining 155,000 Indian students in the public schools in 1975–76 were eligible for special educational services from the USOE, but not from the BIA because (1) they came from tribes not recognized by the Federal Government through treaty or other agreement; (2) they were of less than one-quarter degree Indian blood, or (3) they lived in areas, such as some large cities, not presently served by the BIA.

Financial support for the education of Indian students in the public schools is derived from local, State, and Federal sources. Because of the tax-exempt status of Indian land, many school districts with concentrations of Indian students living on Federal Indian reservations derive less school revenue from local property taxes than is the average for the State. In these cases, the State and Federal revenue sources combine to provide a significant majority of the funds for such Indian-land school districts. For many school districts, however, the number of Indian students is a small proportion of the total student body or the amount of the tax-exempt Indian land is insignificant. In these cases, the relative proportions of the local, State, and Federal contributions will more likely reflect the Statewide pattern. . . .

And finally, CBS addressed the question of the effectiveness of the Indian Education Act by stating that: in comparison with the BIA, the USOE contribution to programs that directly or indirectly benefited elementary and secondary Indian students in the public schools in FY76 was an estimated $150 million (out of the USOE total of $211 million for all Indian aid)—or about five times the BIA contribution level from the JOB program. Most of this total in USOE public school assistance resulted from three formula grant programs: P.L. 81–874 impact aid ($58.5 million), ESEA Title I ($43 million), and Part A of the Indian Education Act ($35 million).

The P.L. 874 impact aid program provides financial assistance to local educational agencies in areas affected by Federal activities. In FY76, P.L. 874 distributed approximately $739 million in general school maintenance and operations revenue to over 4,300 public school districts. In that year, about 85,000 students living on tax-exempt Indian lands in 630 school districts were claimed for the purposes of P.L. 874 with most of this total associated with federally recognized reservation lands.

The ESEA Title I program authorizes financial assistance to school districts to meet the special educational needs of educationally disadvantaged children. Indian children in the public schools participate in the ESEA Title I program to the extent to which they attend Title I target schools and need the special educational services provided.

The Indian Education Act (P.L. 93–318, Title IV, as amended) consists of three principal programs: Part A—Grants to local educational agencies, Part B—Special programs and projects, and Part C—Special programs relating to adult education. In FY 76, the Indian Education Act (IEA) received a total appropriation of $57.1 million, the largest portion of which went to Part A—$35 million. The Part A program authorizes formula grants for planning, developing, and operating supplementary programs designed to meet the special educational needs of Indian children in the public schools. In its supplementary purpose, the USOE-administered Part A program is similar to the BIA-administered JOM supplementary assistance program. Unlike JOM, however, the Part A program is governed by a statutory definition of the term "Indian" which includes students from nonfederally recognized tribes or living in areas, such as many large cities, not served by the BIA. Thus, in 1976, over 300,000 public school Indian students were counted as eligible for entitlements under the Part A program, but only 145,000 of such public school Indian students were recognized for assistance by the BIA under the JOM program.

A 1977 GAO report on the Indian Education Act, Indian Education in the Public School System Needs More Direction from the Congress (March 14, 1977), noted problems in identifying and selecting Indian children under the Part A program, in assessing their special educational needs, and in targeting Part A funds to meet such special needs. Among its recommendations to improve the Part A program, the GAO suggested that USOE strengthen the program regulations and guidelines governing Indian eligibility and that Congress provide a clearer definition of the Indian children to be served. GAO also recommended that USOE improve its monitoring of LEA's (Local Educational Agency) needs assessment under the program and that Congress more precisely determine what are the "special educational needs of Indian children." In addition, GAO suggested that USOE establish measurable program goals by which to judge the effectiveness of Part A projects . . .

Our amendment is designed to begin the process of constructively addressing this overwhelming litany of problems which has been documented repeatedly.

It does not, however, address the merits or demerits of the proposed transfer of BIA educational programs to a new Department of Education as contained in S. 991 presently awaiting floor action. The provisions contained in our amendment represent long-needed internal reforms in both HEW and Interior Indian education programs. In our best judgement, passage of our amendment would not bias in any way the overall question of where these various Indian education programs should be located.

The House recently passed H.R. 15, its companion measure to S. 1753, which contains a major section on Indian education, Title XI. Presently, S. 1753 contains no such provisions. Our proposed amendment is quite similar to Title XI of H.R. 15, but differs in what we feel are some significant and necessary respects. The House Education and Labor Committee built an extensive record on two comprehensive Indian education bills which were subsequently incorporated into the ESEA reauthorization bill as one separate title. In any future conference on S. 1753 and H.R. 15, it is clear that the Senate will have no basis upon which to respond to the House Indian education provisions unless our parallel amendment to S. 1753 is accepted by the Senate.

It is my conviction that, in its consideration of this amendment to S. 1753, the Senate has a rare opportunity to constructively address the many serious problems which have so plagued the government's administration of Indian education services. I, along with Senator Bartlett, urge our colleagues to support our proposed Amendment in the form of an additional Title V to S. 1753.

We are also submitting two amendments to the Adult Education Act which we feel would go a long way toward filling the tremendous educational needs of adult Indians. One would allow the USOE to survey and evaluate needs of all Indian adults, not just those residing on reservations. The other amendment would authorize USOE to make grants for the development and establishment of educational services and programs specifically designed for Indian adults. The present legislation provides for demonstration projects in this area. Our amendment would broaden this part of the legislation and allow for service-type programs.

AMENDMENT NO. 3519

On page 355, strike out lines 1 through 23.

On page 356, line 1, strike out "Part C" and insert "Part B".

On page 377, after line 16, insert the following new title:

TITLE V—INDIAN EDUCATION

PART A—ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES

AMENDMENT TO PUBLIC LAW 874

SEC. 501. (a) Effective with respect to fiscal years beginning on or after the date of enactment of this Act, section 3(d)(2) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by adding at the end thereof the following new subparagraph:

"(D) The amount of the entitlements of any local educational agency under this section for any fiscal year with respect to children who, while in attendance at such agency, resided on Indian lands, as described in clause (A) of section 403(1), shall be the amount determined under paragraph (1) with respect to such children for such fiscal year multiplied by 125 per centum.".

(b) Effective with respect to fiscal years beginning on or after the date of enactment of this Act, section 5(a)(2) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress) is repealed and section 5(a)(1) of such Act is redesignated section 5(a).

(c) Effective with respect to fiscal years beginning on or after the date of enactment of this Act, section 5(b) of the Act of September 30, 1953 (Public Law 874, Eighty-first Congress), is amended by designating the existing provisions as paragraph (1) and adding the following paragraph:

"(2)(A) Payments of entitlements under section 3(d)(2)(D) of this Act shall be made only to local educational agencies which have, within one year of the date of enactment of this paragraph, or when local educational agencies are formed after such date of enactment, within one year of their formation, established such policies and procedures with respect to information received from the Indian parents and tribes as required by this paragraph and which have made assurances to the Commissioner, at such time and in such manner as shall be determined by regulation, that such policies and procedures have been established. The Commissioner shall have the authority to waive this one-year limit for good cause, and in writing to the Indian parents and tribes.

"(B) Each local educational agency shall establish such policies and procedures as are necessary to insure that—

"(i) Indian children claimed under section 3(a) participate on an equal basis in the school program with all other children educated by the local educational agency;

"(ii) applications, evaluations, and program plans are adequately disseminated to the tribes and parents of Indian children claimed under section 3(a); and

"(iii) tribes and parents of Indian Children claimed under section 3(a) are—

"(I) afforded an opportunity to present their views with respect to the application, including the opportunity to make recommendations concerning the needs of their children and the ways by which they can assist their children in realizing the benefits to be derived from the educational programs assisted under this paragraph;

"(II) actively consulted and involved in the planning and development of programs assisted under this paragraph; and

"(III) afforded a general opportunity to present their overall views on the educational program and the degree of parental participation allowed.

"(c) (i) Any tribe, or its designee, which has students in attendance at a local educational agency may file a written complaint with the Commissioner regarding any action of a local educational agency taken pursuant to, or relevant to, the requirements of subparagraph (B) of this paragraph.

"(ii) Within ten working days from receipt of the complaint, the Commissioner shall—

"(I) designate a time and place for a hearing into the matters relating to the complaint at a location in close proximity to the local educational agency involved, or, if the Commissioner determines there is good cause, at some other location convenient to both the tribe, or its designee, and the local educational agency;

"(II) designate a hearing examiner to conduct the hearing; and

"(III) notify the affected tribe or tribes and the local educational agency involved of the time, place, and nature of the hearing and send copies of the complaint to the local educational agency and the affected tribe or tribes.

"(iii) The hearing shall be held within thirty days of the designation of a hearing examiner and shall be open to the public.

"(iv) The complaining tribe, or its designee, and the local educational agency shall be entitled to present evidence on matters relevant to the complaint and to make recommendations concerning the appropriate remedial actions. Each party to the hearing shall bear only its own costs in the proceeding.

"(v) Within thirty days of the completion of the hearing, the hearing examiner shall, on the basis of the record, make written findings of fact and recommendations concerning appropriate remedial actions (if any) which should be taken. The hearing examiner's findings and recommendations, along with the hearing record, shall be forwarded to the Commissioner.

"(vi) Within thirty days of his receipt of the findings, recommendations, and record, the Commissioner shall, on the basis of the record, make a written determination of the appropriate remedial action, if any, to be taken by the local educational agency, the schedule for completion of the remedial action, and the reasons for his decision.

"(vii) Upon completion of his final determination, the Commissioner shall provide the complaining tribe, or its designee, and the local educational agency with copies of the hearing record, the hearing examiner's findings and recommendations, and the Commissioner's final determination. The final determination of the Commissioner shall be subject to judicial review.

"(viii) In all actions under this subparagraph, the Commissioner shall have discretion to consolidate complaints involving the same tribe or local educational agency.

"(D) If the local educational agency rejects the determination of the Commissioner, or if the remedy required is not undertaken within the time established and the Commissioner determines that an extension of the time established will not effectively encourage the remedy required, the Commissioner shall immediately withhold payment of all moneys to which such local agency is entitled under section 3(d)(2)(D) until such time as the remedy required is undertaken, except where the complaining tribe or its designee formally requests that such funds be released to the local educational agency.

"(E) This paragraph is based upon the special relationship between the Indian nations and the United States and nothing in it shall be deemed to relieve any State of any duty with respect to any citizens of that State.".

(d) Effective with respect to fiscal years beginning on or after the date of the enactment of this Act, section 5(c)(2) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress), is amended by redesignating clauses (B) through (F) as clauses (C) through (G) and by adding after clause (A) the following new clause:

"(B) to each local educational agency which provides free public education for children who reside on Indian land, as described in clause (A) of section 403(1), which equals 75 per centum of the amount to which such agency is entitled under section 3(d)(2)(D);".

PART B—BUREAU OF INDIAN AFFAIRS PROGRAMS

STANDARDS FOR THE BASIC EDUCATION OF INDIAN CHILDREN IN BUREAU OF INDIAN AFFAIRS SCHOOLS

SEC. 511. (a) The Secretary, in consultation with the Assistant Secretary of Health, Education, and Welfare for Education, and in active consultation with Indian organizations and tribes, shall carry or cause to be carried out by contract with an Indian organization such studies and surveys, making the fullest use possible of other existing studies, surveys, and plans, as are necessary to establish and revise standards for the basic education of Indian children attending Bureau schools and Indian controlled contract schools (hereinafter referred to as contract schools). Such studies and surveys shall take into account factors such as academic needs, local cultural differences, type and level of language skills, geographical isolation and appropriate teacher-student ratios for such children, and shall be directed toward the attainment of equal educational opportunity for such children.

(b)(1) Within fifteen months of the date of enactment of this Act, the Secretary shall propose minimum academic standards for the basic education of Indian children, and shall distribute such proposed standards to the tribes and publish such proposed standards in the Federal Register for the purpose of receiving comments from the tribes and other interested parties. Within eighteen months of the date of enactment of this Act, the Secretary shall establish final standards to all the tribes and publish such standards in the Federal Register. The Secretary shall revise such standards periodically as necessary. Prior to any revision of such proposed revision to all the tribes, and publish such proposed revision in the Federal Register, for the purpose of receiving comments from the tribes and other interested parties.

(2) Such standards shall apply to Bureau schools, and, subject to subsection (e), to contract schools, and may also serve as a model for educational programs for Indian children in public schools. In establishing and revising such standards, the Secretary shall take into account the special needs of Indian students, and shall place a special emphasis on the support and reinforcement of the specific cultural heritage of each tribe.

(c) The Secretary shall provide alternative or modified standards in lieu of the standards established under subsection (b), where necessary, so that the programs of each school shall be in compliance with the minimum standards required for accreditation of schools in the State where the school is located.

(d) A tribal governing body, or the local school board if so designated by the tribal governing body, shall have the local authority to waive, in part or in whole, the standards established under subsections (b) and (c), where such standards are deemed by such body to be inappropriate or ill-conceived, and shall also have the authority to revise such standards to take into account the specific needs of the tribe's children. Such revised standards shall be established by the Secretary unless specifically rejected by the Secretary for good cause and in writing to the affected tribes or local school board which rejection shall be final and unreviewable.

(e) The Secretary, through contracting procedures, shall assist school boards of contract schools in the implementation of the standards established under subsections (b) and (c), if the school boards request that such standards, in part or in whole, be implemented. The Secretary shall not refuse to enter into a contract with respect to any contract school on the basis of failure to meet such standards. At the request of a contract school board, the Secretary shall provide alternative or modified standards for the standards established under subsections (b) and (c) to take into account the needs of the Indian children and the contract school.

(f) Subject to subsections (d) and (e), the Secretary shall begin to implement the standards established under this section immediately upon the date of their establishment. Within one year of such date, and at

each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring all Bureau and contract schools up to the level required by the applicable standards established under this section. Such plan shall include, but not be limited to, detailed information on the status of each school's educational program in relation to the applicable standards established under this section, specific cost estimates for meeting such standards at each school, and specific time lines for bringing each school up to the level required by such standards.

(g) There are hereby authorized to be appropriated such sums as may be necessary, for academic program costs, in order to bring all Bureau and contract schools up to the level required by the applicable standards established under this section.

NATIONAL CRITERIA FOR DORMITORY SITUATIONS

SEC. 512. (a) The Secretary, in consultation with the Assistant Secretary for Health, Education, and Welfare for Education, and in active consultation with Indian organizations and tribes, shall conduct or cause to be conducted by contract with an Indian organization, a study of the costs applicable to boarding arrangements for Indian students provided in Bureau and contract schools, for the purpose of establishing national criteria for such dormitory situations. Such criteria shall include requirements as to adult-child ratios, needs for counselors (including special needs related to off-reservation boarding arrangements), space, and privacy.

(b) Within fifteen months of the date of enactment of this Act, the Secretary shall propose such criteria, and shall distribute such proposed criteria to the tribes and publish such proposed criteria in the Federal Register for the purpose of receiving comments from the tribes and other interested parties. Within eighteen months of the date of enactment of this Act, the Secretary shall establish final criteria, distribute such criteria to all the tribes, and publish such criteria in the Federal Register. The Secretary shall revise such criteria periodically as necessary. Prior to any revision of such criteria, the Secretary shall distribute such proposed revision to all the tribes, and publish such proposed revision in the Federal Register, for the purpose of receiving comments from the tribes and other interested parties.

(c) The Secretary shall begin to implement the criteria established under this section immediately upon the date of their establishment. Within one year of such date, and at each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring all Bureau and contract boarding schools up to the criteria established under this section. Such plan shall include, but not be limited to, predictions for the relative need for each boarding school in the future, detailed information on the status of each school in relation to the criteria established under this section, specific cost estimates for meeting such criterial at each school, and specific time lines for bringing each school up to the leval required by such criteria.

(d) There are hereby authorized to be appropriated such sums as may be necessary in order to bring each school up to the level required by the criteria established under this section.

REGULATIONS

SEC. 513. The Secretary shall establish such regulations as are necessary to carry out sections 511 and 512 within eighteen months after the date of enactment of this Act.

STUDIES

SEC. 514. There are hereby authorized to be appropriated no more than $1,000,000 for any fiscal year beginning after the date of enactment of this Act to carry out the studies conducted under section 511 (a) and section 512 (a).

FACILITIES CONSTRUCTION

SEC. 515. (a) The Secretary shall immediately begin to bring all schools, dormitories, and other facilities operated by the Bureau or under contract with the Bureau in connection with the education of Indian children into compliance with all applicable Federal, tribal, or State health and safety standards, whichever provide greater protection, and with section 504 of the Vocational Rehabilitation Act (29 U.S.C. 31), except that nothing in this section shall require termination of the operations of any facility which does not comply with such provisions and which is in use on the date of enactment of this Act.

(b) Within one year of the date of enactment of this Act, and at each time thereafter that the annual budget request for Bureau educational services is presented, the Secretary shall submit to the appropriate committees of Congress a detailed plan to bring such facilities into compliance with such standards. Such plan shall include, but not be limited to, detailed information on the status of each facility's compliance with such standards, specific cost estimates for meeting such standards at each school, and specific time lines for bringing each school into compliance with such standards.

(c) Within six months of the date of enactment of this Act, the Secretary shall submit to the appropriate committees of Congress, and publish in the Federal Register, the system used to establish priorities for school construction projects. At the time any budget request for school construction is presented, the Secretary shall publish in the Federal Register and submit with the budget request the current list of all school construction priorities.

(d) There are hereby authorized to be appropriated such sums as may be necessary to carry out subsection (a).

BUREAU OF INDIAN AFFAIRS EDUCATION FUNCTIONS

SEC. 516. (a) The Secretary shall vest in the Assistant Secretary for Indian Affairs all functions with respect to formulation and establishment of policy and procedure, supervision of programs, and expenditure of Federal funds for the purpose of Indian education. Such functions may not be further delegated to an official other than a Deputy Assistant Secretary for Indian Affairs, or the Director of the Office of Indian Education Programs of the Bureau (hereinafter referred to as the "Office") and shall be governed by the provisions of this Act, any other provision of law to the contrary notwithstanding. The Director of the Office may be authorized to redelegate such functions to personnel under his direction and supervision.

(b) The Director of the Office shall direct and supervise the operations of all personnel involved with the provision of educational services by the Bureau. Nothing in this Act shall be construed to require the provision of separate support services for Indian education.

(c) Education personnel located in Bureau agencies, who are under the direction and supervision of the Director of the Office in accordance with the first sentence of subsection (b), shall—

(1) monitor and evaluate Bureau education programs, and

(2) provide technical and coordinating assistance in areas such as procurement, contracting, budgeting, personnel, and curriculum.

However, in the case of boarding schools located off reservation operated by the Bureau, education personnel located in area offices of the Bureau shall provide such services, under the direction and supervision of the Director of the Office.

(d) For the purpose of this section the term "functions" includes powers and duties.

IMPLEMENTATION

SEC. 517. Within six months after the date of enactment of this Act, the Secretary shall establish and publish in the Federal Register the policies and procedures which are necessary to implement the transfer of functions made under section 516.

ALLOTMENT FORMULA

SEC. 518. (a) The Secretary shall establish, by regulation adopted in accordance with section 528, a formula for determining the minimum annual amount of funds necessary to sustain each Bureau or contract school. In establishing such formula, the Secretary shall consider—

(1) the number of Indian students served and size of the school;

(2) special cost factors, such as—

(A) isolation of the school;

(B) need for special staffing, transportation, or educational programs;

(C) food and housing costs;

(D) overhead costs associated with administering contracted education functions; and

(E) maintenance and repair costs associated with the physical condition of the educational facilities;

(3) the cost of providing academic services which are at least equivalent to those provided by public schools in the State in which the school is located;

(4) the cost of bringing the school up to the level of the standards established under sections 511 and 512; and

(5) such other relevant factors as the Secretary determines are appropriate.

(b) Notwithstanding any other provisions of law, Federal funds appropriated for the general local operation of Bureau and contract schools, shall be allotted pro rata in accordance with the formula established under subsection (a), except that, in the case of any such school which is located in a school district of a local educational agency which receives from Federal funds under other provisions of law an average payment per Indian child attending such school in that district which is higher than the amount which would be received by such Bureau or contract school under such formula for each Indian child attending such school, the payment to be received by that school under this section for each such child shall be equal to such average payment for an Indian child in public school in that district.

(c) Notwithstanding subsection (b), the Secretary may provide funds for the general local operation of Bureau and contract schools where necessitated by cases of emergencies or unforeseen contingencies not otherwise provided for under subsection (b). Whenever the Secretary makes funds available under this subsection, the Secretary shall report such action to the appropriate committees of Congress.

UNIFORM DIRECT FUNDING AND SUPPORT

SEC. 519. (a) Within six months after the date of enactment of this Act, the Secretary shall establish, by regulation adopted in accordance with section 528, a system for the direct funding and support of all Bureau and contract schools. Such system shall allot funds, in accordance with section 518, and shall provide each affected school with notification of its approximate allotment not later than the end of the school year preced-

ing the year for which the allotment is to be made.

(b)(1) In the case of all Bureau schools, allotted funds shall be expended on the basis of local financial plans which shall be prepared by the local school supervisor in active consultation with the local school board for each school, and the local school board for each school shall have the authority to ratify, reject, or amend such financial plan, and expenditures thereunder, and, on its own determination or in response to the supervisor of the school, to revise such financial plan to meet needs not foreseen at the time of preparation of the financial plan. The supervisor of the school may appeal any such action by the local school board to the superintendent for education of the Bureau agency, and the superintendent may, for good cause and in writing to the local school board, overturn the action of the local school board.

(2) A local school board shall have financial plan authority under paragraph (1) unless the tribe affected (or in the case of a school serving several tribes, all the affected tribes), by formal action of the tribal governing body, determines that such board shall not have such authority. In the case of such a determination, the tribal governing body (or in the case of a school serving several tribes, all the affected tribal governing bodies) shall have such authority.

(c) In the exercise of its authority under this section, a local school board may request technical assistance and training from the Secretary, and he shall, to the greatest extent possible, provide such services, and make appropriate provisions in the budget of the Office for such services.

POLICY FOR INDIAN CONTROL OF INDIAN EDUCATION

SEC. 520. It shall be the policy of the Bureau, in carrying out the functions of the Bureau, to facilitate Indian control of Indian affairs in all matters relating to education.

EDUCATIONAL PERSONNEL

SEC. 521. (a)(1) Chapter 51, subchapter III of chapter 53, and chapter 63 of title 5, United States Code, relating to the appointment, promotion, removal, leave, and classification of civil service employees, shall not apply to educators or to education positions (as defined in subsection (m),.

(2) Paragraph (1) shall take effect one year after the date of enactment of this Act.

(b) Not later than the effective date of subsection (a)(2), the Secretary shall prescribe regulations to carry out this section. Such regulations shall govern—

(1) the establishment of education positions,

(2) the establishment of qualifications for educators,

(3) the fixing of basic compensation for educators and education positions,

(4) the appointment of educators,

(5) the discharge of educators,

(6) the entitlement of educators to compensation,

(7) the payment of compensation to educators,

(8) the conditions of employment of educators,

(9) the length of the school year applicable to education positions described in subsection (m)(1)(A),

(10) the leave system for educators, and

(11) such other matters as may be appropriate.

(c) (1) In prescribing regulations to govern the qualifications of educators, the Secretary shall require—

(A)(i) that lists of qualified and interviewed applicants for education positions be maintained in each agency and area office of the Bureau from among individuals who have applied at the agency or area level for an education position or who have applied at the national level and have indicated in such application an interest in working at the agency or area level; and

(ii) that a list of qualified and interviewed applicants for education positions be maintained in the Office from among individuals who have applied at the national level for an education position and who have expressed interest in working in an education position anywhere in the United States;;

(B) that a local school board shall have the authority to waive on a case-by-case basis, any formal education or degree qualifications established by regulation pursuant to subsection (b)(2), in order for a tribal member to be hired in an education position to teach courses on tribal culture and language and that subject to subsection (d)(2)(A), a determination by a school board that such a person be hired shall be followed by the supervisor; and

(C) that it shall not be a prerequisite to the employment of an individual in an education position at the local level that such individual's name appear on the national list maintained pursuant to subsection (c)(1)(A)(ii) or that such individual has applied at the national level for an education position.

(2) The Secretary may authorize the temporary employment in an education position of an individual who has not met the certification standards established pursuant to regulations, if the Secretary determines that failure to do so would result in that position remaining vacant.

(d)(1) In prescribing regulations to govern the appointment of educators, the Secretary shall require—

(A)(i) that educators employed in a school (other than the supervisor of the school) shall be hired by the supervisor of the school unless there are no qualified applicants available, in which case the vacant position shall be filled at the national level from the list maintained pursuant to subsection (c)(1)(A)(ii),

(ii) each school superviser shall be hired by the superintendent for education of the agency office of the Bureau in which the school is located, and

(iii) educators employed in an agency office of the Bureau shall be hired by the superintendent for education of the agency office;

(B) that before an individual is employed in an education position in a school by the supervisor of a school (or, with respect to the position of supervisor, by the appropriate agency superintendent for education), the local school board for the school shall be consulted, and that subject to subsection (d)(2), a determination by the school board that such individual should not be so employed shall be followed by the supervisor (or with respect to the position of supervisor, by the agency superintendent for education); and

(C) that before an individual may be employed in an education position at the agency level, the appropriate agency school board shall be consulted, and that, subject to subsection (d)(3), a determination by such school board that such individual should or should not be employed shall be followed by the agency superintendent for education.

(2)(A) The supervisor of a school may appeal to the appropriate agency superintendent for educaton any determination by the local school board for the school that an individual be employed, or not be employed, in an education position in the school other than that of supervisor. Upon such an appeal, the agency superintendent for education may, for good cause and in writing to the local school board, oveturn the determination o fthe local school board with respect to the employment of such individual.

(B) The superintendent for education of an agency office of the Bureau may appeal to the Director of the Office any determination by the local school board for a school that an individual be employed, or not be employed, as the supervisor of the school. Upon such an appeal, the Director of the Office may, for good cause and in writing to the local school board, overturn the determination of the local school board with respect to the employment of such individual.

(3) The superintendent for education of and agency office of the Bureau may appeal to the Director of the Office any determination by the agency school board that an individual be employed, or not be employed, in an education position in such agency office. Upon such an appeal, the Director of the Office may, for good cause and in writing to the agency school board, overturn the determination of the agency school board with respect to the employment of such individual.

(4) Any individual who applies at the local level for an education position shall state on such individual's application whether or not such individual has applied at the national level for an education position in the Bureau. If such individual is employed at the local level, such individual's name shall immediately be forwarded to the Secretary, who shall, as soon as possible but in no event in more than thirty days, ascertain the accuracy of the statement made by such individual pursuant to the first sentence of this subparagraph. If the individual's statement is found to have been false, such individual, at the Secretary's discretion, may be disciplined or discharged. If the individual had applied at the national level for an education position in the Bureau, the appointment of such individual at the local level shall be conditional for a period of ninety days, during which period the Secretary may appoint a more qualified individual (as determined by the Secretary) from the list maintained at the national level pursuant to subsection (c)(1)(A)(ii) to the position to which such individual was appointed.

(5) Except as expressly provided, nothing in this section shall be construed as conferring upon local school boards, authority over, or control of, educators.

(e)(1) In prescribing regulations to govern the discharge and conditions of employment of educators, the Secretary shall require—

(A) that procedures be established for the rapid and equitable resolution of grievances of educators; and

(B) that no educator may be discharged without notice of the reasons therefor and opportunity for a hearing under procedures that comport with the requirements of due process.

(2) The supervisor of a Bureau school may discharge (subject to procedures established under subsection (e)(1)(B)) for cause (as determined under regulations prescribed by the Secretary) any educator employed in such school. Upon giving notice of proposed discharge to an educator, the supervisor involved shall immediately notify the local school board for the school of such action. A determination by the local school board that such educator not be discharged shall be followed by the supervisor. The supervisor shall have the right to appeal such action to the superintendent for education of the appropriate agency office of the Bureau. Upon such an appeal, the agency superintendent for education may, for good cause and in writing to the local school board, overturn the determination of the local school board with respect to the employment of such individual.

(3) each local school board for a Bureau school shall have the right (A) to recommend to the supervisor of such school that an educator employed in the school be discharged, and (B) to recommend to the superintendent of education of the appropriate agency office of the Bureau and to the Direc-

tor of the Office, that the supervisor of the school be discharged.

(f) Subject to the authority of the Civil Service Commission to determine finally the applicability of chapter 51 of title 5, United States Code, to specific positions and employees in the executive branch, the Secretary shall determine in accordance with subsection (a)(1) the applicability or inapplicability of such chapter to positions and employees in the Bureau.

(g)(1) The Secretary shall fix the basic compensation or annual salary rate for educators and education positions at rates comparable to the rates in effect under the General Schedule for individuals with comparable qualifications, and holding comparable positions, to whom chapter 51 is applicable.

(2) Each educator employed in an education position in Alaska shall be paid a cost-of-living allowance equal to 25 per centum of the rate of basic compensation to which such educator is entitled.

(3) The Secretary may pay a postdifferential not to exceed 25 per centum of the rate of basic compensation, on the basis of conditions of environment or work which warrant additional pay as a recruitment and retention incentive.

(h) Any individual—

(1) who on the date of enactment of this Act is holding a position which is determined under subsection (f) to be an education position and who elects under subsection (n)(2) to be covered under the provisions of this section, or

(2) who is an employee of the Federal Government or the municipal government of the District of Columbia and is transferred, promoted, or reappointed, without break in service, from a position under a different leave system to an education position,

shall be credited for the purposes of the leave system provided under regulations prescribed pursuant to subsection (b)(10), with the annual and sick leave to his credit immediately before the effective date of such election, transfer, promotion, or reappointment.

(i) Upon termination of employment with the Bureau, any annual leave remaining to the credit of an individual within the purview of this section shall be liquidated in accordance with sections 5551(a) and 6306 of title 5, United States Code, except that leave earned or included under regulations prescribed pursuant to subsection (b)(10) shall not be so liquidated.

(j) In the case of any educator who is transferred, promoted, or reappointed, without break in service, to a position in the Federal Government under a different leave system, any remaining leave to the credit of such person earned or credited under the regulations prescribed pursuant to subsection (b)(10) shall be transferred to his credit in the employing agency on an adjusted basis in accordance with regulations which shall be prescribed by the Civil Service Commission.

(k) An educator who voluntarily terminates employment with the Bureau before the expiration of the existing employment contract between such educator and the Bureau shall not be eligible to be employed in another education position in the Bureau during the remainder of the term of such contract.

(l) In the case of any educator employed in an education position described in subsection (m)(1)(A) who—

(1) is employed at the close of a school year,

(2) agrees in writing to serve in such a position for the next school year, and

(3) is employed in another position during the recess period immediately preceding such next school year, or during such recess period receives additional compensation referred to in subsection (g)(2) or (g)(3), section 5533 of title 5, United States Code, relating to dual compensation, shall not apply to such educator by reason of any such employment during a recess period for any such receipt of additional compensation.

(m) For the purpose of this section—

(1) The term "education position" means a position in the Bureau the duties and responsibilities of which—

(A) are performed on a school-year basis principally in a Bureau school and involve—

(i) classroom or other instruction or the supervision or direction of classroom or other instruction;

(ii) any activity (other than teaching) which requires academic credits in educational theory and practice equal to the academic credits in educational theory and practice required for a bachelor's degree in education from an accredited institution of higher education; or

(iii) any activity in or related to the field of education notwithstanding that academic credits in educational theory and practice are not a formal requirement for the conduct of such activity; or

(B) are performed at the agency level of the Bureau and involve the implementation of education-related programs other than the position of agency superintendent for education.

(2) The term "educator" means an individual whose services are required, or who is employed, in an education position.

(n)(1) This section shall apply with respect to any individual hired after the effective date of subsection (a)(2) for employment in an education position and to the position in which such individual is employed. Subject to paragraph (2), the enactment of this Act shall not affect the continued employment of any individual employed immediately before the effective date of subsection (a)(2) in an education position, or such individual's right to receive the compensation attached to such position.

(2) Any individual employed in an education position immediately before the effective date of subsection (a)(2) may, within five years of the date of enactment of this Act, make an irrevocable election to be covered under the provisions of this section.

MANAGEMENT INFORMATION SYSTEM

SEC. 522. The Secretary shall establish within the Bureau, within one year after the date of the enactment of this Act, a management information system, which shall provide information to all agency and area offices of the Bureau, and to the Office. Such information shall include but shall not be limited to—

(1) student enrollment;

(2) curriculum;

(3) staff;

(4) facilities;

(5) community demographics; and

(6) student assessment information.

BUREAU EDUCATION POLICIES

SEC. 523. Within one hundred and eighty days of the date of enactment of this Act, the Secretary shall develop, publish in the Federal Register, and submit to all agency and area offices of the Bureau, all tribal governments, and the appropriate committees of the Congress, a draft set of education policies, procedures, and practices for education-related action of the Bureau. The Secretary shall, within one year of the date of enactment of this Act, provide that such uniform policies, procedures, and practices shall be finalized and promulgated. Thereafter, such policies, procedures, and practices and their periodic revisions, shall serve as the foundation for future Bureau actions in education.

UNIFORM EDUCATION PROCEDURES AND PRACTICES

SEC. 524. The Secretary shall cause the various divisions of the Bureau to formulate uniform procedures and practices with respect to such concerns of those divisions and relate to education, and shall report such practices and procedures to the Congress.

RECRUITMENT OF INDIAN EDUCATORS

SEC. 525. The Secretary shall institute a policy for the recruitment of qualified Indian educators and a detailed plan to promote employees from within the Bureau. Such plan shall include opportunities for acquiring work experience prior to actual work assignment.

ANNUAL REPORT

SEC. 526. The Secretary shall submit to each appropriate committee of the Congress a detailed annual report on the state of education within the Bureau and any problems encountered in the field of education during the year. Such report shall contain suggestions for improving the Bureau educational system and increasing local Indian control of such system.

RIGHTS OF INDIAN STUDENTS

SEC. 527. Within six months of the date of enactment of this Act, the Secretary shall prescribe such rules and regulations as are necessary to ensure the constitutional and civil rights of Indian students attending Bureau schools, including their right to privacy under the laws of the United States, their right to freedom of religion and expression and their right to due process in connection with disciplinary actions, suspensions, and expulsions.

REGULATIONS

SEC. 528. Regulations required to be adopted under sections 516 through 527 of this Act shall be deemed rules of general applicability prescribed for the administration of an applicable program for the purposes of section 431 of the General Education Provisions Act and shall be promulgated, submitted for congressional review, and take effect in accordance with the provisions of such section.

DEFINITIONS

SEC. 529. For the purpose of this title—

(1) the term "local educational agency" means a board of education or other legally constituted local school authority having administrative control and direction of free public education in a county, township, independent, or other school district located within a State, and includes any State agency which directly operates and maintains facilities for providing free public education;

(2) the term "Commissioner" means the Commissioner of Education;

(3) the term "Secretary" means the Secretary of the Interior;

(4) the term "Bureau" means the Bureau of Indian Affairs of the Department of the Interior;

(5) the term "local school board", when used with respect to a Bureau school, means a body, the members of which are appointed by the governing bodies of any affected tribes, or if so designated by such tribes, elected by the parents of the Indian children attending the school; and the number of such members shall be determined by the Secretary in consultation with such tribes;

(6) the term "agency school board", means a body, the members of which are appointed by the governing bodies of any affected tribes, or if so designated by such tribes, elected by the parents of the Indian students in Bureau schools under such agency; and the number of such members shall be determined by the Secretary in consultation with such tribes;

(7) the term "supervisor" means the individual in the position of ultimate authority at a Bureau school;

(8) the term "financial plan" means a plan of services to be provided by each Bureau school;

(9) the term "Indian organization" means any group, association, partnership, corpo-

ration, or other legal entity owned or controlled by a federally recognized Indian tribe or tribes, or a majority of whose members are members of federally recognized Indian tribes; and

(10) the term "tribe" means any Indian tribe, band, nation, or other organized group or community, including any Alaska Native village or regional or village corporation as defined in or established pursuant to the Alaska Native Claims Settlement Act (85 Stat. 688) which is recognized as eligible for the special programs and services provided by the United States to Indians because of their status as Indians.

PART C—AMENDMENTS TO VARIOUS EDUCATION ACTS

EXTENSION OF PROGRAMS FOR THE EDUCATION OF INDIAN CHILDREN

SEC. 531. (a) Section 810 (g) of the Elementary and Secondary Education Act of 1965 is amended by striking out "July 1, 1978" and inserting in lieu thereof "October 1, 1983".

(b) Section 303 (a) (1) of the Act of September 30, 1950 (Public Law 874, Eighty-first Congress) as added by the Indian Education Act, is amended by striking out "October 1, 1978" and inserting in lieu thereof "October 1, 1983".

(c) (1) Section 422 of the Indian Education Act is amended by striking out "each of the three succeeding fiscal years" and inserting in lieu thereof "each of the succeeding fiscal years ending prior to October 1, 1983".

(2) Section 423 (a) of such Act is amended by striking out "each of the three succeeding fiscal years" and inserting in lieu thereof "each of the succeeding fiscal years ending prior to October 1, 1983".

(3) Section 442 (a) of such Act is amended by striking out "October 1, 1978" and inserting in lieu thereof "October 1, 1983".

CULTURALLY RELATED ACADEMIC NEEDS

SEC. 532. (a) Section 302(a) of the Indian Elementary and Secondary School Assistance Act is amended—

(1) by striking out "special educational needs of Indian students" and inserting in lieu thereof "special educational and culturally related academic needs of Indian students"; and

(2) by striking out "these special educational needs" and inserting in lieu thereof "these special educational or culturally related academic needs, or both".

(b) Section 304 of such Act is amended by striking out "special educational needs" each place it appears in paragraphs (1) and (2) and inserting in lieu thereof "special educational or culturally related academic needs, or both".

DEMONSTRATION PROJECTS

SEC. 533. Section 303 of the Indian Elementary and Secondary School Assistance Act is amended by adding at the end thereof the following new subsection:

"(c) In addition to the sums appropriated for any fiscal year for grants to local educational agencies under this title, there is hereby authorized to be appropriated for any fiscal year an amount not in excess of 10 percentum of the amount appropriated for payments on the basis of entitlements computed under subsection (a) for that fiscal year, for the purpose of enabling the Commissioner to make grants on a competitive basis to local educational agencies to support demonstration projects and programs which are designed to plan for and improve education opportunities for Indian children, except that the Commissioner shall reserve a portion not to exceed 25 per centum of such funds to make grants for demonstration projects examining the special educational and culturally related academic needs that arise in school districts with high concentrations of Indian children.".

PARENT COMMITTEES

SEC. 534. Section 305(b) of the Indian Elementary and Secondary School Assistance Act is amended—

(1) by inserting "(including persons acting in loco parentis other than school administrators or officials)" after "Indian children" in paragraph (2)(B)(i) and after "children participating in the program" in paragraph (2)(B)(ii);

(2) by inserting ", including the hiring of personnel," after "policies and procedures" in parag.aph (2)(C); and

(3) by striking out the period at the end of paragraph (2)(C) and inserting in lieu thereof a semicolon and by adding at the end thereof the following new paragraph:

"(3) provides that the parent committee formed pursuant to paragraph (2)(B)(ii) will adopt and abide by reasonable by-laws for the conduct of the program for which assistance is sought.".

ALLOCATION ADJUSTMENTS

SEC. 535. Section 307(b) of the Indian Elementary and Secondary School Assistance Act is amended to read as follows:

"(b) In the case of any fiscal year in which the maximum amounts for which local educational agencies are eligible have been reduced under the first sentence of subsection (a), and in which additional funds have not been made available to pay in full the total of such maximum amounts under the second sentence of such subsection, the Commissioner may reallot, in such manner as he determines will best assist in advancing the purposes of this title, any amount awarded to a local education agency in excess of the amount to which it is entitled under section 303(a) and subsection (a) of this section, or any amount which the Commissioner determines, based upon estimates made by local education agencies, will not be needed by any such agency to carry out its approved project.".

TRIBAL SCHOOLS

SEC. 536. Notwithstanding any other provisions of law, any Indian tribe or organization which is controlled or sanctioned by an Indian tribal government and which operates any school for the children of that tribe shall be deemed to be a local educational agency for purposes of section 303(a) of the Indian Elementary and Secondary School Assistance Act (title III of Public Law 874, Eighty-first Congress) if each such school, as determined by the Commissioner, operated by that tribe or organization provides its students an educational program which meets the standards established under section 111 for the basic education of Indian children, or is a school operated under contract by that tribe or organization in accordance with the provisions of the Indian Self-Determination and Education Assistance Act.

AMENDMENTS TO TITLE VIII OF THE ELEMENTARY AND SECONDARY EDUCATION ACT OF 1965

SEC. 537. (a) Section 810(c)(1)(E) of the Elementary and Secondary Education Act of 1965 is amended by inserting "and gifted and talented Indian children" after "handicapped".

(b)(1) Section 810(c)(1)(F) of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"(F) early childhood programs, including kindergarten;".

(2)(A) Section 810(d) of the Elementary and Secondary Education Act of 1965 is amended—

(i) by striking out "children" in paragraphs (1) and (2) of such section and by inserting in lieu thereof "students" each time it appears; and

(ii) by inserting after "teachers" a comma and the following "administrators".

(B) The section heading of section 810 of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"IMPROVEMENT OF EDUCATIONAL OPPORTUNITIES FOR INDIAN STUDENTS"

(c) Section 810 (e) of the Elementary and Secondary Education Act of 1965 is amended to read as follows:

"(e)(1) The Commissioner is also authorized to make grants to and contracts with public agencies, State educational agencies in States in which more than five thousand Indian children are enrolled in public elementary and secondary schools, Indian tribes, Indian institutions, Indian organizations, or to make contracts with private institutions and organizations, to establish, on a regional basis, information centers to—

"(A) evaluate programs assisted under this part, under the Indian Elementary and Secondary School Assistance Act, under section 316 of the Adult Education Act, and other Indian education programs in order to determine their effectiveness in meeting the special educational and culturally related academic needs of Indian children and to conduct research to determine those needs;

"(B) provide technical assistance upon request to local educational agencies and Indian tribes, Indian organizations, Indian institutions, and parent committees created pursuant to section 305 (b) (2) (B) (ii) of the Indian Elementary and Secondary School Assistance Act in evaluating and carrying out programs assisted under this part, under section 316 of the Adult Education Act through the provision of materials and personnel resources; and

"(C) disseminate information upon request to the parties described in subparagraph (B) concerning all Federal education programs which affect the education of Indian children including information on successful models and programs designed to meet the special educational needs of Indian children.

"(2) Grants or contracts made pursuant to this subsection may be made for a term not to exceed three years (renewable at the end of that period subject to the approval of the Commissioner) provided that provision is made to ensure annual review of the projects.".

(d) Section 810 (f) of the Elementary and Secondary Education Act of 1965 is amended by inserting "(1)" after "(f)", by redesignating clauses (1), (2), (3) and (4) as clauses (A), (B), (C), and (D) respectively, and by adding at the end thereof the following:

"(2) The Commissioner shall not approve an application for a grant under subsection (e) of this section unless he is satisfied that the funds made available under that subsection will be so used as to supplement the level of funds from State, local, and other Federal sources that would, in the absence of Federal funds under this subsection, be made available by the State or local educational agency for the activities described in this subsection, and in no case will be used so as to supplant those funds.".

(e) Section 810(g) of the Elementary and Secondary Education Act of 1965 is amended by inserting "(1)" after "(g)" and by adding at the end thereof the following:

"(2) For the purpose of making grants under subsection (e) of this section there are hereby authorized to be appropriated $8,000,000 for each of the fiscal years ending prior to October 1, 1983. The sum of the grants made to State educational agencies under subsection (e) of this section shall not exceed 15 per centum in any fiscal year of the sums appropriated for that year.".

(f) Section 306(a) of the Indian Elementary and Secondary School Assistance Act is

amended by inserting "estimated to be" after "equal to the amount".

TEACHER TRAINING AND FELLOWSHIPS

SEC. 538. (a) The first sentence of section 422(a) of the Indian Education Act is amended by striking out "children" and inserting in lieu thereof "people".

(b) Section 423(a) of the Indian Education Act is amended—

(1) by striking out "less than three, nor"; and

(2) by striking out "professional or graduate degree in engineering, medicine, law, business, forestry, and related field" and inserting in lieu thereof "postbaccalaureate degree in medicine, law, education, and related fields or leading to an undergraduate or graduate degree in engineering, business administration, natural resources, and related fields.".

On page 20, in the Table of Contents, strike out part B and item section 321.

On page 20, in the Table of Contents, redesignate part C as part B.

On page 21, in the Table of Contents, insert after item Sec. 409, the following:

TITLE V—INDIAN EDUCATION

PART A—ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES

Sec. 501. Amendment to Public Law 874.

PART B—BUREAU OF INDIAN AFFAIRS PROGRAMS

Sec. 511. Standards for the basic education of Indian children in Bureau of Indian Affairs schools.
Sec. 512. National criteria for dormitory situations.
Sec. 513. Regulations.
Sec. 514. Studies.
Sec. 515. Facilities construction.
Sec. 516. Bureau of Indian Affairs education functions.
Sec. 517. Implementation.
Sec. 518. Allotment formula.
Sec. 519. Uniform direct funding and support.
Sec. 520. Policy for Indian control of Indian education.
Sec. 521. Educational personnel.
Sec. 522. Management information system.
Sec. 523. Bureau education policies.
Sec. 524. Uniform education procedures and practices.
Sec. 525. Recruitment of Indian educators.
Sec. 526. Annual report.
Sec. 527. Rights of Indian students.
Sec. 528. Regulations.
Sec. 529. Definitions.

PART C—AMENDMENTS TO VARIOUS EDUCATION ACTS

Sec. 531. Extension of programs for the education of Indian children.
Sec. 532. Culturally related academic needs.
Sec. 533. Demonstration projects.
Sec. 534. Parent committees.
Sec. 535. Allocation adjustments.
Sec. 536. Tribal schools.
Sec. 537. Amendments to title VIII of the Elementary and Secondary Education Act of 1965.
Sec. 538. Teacher training and fellowships.

Amendment No. 3520

On page 352, between lines 15 and 16, insert the following:

"SEC. 311. (a) (1) Section 314(a) (4) of the Act (as redesignated by section 307) is amended by striking out "on Indian reservations" and inserting in lieu thereof "among Indians".

"(2) Section 314 of the Act (as redesignated by section 307) is amended by redesignating subsections (b), (c), and (d) as subsections (c), (d), and (e), respectively, and by inserting immediately after subsection (a) the following new subsection:

"(b) The Commissioner is also authorized to make grants to Indian tribes, Indian institutions and Indian organizations to develop and establish educational services and programs specifically designed to improve educational opportunities for Indian adults."

On page 352, line 16, strike out "Sec. 311." and insert in lieu thereof "(b)".

On page 352, line 16, strike out "(d)" and insert in lieu thereof "(e)".

SECTION-BY-SECTION ANALYSIS

PART A—ASSISTANCE TO LOCAL EDUCATIONAL AGENCIES

Amends P.L. 81–874 (Impact Aid) by establishing a new method of computing entitlements and making payments for children educated in public schools who live on Federal Indian trust property, and by conditioning the payment of such entitlements on the establishment by local school districts of policies and procedures which will ensure the equal participation of Indian children in educational programs and the increased participation of the parents of Indian students and of Indian tribes in the education process.

Section 501(a) amends section 3 of the Act by adding a new paragraph 3(d)(2)(D) under which the entitlement for an Indian "A" child would be an amount equal to the regular entitlement for an "A" child times 125 per centum.

Section 501(b) repeals section 5(a)(2) of the Act. This section, added in 1974, requires local educational agencies, as a part of their application for impact aid funds, to provide assurances that Indian children will participate on an equal basis with non-Indian children in educational programs. The need for this section is superseded by the addition of strengthened provisions under the amendment to section 5(d) below.

Section 501(c) amends sections 5(b) of the Act. Under the amendment, payment of entitlements under section 3(d)(2)(D) shall be made only to local educational agencies (LEA's) which have established policies and procedures to guarantee that (1) Indian children will participate on an equal basis in educational programs, (2) applications, evaluations, and program plans are adequately disseminated to tribes and parents of Indian children, and (3) tribes and parents are afforded an opportunity to make recommendations concerning the needs of Indians students, are actively consulted and involved in the planning and development of educational programs, and have the opportunity to present their overall views on the educational program and the degree of parental participation. The amendment also provides an administrative complaint process whereby the tribe, or its designee, may seek remediation of any action taken by an LEA pursuant to or relevant to the above requirements. If, after the complaint procedure, the Commissioner determines that remedial action by the LEA is required and if the LEA does not undertake the remedial action as required, the Commissioner is required to withhold payments of entitlements under section 3(d)(2)(D) until such time as the remedial action is undertaken, unless the complaining tribe, or its designee, formally requests release of the funds to the LEA.

Section 501(d) amends section 5(c)(2) of the Act to provide that in case appropriations are not sufficient to pay the total amount of entitlements under the Act, an LEA will receive 75% of the amount of its entitlement under section 3(d)(2)(D) in the second tier P.L. 874 payments, effectively guaranteeing 100% payments to schools for all Indian children.

PART B—BUREAU OF INDIAN AFFAIRS EDUCATIONAL PROGRAMS

Section 511 provides for the establishment of standards for the basic education of Indian children in Federal Indian schools.

Under section 511(a), the studies and surveys necessary to establish these standards are to be undertaken by the Secretary of the Interior (Secretary) within the Bureau or by contract with an Indian organization and in consultation with the Assistant Secretary of HEW and Indian tribes and organizations. The studies will take into account academic needs, local cultural differences, type and level of language skills, geographic isolation, and appropriate teacher-student ratios for Indian children, and will be directed toward the attainment of equal educational opportunity for Indian children.

Under section 511(b), the Secretary is required to establish proposed standards based on these studies within fifteen months and to distribute the proposed standards to tribes and other parties for comment. Within eighteen months, the Secretary is required to establish final standards, to distribute and publish the standards, and to revise the basic standards as necessary (after notice and comment from the tribes and interested parties). The basic standards will apply to BIA schools, as modified by subsections (c) and (d), and to Indian schools under contract with BIA, subject to subsection (e).

Subsection (c) provides for modified standards where necessary to meet minimum standards required for accreditation of schools by the State within which the school is located.

Subsection (d) gives Indian tribes, or local school boards if so designated by the tribe, the authority to modify the basic standards to take into account specific needs of the tribe's students, subject to the final authority of the Secretary to approve modified standards.

Subsection (e) provides for the implementation of the basic standards in contract schools to the extent requested by the contract school board.

Subsection (f) provides for the speedy implementation of the basic standards in conjunction with a detailed implementation plan which will be submitted annually to Congress indicating the progress made toward implementation of the standards in each Bureau and contract school, the cost estimate for implementing the standards, and a schedule for complete implementation.

Subsection (g) authorizes the appropriation of such sums as are necessary to implement the academic program required under the basic standards.

Section 512 requires the Secretary, through BIA or by contract with an Indian organization, and in consultation with the Assistant Secretary for HEW and with Indian tribes and organizations, to conduct a study for the purpose of developing national criteria to govern dormitory situations in Bureau and contract schools. The criteria are to be established after notice and comment by the tribes and other interested parties within eighteen months and in the same manner as the standards established under section 511. The criteria must include requirements as to adult-child ratios, needs for counselors, space, and privacy and will apply to dormitory situations in Bureau and contract schools. The Secretary will implement the criteria in conjunction with a detailed implementation plan submitted annually to Congress. Such sums as are necessary to implement the criteria are authorized to be appropriated.

Section 513 requires the Secretary to establish within eighteen months regulations to carry out the studies and implement the standards and criteria established under sections 111 and 112.

Section 514 provides an authorization of up to $1 million for any one fiscal year to conduct the studies under sections 111 and 112.

Section 515(a) mandates the Secretary to bring all schools, dormitories, and facilities operated by or under contract with the BIA which are related to the education of Indian children, into compliance with all applicable Federal, Tribal or State health and safety laws (whichever provides the greatest protection) and with section 504 of the Vocational

Rehabilitation Act, but facilities now in use which are not in compliance are not required to be closed.

Section 515(b) requires the Secretary to transmit to Congress an annual report of the present status and projected costs for compliance.

Section 515(c) requires the Secretary to submit to Congress the system used to establish construction priorities for Bureau schools, along with current lists of those priorities.

Section 515(d) authorizes the appropriations of such sums as are necessary to bring Bureau and contract school facilities into compliance with the health and safety laws under subsection (a).

Section 516 reorganizes the responsibility for education within the Bureau of Indian Affairs. Primary responsibility for the formulation of educational policy and expenditure of funds for education at the present time is under the Area Directors.

Under section 516(a) the functions, powers, and duties of the Secretary with respect to the operation and supervision of Indian education would be carried out by an Assistant Secretary for Indian Affairs or the Director of the Bureau's Office of Indian Education Programs, subject to the authority of the Assistant Secretary for Indian Affairs and the Secretary, and through Bureau employees under the supervision and control of the Director.

Under section 516(b), all Bureau personnel involved with the provisions of educational services are placed under the direction and supervision of the Director. However, separate support services for education are not intended.

The responsibilities of education personnel in the agency and area offices are set forth in section 516(c).

Under Section 517, the Secretary is required to implement the transfer of responsibility for education programs under 516 by regulation within six months.

Section 518 and 519 provide for the uniform funding and support of Bureau and contract schools in accordance with a formula based upon the minimum annual amount of funds necessary to sustain each Bureau or contract school. The allotment formula will take into consideration factors including, but not limited to, (1) the number of Indian students served and size of the school, (2) special cost factors involved in the operation of the school, (3) the cost of providing academic services which are at least equivalent to those provided by public schools in the State in which the school is located, and (4) the cost of bringing the school up to the level of the standards established under sections 511 and 512. Each school is to be allotted the same proportion of the funds appropriated for the general local operation of Bureau and contract schools as its minimum need (determined under the above formula) bears to the total minimum need for all schools. However, in the case of a school located in a school district containing a public school which receives from Federal funds under other provisions of law an average payment per Indian student which is higher than the Bureau or contract school's per student allotment, the school's allotment per student will be equal to the average payment per Indian student received by the public school.

In addition, the Secretary is authorized to provide for necessary funding for schools in case of emergencies or unforeseen contingencies not otherwise provided for by these sections. The allotted funds will be paid directly to Bureau and contract schools and expended in the case of Bureau schools, on the basis of a local financial plan. The financial plan is to be prepared by the local school supervisor in active consultation with the local school board (or the affected tribe(s)). The local board (or affected tribe(s)) has authority to ratify, revise, or reject the plan, unless the agency superintendent for education overturns, in writing and for good cause, the local school board's decision. In the exercise of their authority under section 519, local school boards may request and receive necessary technical assistance and training from the Bureau.

Section 520 re-emphasizes the intent of the Indian Self-Determination and Education Assistance Act and would direct that the Bureau support efforts taken by Indians toward self-determination or control over their education programs.

Section 521 provides that the competitive service provisions of the civil service laws (Title 5, United States Code) shall be inapplicable to persons employed in education positions within the Bureau after twelve months of enactment of this Act. Persons employed in education positions prior to the effective date would not be affected unless they elect inclusion under subsection (n) within five years of the date of enactment of this Act. Civil service retirement and employee benefits would not be affected in any way by the Act. Not later than the effective date of section 521(a), the Secretary is required to prescribe regulations governing the employment of persons in education positions within the Bureau including (1) the establishment of education positions, (2) the establishment of qualifications for educators, (3) the fixing of basic compensation for educators and education positions, (4) the appointment of educators, (5) the discharge of educators, (6) the entitlement of educators to compensation (7) the payment of compensation to educators, (8) the conditions of employment of educators, (9) the length of the school year applicable to education positions, (10) the leave system for educators, and (11) such other matters as may be appropriate.

Under section 521(c), a local school board may waive any formal degree qualifications established by the Secretary under section 521(b) in order for a tribal member to be hired to teach tribal culture and language. The Secretary may also authorize the temporary employment of educators not meeting the qualifications established under regulation where failure to do so would result in the position remaining vacant.

Under section (d), the local and agency school boards are given a voice in the hiring of educators at the local and agency levels. Local school supervisors are generally responsible for hiring educators in the Bureau schools, in consultation with the local school boards. However, the local school board's decision on the hiring of educators in the school is final, unless the agency superintendent for education overturns, in writing and for good cause, the local school board's determination. Similar procedures apply with respect to the hiring of local school supervisors and agency education personnel.

Under section 521(e), educators may be discharged only after notice and opportunity for a hearing. The local school supervisor may discharge educators employed in Bureau schools for cause (and in compliance with due process) only after giving notice to the local school board. The local school board has final authority to prevent the discharge, unless the agency superintendent for education overturns, in writing and for good cause, the local school board's decision.

Under section 521(f), subject to the Civil Service Commission's final authority to determine the applicability of the competitive service laws to specific positions and employees, the Secretary shall determine which positions within the Bureau are education positions covered by this Act.

Section 521(g) requires the Secretary to fix the basic compensation for education positions under this Act at rates comparable to the rates under the General Schedule for comparable positions under the competitive service classification, provides for an additional cost-of-living allowance for educators employed in Alaska, and authorizes a post differential not to exceed 25 per centum of the basic compensation.

Section 521(h) through 521(j) are transfer provisions protecting accrued employee leave rights.

Section 521(k) prevents an educator who voluntarily terminates employment with the Bureau before the expiration of his or her employment contract from being employed in another education position in the Bureau during the remainder of the term of the contract.

Section 521(l) makes section 5533 of Title 25, prohibiting Federal employees from receiving dual compensation, inapplicable to educators receiving additional compensation under subsection (g) or receiving compensation from outside employment during summer recess.

Section 521(m) defines the terms "educator" and "education position."

Section 522 requires the Secretary to establish a management information system including student enrollment, curriculum, staff, facilities, community demographics, and student assessment information with respect to the Bureau's education programs.

Section 523 requires the Secretary to promulgate, after dissemination to Congress, the tribes, and interested parties, policies, practices, and procedures to govern education-related action by the Bureau.

Section 524 requires the various divisions of the Bureau to establish uniform practices and procedures with respect to the concerns of those divisions which relate to education.

Section 525 requires the Secretary to institute a policy for the recruitment of Indian educators.

Section 526 requires the Secretary to submit an annual report on Indian education to the Congress.

Section 527 requires the Secretary to prescribe rules and regulations necessary to ensure the civil and constitutional rights of Indian students.

Section 528 provides that regulations required to be adopted under sections 116 through 117 shall be promulgated, submitted for congressional review, and take effect in accordance with the provisions of section 431 of the General Education Provisions Act.

Section 529 contains definitions of terms used in the Act.

PART C—AMENDMENTS TO VARIOUS EDUCATION ACTS

Section 531 provides for a simple five year extension of various Indian education programs administered by DHEW.

Section 532 adds "culturally related academic needs" to the needs to be addressed by LEA's with funds received under this part.

Section 533 provides authorization for the development of demonstration projects.

Section 534 provides that those persons serving in the role of "parent" (in loco parentis) will be eligible to serve on advisory committees overseeing the functioning of these programs. This section also grants additional input to the advisory committees into the hiring of personnel paid for with Indian Education Act funds and requires advisory committees to adopt and abide by by-laws.

Section 535 allows adjustments in the allocation of funds under this program where the funding would otherwise revert back to the U.S. Treasury unused.

Section 536 qualifies contract and alternative schools for the entitlement program funded under the Indian Education Act, as well as the 10 percent set aside competitive program.

Section 537 amends Title VIII in order to

improve the educational opportunities of Indian students.

Section 538 amends Title IV of the Indian Education Act for the purpose of clarification.

EXCISE TAX ON CERTAIN TRUCKS, BUSES, TRACTORS, ETC.—H.R. 1337

AMENDMENT NO. 3521

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to H.R. 1337, an act to amend the Internal Revenue Code of 1954 with respect to excise tax on certain trucks, buses, tractors, et cetera.

STATE-TAX CREDIT AGAINST FEDERAL SLOT MACHINE TAX

● Mr. LONG. Mr. President, the Internal Revenue Code imposes an annual occupational excise tax on slot machines or other coin-operated gaming devices of $250 per machine. If a State imposes a similar tax, the State tax is credited dollar-for-dollar against the Federal tax, except that under present law, the credit for State tax paid cannot exceed 80 percent of the Federal tax.

The availability of the State-tax credit facilitates the raising of revenues through State taxes on slot machines. Under State law in Nevada, an amount equal to the State-tax credit is used for educational purposes. Under that law, the first $5 million is earmarked for capital improvements in the University of Nevada system, including the community colleges. Funds in excess of $5 million go to the State Distributive School Fund, which, under Nevada law, is the principal mechanism for distributing State assistance to local school districts. If the credit is increased to 95 percent, the additoinal amounts made available would be used for the payment of interest and amortization of principal for construction costs of educational facilities of the University of Nevada.

In light of these considerations, the Finance Committee has concluded that it is desirable to raise the limitation on the State-tax credit from 80 to 95 percent of the Federal tax. The increased limitation will apply for years ending June 30, 1979, and June 30, 1980.

In addition, the committee amendment I am submitting today repeals the Federal occupational tax on slot machines, et cetera (imposed by section 4461 of the Code) for years beginning after June 30, 1980. The Treasury Department does not oppose repeal of the tax in view of the increase in the maximum State-tax credit made by the amendment.●

REVENUE LAW TIMING REQUIREMENTS—H.R. 7320

AMENDMENT NO. 3522

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to H.R. 7320, an act to revise miscellaneous timing requirements of the revenue laws, and for other purposes.

PUBLIC CHARITY STATUS OF CERTAIN LONG-TERM CARE ORGANIZATIONS

Mr. LONG. Mr. President, this committee amendment I am submitting today excludes from private foundation status, for purposes of the foundation excise tax rules and the charitable deduction income tax rules, certain tax-exempt charitable organizations which have continuously operated since May 26, 1969, facilities for the long-term care of elderly persons, needy widows, children, or permanently and totally disabled persons.

The Internal Revenue Code defines the term "private foundation" to mean any charitable, educational, religious, or other organization described in section 501(c)(3), other than certain specified categories of organizations. These categories (known as "public charities") include churches, schools, hospitals, or certain medical research organizations, certain other organizations which receive specified "public" support, and organizations which are "supporting" organizations to other public charities. For this purpose, under Treasury regulations, the term "hospital" does not include "convalescent homes or homes for children or the aged, nor does the term include institutions whose principal purpose or function is to train handicapped individuals to pursue some vocation." Thus under present law, a privately endowed long-term care organization (such as an orphanage) may not qualify as a public charity.

Public charities are not subject to the private foundation excise taxes. In general, the rules relating to income tax deductions by individuals for contributions to public charities or to private operating foundations are more favorable to the donor than the rules relating to the deductibility of contributions to private nonoperating foundations."

The Finance Committee has concluded that privately endowed charitable organizations which operate long-term care facilities as their principal functional purpose perform public functions and are subject to public attention to the same extent as privately endowed schools, hospitals, hospital-affiliated medical research organizations, and so forth, which are treated under present law as public charities on the basis of their charitable functions. Also, imposition of the annual foundation excise tax on the net investment income of these organizations reduces the amount of such income available for operation of long-term care facilities.

Accordingly the committee amendment excludes from private foundation status an organization, described in section 501(c)(3) of the Code, which, on or before May 26, 1969, and continuously thereafter to the close of the taxable year, operates and maintains as its principal functional purpose facilities for the long-term care, comfort, maintenance, or education of permanently and totally disabled persons, elderly persons, needy widows, or children. The amendment applies retroactively to January 1, 1970.

It is understood that the committee amendment would benefit the Sand Springs Home in Oklahoma and approximately 26 other identified homes around the country. Any other long-term care organization meeting the requirements of the amendment also would be treated under the amendment as a public charity, but only if the organization has operated qualifying long-term care facilities continuously since May 26, 1969.

REVOCATION OF ELECTION OF RETIRED PAY FOR TAX COURT JUDGES—H.R. 8811

AMENDMENT NO. 3523

(Ordered to be printed and to lie on the table.)

Mr. LONG submitted an amendment intended to be proposed by him to H.R. 8811 an act to amend sec. 7447 of the Internal Revenue Code of 1954 with respect to the revocation of an election to receive retired pay as a judge of the Tax Court.

INVOLUNTARY CONVERSION OF SPECIAL USE VALUATION PROPERTY

● Mr. LONG. Mr. President under present law, certain real property used as a farm for farming purposes or in a closely held trade or business may be valued for Federal estate tax purposes by reference to its actual use ("special use valuation"), rather than at its fair market value determined on the basis of highest and best use.

To assure that special use valuation property continues to be used for farming or for other closely held business uses, a recapture rule is provided. In general, this rule results in recapture of the estate tax benefit of the special valuation if the heir disposes of the property or changes its use within 15 years of the death of the decedent (or, if earlier, prior to the death of the heir). The purpose of this recapture rule is to prevent the heir from having the property valued for a special use for estate tax purposes, but then obtaining a higher value by sale or change of use.

Under present law, this recapture rule applies to special use valuation property which is involuntarily converted (such as by condemnation) even if the proceeds of the conversion are reinvested in property used for the same special use.

The Finance Committee has concluded that application of this recapture rule to an involuntary conversion produces an unfair and unnecessarily harsh result in cases where the heir reinvests proceeds in farm or other special use real property. In such a case, the heir's use of the conversion proceeds to acquire property for the same special use is consistent with the basic policy of the recapture rule, and the interruption in the 15-year holding period is not a voluntary act by the heir.

Accordingly the amendment I am submitting today provides that if an involuntary conversion of qualified real property takes place, no recapture of the estate tax benefit will occur if the property is replaced by other real property of at least equal value to be used for the same use. If qualified real property is replaced by property of lesser value, the recapture will apply only in the propor-

tion that the excess of the amount realized in the conversion over the amount reinvested bears to the amount realized on the conversion.

These rules generally give the heir the same time to make a qualified replacement as is permitted under the present income tax involuntary conversion rules; that is, 2 years from the date of the conversion. The amendment also provides that the recapture period (generally, 15 years) will be extended for an additional period equal to the period of any discretionary extensions of time, beyond the normal 2-year period, granted by the IRS for reinvestment. However, any such extension of the recapture period will apply only to the replacement property.

Present law also provides that the basis of "carryover basis property" generally is adjusted by the amount of Federal and State estate and inheritance taxes attributable to appreciation. Although the purpose of the recapture tax is generally to place the estate (and the heir) in essentially the same position as if special use valuation had not been elected, no adjustment is provided under current law for any portion of the recapture tax imposed upon the disposition of special use valuation property.

The Finance Committee has concluded that this result is unduly harsh even in cases where the involuntarily converted property is not fully replaced. Consequently, the amendment provides that if qualified real property subject to an involuntary conversion is carryover basis property, its basis will be increased for Federal income tax purposes in an amount equal to the recapture tax imposed with respect to any appreciation element in the portion of the differential between fair market value and special use value which has been subjected to recapture. These adjustments to basis are to be made on a property-by-property basis.

The following example illustrates the operation of these basis adjustment rules in the case of carryover basis property. Assume that one parcel of special use valuation property is involuntarily converted within the recapture period and that none of the conversion proceeds are reinvested. As of the applicable estate tax valuation date, the fair market value of the property is $1 million and its special use valuation (at which it was included in the decedent's estate) is $700,000. The heir's basis in the property (prior to any adjustment by reason of the involuntary conversion) is $600,000 and the amount of the recapture tax imposed by reason of the involuntary conversion is $129,000. Under these assumptions, all of the recapture tax is attributable to the appreciation element in the differential between the fair market value and the special use value, and thus the basis of the property is increased by $129,000 (from $600,000 to $729,000).

However, if in the example described above, the heir's basis were $800,000 rather than $600,000, then only two-thirds of the recapture tax would be attributable to the appreciation element in this value differential, and the basis of the property would be increased by $86,000 (from $800,000 to $886,000).

The amendment provides that an adjustment resulting from an involuntary conversion is treated as having been made immediately before the property was involuntarily converted. Thus, the adjustment will result in a reduction in the amount of gain (or an increase in the amount of loss) realized on the involuntary conversion.

If the involuntarily converted property is replaced by property of at least equal value to be used for the same use, no recapture tax would be imposed and hence no basis adjustment would be made.

Since this committee amendment would correct technical oversights in the 1976 Tax Reform Act, it would apply to involuntary conversions after December 31, 1976 (the effective date of the estate tax changes for special use property made by the 1976 act).●

DISTRICT OF COLUMBIA REPRESENTATION—HOUSE JOINT RESOLUTION 554

AMENDMENTS NOS. 3524 AND 3525

(Ordered to be printed and to lie on the table.)

Mr. SCOTT (for himself and Mr. WALLOP) submitted two amendments intended to be proposed by him to House Joint Resolution 554, a joint resolution proposing an amendment to the Constitution to provide for representation of the District of Columbia in the Congress.

NOTICES OF HEARINGS

COMMITTEE ON THE JUDICIARY

● Mr. ROBERT C. BYRD. Mr. President, for Mr. EASTLAND and on behalf of the Committee on the Judiciary, I desire to give notice that a public hearing has been scheduled for Friday, August 25, 1978, at 9:30 a.m., in room 2228, Dirksen Senate Office Building, on the following nominations:

Patricia J. E. Boyle, of Michigan, to be U.S. district judge for the eastern district of Michigan vice Damon J. Keith, elevated.

Julian A. Cook, Jr., of Michigan, to be U.S. district judge for the eastern district of Michigan vice Lawrence Gubow, deceased.

Any persons desiring to offer testimony in regard to these nominations shall, not later than 24 hours prior to such hearing, file in writing with the committee a request to be heard and a statement of their proposed testimony.

This hearing will be before the full Judiciary Committee.●

ADDITIONAL STATEMENTS

JACK ANDERSON RETRACTS

● Mr. CURTIS. Mr. President, there are no exceptions to the command "Thou shalt not bear false witness." It applies to all persons. There is no immunity either for members of the press or for politicians.

When falsehoods are spoken or written, they often do great damage. Such was the case with one of our very distinguished men of the Foreign Service, the Honorable Turner B. Shelton.

Ambassador Shelton is an honest and dedicated patriot. He represented the U.S. Government with fairness and honesty and in the best interest of our country. He was our Ambassador to Nicaragua from 1970 to 1975. Ambassador Shelton has rendered distinguished service at several foreign posts including Russia, where he negotiated the cultural exchange, and in Hungary and in the Bahamas.

There are those in our country, and some of them are in government, who have extreme, critical views of Nicaragua, and they seem to prefer that Nicaragua have a "Castro-type Communist government." They fail to speak or write objectively about Nicaragua and the facts relating to that country. This group disregards the questions as to whether or not a country is a dependable friend of the United States. All of this resulted in false and damaging statements being made and written about Turner B. Shelton. After Mr. Shelton's return from Nicaragua, he was under consideration for another post. The falsehoods that were published about him did influence some Members of the Senate and some members of the Committee on Foreign Relations. The result was that this country was deprived of the services that Ambassador Shelton could render, and Ambassador Shelton was treated most unfairly by the publication of these falsehoods and was damaged materially.

Among those who wrote things about Turner B. Shelton that were untrue was the well-known columnist Jack Anderson. I am happy to report that Jack Anderson has retracted his statement. Jack Anderson has admitted that he was wrong. Mr. President, I shall submit for the RECORD that portion of Jack Anderson's column relating to Ambassador Shelton which appeared in the Washington Post on Saturday, August 12, 1978. I commend Jack Anderson for making this retraction. It is unfortunate that a good man was wrongfully damaged by falsehoods, and it is too bad that Turner B. Shelton had to bring a lawsuit against Jack Anderson before this retraction was made.

The article above of August 12, 1978, follows:

ARTICLE BY JACK ANDERSON

Shelton Revisited—The U.S. ambassador to Nicaragua from 1970 to 1975 was Turner B. Shelton. Commencing in 1973, we did a series of articles critical of the ambassador. We have concluded that, to be totally fair to Ambassador Shelton, the following should be added to the record.

Our criticism of Ambassador Shelton was based upon his close relationship with President Somoza, but in light of additional facts we are now convinced he was merely carrying out the Nixon administration's policy in Nicaragua.

On Dec. 22, 1972, a devastating earthquake struck Nicaragua. We reported that the Sheltons were primarily concerned with their own personal problems.

We are now persuaded that the ambassador and his wife were deeply concerned about the devastation. The ambassador worked tirelessly for six days and nights with little more than a few hours sleep and refused to let a broken arm slow him down.

For their efforts, the embassy received a special commendation from the State Department and White House. He also received from President Somoza the highest award of Nicaragua.

After leaving Nicaragua, Shelton became diplomat-in-residence at the Naval War College in Newport, R.I. He retired on March 31, 1977. He is now a successful international consultant representing the interest of U.S. firms abroad.

We did not agree with the Nixon administration's policy toward Nicaragua. Perhaps this influenced our attitude toward Shelton. His 30 years with the government included notable achievements and the Distinguished Service Award. He played a leading role in negotiating the first U.S.-Russian cultural exchange program.●

CZECHOSLOVAKIA

● Mr. STEVENSON. Mr. President, 10 years ago the Soviet Army marched into Czechoslovakia and brutually suppressed the beginnings of liberal and humane government in that unhappy country.

In the brief period of Czechoslovakia's true independence between the two world wars, Americans developed a profound respect for the people of Czechoslovakia. Their courageous and purposeful efforts to build a democracy in their ancient land earned the admiration of peoples everywhere. The Soviet takeover after World War II effectively stifled the growth of democracy in Czechoslovakia for a generation. So it was understandable that, in 1968, after years when liberty in Czechoslovakia was in eclipse, people in the West were encouraged by the signs of a loosening of the repressive controls characteristic of the Czech regime.

Those hopes were destroyed by the raw application of Soviet force, and we salute the courageous leaders of Czechoslovakia who reminded their fellow countrymen and all of us that the longing for freedom cannot be extinguished.

Even though repression has been the rule in Czechoslovakia since 1968, the Charter 77 group has managed to raise its voice to insist that the Czech Government honor its commitment to the principles of the Helsinki Accord. In doing so, the Charter 77 group has once again demonstrated the persistence of the human spirit in its demand for freedom and decency. As Americans, we should bear in mind the heroic efforts of those who put their own safety in jeopardy to achieve freedom for all and conduct our foreign policy in such a way as to enhance the opportunity for freedom and justice for the people of Czechoslovakia.●

GOLD MEDALLION—GOOD ECONOMICS

● Mr. TOWER. Mr. President, I recently joined Senator HELMS in sponsoring a bill which would require the Treasury to sell the first 1.5 million ounces of gold it sells after the date of enactment in the form of gold medallions. After this, the amount of gold minted into medallion form would be adjusted to meet demand.

This bill, the Gold Medallion Act of 1978, would not in anyway limit the amount of gold sold by the Treasury, only the form in which it is sold. Currently U.S. gold is auctioned off in bars which weigh 400 ounces apiece and are valued at about $70,000. Very few citizens can afford to make such a purchase. As a result, very little U.S. gold is sold to Americans. This should not be interpreted to mean that Americans do not want gold. More than 1.6 million ounces of the precious metal were imported last year—from Austria, Mexico, and South Africa—in the form of bullion coins. The American people have clearly demonstrated that they want to own gold, and their Government is clearly demonstrating a reluctance to let them buy it. For this reason, I have become a cosponsor to Senator HELM's Gold Medallion Act.

It is not my purpose here to make an empassioned speech on the American people's right to own American gold, although I believe very strongly in that right. It is not my purpose to bemoan the present situation whereby Americans must buy their gold abroad or not buy it at all. What I wish to do here is to examine, as thoroughly as possible, the economics of this bill; to ask the question, is this bill economically sound?

First of all, does the United States need, in the economic sense of the word, this bill? According to a statement issued by Grover C. Criswell, Jr., president of the American Numismatic Association, the answer is yes. All U.S. gold sales have been aimed at the bulk purchaser; gold bars are sold by weight at the current price of gold, usually to foreign banks. Meanwhile, Americans are importing bullion coins, and paying the current price of gold plus about 8 percent, which is the premium charged for bullion coins by the countries that issue them. Thus, we see gold leaving the country and we see gold coming into the country, in roughly the same quantities. Yet the gold coming into this country costs 8 percent more than the gold leaving it. Clearly this is not helping our balance-of-payments situation any.

The Gold Medallion Act would insure that, instead of leaving the country, this 8-percent premium would remain at home. Even if the Treasury receives less than an 8-percent premium for U.S. medallions, this would mean substantial additional Federal revenues, with the Government standing to gain an estimated $20 million from the sale of 1.8 million ounces at $170 an ounce. Of course, since the price of gold is most likely to be more than $170 an ounce by the time this bill could be enacted, the Government's profits would probably be even higher.

We must also consider the beneficial domestic results derived from utilizing these profits at home. The multiplier effect is, of course, lost when money is spent abroad.

Demand for small gold medallions in the United States is already assured, and may increase in the wake of the Gold Clause Freedom Act, a bill authored by Senator HELMS, cosponsored by myself, and signed into law in October of 1977. As more and more people begin to write contracts stipulating that they be paid in gold, the need for gold in small quantities will skyrocket. Gold medallions issued by the United States would provide the ideal medium of exchange for these contracts, and as a result the Government would profit.

Now, I am sure that many of you will agree that with the Federal debt the way it is now, the Government cannot afford to turn down a profit—be it ever so small in comparison with the debt itself.

So how much would these impressive little medallions cost to produce? Not much. Since the medallions would be made of the 0.900 fine gold which constitutes the bulk of the Treasury's stock, no time and money need be wasted in further refining. Also, it is much easier and cheaper to mint a gold medallion than to create the cupro-nickel sandwich of which our coins are made. The average medallion would probably cost only about 5 cents to manufacture, plus the costs of any added security which might be needed. For special medallions, of course, the cost of production would be much higher, and this cost would be passed along to the purchaser in the form of a large premium.

Gold medallions would cost little to manufacture, and promise an opportunity for considerable profit. Economically they are highly feasible.

I find that I must make one point on the ethics of our present method of selling gold. Foreign banks may be buying our gold, while our own citizens want to but are effectively prevented. This is a grave injustice. The Gold Medallion Act of 1978 is an opportunity for us to amend this injustice. Too rarely, we find, do ethics and good economics walk hand-in-hand, but this is the case with this unique bill. I hope that all in the Senate will join me in supporting it.●

A MODERATE'S VIEW ON TAX CUTS

● Mr. JAVITS. Mr. President, the United States can no longer afford to ignore the seriousness of the economic problems that face our Nation today. The No. 1 culprit is inflation, and this condition threatens the very social fabric of our Nation, breeding a divisiveness and an economics of selfishness among the American people.

A manifestation of this emerging trend over proposition 13, where the American taxpayers in their frustration and anger have struck out at public spending, only to encourage those we can least afford to harm—the poor and the disadvantaged.

A recent article in the Wall Street Journal by David P. Eastburn, president of the Federal Reserve Bank of Philadelphia, specifies in a highly perceptive way some of our Nation's major economic ailments and offers some equally timely changes. In his article, Mr. Eastburn urges us to transcend the traditional barriers presently dividing liberal and conservative doctrines in the field of economics and to work toward the creation of a cohesive social and economic policy that will restore the public's confidence and rally its support.

I share Mr. Eastburn's concern about the insidious nature of inflation, and I believe, with him, that we should avoid

a radical "meat-ax" approach to cutting taxes and choose the "scalpel" approach for specificity and responsibility—an approach that considers the full implications and the social as well as the economic costs. Also I concur in his recommendation that we reexamine the role of Government in fostering or hampering economic growth. Mr. Eastburn very astutely weighs the trade-offs involved in managing an economy of the magnitude of ours and reaffirms our urgent need for sound anti-inflationary fiscal and monetary policies.

Mr. President, I commend this article to my colleagues and ask that it be printed in the RECORD.

The article follows:

[From the Wall Street Journal, Aug. 16, 1978]

MEAT AX APPROACH TO CUTS CAN BE AVOIDED

(By David P. Eastburn)

As the wave of tax-slashing proposals sweeps the nation, economic liberals find themselves with their backs to the wall. Those of us who would use economic policy consciously to alleviate poverty and economic distress (as good a description of liberal economics as any) see the tide of sentiment moving strongly against us. What course should an economic liberal seek?

First, how to deal with the Proposition 13 syndrome? To the extent that the meat-ax approach to taxes is directed deliberately to cutting public services to the poor and disadvantaged, it is, of course, deplorable. But a case can be made for shrinking the size of government that is perfectly consistent with the liberal view. It is that beyond some point intervention by government can hamper the economy so severely as to slow economic growth.

Edward Dennison, a senior fellow at the Brookings Institution, has calculated, for example, that government regulations have cut deeply into productivity growth during the 1970's. He estimates that in 1975 pollution and safety regulations alone reduced the average growth rate in productivity by about one-fifth. Productivity growth is a key element in maintaining economic growth. And since economic growth has been responsible for most of the remarkable reductions of poverty achieved in the past quarter of a century, it is clear that excessive government intervention can be counterproductive to the objectives of liberal economics. What is "excessive," of course, is a matter of judgment. Mine is that we are operating in the danger zone.

But the solution is not to apply the meat ax. Surely the process of government has not become so bankrupt that we cannot still confront the many needs before us and sort out the priorities.

Congress has made good progress in recent years in improving the budgetary procedure. There is new awareness in the Executive Branch of the need to overhaul regulations. These are sensible, selective approaches to limiting the scope of government which still can encourage the private sector to grow and yet leave room for directing some of the taxpayer's dollars to meeting social needs.

Perhaps the proposal most deplorable to liberals is the Steiger plan to slash the capital gains tax. If the motive is simply to give a windfall to the already rich, the proposal is, of course, reprehensible. But there can be honest debate about the effect of the capital gains tax on economic growth. The science of economics is not far enough advanced to tell us exactly what the effect of a cut may be, but it certainly is in the direction of encouraging growth.

Similarly, the tendency recently to stress the importance of other kinds of tax relief for investment—liberalized depreciation allowances and the like—can be perfectly consistent with the liberal view. The "trickle-down" theory may be anathema to the social activist, but in the longer run it may further his cause better than a tax policy that always favors the consumer. What we need to do, obviously, is to make a careful tradeoff between the immediate benefit of such tax changes for the well-to-do and the ultimate welfare of the disadvantaged. Evidence of the past quarter of a century is that there is long-run paydirt in policies that encourage investment. They are not inimical to liberal economics.

The real culprit is inflation. I firmly believe the current taxpayer revolt would not exist were it not for the widespread frustration about inflation. It has been observed that the most insidious thing about inflation is that it tears at the fabric of society, and we are now seeing this happen.

The cry throughout the land is "Hey, what about me?" Group is pitted against group; everybody is out to get his; generous impulses are stifled. I have visions of angry hordes of middle-income consumers in California marching from the supermarket to balloting places to vote for Proposition 13.

What all this tells me is that the best way for those of a liberal persuasion to achieve their ends is to join the fight against inflation. Too often in the past liberals have been identified as being concerned with poverty and economic distress, conservatives with inflation. It is not that simple. Economists don't understand as much as they would like about the connections between the two phenomena and they need to keep working at the problem, but the lesson of the real world is that unless we get inflation under control we are not going to have sufficient public support to deal with economic distress.

This line of thought tells me, too, that we can't look for much success in efforts to talk down inflation. Once people come to feel they are on their own, that the only course is to look out for their own interests, appeals to self-sacrifice for the general good are not likely to be heeded. New approaches are needed and should be tried. One that holds promise is the TIP proposal to give tax benefits to businesses with a good record in holding down inflation. Extreme believers in the free market fear that the plan would interfere in its operation. On the contrary, I see the plan as harnessing market forces to fight inflation. Administrative problems are great but probably not insuperable. Liberals should give vigorous support to TIP.

However, this solution at best is sometime in the future and in any case cannot do the whole job. Given this fact, the most fruitful course is to pursue anti-inflationary fiscal and monetary policies—hold down government spending and keep the money supply from growing too fast.

This kind of action often is not identified with the traditional liberal economic view, but, I suggest, is the most promising route to the liberal goal. Liberals can join at least one hand with monetary and fiscal conservatives with a clear conscience that they are being true to their economic and social ideals.●

NADER ANTI-NUKE CONFERENCE, OCTOBER 6–8

● Mr. GRAVEL. Mr. President, I think it is fair to say that Ralph Nader and I disagree on many energy issues. But there is at least one issue we agree on, and that issue is nuclear power. We both recognize the environmental and economic burden of nuclear power on America and the world.

I am pleased that Ralph Nader is organizing another national gathering of citizens who are trying to prevent proliferation of radioactive wastes. I hope the gathering, to be held in Washington, D.C., October 6 through 8, 1978; will help give Congress the message that there is a rapidly growing constituency of people determined to hasten the demise of unsafe nuclear power and substitute the sensible alternatives like greater energy efficiency and solar energy.

Mr. President, I ask that Ralph Nader's invitation to "Critical Mass '78" be printed in the RECORD.

Mr. President, I also ask that two recent articles from the Washington Post be printed in the RECORD. These articles relate the efforts of Princeton University's plasma physics lab in trying to arrive at resolution of problems concerned with the commercial production of electricity from fusion. Fusion shows great promise for the future, in that it is nonpolluting, nonradioactive, and draws its source of fuel from seawater.

The material follows:

CRITICAL MASS '78

DEAR FRIENDS: Four years ago nearly a thousand citizens gathered to apply their talents, skills and resources on the menace of nuclear power. Since then the safe energy citizens' movement has steadily grown—but so too have the challenges.

When Critical Mass '74 was convened in November, 1974, thirty-six safe energy alliances had not yet formed. New York City and New London, Connecticut had not yet instituted an across-the-board ban on the transportation of radioactive materials. There had not been one hundred and fifty cancellations or postponements of nuclear reactor orders. Robert Pollard and Ronald Fluege had not yet resigned under protest from the U.S. Nuclear Regulatory Commission. Dale Bridenbaugh, Gregory Minor, and Richard Hubbard had not yet decided to quit their high level engineering positions at General Electric. Dr. Thomas Mancuso and Dr. Alice Stewart had not yet released their findings about the cancer-causing risks of low level radiation. State and local officials had not yet demanded "veto power" over the siting of radioactive waste repositories. The geologists at the U.S. Geological Survey had not yet released their reservations about burial of deadly nuclear wastes in geologic salt formations. And Congress had not yet abolished the secretive Joint Committee on Atomic Energy, which authored so much of the nation's pro-nuclear legislation. It is an awesome set of developments that has propelled public awareness about the risks of atomic energy.

Nevertheless there remain many important challenges today—challenges which will be examined and confronted at Critical Mass '78. The nuclear industry, chafing under the burden of mushrooming self-generated costs, the international uranium cartel, and operating difficulties, is moving toward a massive federal/taxpayer bailout. There is also great resistance within the industry to tighter radiation standards. Energy Secretary James Schlesinger wants to accelerate the licensing of nuclear plants despite the attendant safety risks and curb public participation under the guise of a public participation provision. The Department of Energy is considering New Mexico as a site for an ill-conceived radioactive waste repository. And no federal agency is devising a solution for the tons of uranium mill tailings that

pollute the West. . . . Finally, the prospect for a devastating reactor accident still hangs menacingly over the nation.

This year Critical Mass '78 hopes to bring both the new and old issues and the new and old activists together. As the citizens' movement builds momentum and as the nuclear industry faces a crossroads, it is time for all concerned citizens to meet in an educational forum to exchange information, strategies, and skills, about atomic energy, and its alternatives. I hope you join us for Critical Mass '78—it's an opportunity to show that a Critical Mass of people can make the Critical Difference.

Yours,

RALPH NADER.

[From the Washington Post, Aug. 20, 1978]

TAMING FUSION'S FURY

(By Thomas O'Toole)

It all began with Project Matterhorn in 1951. The search for energy from thermonuclear fusion—clean, cheap and without limits, its supply of fuel nothing more than the deuterium found in the earth's seawater.

So optimistic were the scientists who started Matterhorn that they spoke of producing power in five years. Buzz words were: "Burnup by Christmas," meaning they hoped to demonstrate fusion's scientific feasibility by matching the temperature of the sun the first year.

So relaxed was the program in 1951 that its name was chosen because Princeton University's Dr. Lyman Spitzer, Jr., the project's first director, was a mountain climber. A picture of the Matterhorn hung in his laboratory.

Two years later, the dream had dimmed but not by much. The scientists realized that the world of plasma physics where gas behaves like solids and liquids was more complex than they suspected but by then they had built a machine at Princeton to test their understanding of the physics.

The machine was called the Stellerator and some of its builders fully expected to reach fusion temperatures of 100 million degrees centigrade the first time they turned it on. When the day came to test it, the lights were turned out in the Stellerator laboratory so everybody could get a good look at the superheated gas when it ignited and the Age of Fusion began.

Somebody pushed the button that started the machine. There was a sudden, blinding flash. Not from fusion, however. The magnetic coils built into the machine to insulate the hot gas and keep it away from the walls of the machine all burned up because of a massive short circuit.

It's taken them 27 years but the scientists who labor at fusion research are beginning to understand its physics and tame its special fury. It has not been easy. While there have been no more short circuit explosions like the one that struck Princeton 25 years ago, there have been countless small but embarrassing failures along the way. What began as a cakewalk up the Matterhorn has become what the Department of Energy's Dr. Edwin Kintner calls the "greatest technological challenge man has ever undertaken."

A TURNING POINT

On July 24, a piece of that challenge was met. On that day, a younger team of Princeton scientists than the group which started the charge up the Matterhorn reached a milestone which may mark a turning point in technological history.

What the Princeton team did was achieve a temperature of at least 60 million degrees in a machine that might be described as a test-tube grandson of the old Stellerator. The temperature measurements which can be made on the Princeton device have a limit of 60 million degrees. Some scientists believe the real temperatures reached on July 24 at Princeton were upwards of 80 million degrees.

Even 60 million degrees is four times as hot as the interior of the sun. It's true the 60-million mark wasn't sustained for any longer than a 20th of a second, but sustainment time is beside the point. The highest temperature reached in a fusion device like the Princeton machine before July 24 was a paltry 26 million degrees.

"We'd been hoping to get up to 35 million degrees this time," said Dr. Melvin B. Gottlieb, director of Princeton's plasma physics laboratory, "but we went sailing right by it. We saw the temperatures go to 45 million, 50 million, 55 and then 60. It was amazing."

What's the importance of the Princeton achievement? Well, it's a little like breaking the sound barrier for the first time. The scientists have proven they can do it. There's nothing magic about 60 million degrees except that once a fusion device gets through 44 million degrees the heat is so high that the fusion reaction where light elements combine to form a heavier element begins to sustain itself.

The deuterium inside the machine is now so hot it has become a plasma, a gas whose electrons have been stripped away. When that happens, the gas is left with positive and negative charged particles moving at random. So rapid does that motion become that it's almost impossible to slow it down and cool the gas off again. It's like a runaway truck, moving down the steepest of hills.

THE MAGIC NUMBERS

Princeton's Dr. Gottlieb insists that what took place in his laboratory July 24 is not a breakthrough and perhaps it isn't. Gottlieb says that fusion will not be demonstrated until a plasma reaches a confirmed temperature of 100 million degrees for at least one second. These are the magic numbers scientists have talked about for the last 27 years. At those temperatures and for that span of time, more energy is pumping out of the fusion device than must be pumped in. Eureka!

The Princeton Large Torus, as Gottlieb's infernal machine is called, is the forerunner of a much bigger machine now being built at Princeton which will surely demonstrate sustained fusion for the first time. As intricate as fusion physics are, one thing about it is simple. Build a bigger machine and you go to higher temperatures and longer fusion times. It is an axiom of plasma physics.

Why did it take 27 years to prove the power of fusion? To begin with, the physics proved to be a lot more difficult than anybody imagined. Princeton's Gottlieb explains it this way: "People always ask me why we can't solve the fusion question if we put a man on the moon. And I always say that getting to the moon didn't involve any new principles, it was just a question of engineering the machinery to get there. In the fusion business, we're running up against new concepts every day and trying to put together the engineering at the same time."

Engineering the equipment to reach higher temperatures than the sun has turned out to be a task of backbreaking magnitude. Just one part of that job was developing magnets that had enough force to contain plasma at temperatures of millions of degrees. After all, those temperatures melt anything they touch so that any machine built to withstand those temperatures had to have a mechanism that kept the hot gas from touching the walls of the machine.

Magnets can do that because the plasma is electrically charged. The field built up by the magnets along the walls of the machine wrap around the plasma like a great big cloak, keeping all but a tiny fraction of the gas from touching the walls. Put another way, the magnetic fields act like the insulating layer in a thermos bottle and help to keep the heat from escaping.

It took 27 years for the scientists involved to learn what Gottlieb calls the "kitchen tricks" of the business that make fusion work. Start with the "heaters" that raise the temperature of the gas to plasma-like heats. The heaters used in the Princeton experiment are what engineers call "neutral beam injectors," which are a brand new family of devices developed at the Oak Ridge National Laboratory for the purpose of lighting the fires of fusion.

The neutral beams are ingenious "guns" that fire high energy charged particles right into the fusion machine. Along the way, the charged particles pass through a gas cell that strips half of them of their charge so that they're neutral when they enter the machine's magnetic field.

Charged particles would be trapped by a magnetic field. Neutral particles with no charge on them fly through magnetic fields as if they're not there. The result of a steady stream of high speed neutral particles striking a gas like deuterium is that they collide with such force that they get charged again, heating the gas to enormous temperatures in fractions of a second.

The real "kitchen trick" that Gottlieb and his team used last month was to scrub the walls of the fusion machine and make them squeaky clean.

If that sounds oddly unscientific, consider this. It turns out that when an unheated gas first enters a fusion machine some of it escapes the magnetic field and clings to the walls of the machine. When the gas contained by the magnetic field is heated, the gas clinging to the walls tends to cool everything down and slow the fusion reaction. For years, scientists didn't understand this. And their response was to pump more gas into the machine to try to raise the temperature. This slowed down the reaction too, spoiling the experiment.

"It sounds so simple, except a lot of people have been struggling with it and after you've done it you say: 'Why didn't we do it a long time ago?'" Gottlieb said. "Now everybody will be doing it within the year or maybe less."

AN ERRANT MEMO

An enduring irony of the Princeton achievement of last month is that it does nothing to speed up the U.S. program to develop fusion as an energy source.

It proves that fusion is possible but it cuts not one month from the plan to generate electricity from fusion by 2005 and have a commercial network of fusion electric plants in place by 2025.

It doesn't save a penny of the money that's needed to develop fusion either. It's cost more than $2 billion already and it's going to take at least another $15 billion to make the first kilowatt of electricity from fusion.

"I keep on saying to people that if somebody invents a new energy system it will take at least 20 years before there's a 5 percent market effect," Gottlieb said. "You can't make changes in a hurry even if you know how to do it and we don't know how to do it yet."

The politics that followed the Princeton achievement are curious and deserve at least a mention. When the Department of Energy was notified of the 60-million-degree milestone, a mixed reaction ensured. The fusion people were ecstatic, drafting what the federal government calls an "early warning memorandum" for cabinet and agency heads to explain what had happened. Curiously, the memo never reached the White House, presumably the place such memos are aimed at.

There was discussion inside the Energy Department about whether to hold a press conference to announce the achievement. Top management did not want a press con-

ference. They worried that Congress might demand an increase in the fusion budget request, anethema in this year of a forecast balanced budget.

There's another reason Energy Department sources say top management looked askance at the fusion achievement. Energy Secretary James R. Schlesinger believes in the "economics of scarcity," meaning he preaches energy economy because all our fuels are in scarce supply.

Fusion? All fusion does is tell the world that we have all the energy we'll ever need.

[From the Washington Post, Aug. 15, 1978]

LAB FEAT TERMED FIRST STEP TOWARD LIMITLESS ELECTRICITY

(By Thomas O'Toole)

The attainment of a temperature of 60 million degrees for a half second in a Princeton University laboratory was described yesterday as the first step toward a limitless supply of electricity for the entire world.

"We're going to make it, we're going to demonstrate the scientific feasibility of fusion," Dr. Melvin B. Bottlieb, director of Princeton's Plasma Physics Laboratory, said at a press conference held at the Department of Energy. "We're on schedule and we're very confident we will demonstrate fusion . . ."

Gottlieb said the demonstration of fusion could come as early as 1981 or 1982, when the Tokomak Fusion Test Reactor under construction at Princeton will begin to operate. This is a machine twice the size of the laboratory device used at Princeton to achieve fusion temperatures of 60 million degrees.

"We need to reach temperatures of 100 million degrees to demonstrate fusion," Gottlieb said. "There is no reason we cannot reach those temperatures in the next machine, which is a larger machine than we're now operating."

He said the attainment of a 60-million-degree temperature in the present Princeton machine came sooner than he or anybody else expected.

"It took us seven years to go from 5 million degrees to 25 million degrees," he said. "It has taken us six months to go the last 35 million degrees and reach the 60-million-degree mark. The results came in much better than we anticipated."

The most encouraging result of the Princeton achievement is that the 60-million-degree mark was reached without the hot hydrogen-deuterium gas mixture "clumping" together in swirls that would tend to cool the gas and spoil the fusion reaction.

"The fear was that the hot gas would clump up and leave cold spots that would slow down the fusion reaction," Gottlieb said. "To our great joy, we found out that this is not so."

He said this means that the larger machine now being built can be equipped with a much thicker magnetic field to insulate the hot gas and raise its temperature to the desired 100-million-degree mark.

"The invisible layers of magnetic field that confine the gas can be increased in scale in the bigger machine," he said. "The insulation that the magnetic field provides can be steadily improved upon in the next machine."

Calling the attainment of the 60-million-degree mark "extremely gratifying," Gottlieb declined to describe it as a scientific breakthrough.

"Breakthrough is not a scientific term," he said. "I have always avoided the word and I will continue to avoid it."

The way he described it, the Princeton Large Torus machine that achieved the 60 million degrees did so two weeks ago. He gave credit for the achievement to the use of a technique called "neutral beam injection" to help heat the gas confined inside the machine.

The 60-million-degree temperature is more than twice the temperature previously reached by the Princeton machine, a mark it make in December. The new record temperature is four times hotter than the interior of the sun.

The opposite of nuclear fission—the basis for today's nuclear power plants—where heavy atoms like uranium are broken apart to release energy, fusion is the combining of light atoms like hydrogen with an accompanying discharge of energy.

Fusion is clean, producing no radioactive wastes to be disposed of. It is limitless, drawing its fuel from seawater from which the light elements like hydrogen and deuterium (a heavy isotope of hydrogen) can be extracted.

John M. Deutch, director of energy research for the Department of Energy, cautioned yesterday that the Princeton achievement does not change the national timetable for the commercial production of electricity from fusion. He reiterated that the first fusion plant would not be built before 2005 and that fusion would not be commercial before 2025.

"The first fusion reactor won't be seen before the first decade of the next century and it could be another 20 years before fusion goes commercial," Deutch said. "We're talking about a developmental budget of $10 billion or more which we have no assurances that the engineering difficulties involved in generating electricity from fusion will be overcome."●

THE COSMETIC WAR ON INFLATION

● Mr. TOWER. Mr. President, inflation is the most serious economic problem facing this Nation today. It is literally robbing Americans of their income, frustrating efforts to provide jobs, and undermining confidence in the U.S. dollar.

The problem of inflation was addressed by Paul W. McCracken, former Chairman of the Council of Economic Advisers, in an article appearing in the August 18 issue of the Wall Street Journal. In the article, Professor McCracken states that:

The fact is that we are not gaining ground against inflation.

He goes on to say that:

After all the rhetoric about inflation's being the dominant economic problem . . . we are losing ground.

His observations regarding the role of fiscal and monetary policies in causing inflation were particularly insightful. He writes:

That we have not really been willing to bite this bullet is indicated by the demand management (fiscal and monetary) policies that have been deployed. The upward pressure the budget (fiscal policy) exerts on the economy is equal to the rise in expenditures plus the revenue value of any net reduction in tax rates (which indirectly has an expansive effect by increasing after tax incomes). In the period from 1959 to 1965, when the price level was quite stable, this measure of "fiscal pressure" averaged about 1% of GNP. Since 1965 it has been 2% to 3%, and would be close to 3% in 1978–79.

This same fear of facing fundamentals seems to be evident for monetary policy. With the emergence of rates of monetary expansion during the first quarter consistent, if sustained, with more discipline on the price-cost level, nervous protests were heard about the adverse effects on the economy. Those protesting presumably were calling for more rapid rates of monetary expansion (which is the only way the Federal Reserve could relieve pressures on interest rates), which would set the stage for a more rapid and inflationary expansion, which would in the end produce the even higher interest rates that are always the accompaniment of higher rates of inflation.

I wish to submit the complete article for the RECORD.

The article follows:

THE COSMETIC WAR ON INFLATION

(By Paul W. McCracken)

Barry Bosworth's basic trouble is that he has been right. And the rewards in our Babylon on the Potomac for those who insist on speaking the obvious about such unpleasant matters as inflation are not much different from those in ancient times who were disengaged from their heads for bringing to the King bad news from the wars. In Washington, success in Fighting Inflation apparently consists not in such quaint and straightforward things as reducing inflation but in producing pyrotechnics and cosmetics which will persuade the citizenry that there is progress where none in fact is really occurring. Indeed, the danger is not so much that citizenry will be confused, having themselves demonstrated a considerable capacity for clearheadedness, as that managers of policy will mislead themselves.

The fact is that we are not gaining ground against inflation. While the monthly figures will bounce one way or the other, and we might have a few good readings now, there are persuasive reasons for expecting the basic rate of inflation to continue rising. For one thing the underlying trend since the beginning of 1976 has been upward. It is, of course, true that speaking about a "trend" during a 2½ year period will make the careful statistician wince, and food prices have given the CPI a bad upward push. But a 2½-year period contains 30 monthly observations, and some subgroup of prices (about half of them, in fact) will always be rising more rapidly than the average.

UPWARD, EVER UPWARD

Moreover, the underlying "trend" in labor costs per unit of output during the last two years has also been upward. Apart from erratic quarter-to-quarter wobbles, the underlying rate of increase in unit labor costs has itself been rising about a half a percent per quarter—a track which would bring us to double digit rates by 1979.

And it is not easy to make a persuasive case that labor costs will be rising less rapidly. For one thing we are not getting anything like the gains in productivity, to offset the impact of wage increases on costs, that the economy historically delivered. Quarterly gains in output per man hour (annualized) have averaged a 1.6% annual rate in 1976, 1977, and thus far in 1978, and even with the strong, second-quarter gain in real output, productivity in the non-farm private sector rose at the rate of only 0.6% per year. In fact, these sluggish gains in productivity now extend back for a decade, strongly indicating that a fundamentally unfavorable structural problem has emerged in the economy.

If there were reason to expect a moderating trend in the rate of wage increases during the year ahead, that would provide some reason for optimism about the price level. This trend is more apt also to be perverse. Next year will give us a heavy schedule of collective bargaining, and this means a disproportionate share of wage increases will be the large first-year, front-loaded adjustments. And the probability that the average size of the overall packages negotiated will be enlarged further is also uncomfortably high.

All of this might, of course, be consistent with a declining rate of inflation. Some major items that consumers buy might experience a sharp decline in their prices—

though if this were food, while one part of government tried to take credit for progress against inflation another part would be busy viewing with alarm the low level of farm prices.

Rising labor costs also might not fully express themselves in the price level if profit margins were to be squeezed further. Reported profits are now double those of a decade ago, and they have increased almost 50 percent in the last five years. Here is, however, an illustration of the extent to which inflation itself can confuse facts. With a proper accounting for current costs, which conventional procedures fail to do, true profits after taxes are up only one-third from those of a decade ago, which means that in real terms they are down. While some businessmen prefer the comfort of the misleading conventional figures on profits, they could be expected to keep a short leash on their capital budgets if profit margins were to decline further.

After all of the rhetoric about inflation's being the dominant economic problem, a view which surveys show consumers share emphatically, we are losing ground.

What is the problem?

The problem is that our strategy for reducing the rate of inflation is, to borrow an apt phrase from D. H. Robertson, 'a grin without a cat."

While there is plenty for the profession to be humble about when it comes to the economics of inflation, there is one conclusion that is supported both by logic and the facts of historical experience. The rate of inflation will not come down so long as pressures of demand pushing on supplies are strong enough so that higher prices and higher wages have no adverse effect on sales volume and employment. Indeed, holding prices and wages below these market-clearing levels by some sort of brute force or ad hoc process would produce the queue-line economy.

The rate of inflation will embark on a downward trend when the result of posting inflationary price increases or extracting excessive wage increases is a painful loss of sales and employment. Ours is the only major industrial country that has not yet mustered the will to face this basic fact of economic life. And the OECD secretariat now projects the 1978 rise in U.S. labor costs per unit of output in manufacturing to be above the average for the "Big Seven" countries, and significantly lower than the increases projected only for the U.K. and Italy.

That we have not really been willing to bite this bullet is indicated by the demand management (fiscal and monetary) policies that have been deployed. The upward pressure the budget (fiscal policy) exerts on the economy is eqiual to the rise is expenditures plus the revenue value of any net reduction in tax rates (which indirectly has an expansive effect by increasing after tax incomes). In the period from 1958 to 1965, when the price level was quite stable, this measure of "fiscal pressure" averaged about 1% of GNP. Since 1965 it has ben 2% to 3%, and would be close to 3% in 1978–79.

This same fear of facing fundamentals seems to be evident for monetary policy. With the emergence of rates of monetary expansion during the first quarter consistent, if sustained, with more discipline on the price-cost level, nervous protests were heard about the adverse effects on the economy. Those protesting presumably were calling for more rapid rates of monetary expansion (which is the only way the Federal Reserve could relieve pressures on interest rates), which would set the stage for a more rapid and inflationary expansion, which would in the end produce the even higher interest rates that are always the accompaniment of higher rates of inflation.

ANOTHER PART OF THE PROBLEM

A part of our problem is that we have also been reluctant to be realistic about how high the economy's operating rate could be pushed before pressures would begin to build. With the unemployment rate at 6% and the operating rate in manufacturing at only 84% of capacity (according to the Fderal Reserve), plenty of slack seemingly remains available to assure that more demand would translate into employment and output rather than higher prices and costs.

This is far too simplistic. Aftr a decade in which the economy's operating rate has been low, the capacity situation and labor markets are uneven, and bottlenecks are bound to develop at lower average operating rates than after a sustained period adjusted to performing closer to overall capacity. This is particularly evident in the labor market, where lack of skilled and experienced labor may impede that expansion of output which would provide jobs to those who are unemployed.

There is empirical evidence that the economy is in the pressure zone now. The proportion of companies reporting slower deliveries is now in the range reached in late 1972, or 1969, or 1956–66. And the incidence of help-wanted advertising is now higher relative to the labor force than at all cyclical peaks during the last decade including, even 1969).

When we are unwilling to face the fundamental realities of the economy and prefer to deal with symptoms and cosmetics, we should not be surprised that we are losing ground against inflation. Washington should not be confused about this. The citizenry is not.●

SCIENTIFIC MERIT OF NASA'S LUNAR SAMPLE ANALYSIS PROGRAM

● Mr. STEVENSON. Mr. President, the HUD-Independent Agencies Appropriation Act for fiscal year 1979, as passed by the Senate, contained a cut of $5.7 million from the NASA appropriation for lunar sample analysis. Since $5.7 million was the total amount earmarked for this activity, the cut effectively terminates this research.

The lunar sample analysis program is extraordinarily productive and useful. Not only is it important to our understanding of the Sun and its effect on Earth's environment but it has had a significant impact on major engineering programs in the Department of Energy, as discussed in a letter I have received from Dr. Milton Blander of Argonne National Laboratory.

The scientific community agrees that the lunar sample analysis program is a research activity of major importance that has brought distinction to U.S. science. NASA has done an outstanding job in administering this activity.

The conference committee on H.R. 12936 will meet soon. I urge the conferees to agree to the restoration of a significant portion of the $5.7 million for NASA's fiscal year 1979 lunar sample analysis program.

Mr. President, I ask that a number of letters written to me by scientists expressing concern over this reduction be printed in the RECORD.

The material follows:

THE ENRICO FERMI INSTITUTE,
Chicago, Ill., Aug. 3, 1978.

Hon. ADLAI E. STEVENSON III,
Chairman, Science Technology and Space Committee, Committee on Commerce, Science and Transportation, U.S. Senate, Washington, D.C.

DEAR SENATOR STEVENSON: I am deeply concerned upon learning that the Senate Committee has voted to eliminate the entire budget for lunar sample analysis ($5.7 million) from the NASA budget. Few endeavors have brought as much distinction to U.S. science as the lunar program and the analysis of the samples returned from the moon. Several of the best scientists have in the past years and will continue in the future to uncover some of the most significant facts about our earth and the solar system. A sudden cut of this exciting program constitutes, in my view, a serious blow to the scientific community, to NASA and to the scientific enterprise of the country as a whole.

I am seriously concerned with the consequences for our institutions in Illinois. At the University of Chicago's Enrico Fermi Institute three excellent faculty members, Professors Edward Anders, Robert Clayton and Anthony Turkevich, all members of the National Academy of Sciences, have made outstanding contributions to the field of lunar research. Their efforts would be severely cut back if the lunar samples analysis program were removed from NASA's budget.

I would greatly appreciate your efforts to restore this budget cut and to insure the continuing success of this outstanding program.

Sincerely,

PETER MEYER,
Director.

PALOS PARK, ILL.,
August 2, 1978.

Senator ADLAI STEVENSON,
Senate Office Building,
Washington, D.C.

DEAR SENATOR STEVENSON: This letter concerns the Senate appropriation bill for NASA and in particular a 5.7 million dollar item for lunar sample analysis which is in danger of being eliminated. Teams working on lunar sample analysis generally also do research on meteorites (funded I believe, from a separate budget category) so that appropriations for lunar samples impacts on research on all extra-terrestrial materials and a cut in the lunar sample budget would ultimately put most meteorite research in jeopardy. I am employed in the Chemical Engineering Division of the Argonne National Laboratory and am partly supported for about 25 percent of my time as the principal investigator on a grant from NASA for research on meteorites. One of my coinvestigators at Argonne is L. Fuchs. Most of my other research is on energy related fundamental chemistry. The purpose of this letter is to describe two specific instances of where fallout from our research on meteorites has had a significant impact on major engineering programs within the DOE.

The first instance relates to the high temperature battery under development in a multimillion dollar program at the Argonne National Laboratory, General Motor Corporation, the Atomics International Division of Rockwell International Corporation, Gould Incorporated, and Eagle-Picher Corporation. This high temperature battery employs a lithium aluminum alloy as one electrode, an iron sulfide as the other and molten lithium chloride-potassium chloride as the electrolyte. The potential uses of this battery are for motor vehicle (largely automobile) propulsion and central electrical power storage. During the operation of this battery a peculiar phase was formed, later

labelled as "J" phase, which impeded the operation of the battery and decreased its ability to perform up to expectations in a major way. This phase was later identified as the mineral djerrfisherite which had been first discovered and characterized by my meteorite coinvestigator, L. Fuchs in an earlier investigation of meteorites. His earlier characterization and later help was an important cornerstone of the battery related research on this material which all led to measurements (some within my group under DOE funding) to define the chemistry of this material and to devise ways to eliminate it in the operation of the battery. Early tests indicate that performance of laboratory cells has improved 60 percent when our suggestions for eliminating this phase based on our research are used.

A second instance concerns my own work on condensation from a hot "solar gas" to form complex silicates, sulfides and metal phases. The computer program we used for this work was originally a NASA program for the calculation of rocket performance. We adapted and modified it for calculating the possible formation of meteoritic material from a solar nebula. Our modifications of this NASA program, made under our NASA contract for our meteorite research, has generalized the computer program so that it became useful in three DOE programs at the Argonne National Laboratory. It is now in use in our programs on power generation with a magnetohydrodynamic (MHD) generator, on the fluidized combustion of coal, and in a program on energy conservation in industrial electrolytic processes. In the MHD program, it is an important tool for minimizing a major economic factor in the loss of potassium seed and in the coal program it is used to calculate and prevent the formation of corrosive deposits. In the conservation program, it is used to deduce more energy efficient methods for metal (*e.g.* aluminum) production. I anticipate many other uses for this computer program (which parallel the uses of the program for meteorites). For example, the disposition of the pollutants lead and cadmium from coal combustion can be deduced and would be important in the elimination of these contaminants from flue gases.

Overall, these are only two examples of which I am aware. I am certain that there are other examples where research on extraterrestrial materials has aided in applied programs.

I hope that the funding for lunar sample analysis will not be eliminated. It has been a major example of the extremely high quality of American science and, has far surpassed the quality of analogous research in the USSR. Lunar (and meteoritic) research is still very vital. It is getting us closer to understanding our beginnings over four billion years ago and in addition has provided fallout which is an aid in some of our more practical goals.

Sincerely,

(Dr.) MILTON BLANDER,
Senior Scientist and Group Leader, Chemical Engineering Division, Argonne National Laboratory.

CHICAGO, ILL., *August 3, 1978.*

Senator ADLAI STEVENSON,
Senate Office Building,
Washington, D.C.

DEAR SENATOR STEVENSON: This letter is to request your intervention in every way possible to reverse the action of the Senate Appropriations Committee which deleted a $5.7 million appropriation for continuation of lunar sample research in NASA.

This is an extraordinarily grave matter. The action proposed is tantamount to the destruction of one of the best managed, most active and productive research programs in the U.S. This program enjoys extensive and active international involvement and support.

To remove this research activity from NASA will emasculate some of the most creative and productive teams of scientists and create major financial difficulties for their laboratories. In addition, it will seriously affect other scientists and laboratories since the already short NSF funds for earth (and planetary) science will have to be even further subdivided.

The present exciting and enthusiastically supported research program on lunar samples is beginning to help us understand the system we live in and the planet we live on, their origins and evolution. The lunar samples are not only relics of the distant past; they have also monitored the behavior of the sun. Lunar sample research is vital to an organization such as NASA. These samples provide ground truth information for many of the measurements related to fly-bys and spectroscopic observations of objects in the solar system.

Man's utilization of space will be significantly dependent on exploitation of the moon as a base and a materials resource. We must take advantage of the lead time provided by the availability and study of lunar material to acquire the knowledge that will be necessary for this next step by man into space.

Sincerely yours,

GEORGE W. REED, Jr.,
Senior Scientist,
Argonne National Laboratory.

UNIVERSITY OF CHICAGO,
Chicago, Ill., August 3, 1978.

Senator ADLAI STEVENSON III,
The Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR STEVENSON: I am writing to you about the Proxmire Subcommittee's recommendation that 5.7 million dollars for lunar sample analysis should be deleted from the NASA budget and that lunar sample research should be carried out from now on by the NSF but that no new funds should be provided the NSF for this purpose. At the very least, this will result in a drastic reduction in the amount of money available for lunar research, a productive program already operating on a bare-bones budget. Inasmuch as the understanding of the origin and evolution of the planets is the fundamental scientific rationale for NASA's exploration of the solar system and studies of samples returned from distant plants are the most direct means of attaining this understanding, these recommendations are yet another step toward the total emasculation of the United States space program.

My own research is funded by NASA, but from a different program, that which deals with the study of meteorites. As the 1974 recipient of the Geochemical Society's F. W. Clarke Medal in Cosmochemistry, the study of the composition of the universe, I can tell you that the techniques developed in and the scientific return from the lunar sample program have had a major, positive effect on upgrading the quality of scientific research in my field. In addition, deletion of the above funds would close down NASA's lunar sample curatorial facility to which the NSF has turned for the delicate sample preparation techniques required in the study of the Antarctic meteorites which were recovered in two recent, highly-publicized expeditions funded by the NSF.

Some scientists are actively studying possible missions to return samples from Mars around 1990. How will those laboratories best equipped to retrieve the maximum information from those samples exist from now until then? Recent events have taught us the hard way that it is very diffcult to resurrect a high-technology program once it has been dismantled. It is my opinion that Skylab would not be in danger of plummeting prematurely to Earth if the manpower and technology gathered together during the Apollo era were still intact today.

Surely the United States, which spends billions annually on cigarettes, cosmetics and pet food, can afford 5.7 million dollars in the same period to continue the systematic scientific investigation of the lunar rocks which were obtained at a cost of over 20 billion dollars to the U.S. taxpayer. For the past few years, I have sat on the sidelines, watching in frustration budgets in various areas of scientific research dwindle or remain level in the face of a scientific inflation rate which far exceeds that of the consumer price index. The effect on American science is now visible. There are fewer laboratories. There is lower productivity in many of the remaining ones. Most disturbing of all, there is a growing hesitation on the part of U.S. scientists to commit sizeable fractions of their research budgets to exciting, pioneering ventures at the forefront of science because these are the risky ones, where the chance of failure is much higher than in those activities which have always worked in the past. I am sorry I have not written you a letter such as this in the past to urge you to do what you can to increase funding of scientific research.

Each year, I read more and more articles by Russian, German, Japanese, English and French scientists, the quality of whose research is relentlessly pursuing and overtaking our own. Did you know that Germany may very well send a spacecraft to rendezvous with and study Halley's Comet when it returns spectacularly in 1986, but that the U.S. will not because of budgetary constraints on NASA? The loss of U.S. scientific prestige in that event would be very great, but not as devastating as that which would accompany cessation of research on lunar samples.

For countless centuries, man has struggled to understand the universe and its origins. I hope it will not be said in the future that the United States, by these and other actions of the Senate, was instrumental in curtailing efforts to achieve this noble goal. I also hope I can count on your understanding of the importance of these issues and on your courage and leadership ability to stand up in the Senate and fight for what you believe in.

Yours sincerely,

LAWRENCE GROSSMAN,
Associate Professor of Geochemistry.

ENRICO FERMI INSTITUTE,
Chicago, Ill.

Senator ADLAI STEVENSON,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR STEVENSON: I have recently learned of Sen. Proxmire's motion in the subcommittee of the senate appropriations committee to eliminate portion of the annual NASA budget dealing with the analysis of lunar and extra-terrestrial samples. I was more than alarmed to hear of this for several reasons that I wish to mention.

The past decade of research in the lunar and planetary sciences has rapidly increased our rather meager knowledge of the theories of solar system and planetary formation. In particular, the past few years have provided us with some of the most fascinating data to date. The techniques that have been developed to enable us to formulate these theories have all been a result of work brought about from the lunar program. It would be tragic at this time to cut off the research at just the time when we are at the point of developing the techniques to understand these complex problems. I might point out that we have not examined anywhere

near the total amount of samples that have been returned from the Apollo missions, due primarily to the great amount of caution and extreme care that not only NASA but all the scientific researchers have applied to the work. Sen. Proxmire has argued that $39 billion dollars have already been spent on the lunar missions and further spending should be eliminated. I believe that this is irrational in that the amount of money spent yearly to study these lunar samples is quite small, not only with respect to the $39 billion but also other budgets. It would seem a great waste considering that large initial cost to not derive full benefit from the program and to get our money's worth so to speak by learning as much as we can from the samples that we went for in the first place.

The NASA lunar and meteorite program has been in the past and still remains an exciting program, not only from the research itself but from the standpoint of the International collaboration that the program has allowed for. The work that is now being carried out by these scientists is of the highest caliber and has evolved into this state from this cooperation among scientists of all parts of the world.

Shifting of funding to NSF would be damaging from two standpoints, first, NASA is a mission oriented agency and as such is best equipped to oversee the research. It would be quite wasteful to throw away all the years of planning and work that has been invested in the Lunar and planetary science institute and shift the funding agency to one which has no expertise in the field. Secondly, the removal of the current NASA funding would require all the presently funded institutions to apply to the NSF. Overburdening of these funds would have the effect of squeezing out many of the smaller institutes funded by both NASA and the NSF. Many of these schools rely on these funds to support both student and faculty research. Certainly the effect would be felt on students who might be considering studying in the life sciences but could not afford to do so without funding. With the growing concern of environmental and energy issues the need for people highly trained in these areas is crucial. Removal of funds that allows us to train these people will result in a direct drop in the number of scientists that may be trained.

I hope that the Senate will act favorably on this issue and the work will continue to be carried on in the Lunar and Planetary sciences at the highest level. I thank you for your time in reading this hastily written letter and hope that we might count on your support.

Sincerely,

Dr. MARK H. THIEMENS,
Research Associate.

UNIVERSITY OF CHICAGO,
Chicago, Ill., August 3, 1978.

Senator ADLAI STEVENSON,
Russell Senate Office Building,
Washington, D.C.

DEAR SENATOR STEVENSON: I wish to express dismay at the action of Senator Proxmire's subcommittee of the Senate Appropriations Committee in deleting the lunar sample analysis program from the NASA budget.

It should be emphasized that the program is first-rate on scientific grounds. The subject of study is important and timely. The international community of scientists involved is a dedicated, productive group of scholars of high calibre. The record of research over the last nine years is vast and impressive in its quality. The prospect of work yet to be done is stimulating and exciting.

When President Kennedy in 1961 set a national goal to put a man on the moon within the decade, his motivations were political, not scientific. Many members of the scientific community were dubious about the value of such a program, myself included. However the fantastic success of the Apollo program clearly served its purpose admirably: to demonstrate American technological superiority to the world at large. But once the engineering feat had been accomplished, the task of reaping the maximum scientific benefit from the returned lunar samples fell to researchers, both here and abroad, most of whom had their backgrounds in the terrestrial earth sciences. New laboratory techniques were developed, new high standards for excellence of experimental methods were established, new patterns for collaborative research and for rapid communication and publication evolved. The prestige of American science in the international community has been greatly enhanced by this program.

A useful measure of the health and vitality of the lunar program is given by the Lunar Science Conferences, held annually in Houston. The excitement of these meetings has not waned over their nine occurrences. They are an annual *must* for about a thousand scientists. The well edited Proceedings volumes from these meetings run to almost 4000 pages a year. The scope of the conferences has evolved so as to include all of solar system science, including the moon, the planets and meteorites.

What lies ahead for research with lunar samples? At the very least one should be aware that a substantial fraction of the lunar samples have not yet been studied at all. These include a number of important core samples collected on the early missions when the pressure of succeeding missions precluded the possibility of the careful opening and dissection of these very important specimens. Furthermore, our understanding of the moon has progressed very considerably since 1970, and powerful new techniques have been developed, so that detailed study of samples from the early missions is necessary to realize their full value. I must emphasize that lunar sample analysis is not a routine application of established techniques to a large number of similar samples. New techniques are continually developed which allow us to address new scientific questions.

Not all aspects of lunar sample studies refer to the moon. Many take advantage of the fact that the moon has been a collector of particles from its space environment for over four billion years. For example, in my laboratory we measure the atoms of nitrogen implanted into grains in the lunar soil from the solar wind. By measuring soils taken from deep cores, we can measure properties of the sun back to two or three billion years ago. The results show a surprising large variation in the relative abundances of the two isotopes of nitrogen, reflecting the nuclear processes which have gone on in the sun. The most important conclusion from this is that we do not yet know how the sun works. This is an obvious case in which lunar sample studies have impact in broader areas of science, and in areas of practical human concern.

Another example of cross-fertilization from lunar sample research to other fields is the development of a new method for the determination of the ages of rocks. This technique, requiring very precise measurements of the isotopes of the rare elements samarium and neodymium, was applied first to lunar rocks in 1975. It has subsequently become one of the most important methods of studying the geological evolution of the crust and mantle of the earth.

Should the study of lunar samples be under the jurisdiction of NSF rather than NASA? From the points of view of the quality and effectiveness of proposal review, and of accessibility to the broad scientific community, I see no major difference. From my experience both as a proposal writer and a proposal reviewer for both agencies, I believe that the NASA lunar science program has a higher average quality than the NSF geochemistry program. However, NASA must determine which scientists have access to lunar samples, and must make that judgment on the basis of scientific proposals. It seems unnecessarily cumbersome to require one agency to evaluate proposals for sample allocation and another to evaluate the sample proposals for funding.

In summary, the lunar sample research program is a thriving, important area of science which makes a major contribution to American scientific prestige in the world. The United States has brought the world into the age of space exploration. Termination of a significant part of this venture could only be read as a signal that we have lost interest in exploring the nature of man and his environment.

Sincerely yours,

ROBERT N. CLAYTON,
Enrico Fermi Institute, Department of Chemistry, Chairman, Department of the Geophysical Science.

ENRICO FERMI INSTITUTE,
Chicago, Ill., Aug. 3, 1978.

Hon. ADLAI E. STEVENSON III,
Chairman, Subcommittee on Science and Space, U.S. Senate, Russell Senate Office Bldg., Washington, D.C.

DEAR MR. CHAIRMAN: I respectfully request that you seek to restore funds for the lunar sample analysis program ($5.7 million) that were deleted from the NASA budget by the Senate Appropriations Committee. I am enclosing my July 27 letter to Senator Magnuson, giving some reasons why this program should be continued. I shall not repeat the arguments in that letter, but focus on two crucial points: why the lunar sample is worthwhile and why it should be continued under NASA rather than NSF auspices.

(1) The lunar sample program has revitalized several areas of the earth sciences. Faced with the challenge of these priceless samples, lunar scientists have improved their instruments and skills by orders of magnitude, with a corresponding gain in information. These advances are now spreading through the earth sciences, often through the medium of young people trained in the lunar program. Having reached the paradoxical state where we have better data on lunar than on terrestrial rocks, many lunar scientists now spend part of their time on terrestrial rocks, applying lessons learned from the Moon to the Earth and thus directly contributing to the earth sciences.

(2) The lunar sample program has brought much distinction to U.S. science. Our world leadership in planetary science, geochemistry, and cosmochemistry is confirmed by every yardstick: professional honors, citations in foreign books and journals, U.S. contributions at international meetings, recognition by the Russians (as mentioned in my letter to Senator Magnuson), etc. A sign of the vitality of the program is the continuing participation of foreign scientists, selected by NASA peer review but funded by their own governments.

(3) The program has brought many scientific and cultural benefits, and will bring more. I think we will be a better and wiser people if we know our past: not only the origins of our nation but also the origins of mankind, life, our planet, and the solar system. The Moon holds many clues to these questions. (a) It differs chemically from the Earth, for reasons that are not yet fully understood. (b) It provides "ground truth" for the understanding of other small planets, such as Mars, Mercury, asteroids, moons of Jupiter and Mars, etc. (c) It contains a record of radiations and objects that struck the Moon since its formation: cosmic rays, par-

ticles from the Sun, meteorites, late building blocks of the planets, etc.

Let me offer two examples from my own work that illustrate the nature of lunar research. My group, consisting of 3 Ph.D.'s analyzes lunar rocks for 20 rare elements, using an exceedingly sensitive and precise but slow and expensive method: neutron activation analysis. We have learned to recognize meteoritic debris in lunar samples by its chemical signature (traces of noble metals, which are rare in pristine lunar rocks but are abundant in meteorites). Of special interest to us are the 20–100 mile bodies that fell on the Moon in the last stages of its formation, and produced the dark scars on the Moon's face. Many more such bodies must have fallen on the primitive Earth, but their traces have been wiped out by geological activity. Some of these bodies presumably were planetesimals (building blocks of the planets) and hence of great importance to an understanding of the planets.

By studying some 200 lunar samples over 5 years, we gradually recognized that 8 different bodies were represented, that 7 of them were unlike any present-day meteorites, and that they apparently fell in the order of their composition: the most Moon-like first, and the least Moon-like last. Obviously, nature is trying to tell us something about the orbits of these bodies, and how they varied with chemical composition. This, in turn, relates to the question why the planets all differ in chemical composition—one of the most basic questions in planetary science. Lunar samples contain at least part of the answer, and if we want to find it, my group will have to be funded to continue this work, and a couple of other groups should also be funded to keep me honest.

Lunar samples can also lead us to the same question by a different route. Combining ideas derived from meteorites and lunar samples, we showed in 1974 how to calculate the complete bulk composition of the Earth and Moon from only 6 chemical clues. This was an improvement over the traditional, trial-and-error method, which gave less complete results from a much greater body of data. Colleagues at other institutions tested our model and found that it came close to the mark, though in need of further tinkering. Encouraged by the success, we now are on the second try of a similar model for Mars, based on a few scraps of data returned by Viking. This model soon will be tested by us and others. If it survives, it will guide future research by making predictions, putting unrelated facts into a framework, extracting more information from a given number of facts, and allowing us to skip pointless experiments. We'll learn more about Mars with less effort and expense than we could without such a model. But this model could not have been conceived without earlier work on meteorites and lunar samples.

(4) The lunar program has brought various practical benefits, as some of my colleagues will report to you. I shall mention two examples from my own work on meteorites, an equally abstruse kind of extraterrestrial material. In 1959, I concluded that the diamonds in certain rare meteorites were made from graphite by high-speed impact; within a few months, two colleagues had duplicated the process in the laboratory and taken out a patent. A chemical company now uses this process to make industrial diamonds.

Between 1963 and 1973, my coworker B. Hayatsu worked on the origin of organic compounds in meteorites. We concluded from simulation experiments that these compounds had formed from carbon monoxide and hydrogen, with clay as a catalyst. Hayatsu now works at the Argonne National Laboratory on coal liquefaction, and found that clay is an excellent catalyst for this process. Unlike the previously used metallic catalysts, clay is not poisoned by the abundant sulfur in Illinois coal, but works even better when sulfur is present.

Let me now turn to the second question, why NASA rather than the NSF should administer the lunar program.

(5) We are not afraid to let the NSF "evaluate (our proposals) competitively with other applications for funding for basic research in the geological sciences", as long as it is done under a strict merit system. The initial selection of lunar sample PI's in the 1960's was strict enough, and the group has been pruned annually since 1970, by a tougher and more thorough peer review than that of the NSF. A number of people rejected by the lunar program are in fact being funded by the NSF.

However, the dumping of the lunar program onto the NSF, without an increase in funds, means that two groups previously funded at $29.8 million suddenly have to scramble for $24.1 million, which is a 19% cut. At this point a difference in research techniques becomes crucial. Geology, using its traditional tools of pick, hammer and microscope, is a low-budget operation; whereas isotope geochemistry, using the tools of physics (mass spectrometers, radiation detectors, etc.) is as expensive as physics. The NSF usually avoids measuring two such fields by the same yardstick, and separates expensive research fields (high energy physics, oceanography) from low-cost fields. But if this principle is breached in the present case, by forcing both groups to compete for the same 81% of their former funding, the temptation will be strong to sacrifice 50 high-cost lunar scientists for the sake of 200 low-cost geologists, or to slash the larger budgets to the point where the research groups are crippled.

(6) NASA is here to stay, as even Senator Proxmire seems to concede. And NASA has a long, unfortunate history of putting its priorities where the money is: 99% for engineering and 1% for science. Scientists have fought this trend in the 60's and early 70's, and though the situation has greatly improved in recent years, it would be unwise to free NASA of this potential swarm of gadflies Hare-brained schemes, such as mining of asteroids and orbital power stations, still need to be opposed, and such opposition is likely to be better-informed and more vigorous if it comes from scientists with a stake in NASA's program and image. In a positive vein, advice on worthwhile missions will also be better-informed and more freely given by scientists supported by NASA.

Let me conclude by paraphrasing a remark by Carl Sagan. We will be remembered as the generation that explored the solar system. Do we also want to be remembered as the generation that decided after spending $30 billion on a brilliant engineering feat that it couldn't afford $5.7 million to extract the scientific message from the lunar rocks that the astronauts returned?

Yours sincerely,

EDWARD ANDERS,
Professor of Chemistry.

CHICAGO, ILL., *Aug. 3, 1978.*

Sen. ADLAI STEVENSON,
Russell Senate Office Building,
Washington, D.C.:

Request that you introduce a Senate floor amendment restoring 5.7 million dollars to the NASA 1978–79 appropriations when the HUD-independent agencies appropriation bill (H R 12936) reaches the floor these funds were in the presidents budget for lunar sample studies and were deleted by the Senate appropriation committee.

Funds are vital to the University of Chicago's major program of basic research in physics and geochemistry and to basic understanding of exterrestrial phenomena would be glad to have the opportunity to discuss this with you personally if you need further material or justification for supporting this proposal.

HANNA HOLBORN GRAY,
President, University of Chicago.

PASADENA, CALIF., *Aug. 5, 1978.*

Hon. ADLAI A. STEVENSON III
Russell Senate Office Building,
Washington, D.C.:

I was sorry to hear that the Senate Appropriations Committee deleted the 4.7 million dollar appropriation for the analysis of lunar samples from the NASA budget. Senator Proxmire's suggestion that the geological branch of the NSF should now support this research would basically represent a 25% cut of the budget of this branch for those researches they are now funding. This seems to me a highly unwise move in the light of the importance of maintaining a high level of research on the problems pertaining to earth sciences whose researches include, earthquake prediction, studies on origins of ore deposits, coal, petroleum, and other natural resources, I therefore urge you that the 5.7 million dollars deleted from the NASA budget for the analysis of lunar samples be put back in the NASA budget and the proposed transfer of the financial responsibility for the analysis of these lunar samples to the NSF be avoided.

SAMUEL EPSTEIN,
Vice-President and President-Elect of the Geochemical Society, California Institute of Technology.

STANFORD, CALIF., *Aug. 4, 1978.*

Mr. ADLAI E. STEVENSON III,
Chairman, Subcommittee Science and Space, Russell Senate Office Building, Washington, D.C.

The proposed transfer of the budget for the lunar sample analysis program from NASA to NSF may have an unintended impact on important NSF programs in Earth science, especially if the combined funding for the lunar research, geology, geochemistry, and geophysics is substantially reduced. As president of the American Geophysical Union I am especially aware that the Earth science research funded by NSF provides the intellectual basis for many important applications including the prediction of earthquakes and other natural hazards and the global search for mineral resources. If the lunar analysis program is transferred to NSF, I hope that it can be done in a way that maintains the vigor of the lunar program without curtailing other important NSF programs in Earth science.

ALLAN COX,
President, American Geophysical Union.

PASADENA, CALIF., *August 2, 1978.*

Senator ADLAI E. STEVENSON,
Russell Senate Office Building, Washington, D.C.

DEAR SENATOR STEVENSON: The proposed deletion of the funds for the research on luner and extra-terrestrial material from the 1978–79 budget of NASA and NSF causes me great concern, the study of these samples is the ultimate scientific reward of the luner missions and a vital part of future explorations of our space environment. It has contributed tremendously to the understanding of our own planet as well as the solar system as a whole. This knowledge is essential not only to the possible future use of the space but also to the continuing effort of assessing man's position in the universe. This type of research is not a one time job but progresses with improving technology. It cannot be substituted by any other work. For a great nation like the U.S. it is definitely a lack of foresight to wipe out an entire field for the reason of saving an already pitifully

small amount of supporting funds, for these reasons I urge you to vote against this deletion.

TYPHOON LEE,
Robert R. McCormick Postdoctoral Fellow University of Chicago.●

THE IMBALANCE IN LABOR RELATIONS

● Mr. LUGAR. Mr. President, the recent filibuster against the labor reform bill was part of an effort to halt the increasing imbalance in labor relations in favor of powerful unions. Fortunately for the welfare of the country, of small businesses, and ultimately, of labor as well, the filibuster was successful.

The labor movement has been an important and necessary political force in the struggle for fair, humane working conditions and benefits. Its accomplishments have been great. It still has much to do.

But this struggle—because of its great success—now imposes different obligations upon labor organizations. The rights of the uninvolved public, and the economic welfare of the Nation as a whole must figure in the calculations of today's labor leaders.

Mr. President, I wish to call to the Senate's attention an excellent article that appeared recently in the Evansville, Ind., Press, written by Elizabeth Brewster of that city.

Ms. Brewster, although she has just graduated from high school, writes with an understanding and perceptiveness beyond her years. I would hope that other citizens of all ages will give her essay thoughtful consideration.

I salute her for a significant contribution to the public debate on a most important issue, and I commend the Evansville Press for affording her the opportunity to express her views.

The article follows:

BRINGING BALANCE TO LABOR RELATIONS

(By Elizabeth Brewster)

The precarious balance of power between American labor groups and American management interests currently seems to be topped in favor of the labor unions, a situation that provides little chance for either side to achieve its goals.

Labor unions are obviously an integral, necessary part of the American labor scenario, as they have been since their first rise to power in the 19th-Century industrial revolution.

Early attempts at organization of workers were usually the laborers' only response to the notoriously unhealthy working conditions and insufficient wages. The need for some type of worker representation then was obvious and urgent; today, labor unions still serve a vital purpose in protecting the rights of many American workers.

The need for protection of these laborers' rights, however, does not rationalize the abuse of power sometimes attempted by various unions.

Strikes, walk-outs and work slowdowns are usually viable and reasonable means of protesting contract settlements or working conditions. When these methods of dissent seriously interfere with the welfare of uninvolved American citizens and violate federal laws, however, the unions may be considered guilty of techniques akin to the 19th-Century management's "shut-out" and "blacklisting" tactics.

This lopsided balance of power can also wreak havoc with economic conditions. The current Washington strategy of combating inflation depends a great deal on keeping wage increases comparatively low during the next several years.

Yet the ever-rising wage demands of many unions seems to bluntly defy this economic plan. The rank-and-file members of a number of these unions seem oblivious to the fact that most additional money they so fervently demand may eventually spur price increases of consumer goods.

Most of the unions also seem unwilling to be the first "victim" of economic policy that could ultimately increase the purchasing power of its members.

This occasional disregard for public economic welfare gives every union an uncomplimentary image to the public, and diverts attention and enthusiasm from their ultimate goal: Betterment of workers' conditions.

Just as the oppressive industrial giants of the 19th Century eventually found themselves labeled as the "bad guys," so, too, will today's labor unions which are single-mindedly employing every dramatic tactic in their arsenal. Most likely, they will be regarded quite unsympathetically by future onlookers.

The perpetual power play between labor unions and management, nevertheless, is not inevitably headed for disaster. A genuine spirit of cooperation and compromise in both labor negotiations and everyday working interactions would do a great deal to improve the relationship.

The realization, too, that in a fair compromise neither side can be completely satisfied is a needed replacement for the current negotiating attitudes of belligerent stubbornness.

Negotiations between labor and management too often seem weighted down in favor of one side or the other, but the addition of cooperation and realistic attitudes could be the necessary elements to keep the balance of power from toppling.●

THE DAY OF SHAME

● Mr. WILLIAMS. Mr. President, on this 10th anniversary of the Soviet invasion of Czechoslovakia, I would like to express my personal repugnance for government sanctioned oppression. In current times, when human rights are extremely vital to our Nation's foreign policy, it saddens me to be reminded on this occasion that there are countries which refuse to recognize the right of each individual to personal and political freedom.

The people of Czechoslovakia were awakened early in the morning of August 21, 1968 by Soviet and Warsaw Pact troops, tanks, and guns. These people, who had been striving for a more democratic state, were forced by thousands of alien soldiers to accept the repressive standards of Communist rule. The people of Czechoslovakia, before that time, had made great strides toward the implementation of many aspects of democracy in their country. In fact, according to a contemporary Western report, many of those who were considered to be the more radical of Czechoslovakian reformers: "dreamed of making that country a genuine democracy, with different political parties that would have the right to contest for power. In their view, Czechoslovakia should become a country in which Communists could be voted out of power if the people wished to do this."

Mr. President, these efforts of the so-called "radical" reformers were, in my mind, directed toward a truly noble goal. Nevertheless, the Soviet Union refused to accept the legitimate aspirations of these courageous people. Instead, they denied many of those so-called "radicals" the opportunity to express their aspirations for a more representative government.

The tragic events of 10 years ago should serve as a consistent reminder to all Americans that we have an obligation to support the freedom of people everywhere. There are millions of individuals whose daily lives still focus around a continuous struggle with Communist oppression. They live under governments which refuse to recognize their inherent rights to freedom and personal dignity.

As Americans, we are privileged to be able to promote the cause of freedom by protesting the plight of any people who are systematically denied justice by their own governments. Too many countries, like Czechoslovakia, have reluctantly fallen under totalitarian domination since World War II. This anniversary of the shameful day that the Soviet Union crushed the budding liberalization there should add to our resolve that we will remain free.

And, in the enjoyment of our freedom, we must let the world know that we feel implicated in the fate of those who are oppressed. Our expressions of hope and indignation can hasten the day when the torch of freedom will once again shine in Czechoslovakia and other enslaved nations.●

TENTH ANNIVERSARY OF SOVIET INVASION OF CZECHOSLOVAKIA

● Mr. ZORINSKY. Mr. President, today we recall with sorrow the Soviet invasion of Czechoslovakia. On August 21, 1968, the Soviet Union brutally occupied Czechoslovakia and brought to an end a brave experiment in independence. Threatened by a breath of freedom, the Soviet Union crushed the attempt of the Czechoslovakian people to fashion their own institutions of government free of external influence.

Ten years have neither softened the harshness of that first blow nor the continuing oppression with which the Soviets exercise their dominance over the Czechoslovak nation. August 21 rightly is called the "Soviet Day of Shame." The Soviet Union has violated the letter and the spirit of the United Nations Charter and the Helsinki Final Act. Such flagrant violations deserve the condemnation of free peoples everywhere.

Aspirations for freedom have survived in Czechoslovakia and are expressed in Charter 77, a manifesto by Czechoslovakian citizens appealing to their government to observe the principles of the final act and the Czechoslovak Constitution. I applaud this call for the sovereign right of self-determination. Our national commitment to basic human rights demands no less.

Earlier this month, I proudly joined a number of my colleagues in cosponsoring

Senate Resolution 526, observing the 10th anniversary of the Soviet invasion of Czechoslovakia. Senate Resolution 526 expresses the sense of the Senate that the President should use the influence and leverage of his office to end the continuing intervention in Czechoslovakia by the Soviet Union. Today, I join Americans of Czech and Slovak descent—and all Americans—in condemning again the Soviet occupation of Czechoslovakia and expressing support for the brave people of that nation.●

TENTH ANNIVERSARY OF THE INVASION OF CZECHOSLOVAKIA

● Mr. MOYNIHAN. Mr. President, today, August 21, 1978, marks the 10th anniversary of the Soviet invasion of Czechoslovakia.

This year must bring many memories to the peoples of Czechoslovakia—some that are inspiring, and some that are grim. But it is equally an occasion for Americans to reflect upon the influence our ideas have had throughout the world, and on the challenges those ideas encounter in the world today.

Sixty years ago the modern nation state of Czechoslovakia was created out of the ruins of the Austro-Hungarian empire and the chaos of World War I. Its creation was principally the work of Czech and Slovak patriots and statesmen, most notably a man of brilliance and great character, Thomas Masaryk. But we should remember that those who accomplished this remarkable work were greatly influenced by the precepts of democratic self-determination whose most eloquent international advocate was our own President, Woodrow Wilson. Moreover, like our own country, the Czechoslovak Republic was a nation composed of diverse ethnic groups—not only Czechs and Slovaks, but Germans, Hungarians, Ukrainians, Gypsies, and Jews. For 20 years, until outside powers destroyed it, the Republic enabled these peoples to live together in unprecedented harmony and liberty.

In 1938, 40 years ago, their accomplishment was cruelly destroyed. Hitler's armies occupied the Sudetenland, and the rest of Czechoslovakia was yielded to the Axis powers at the Munich conference. Czechoslovakia was abandoned with a remarkable combination of cowardice and hauteur best expressed in Neville Chamberlain's remark that Czechoslovakia was a "far away country about which we know little." It was a remark which sometimes finds echoes in our own time.

Hitler's defeat brought only the briefest respite for the peoples of this nation. Both Czechs and Slovaks rose against the German occupations in 1944 and 1945, but received little aid from the Allies, largely because the Soviet Union preferred to "liberate" these areas itself. A coalition government ruled the country for a short period after the war, but local Communists, directed by Soviet agents and aided by the massive presence of the Red Army, overthrew the constitutional government in 1948—30 years ago. Again, the democracies turned their backs on our Central European cousin. Russia, the Big Four conceded, had a right to her own buffer zone: a bizarre concession to the outrageous contention that the West harbored designs against the Soviet Union.

But Czechoslovakia's democratic traditions did not die. Ten years ago today they reappeared in the heresy of "Socialism with a human face," and the call for political pluralism, a prospect which panicked the Soviet leadership and precipitated the Soviet invasion. That invasion, justified by the remarkable pretext that the Soviets were protecting the country from "West German revanchism," brought about nothing less than a thoroughgoing reimposition of totalitarianism on Czechoslovakian society. The Dubcek coalition was completely purged. Five Soviet divisions were permanently stationed on Czechoslovak soil. And, most important, pro-Soviet Czechoslovak Communists reimposed ideological and political controls in all spheres of life.

Nevertheless, today, 10 years after the ruthless invasion of Czechoslovakia, the Czechoslovak people's commitment to freedom remains an unbroken force. This fact is a powerful rebuke to the enemies of freedom, and to the cynics who believe that those who would resist totalitarianism are quixotically seeking to impose their own democratic values upon an indifferent world. It is also a tribute to the enduring power of that tradition of democratic internationalism which shaped the best of our own Nation's foreign policy in the years since World War II. The spirit of freedom in Czechoslovakia endures among the workers, who have joined in protests against oppression and foreign domination. It is evident among the religious groups: Roman Catholic clergy have spoken out bravely against religious persecution, as have priests of the Protestant Church of the Czech Brethren, Lutherans, Jewish leaders, and Seventh-day Adventists. But perhaps the best-known evidence of Czechoslovak desire for liberty is the group which calls itself "Charter 77," a group which now has some 1,000 public supporters, and describes itself as:

> . . . a free, informal and open community of persons of varying convictions, religions and professions, joined together by the will to work individually and collectively for respect for civil and human rights in our country and in the world—those rights which are granted to man by the two codified international covenants, by the Final Act of the Helsinki conference, by numerous other documents opposing war, the use of force and social and intellectual oppression, and which have been expressly and succinctly stated in the UN Universal Declaration of Human Rights.

The current Czechoslovak regime's utter contempt for basic human rights was displayed when, at the very moment its delegates were discussing compliance with the Helsinki accords in Belgrade, it was convicting three of the Charter 77 signers—the playwright, Vaclav Havel; the actor, Pavel Landovsky; and worker, Jaroslav Kukal—for "anti-Czech" activities. All this was done even though the Chartists took great care to draft their statement so that it would conform to the letter of their country's written laws. On June 6, 1978, almost 40 of those associated with the Charter 77 Movement were arrested in order that no evidence of the Czechoslovak desire for liberty would be visible to Chairman Brezhnev during his visit to the country.

Mr. President, these good people depend on the interest and concern of the West to keep their movement alive. We have not always been faithful to them in the past. Today, as negotiations go forward on mutual and balanced force reductions in Europe, this anniversary should remind us that our interests in seeing fewer Soviet troops in Eastern Europe arise not merely from military and strategic considerations, but also from political and humanitarian concerns. Soviet troops in Czechoslovakia pose a threat to Western European security, but their presence is also a brutal imposition on the freedom of the Czechoslovakia peoples themselves. As long as the troops remain, so will oppression and domination.

Mr. President, I have recently received from my friend and colleague, Dr. Jiri Horak, the statement of the Council of Free Czechoslovakia, adopted by them on August 1 of this year. I ask that this statement, the appeal of an extraordinary group of Czechoslovak democrats-in-exile, be printed in its entirety in the RECORD.

The statement follows:

AN APPEAL: END THE OCCUPATION OF CZECHOSLOVAKIA

On the tenth anniversary of the invasion and occupation of Czechoslovakia by the armed forces of the Soviet Union we appeal to all the peoples of the world and the United Nations to support the demand of the Czechoslovak people for the immediate withdrawal of all Soviet forces from the territory of their Republic.

On August 21, 1968, the Soviet army invaded and occupied Czechoslovakia. On August 28, 1968, the Soviet Communist Party leaders forced Czechoslovakia's kidnapped leaders in Moscow under duress to sign a communique sanctioning the temporary occupation of the Czechoslovak Republic.

This act of aggression was in violation of the Czechosovak-Soviet Treaty of Friendship and Alliance of 1943, of several agreements among the Allied Powers on liberated Europe, of Article 2 of the Charter of the United Nations, and of the Soviet government's own declaration of October 30, 1956. The Soviet Union invaded Czechoslovakia on the pretext that the country was to be protected against a nonexistent "West German revanchism."

The continuing occupation of Czechoslovakia is in violation of the agreement between the governments of Czechoslovakia and the Soviet Union of October 16, 1968, according to which Soviet armed forces were to be stationed in Czechoslovakia only provisionally. In this document to the Soviet Union acknowledged that its forces had entered Czechoslovak territory only temporarily and undertook to withdrew them as soon as the situation in Czechoslovakia had been normalised. Since then Czechoslovak as well as Soviet Communist leaders have declared on numerous occasions that

conditions in Czechoslovakia have been normalized. But the country continues to be occupied.

The occupation also violated the provisions of the Final Act of Helsinki. But above all else it continues to violate the three principles which the Soviet Union itself has recognized as essential for the peace, stability, and prosperity of Europe:

The principle of the sovereignty of all European states and nonintervention in their internal affairs.

The principle of the independence of all states including the right of self-determination.

The principle of the renunciation of the use of force against any state.

The Soviet invasion and occupation of the Czechoslovak Republic have dangerously upset the military balance that had existed in Europe since the end of the Second World War. They violate wartime agreements about the deployment of Allied forces in Continental Europe. Czechoslovakia was to have neither Western nor Soviet troops on its territory. The occupation of Czechoslovakia keeps Soviet forces in the heart of Europe in such numbers that the military balance along the dividing line between East and West is heavily weighted in Soviet favor.

It is therefor imperative not only for Czechoslovakia's sovereignty, independence, and freedom but also for the peace, stability, and prosperity of Europe that the Soviet Union withdraw its armed forces from the territory of the Czechoslovak Republic.

This appeal is backed by documents in which the Soviet Union has committed itself to evacuate the territory of the Czechoslovak Republic, and by Czechoslovak citizen's to declarations of protest against the occupation of their country and resolutions demanding its end. The Charter 77 movement in Czechoslovakia and Czechoslovak exiles' endorsement of Petition 78 bears witness to the determination of all Czechs and Slovaks to see their Republic rid of Soviet occupation forces and once more sovereign, independent, and free.

In submitting this appeal, we speak for the Czechoslovak exiles who left their country after the coup d'état of 1948 as well as for those who had to leave when Czechoslovakia was invaded by the Soviet army in 1968. We are absolutely certain that, speaking in their names, we speak for all Czechs and Slovaks. We believe that a new European order based on the principles of true sovereign equality, independence, self-determination, nonintervention, and renunciation of the use of force would be a great step toward satisfying the hopes, aspirations, and interests of all the European peoples.

COUNCIL OF FREE CZECHOSLOVAKIA.
WASHINGTON, D.C., *August 1, 1978.*●

CZECHOSLOVAKIA: AUGUST 1978

● Mr. EAGLETON. Mr. President, yesterday marked the 10th anniversary of the Soviet invasion of Czechoslovakia. On August 20, 1968, Soviet tanks and troops moved into Prague in a massive effort to "rehabilitate" the Communist government of Alexander Dubcek. Dubcek's movement toward liberalization and reform so threatened the Soviet Union's ideological hold that they retaliated with their own particular brand of crisis management—force.

It is tragic and yet predictable that the Soviets move in this pattern. Their totalitarian system cannot tolerate much flexibility in the area of human rights or civil liberalties, for it shakes the very foundation upon which the Soviet oppressive regime is built. Whenever the Soviets have perceived that their influence is on the wane, whether domestically or internationally, they have tightened their control. We have seen it most recently with the Scharansky-Ginsburg trials, and as we look back into history we see the trend evolving.

And yet, Mr. President, in spite of the pressure tactics used by the Soviets, the 1968 invasion of Czechoslovakia has strengthened the push for human rights in Eastern Europe and the Soviet Union. In an excellent article in yesterday's Washington Post, Tad Szulc points out that the invasion of Czechoslovakia received almost unanimous condemnation from Communist leaders outside Eastern Europe.

Since 1968, the trend of Communist parties outside the Soviet Union has been toward self-reliance—less dependence on Moscow and more independent action. This is not to say that communism is no longer a force to be dealt with, but that the Soviet Union's tactics of force and brutality do not always produce the desired effect. As Tad Szulc states in his article:

Communism, of course, will not go away in our time as a major political force in the world. But Czechoslovakia has probably done more to change its system of international relationships than any other single contemporary event.

Mr. President, the reforms Alexander Dubcek initiated in the Prague Spring of 1968 were stilled by the sheer weight of Soviet force, but the spirit of Prague Spring still smolders in the consciousness of hundreds of thousands of Czechs, despite the presence of some 80,000 Soviet troops.

In 1977, a group of Czech citizens rekindled the human rights movement by issuing Charter 77, presenting the Husak government with a bold statement regarding the necessity to improve human rights in Czechoslovakia. Charter 77 outlines some 12 areas in which the Czech Government violates the most basic human rights—freedom of expression, freedom of religion, right of assembly, right to strike, the right to leave one's country, to name a few. The necessity for such a document is hard for us to fathom, because we take these basic rights for granted. It is a testimony to the spirit and strength of the Czechs that they have been able to keep their hopes alive during 10 years of Soviet occupation.

Mr. President, I ask that Tad Szulc's article, "The Legacy of Prague," be printed in the RECORD.

The article follows:

THE LEGACY OF PRAGUE—INVASION DEEPENED IN COMMUNIST WORLD

(By Tad Szulc)

At precisely 11 p.m. on August 20, 1968, Soviet and Warsaw Pact armies crossed the borders of Czechoslovakia in a land and aerial invasion designed to stamp out that country's experiment in "Marxism with a Human Face." It was a watershed event in terms of Soviet power politics, aimed at preventing any change in the ideological status quo in Moscow's zone of influence and blocking Marxist evolution wherever possible.

Now, a decade later, it is evident that while the Soviet Union remains faithful to the "Brezhnev Doctrine," invoked as a justification for invading Czechoslovakia to preserve ideological orthodoxy, it has paid a heavy price for this surgical stroke. The international Communist movement has been further splintered, dissent in Eastern Europe as well as in the Soviet Union has risen to new heights forcing last month's Moscow trials, and China has been propelled into a new relationship with the United States.

On the plus side for the Kremlin, the Prague invasion became a precedent for "invitations" for outside military intervention of the type the Russians and the Cubans are currently practicing in Africa. The "fraternal assistance" against the Prague government of Alexander Dubcek had been "requested" by pro-Soviet Communist conservatives whom the Kremlin called Czechoslovakia's "authentic" leaders.

In other words, the events of 1968 are having a continuing impact on the world scene today.

First, the invasion established the proposition that Moscow will never tolerate a peaceful evolution of the Communist system within its zone of influence at home or in Eastern Europe. The Russians had invaded Hungary in 1956, but the issue there was the ouster from power of the Communist Party—not its transformation—and the abandonment of the Warsaw Pact. In the sense that Marxism still aspires to being a living, changing philosophy suited to new generations, the fundamental ideological test was Czechoslovakia.

As far as the Kremlin is concerned, Marxism-Leninism in its present form is an immutable dogma not open to dissent or experimentation; as recent events prove, there has been no meaningful change in it in the last decade, despite internal and external pressures. This concept is obviously linked to the national interest of the Soviet state, which includes absolute control over domestic nationalisms. What if the example of reforms in Prague, which included certain autonomy for Czech minorities, had given ideas of change to the nascent Soviet dissidence or to the Ukrainian, Georgian, Lithuanian, Tatar or other minorities?

Although the intervention was meant to paralyze Marxist liberalization, ironically, it served to strengthen Soviet dissent, and, gradually, to reawaken it in part of Eastern Europe. The desire for change simply could not be killed.

To be sure, Andrei Sakharov, the nuclear scientists, had issued his manifesto calling for internal Soviet change the year before the invasion and writers Yuli Daniel and Alexander Ginzburg were already in jail. But the Prague invasion resulted in unprecedented public protests in Moscow and the consequent imprisonment of several activists. And the wave of dissent kept gathering power after August, 1968, climaxing in this summer's trials when, once more, the Politburo concluded that any ideological challenge was unacceptable. A direct line connects the events of the summer of 1968 and the summer of 1978.

RIFTS IN THE FAMILY

Within the international Communist movement, the invasion has had consequences that cannot yet be fully measured. Yugoslavia in 1948, Albania in the early 1950s, and China in the late '50s had broken away altogether from the Moscow center of communism. In the early 1960s, Romania had embarked on an independent foreign policy, including close ties with the runaway Chinese. Palmiro Togliatti, leader of the Italian Communist Party in the mid-'60s, had begun developing novel notions about Marxist evolution.

Then the Prague invasion forced another historic divide in Communist movements. Yugoslavia and Romania mobilized their forces and were ready to fight if Brezhnev

decided to use the momentum of Prague to put communism in order on their territories. The Italian Communist Party denounced the invasion openly and began moving toward what became known as Eurocommunism. So did the Spanish party, still exiled but quite important. The French party, rich in Stalinist traditions, split over Czechoslovakia and began its own shift away from Moscow's leadership. So did the smaller Western European parties.

Significantly for the future, of all the important world Communist figures outside Eastern Europe only Cuba's Fidel Castro applauded the invasion. China, of course, condemned it and even North Vietnam was strangely ambiguous about it.

When the Kremlin succeeded in organizing the 1969 conference of world Communist parties in Moscow, it was clear that the international movement was rent asunder over Czechoslovakia. The Kremlin has not even tried to convoke another such global conclave since 1969, fearing new and deeper rifts that would be certain to become public.

In the ensuing years, the divisions inevitably acquired greater depth. It took the Soviets two years to prepare the conference of European Communist parties that was finally held in East Berlin in June 1976. For the first time, Moscow had to negotiate a consensus document with foreign parties rather than impose it. In the end, the Berlin declaration was issued without the signatures of any of the Communist leaders. Unwilling to risk a public breakdown, Brezhnev had to go along with a text setting forth, in effect, the independence of individual parties from Moscow and their right to seek power and influence in their own way.

Traveling through Eastern Europe late in 1976, I was told that while the Soviet and most of the parties in the immediate zone of Moscow's control did not consider the Berlin text to be binding on them—and that they interpreted it in their own way—Western European Communists along with Yugoslavia and Romania would clearly insist on the new freedom of maneuver.

Western European parties have not broken altogether with Moscow—the Italian party, for example, still supports Soviet foreign policy in a broad context—and they may not do so in the foreseeable future. But they are no longer committed to such articles of faith as international proletarian solidarity and each is evolving in its own way in terms of modern Marxism. The strong Spanish party, for one, this year took the surprising step of eliminating the name and concept of Leninism from its official documents and pronouncements.

Communism, of course, will not go away in our time as a major political force in the world. But Czechoslovakia has probably done more to change its system of international relationships than any other single contemporary event.

FROM CHINA TO AFRICA

Prague 1968 has changed other situations, too, in myriad ways. In my conversations with Chinese diplomats after Henry Kissinger's first trip to Peking in 1971, I was told that the invasion of Czechoslovakia was one of the key elements in China's decision to open a relationship with the United States. The invasion, coincidentally or not, was followed by armed Soviet-Chinese border clashes in 1969, and Peking must have drawn its own conclusions from these sequential events.

Czechoslovakia also put an irrevocable end to the timidity of the non-Communist Left in the West in criticizing Soviet actions of this type as well as Moscow's internal repression. The 1956 Budapest bloodbath had led to protests by leftist intellectuals in Western Europe, but they died down. After Czechoslovakia, these voices became strong and clear and they keep gaining in resonance The French protest generation of May 1968 has produced the "new philosophers" of the mid-'70s, many of them shedding their former Marxist convictions and becoming articulate anti-Communists. Gulag, immortalized by Solzhenitsyn, is now the symbol of oppression for much of the Western European intellectual Left.

The mechanics of the Brezhnev Doctrine, however, also work in other directions, again stressing the historical fallout of Prague. Fidel Castro, the man who praised the 1968 invasion, has borrowed from the Soviet example the concept of "invitation" to justify his military involvement in foreign countries.

This Communist legalism was invoked to provide an excuse for the Cuban intervention in Angola in 1975 and Ethiopia in 1977, where American policy created the conditions for such interventions. In the first instance, the Cubans moved to support one faction that "invited" them against two others in the developing civil war. As for Ethiopia, how and by whom the invitation was issued are mysteries, although the ruling junta doesn't deny, after the fact, that the Cubans and the Russians were asked to come. Today Havana remains open to an "invitation" from Rhodesia's Patriotic Front, if events warrant it, or to related invitations from Zambia, Tanzania or Mozambique.

A decade after Soviet tanks entered Prague, the Brezhnev Doctrine remains intact in all its aspects, a challenge to the West as it is to Marxist reformers.●

AMERICA'S DEFENSE POSTURE

● Mr. HARRY F. BYRD, JR. Mr. President, a great deal of attention has been given in recent months to the state of our Nation's defense.

Growing Soviet military capabilities combined with a perception of declining U.S. military strength have led many analysts to conclude that our future security is in danger unless prompt corrective actions are taken.

Adm. Thomas F. Connolly, a distinguished naval officer with long experience in matters of national security, has recently written a thoughtful article on this matter which raises serious concerns as to our Nation's future security.

This article appeared in the summer issue, 1978, of Wings of Gold.

I ask that this article be printed in the RECORD.

The article follows:

AMERICA: FIRST AND LEADING OR SECOND AND SUBORDINATE?

(By VADM Thomas F. Connolly, USN (Ret)

The future of naval aid depends obviously on the future of the United States. In the summer of 1978, as the American ship of state steams steadily toward a darkening horizon, the quality and adequacy of our American defenses, and the will of our people to either opt for first place and leadership or settle for second and a subordinate role to the USSR, become uppermost.

What is the bottom line in mid-1978? It is, plainly and bluntly, that since the Department of Defense came into being in 1948, the U.S. has won nothing, only lost. Large numbers of our young men have been killed, billions of dollars spent. Today, inferior in military forces and capabilities—particularly seapower—for an "island" nation short on energy and other resources, the U.S. stands in mounting risk to the power and intentions of an adversary. These words may be denounced. But there won't be many with honest tongues and knowledge of warfare who will deny that Soviet military strength has become very formidable while U.S. strength is spread far too thin, with marginal quantities of modern weapons, back-up aircraft and other armaments. Any notion that once conflict is at hand the nation can build to superior strength, as was done in WWII, is unrealistic. We face a situation we should never have let happen—where through our military weakness, temptations are presented for Soviet aggression in forms and degrees of their choosing.

Solzhenitzyn has warned that WWIII has been taking place and the USSR is winning. It can be noted also that professional military officers have long advised the political leadership of the growing dangers. Today top-level attention appears to be accorded strategic nuclear missile ratios and the preponderant Soviet/Pact forces in Western Europe. More likely Soviet initiatives are in other areas: subversion of Middle East oil governments; further penetration of Africa; and control, or threat of control, of the flow of vital resources and of commerce. And wherever and whenever those Soviet initiatives become reality, the first line of contact will be the U.S. Navy, with naval air, as in countless times in the past, in front.

In sum, economic harassment and weakening of the West by raising the uncertainty of resource availabilities, of investment, new business ventures and on-going commercial arrangements. These are the very strengths of the West. The possibilities for mischief and evil-doing provided by Soviet military power and their Cuban, African, and Asian surrogates are many indeed. Until we show the Soviets again that they will not be successful in aggression because we have the means and will to oppose their aggression we must expect a succession of reverses. Many will rise to say that such things will not be done by the Soviets. That view needs proving. The business of our government is to ensure that they cannot happen. Our fate and future must not be left to chance or the Kremlin. This is not a call to armed conflict but a call to be strong again—to deter Soviet venturism with credible military power, not concession followed by concession. For it is undeniably true that the risk of conflict rises as our differences shrink, tempting the USSR to actions which they would never try in the face of strength and will.

Since 1961 systems analysis as used by Defense has been a principal factor in the steady decline of United States military capabilities. Ostensibly on the basis of "cost/effectiveness," costs were cut using the McNamara formula which was to cut procurement, cut people, cut operations. U.S. forces have become even smaller; ships, aircraft, weapons fewer; combat and war-fighting experience less a part of selection and decision. The analysts working at a level just below the Secretary of Defense and above all the military departments, predictably had too much leverage as well as the last word so that civilian management of military matters has become total in everything that counts.

Secretaries of defense, budget directors and presidents have found the work of their analysts very useful in producing yearly budgets that fitted not military requirements but politically constructed dollar quotas. Part of the takeover process was to portray, and regard, military professionals as improperly or incompletely educated and, so, incompetent for the tasks of national defense. Once the trend of downward Defense and upward social welfare and other programs was established the process became self-fulfilling. The analysts cannot be saddled with all the blame. Top government officials have known over the past several

years that USSR military power was rising fast and, as well as any, they knew the U.S. was not putting enough dollars into national security or paying enough attention to it. Ours has become a government driven by pressure groups. During and after Vietnam pressures were away from defense expenditures. Government leaders found it hard—too hard—to press for required defense.

It is certain that moves to let the U.S.S.R. reach military superiority have been supported by some government planners on the premise that this would avoid war and convince the Soviets they had nothing to fear from the United States. Whatever, America's military decline and its international decline remain singular consequences of taking the military professional corps out of the arenas where requirements of national security are really formulated and decided. These are arenas into which different minded performers have made their way since the days when American military strength and standing were high. Only in the Congress do the cognizant military professionals testify as expert witnesses. But here also the process is a dissimulation: the military witnesses are required to adhere to the Administration budget, designed by civilians in the Pentagon and the White House. Congressional committees are thus denied hearing how the military leaders really view national security needs. If committee members ask the right questions in the right ways and call for a purely personal professional answer, they can hope for guarded responses that try to suggest but don't declare how deeply concerned the military corps of the U.S. have become. The procedure is justified on the basis of avoidance and substitution. Of course, the Secretary of Defense talks with the Joint Chiefs. But that has meant very little in budget matters for a long time. Changes, perhaps, but increases no.

Now the United States task is to rebuild military capabilities to cope with those of the U.S.S.R. Priority should be accorded naval and air power at sea where Soviet interdiction capabilities are so great. This means an increase in U.S. capabilities that can deal with the many Soviet missile systems. Navy-wise, it means CVNs, AEGIS cruisers, and SSNs for the battle groups, F–14s, E–2Cs, A–6Es and A–7Es for the carrier decks. It does not mean building V/STOL ships before we develop worthwhile V/STOL aircraft from existing decks. It particularly means the advanced AWG–9 and advanced PHOENIX missile, and it means CILOPing the best fighter-weapon system in the world—the F–14. Overall, it means more broad naval capabilities—not equipments tailored for "low threat" situations.

Planning and funding the steps will be very difficult: the opponents of a stronger defense are well intrenched. Prodigious effort—or shock—is needed just to reverse the downward course of U.S. arms. The Secretary of Defense believes, as he recently told the House Armed Services Committee, that his department, i.e. the defense establishment of the United States, is as well run as any governmental department, which is so if you drop out the bottom line: not capable of protecting and preserving the United States as we know it and as the great majority of Americans want it to remain.

The Congress has constitutional responsibility for providing military strength to meet all national security needs. The Congress also has investigative powers. At this urgent moment of our history, it seems that a joint committee of the Senate and House should determine the true state of preparedness of the U.S. to protect and preserve the nation. It is a time for honest realism, for a political, bipartisan determination of the nation's security. That having been done, established procedures of the Congress will undertake required actions.

It is certain that the Department of Defense must be reconstructed. There are too many well-meaning amateurs in high office for short periods with more responsibility than their knowledge and competence justify. Often they come with missions other than to build and maintain a national defense second to none. Senior military officers (not just the Chairman) should have key parts in national security planning and defense program formulation. Their views should not be set aside by the military sector of OMB. Too much accord and attention are paid to scholars regarding national security. Scholars almost never reckon with power or the kinds of men who acquire and use it. In general, scholars abhor power of all kinds and call for solutions that are "reasonable" which have been honored in the breach in every century including this one. The world today is alive with unrest and urges to action. Trouble—big trouble—lies in store. The workable formula for the U.S. to become militarily powerful again, and then reasonable. The Administration chooses to play a game of placating which is dangerous and almost certainly will be unsuccessful.

Unless our Defense efforts are reformed and revitalized on realistic national security lines the American dream can well end up being the West wing of an all Soviet condominium.●

WADE D. MOODY

● Mr. EAGLETON. Mr. President, it gives me great honor to pay special tribute to an outstanding Missourian, who recently received the Department of Commerce's Thomas Jefferson Award. Wade Moody of Pattonsburg, Mo., was honored for his unusual and outstanding achievements for volunteer weather observation. Mr. Moody was honored for making timely and accurate weather observations and for taking river stage readings under extreme and hazardous conditions. As Pattonsburg is subject to flash floods, unusual efforts were required to collect weather information on numerous occasions. In this day and age when everyone wants to be paid for their efforts, it gives me great pleasure to acknowledge the deeds of a man willing to give freely of his time.

The Thomas Jefferson Award was originated in 1959 for the National Weather Service to honor volunteer weather observers for their outstanding achievements. It is the highest award the National Weather Service presents to volunteers. The award is named for Jefferson because the statesman-scientist made an almost unbroken series of weather observations from 1776 to 1816.

Missouri citizens should be proud of Wade Moody, and his efforts to keep them informed.●

HUNTING AND FISHING IN ALASKAN CONSERVATION AREAS

● Mr. MARK O. HATFIELD. Mr. President, for several weeks now the Senate Committee on Energy and Natural Resources, on which I serve, has been grappling with the so-called d–2 issue, attempting to deal responsibly with legislation to designate lands of national interest as parks, wildlife refuges, national forests, wilderness, and other protective designations.

As with any legislation of broad national interest, a certain amount of misinformation is bound to be circulated. One of the arguments opponents of the d–2 legislation have used is its impact upon hunting and fishing. Some would have us believe that all areas designated for protection will be closed to hunting and fishing. This is clearly not the case. While national parks and monuments have been and will continue to be closed to hunting, they are not closed to fishing. In the case of wilderness outside of parks and monuments, and in the case of wildlife refuges, national forests and wild and scenic rivers, hunting and fishing would be allowed to continue.

A recent editorial in the Oregon Journal accurately points out that "Congress has no intent to forbid hunting in new wilderness areas or other preserves it sets aside" outside parks and monuments. I believe this editorial puts the hunting issue in proper perspective, and I ask that it be printed in the RECORD.

The editorial follows:

[From the Oregon Journal, July 22, 1978]

LIES ABOUT ALASKA

An editor at The Journal who is also an avid hunter, fisherman and outdoorsman returned to work after a two-week visit to Alaska in rapture and livid rage.

He talked happily about a memorable Inside Passage ship ride and his visits to the Kenai Peninsula and the Arctic west coast. His anger was reserved for stories he heard from fellow hunters about how the Alaska land bill now under study in Congress would ban hunting in most of the state.

Another effort by the do-gooders in Congress to lock up recreation lands only for the Sierra Club backpack types, he was told by irate residents up north, who like to take float planes, ski planes, snowmobiles and motor boats into the remote reaches of the great state.

The editor and the people he spoke with are victims of one of the larger lies associated with the emotional debate concerning federal "national interest lands" legislation which now is before the Senate Energy and Natural Resources Committee.

That panel is considering its own version of a similar bill which was unanimously passed by the House a few weeks ago. The legislation would set aside new wilderness areas in Alaska (where there currently are only 75,000 acres of official wilderness on the books), as well as create new national parklands, wildlife refuges and other conservation zones on federal lands in the state.

Aside from a ban on hunting in national parks, similar to one which exists in national parks in the "Lower 48" (and Hawaii), Congress has no intent to forbid hunting in the new wilderness areas or other preserves it sets aside, according to reliable analysts of the bill from both sides of the issue.

Congress has, in fact, taken special care so far to recognize the unique subsistence culture of natives and non-natives in Alaska, and gives them hunting rights even in national parklands in some cases.

Contrary to Lower 48 wilderness restrictions, where persons using motorized vehicles are severely punished, the "traditional" motorized conveyances Alaskans have long found necessary generally still will be allowed by recreationists, in all the new areas.

There have been few land issues which have inflamed Americans as much as those arising from Alaska, from the time Seward's folly in 1867 brought critics down on that wily Interior secretary for paying too much,

to the present fights over the oil pipeline, distribution of lands and federal preservation policies.

Hunting, certainly, is but one of the issues involved in the current legislative battle. If the lie about locking out hunters and fishermen is understood to be misleading propaganda, it also should be seen as the least controversial issue Congress must decide.●

ALI BHUTTO AND PAKISTAN'S FUTURE

● Mr. McGOVERN. Mr. President, I am among several Members of the Senate who have been involved in humanitarian efforts to prevent the execution of former President Zulfikar Ali Bhutto of Pakistan. Those efforts have included direct appeals to the present government of that country—appeals the government says it will not heed.

More recently, former U.S. Attorney General Ramsey Clark has traveled to Pakistan to witness the legal proceedings involving Mr. Bhutto. Beyond the humanitarian issues involved, Mr. Clark has made a careful evaluation of the destabilizing internal consequences that would flow from the execution of a most popular leader in Pakistan.

Mr. Clark's report appears in the August 19 issue of the Nation magazine. I think this thoughtful study will be of interest to everyone who has followed developments in South Asia, and I therefore ask that it be printed in the RECORD.

The study follows:

THE TRIAL OF ALI BHUTTO AND THE FUTURE OF PAKISTAN

(By Ramsey Clark)

Rarely has a criminal proceeding held such potential to alter history as does the trial of Zulfikar Ali Bhutto. Its impact can reach beyond the fate of a man and the unity of a nation to affect fundamentally economic, political and military power worldwide. The Supreme Court of Pakistan is now considering an appeal from his conviction for murder and the sentence of death. Its decision is expected in the very near future. Executions are carried out immediately following final judgment in Pakistan.

The idea of Pakistan, nurtured by a poet, Allama Iqbal, and consummated by a statesman, Mohammed Ali Jinnah, was fragile from conception. To bind a political union of widely differing, proud and often warring people by a single tie, the religion of Islam, was a unique experiment. The dream of Pan Islam fitted neatly with desires of the Islamic populations of British India to be independent of the majority Hindu population when "freedom came at midnight" to the subcontinent of Asia. The result was a new nation of East and West Pakistan divided by 1,000 miles of land mass.

The West contained four distinct regions with diverse and sometimes hostile populations: the dominant Punjab, the North West Frontier Province, the Sind and Baluchistan. The traumatic separation from India in 1947 split both Punjab in the west and Bengal in the east between India and Pakistan, resulting in waves of migrating millions and recurring massacres. Pakistan, containing the poorest areas of the former colony, was cut off from markets, industry and the continuity of government administration, all primarily located in India.

Movements for political separation were powerful forces throughout the new nation from its birth. A bloody civil war began in East Pakistan in March 1971. Four months after the India-USSR treaty of August 1971, India invaded East Pakistan and in two weeks crushed West Pakistan forces, ending the war. East Pakistan seceded and became Bangladesh. It contained the majority of the population of the former nation and an even greater majority of its poverty and problems. Henry Kissinger's "tilt" to Pakistan at that time probably deterred India from invading and partitioning the West.

Separatist movements were not limited to tensions between East and West. Within the West there were, among others, a Baluchistan Liberation Movement sometimes based in Iraq and a Pakhtoonistan movement involving both Baluchistan and the North West Frontier—giving rise to the possibility of a new nation in the event of the breakup of Pakistan, a nation that would include Afghanistan and most of Pakistan west of the Indus, excluding the Sind and Punjab forming a corridor hundreds of miles wide from the Soviet Union to the Arabian Sea. The movements have involved guerrilla warfare countered by martial law and military casualties that may exceed those of the war in the East.

Bhutto came from a wealthy land-owning family in the very poor Sind. Graduated from the University of California at Berkeley and with a law degree from Oxford, he was Minister of Commerce for Pakistan at 30 and Foreign Minister when 33. He resigned as Foreign Minister in protest against military government policies in 1966, having established good relations for his country with China. He was imprisoned briefly in 1968 by President Ayub Khan for criticizing the government.

Founding the grass-roots Pakistan Peoples Party, Bhutto became the dominant political figure in the West by 1970. After the war in which East Pakistan was lost, he became President in 1972 (the first civilian chief of state in more than twenty years) and then in 1973, the first elected Prime Minister. Presenting himself as a democrat, a Socialist, a Populist and reformer, he initiated programs for land reform, economic development, social services, family planning, a strong Pakistan Peoples Party, internal security, Moslem leadership and international prominence based on nonalignment.

It is conceded by friend and foe alike that Bhutto is keenly intelligent, popular and charismatic. On the international scene he was called on to mediate in Cyprus, Korea and elsewhere. He assisted in preliminary contacts that led to President Nixon's visit to China. He negotiated difficult prisoner exchanges with India and Bangladesh, restored relations with Bangladesh, and eased tensions with India.

The United States expressed its strong disapproval of his role in calling for a Third World Summit, fearing concerted action by poor countries. President Carter urged Bhutto to abandon plans for a nuclear reprocessing plant France agreed to build in Pakistan. (India has had the bomb since 1974.)

Within the nation, he helped bring about the adoption of a new written Constitution in 1973 which some saw as a foundation for democratic government protecting human rights and securing economic justice. Economic policies stimulated growth despite difficult international problems including rising energy costs. Agriculture, health, education and housing were major concerns for his government and some progress was made.

But his years in power were in most ways the worst of times. He assumed office in the aftermaths of a humiliating military defeat, the severing of the nation, loss of most of its population to Bangladesh and the psychological and physical impairment of the dominant power in the society—the Army. Floods (including those of 1973 which were called the worst natural disaster in the area's history), earthquakes and other calamities befell the people during those years.

And above all there was the random violence, gun-running, guerrilla skirmishing, constant tension and high risk of revolution or invasion caused by political, tribal, cultural and international ambitions for power and dominance in surviving Pakistan and its very different parts. The Shah of Iran strongly supported Bhutto's efforts to contain the separatist movements. The Shah has no interest in seeing another state arise capable of dominating the strategic Persian Gulf, particularly a Baluch state that could lay claim to the loyalty of Iran's own sizable Baluch population. (Within Iran live one-third of the Baluch people.) World powers, principally the United States, the USSR and China are also keenly interested in Pakistan.

Growing instability was addressed with tough military and police measures. While parliamentary government endured, there were political arrests and detentions numbering in the thousands, martial law for whole cities and provinces at times, and a growing Federal Security Force not greatly concerned for life and liberty. Amnesty International, among others, protested human rights violations in a well-documented 1976 report.

The first six months of 1977 were difficult. Bhutto's popular appeal seemed to slip badly with turbulence and the harsh government reaction to it. He called elections which were held in March and the surprisingly strong showing of his party brought immediate outcries of vote fraud by other parties. Hundreds of protests and demonstrations, including some by women and children, led to violence and deaths and brief periods of martial law in major cities. Conditions were reminiscent of Chile before the *golpe* in 1973. Though most observers concede Bhutto candidates actually received a clear majority, probably 60 percent of the votes, a settlement among the parties that might have restored relative calm had not been reached by July, and new elections were planned for October.

On July 5, 1977 there was a bloodless military coup. General Zia ul-Haq, who had attended advanced command courses in the United States and the United Kingdom between 1972 and 1975, assumed government power as Chief Martial Law Administrator. The stated purpose was to stop the "drift toward political chaos." But drastic police measures were taken which created doubt as to General Zia's purpose. Severe penalties were immediately promulgated by fiat. Martial Law Order 12 provided for preventive detention and it was used liberally. Martial Law Regulation 11 of July 5 declared simply: "No one shall, either directly or indirectly, participate in any political activity. Maximum punishment 5 years Rigorous Imprisonment, fine and/or whipping not to exceed 10 stripes." Martial Law Regulation 13 provided the same punishment for any form of communication critical of the Armed Forces or "calculated to create alarm or despondency amongst the public."

Public executions and floggings were authorized and carried out. The amputation of a hand was made legal punishment. General Zia says, "it is the humiliative rather than the punitive aspect of flogging which is important." He tells one that the death penalty and life imprisonment were not deterrents to criminal conduct but the threat of flogging was. His new Law Minister A. K. Brohi says floggings are necessary to control the people and asks what do you do with a "mad dog." He defends stoning women to death for adultery and is the principal government spokesman justifying these cruel, inhuman and degrading punishments as being ordained by the law of Islam.

Bhutto was arrested on the night of the

coup and held for several weeks. Most of the high officials in his administration have been confined. Leaders of the Pakistan Peoples Party were also arrested. Many are still in prison, joined this year by leaders of other parties. Bhutto, released to campaign for the October elections, was greeted by enormous crowds. In early September he was arrested and charged with ordering the murder of a minor political figure in November 1974. General Zia publicly spoke of documentary evidence establishing Bhutto's guilt. Released on *habeas corpus* by a court, he was promptly rearrested under both military and civil process and has been detained virtually incommunicado since September 17, 1977.

While he was originally to be tried by a military court, it was decided he should be tried before five members of the High Court in Lahore. The two justices who had granted his writ of *habeas corpus* were excluded. The presiding judge was acting Chief Justice by appointment of General Zia; he was also an old enemy who had heard Bhutto's case when he was arrested in 1968. He should have been disqualified.

The murder charge, if believed, takes the case out of politics. Officials in the Zia government assure you this is a routine murder case. (Ferdinand Marcos of the Philippines, a master at authoritarian deceit, has used an ordinary murder charge to convict and condemn Benigno Aquino, a major political opponent, to death.)

This murder charge, while the most serious that can be made, was not taken seriously at first. The allegations themselves are so inherently improbable. The murder rate in Pakistan is high enough to make Houston seem peaceful. This assault was said to have been an attempt to kill a man named Ahmad Raza Kasuri, a dissident in the Pakistan Peoples Party. On June 3, 1974 Bhutto had become irritated with Mr. Kasuri on the floor of Parliament and expressed his feelings sharply, but not threateningly. This incident is the prosecution's case for a motive. Others had spoken far more sharply, even threateningly, including Kasuri himself who said of another group, "Time had come for their being killed."

Kasuri's father was apparently killed by automatic gunfire which hit a moving car occupied, according to the evidence by Kasuri, his father, mother and an aunt, near Lahore shortly after midnight on November 11, 1974. Kasuri, who had no way to knowing who fired, or ordered the shooting, immediately blamed Bhutto and used the charge politically.

In 1972 he had claimed nine attempts had been made on his life for which he had blamed another politician. He claimed three attempts were made on his life in 1974. An investigation of the death of Kasuri's father was closed in 1975 without charges being brought. From 1975 through June 1977 Kasuri sought through intermediaries to establish friendly relations with Bhutto, obtained a meeting with the Prime Minister and returned to the party.

Shortly after the coup, two members of the Federal Security Force were arrested, questioned and confessed to the shooting. Masood Mahmud, Director General of the FSF, was taken into protective custody on July 5, 1977, and on August 14 wrote General Zia making "a clean breast of the misdeeds of the Federal Security Force under the orders of Bhutto." He later confessed to ordering the assault on instructions from Bhutto. His testimony is the only evidence directly linking the Prime Minister to the murder. It is more than suspect. He says Bhutto threatened him and made him personally responsible for "taking care" of Kasuri, commanding him to instruct a subordinate, Mian Muhammed Abbas, to "produce the dead body of Ahmad Raza Kasuri or his body bandaged all over." The body was never produced, of course. Abbas confessed, and then retracted, then on July 10, 1978 his lawyer again filed a confession before the Supreme Court.

The trial was not fair. The acting Chief Justice's conduct would make Judge Julius Hoffman in the Chicago 7 trial a model of decorum. He publicly commented on Bhutto's "guilt" outside the courtroom before conviction. His prejudice is spread through his 145-page decision. Even there he could not restrain himself from characterizing Bhutto, who did not present a defense, as a "compulsive liar," "unruly," "hurling threats as well as insults on us."

As one illustration, before the defense abandoned the case, Bhutto's lawyers had cross-examined Masood Mahmud, the prosecution's second witness. He was asked whether he had caused police to hold a Mrs. Ibrat while "rats were let loose in her shalwar and its ends tied." The purpose obviously was to examine the credibility and character of the witness. The acting Chief Justice, in referring to this cross-examination, wrote: "It appears that these questions were put to prove that P.W. 2 (Mahmud) was well-qualified from the point of view of the principal accused (Bhutto) to be appointed as Director General of the Federal Security Force."

The evidence presented against Bhutto, even if believed, would not support a verdict of guilt. The prosecution case was based entirely on several witnesses who were detained until they confessed, who changed and expanded their confessions and testimony with each reiteration, who contradicted themselves and each other, who, except for Masood Mahmud, were relating what others said, whose testimony let to four different theories of what happened, who were contradicted by ballistics and other physical evidence and who were absolutely uncorroborated by an eyewitness, direct evidence, or physical evidence.

There were records showing that one of the FSF officers who allegedly fired the shots was in Karachi at the time, but no defense evidence was presented on this. Each of these witnesses had an urgent motive to inculpate the Prime Minister, each alleged that he resisted and protested but was forced by threat and command to participate in the shooting. That Kasuri remained alive in spite of the alleged fury of the Prime Minister did not seem to affect belief that his murder was ordered. Kasuri himself was shown to be a highly erratic, untruthful and opportunistic politician of no standing who sought favor from Bhutto until his overthrow.

Critical stages of the trial were conducted in camera. Comments and rulings by the court and conflicts between counsel and the court caused Bhutto to discharge his attorneys and boycott the trial before the prosecution completed its case.. The remaining prosecution witnesses were not cross-examined, no defense case was presented and Mr. Bhutto was unrepresented during the concluding, critical phases of the trial.

All five defendants—Bhutto, the two FSF officers who allegedly fired the shots and their two superiors who were charged with participating in carrying out the order allegedly communicated by Masood Mahmud—were sentenced to hang, Mahmud, who alone testified that Bhutto ordered the acts, was pardoned. Efforts of the other four defendants to involve Bhutto and justify their conduct did not save them, at least not yet.

The decision of the High Court is full of errors of fact and law. Its characterizations of evidence show its bias. There was no objective effort to determine fact.

The case is now on appeal in the Supreme Court of Pakistan at Rawalpindi. There from Saturday through Wednesday each week, the nine justices engage in a meticulous review of the trial record. They are impressive men, learned in the law and skillful in their examination of the trial transcript, counsel and each other. The Chief Justice Anwar ul-Haq questions most frequently, but all participate in a lively manner.

The Court has maintained some judicial power. In an important decision in Bhutto's wife Nusrat's application for a writ of *habeas corpus*, the Court boldly declared that precedents suspending judicial power under similar circumstances through the law or necessity were in error. But no writ was issued and Mrs. Bhutto remains incommunicado in custody, though not charged with any crime.

The Supreme Court of Pakistan is not in an easy position. The Chief Justice was selected by General Zia who had removed his predecessor. Four of his associates were appointed by General Zia. Everyone is looking for political motivation. Each justice has the rule of law in Pakistan, his professional reputation, his personal future, perhaps his own freedom and life before him in this case. The decision will be historic. It is due within weeks now.

We shall see whether the world sits quietly by and watches if Ali Bhutto is executed. Just 51 years old, he moved impressively on the international stage for nearly two decades. Many viewed him as a "scholar statesman," a phrase used by Kasuri in 1976. Political vengeance can be dressed up as a pure criminal trial. Such a method defames former leaders and dissipates support for them. It is not a happy or humane precedent. Even a commutation of the death sentence by the Supreme Court or by General Zia will only diminish the personal tragedy and perhaps temper political significance of this method of destroying democratic institutions.

For Pakistan and Islam, the execution of Bhutto would have devastating effects. If an election were held today, most concede that Bhutto would win overwhelmingly. He is the one leader with broadly based popular support in Pakistan. His prosecution and his mistreatment in prison, where no foreign observer has been permitted to see him or examine conditions of his confinement, have created new and greater public sympathy for him. Even some soldiers have openly expressed their view that the charges were fabricated.

Martial law does not sit easy on the people. Public lashings of members of the press (more than eighty have been arrested) and of many poor people has caused a bad reaction, so that General Zia was quick to observe in mid-July that there had been no lashings for four months. Still, even government-controlled daily papers report sentences of imprisonment and lashing by military courts presided over by a major or a colonel. The Law Minister, who believes in the law of the lash and says both Islam and the people demand it, doesn't seem to hear even supporters of General Zia say that the floggings, executions and theatened amputations are causing greater unrest and alienation. Both at home and abroad the Draconian punishments have greatly damaged the nation and its religion.

The execution of Bhutto would be extremely destabilizing. Rioting, even civil war, is a possibility. The military is not of a single mind. Eighty percent of the soldiers are from Punjab, which creates hostility in Sind, Baluchistan and the North West Frontier. A foreign power with a suitacase full of money might easily establish another General.

Poor Pakistan with its staggering human problems, hunger, violence, illiteracy, illness, population growth, underdeveloped economy, fragile confederation of dissimilar and warring people needs help. A haunting part of the planet running from the Arabian Sea coast to Nanga Parbat in the Himalayas, most

of its more than 70 million people live in staggering want.

But foreign interest in Pakistan may prove its greatest problem and peril. It is the wrong country, in the wrong place, at the wrong time. And it will not be left alone.

To Afghanistan it is tempting because it contains many people of common tribe and culture in the Frontier and Baluchistan. It also offers access to the sea, the chance to realize a greater Afghanistan and a vast increase in power. To Iran it presents a threat on a long border with a large common population of Baluchs and the threat of encirclement by hostile forces from the Arabian Sea to the Turkish border, along with the possibility of strategic domination by the USSR of the Persian Gulf, the Arabian Sea, the Middle East.

To India the prospect of the disintegration of Pakistan offers the chance to consolidate Punjab, to return to British India's borders geographically, along with the elimination of an enemy, control over a wide buffer to the Soviet Union. These are historical and regional concerns.

To China, the Soviet Union and the United States, Pakistan is of the greatest strategic importance. From the days of the wars with the Ottoman Empire, Czarist Russia sought warm-water ports. Pakistan has hundreds of coastal miles on the Arabian Sea, dominating, with Oman, the entrance to the Persian Gulf. Control of Pakistan would directly increase Soviet power over Middle East oil, magnify its influence with India, give it access to the Indian Ocean and to East Africa and greatly contribute to the encirclement of China. With the new, stronger Soviet influence in Afghanistan, destabilization in Pakistan holds enormous meaning.

China, with a common border and open highway from Sinkiang to Karachi, may see Pakistan as a key to containing Soviet influence and holding a protected position throughout the subcontinent and Southeast Asia. With Pakistan controlled by the Soviets, China would be cut off on the west, and India, Burma and Thailand would be more vulnerable to influence by the USSR.

The United States may see in the balance the Middle East and its vast oil reserves, along with greatly altered influence in southern Asia and eastern Africa. People in Pakistan speak of CIA activity in establishing Zia. They name names. It is believable to many. After all, is not Iran—"we helped restore the Shah to his throne," William Colby says—the CIA's proudest achievement?

Whatever the cause, the United States is again in the position of supporting a military dictatorship, harsher in its public pronouncements than any, even claiming religious authority for its harsh rule.

General Zia may have greater difficulty maintaining himself in power than Marcos or Generals Pinochet or Park or the neighboring Shah. He is unknown. He is inexperienced. He has not been judged effective by international observers. He presides over historic dimension and contemporary turbulence. He rules by the threat of the lash with absolute authority. He postpones elections.

And he may execute Ali Bhutto.

The role of the United States should be clear by now. We cannot live other nations' lives for them. We can only live by our own principles and believe that right may make might.

We should stand for life and implore with all our moral suasion a commutation of the death sentence. We should stand for justice and urge freedom, or—if the facts warrant prosecution, which I have not seen—a new and fair trial for Ali Bhutto. We should stand for democracy and urge popular elections in Pakistan at the earliest date by which all parties and candidates can be fairly preserved and voting honestly monitored. We should urge an immediate end to martial law and cruel, inhuman and degrading punishments.

We should stand for humanity and send massive economic aid, assuring delivery to those in greatest need—offering food, independence in food production, health care, education, an expanding, independent economy, decent housing and human dignity for all the people of Pakistan. It is to these issues that our imagination, energy and foreign policy should be addressed.●

AND NOW A WORD ABOUT YOUR SHAMPOO

● Mr. LAXALT. Mr. President—

Today, consumers are greeted with an unending variety of shampoos and conditioners. Shampoo for dry hair or oily hair, for damaged hair or tinted hair. To help you decide what's best for you, the Food and Drug Administration has a reprint from its magazine, the *FDA Consumer*. It's called *And Now a Word About Your Shampoo*. For a free copy . . .

My office received a press release the other day from GSA, from which I took the above quote. At first I thought I was being subjected to some sort of joke, but as I read on, I realized that the Federal Government was indeed concerned about the welfare of my hair, and wanted to make sure that I used the right shampoo when I was moved to wash my hair.

I was relieved to learn that the bureaucracy has analyzed, and published the results of its analysis, not only the various sorts of shampoos available on the market, but after-shampoo conditioners, additives in shampoo, their respective functioning in hard and soft water, and a host of other little known facts about keeping my hair soft and shiny. I was told in the press release, for example, that I should not look toward protein or other additives to feed my hair, or make my hair alive, since my hair is dead and cannot be fed.

I was told, in addition, that I would need to use a special after-shampoo conditioner to mask the problems caused by the use of dyes, bleaches, waving, or straightening mixtures, or from the intense heat used to curl or straighten my hair strands. Mr. President, I am certainly glad to know these things about my shampoo problems, and am equally glad to know that the Federal Government has taken it upon itself to use its resources to come to grips with these acute problems of our society. I am sure, as well, that the voters in California who voted for proposition 13 would be equally happy to know how their tax dollars are being spent.

I wonder, Mr. President, if they will ever learn.

I ask that the GSA press release be printed, in full, in the RECORD:

AND NOW A WORD ABOUT YOUR SHAMPOO

"Rapunzel, Rapunzel, let down your long hair." Now we all know what her hair looked like, but what about her shampoo? Actually, choosing a shampoo in the days of yore was probably a lot easier.

Today, consumers are greeted with an unending variety of shampoos and conditioners. Shampoo for dry hair or oily hair, for damaged hair or tinted hair. To help you decide what's best for you, the Food and Drug Administration has a reprint from its magazine, the *FDA Consumer*. It's called *And Now a Word About Your Shampoo*. For a free copy, send a postcard to the Consumer Information Center, Dept. 566F, Pueblo, Colorado 81009.

Ever wondered if a shampoo can give your hair shine, smoothness and body, just as well as an after-shampoo conditioner? According to the FDA, probably not. It's difficult to produce a shampoo that is strong enough to clean well, but mild enough to leave natural oils on the hair.

The conditioners in shampoos are not normally adequate to cover damage that may result from the use of dyes, bleachers, waving or straightening mixtures, or from intense heat used to curl or straighten the hair strands. You'll usually need special after-shampoo conditioners to mask these problems.

Know what the labels "for use on normal, dry or oily hair" means? different formulas are controlled by altering the strength or amount of the synthetic detergent and conditioning additives in the shampoo. So, by picking the one that matches the condition of your hair, you can feel a difference.

On the other hand, don't look toward protein or other additives to "feed your hair" or "make the hair alive". This can't be done, since hair is dead tissue.

And, what's in a baby shampoo? Baby shampoos are usually made from relatively stingless and non-irritating synthetic detergents. They don't normally contain added ingredients, like perfumes, which can irritate the eyes.

Today, most shampoos are made with synthetic detergent, not soap. The main advantage of synthetic detergent is its functioning in hard water. Although soap works well to remove dirt and grease from surfaces, in hard water the soap forms a gummy material called "soap scum". The familiar ring in the bathtub is formed of these deposits. Synthetic detergents, on the other hand, do not react to the degree of hardness in the water, and scum deposits do not form on your hair.

When you order a copy of And Now a Word About Your Shampoo (free), you'll also receive a copy of the free Consumer Information Catalog. It lists more than 200 selected free or low-cost publications from the federal government. The Catalog is published quarterly by the Consumer Information Center of the General Services Administration.

Note to editors: Please check with us if you plan to use this material after November 15, 1978, so we can be sure we have adequate stock to meet your readers' requests.●

LET'S NOT TORPEDO OUR NAVY

● Mr. HARRY F. BYRD, Jr. Mr. President, the balance of naval power has been shifting. The Soviet Navy in recent years has become a true "blue ocean navy" and has increased substantially its capabilities to threaten U.S. control of the seas.

Former Secretary of the Navy, J. William Middendorf, has recently written an excellent article in the August edition of Reader's Digest concerning the current state of our Navy and its needs in the future.

His thoughtful analysis describes clearly the threats our Nation faces. He also prescribes the actions necessary to reverse the harmful trend of the naval balance.

So that my colleagues may have the benefit of his views, I ask unanimous

consent that the article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

LET'S NOT TORPEDO OUR NAVY

(By J. William Middendorf II)

Since retiring as Secretary of the Navy last year, I have been haunted by the feeling that my obligation to the American people won't be fully discharged until I deliver a final word, my own view of our ability to continue to safeguard our freedom. As a private citizen, I have no ax to grind, save the ax all Americans ought to be grinding—that we maintain the military posture it takes to deter war, to ensure our vital interests, to protect freedom and to prevail if war comes.

That is the posture we began keeping in the early 1950s and which for several years now has been in serious decline. Indeed, so severe is the decline that I fear we are fast approaching a time of testing such as the United States has never had to endure. Unless we move fast on a Naval rebuilding program, I'm convinced that the next ten years will see the end of U.S. ability to deter and prevail, with all the grave consequences that implies for free people everywhere.

We've had warnings:

During the 1973 Middle East War, the Soviet navy was quickly able to double its Mediterranean fleet to 96 ships on station. And this wasn't even an all-out effort by the Soviets. Against it, we went all out to reinforce our Sixth Fleet to a peak strength of 66 units. The Soviets were armed with deadly anti-ship cruise missiles, a weapon not then in our own inventory. Knowledgeable professionals differ as to who would have prevailed in a Soviet-American shoot-out. Fortunately, we didn't have to find out, but Moscow's boldness during that crisis brought us to the brink of World War III.

Huge Soviet navy war games were held in 1970 and 1975. Called Okean (Ocean) 70 and Okean 75, they are full of ominous meaning for the future. In Okean 75, hundreds of Soviet air, surface and undersea combatants were deployed over the world's seas with intelligence collectors, oilers, repair ships and merchant convoys and put through intensive, coordinated maneuvers. It was the the greatest show of naval strength in history.

Five major shipyards in the U.S.S.R. produce submarines—with six more building large surface ships. All these huge yards have been expanded and modernized in the last five years, to produce a steady stream of new ships.

STRATEGIC THREAT

In short, there has been an alarming shift in the balance of naval power and the abilities of the Soviet and American navies to perform their different missions. Though many of our ships are superior in quality and our sailors are more experienced, the Soviet navy now is more than triple the size of our fleet and its overall effectiveness is increasing.

Our way of life depends on the unimpeded flow to us of essential raw materials and energy—we now import *all* our rubber, chromite, cobalt and manganese ore and *half* our oil. Ninety-nine percent of our overseas trade is carried by ship. Our survival depends upon a Navy competent to keep open the sea lanes, pose a believable deterrent and enable us to support our allies in the event of war.

By contrast, the U.S.S.R. is relatively self-sufficient in raw materials and energy. The Soviet Union can support itself and provide most of its allies with economic and military aid without crossing a major body of water. A truly peaceful Soviet government would be content with adequate coastal-defense forces—the kind of naval force the Kremlin kept until 15 years ago. Since then, it has sought to create a navy of such speed and devastating fire power (at the expense of cruising range) that it can overwhelm any U.S. Naval force. It has created a "first strike" navy.

This explains the enormous Soviet naval buildup of the past decade and a half. The Kremlin became aware in the late 1950s that without a blue-water navy it could not influence world events. The Soviets were embarrassed at their impotence in 1956 when a British and French naval expedition invaded Suez; and in 1958, when the U.S. Navy moved strong forces into the eastern Mediterranean to discourage communist interference in Lebanon's disorders. The last straw was the 1962 Cuban missile crisis, when a U.S. Naval blockade and the threat of overwhelming American nuclear retaliation forced the U.S.S.R. to remove nuclear missiles it had been installing in Cuba.

But now the U.S.S.R. boasts the world's largest strategic (long-range, nuclear-ballistic-missile-carrying) submarine fleet. The Soviets have launched 60 such boats in the past ten years. Their Delta Class submarine—27 operational and more abuilding—is the world's largest. Each is poised to fire 4200-mile-range missiles.

That distance exceeds by some 1700 miles the range of our most advanced submarine-based missile, the Poseidon. It also approximates the range of our new Trident I missile, which won't reach the water until close to 1980. The Delta Class missile now makes it possible for the Soviet strategic submarine force to attack virtually every city in the United States from the U.S.S.R.'s home waters.

The Soviet force also includes 33 Yankee Class boats, each fitted with 16 1300-mile missiles, and 30-odd older nuclear- and diesel-powered boats, each carrying a number of 350- and 650-mile nuclear missiles. Against this, the United States has a ballistic-missile firing submarine fleet of 41 relatively old Polaris and Poseidon boats.

SHRINKING MARGIN

The Soviet navy's commander in chief, Adm. Sergei Gorshkov, has vowed publicly to achieve a navy that is second to none. Is he achieving this goal?

Recently retired Chief of Naval Operations Adm. James L. Holloway III has delivered a sobering assessment to Congress: we retain "a slim margin of superiority." The Chief of Naval Operations four or five years from now may not be so optimistic, since that "slim margin" is represented by our 13 aircraft carriers. In 1976, the Soviets deployed their first, the 45,000-ton *Kiev*. A second *Kiev*-class carrier is nearing completion and a third is under construction. We probably can expect to see more and perhaps larger carriers joining Soviet fleets through the 1980s.

Although Gorshkov's carriers do not yet give him the long-range striking power ours provide, he has 1250 land-based naval aircraft, of which 30 are the new supersonic Backfires. These have at least a 5000-mile range, and pose a terrible threat to our Mediterranean and Pacific fleets. They could also menace any Naval force that we might bring into the Indian Ocean to shore up a Red-threatened oil-rich state.

The Russians also have tried to offset our superiority in aircraft carriers by arming scores of surface ships and submarines with deadly anti-surface-ship cruise missiles. There is frightening evidence that they are developing a new guidance technology, which will enable a missile-firing ship or submarine to stand off at a distance, find a target ship with over-the-horizon radar, and fire a weapon that will streak at 2000 m.p.h. 50 to 60 feet above the sea, underneath our search radar.

Our scientists have been developing a weapons system to counter this threat. It's called Aegis, and we know it will find incoming Soviet missiles 30 to 40 miles out and blow them up. But at the earliest, it will be 1981 before the system can be deployed on the first ship.

SOVIET SQUEEZE

In addition to a strategic submarine force twice the size of ours, the Russians now have by far the world's largest attack submarine fleet, well over 200 boats, for anti-shipping and anti-submarine purposes. Imagine what the Soviet attack force could do in the event of war! Nazi Germany, which began World War II with 57 submarines, primitive by today's standards, very nearly succeeded in severing our Atlantic supply lines, sinking some 14 million tons of Allied shipping. Clearly, the lesson has not been lost on the Soviets.

Against the U.S.S.R.'s huge surface and undersea forces we can deploy a total of 82 attack submarines.

The Russians also have more of all kinds of surface combatants than we have: more cruisers, more destroyers and other escort types; they vastly outnumber us in small (less than 1000-ton) attack boats. Yet these are fast, maneuverable and hard to hit. Equipped with new nuclear-tipped missiles, they pack a lethal wallop. The Soviets now are also moving to gain an advantage with amphibious ships that carry marines and their arsenals, including tanks, into beaches. They have some 100 such ships. We have 63, and we would need 48 of these to embark a single Marine amphibious force.

The Soviet navy has the world's largest naval-mine-warfare force, the world's largest inventory of naval mines and a capable anti-mine-warfare force. It also has the world's largest fleet of intelligence collectors—so-called "spy ships." Approximately 50 are deployed all over the globe—many posing as merchant or fishing vessels.

With their modern, powerful navy, the Soviets are showing the flag in more and more places, doing their best to influence events. During the Angolan war, Soviet naval units were deployed offshore in a show of support for their Cuban proxies. They now cruise regularly in many of the world's major seas. (A Soviet task force has come within 25 miles of Hawaii, and another has entered the Gulf of Mexico.) Thep have obtained the use of port facilities in the Indian Ocean, the Mediterranean, on the west coast of Africa and in the Caribbean. It is obvious that the Kremlin employs its naval forces in support of an ambitious foreign policy targeted at controlling the world's raw-material sources.

I don't think most Americans, including many in Congress, really grasp what a tough fix we are in, or will be in soon. If present trends continue, for example, it wouldn't surprise me to awaken some morning to the news that the Soviets have annexed the warm-water ports of northern Norway, which they have long coveted. Or to be told by Moscow that "the situation must be stabilized" by the Soviets in some politically troubled oil-rich state which is important to our survival.

U.S. RESPONSE

We are in this fix for a lot of reasons, including old, discredited theories that the Russians are as interested as we are in arms control and disarmament. Powerful voices in this country continue to urge that we disarm unilaterally, insisting that the Russians will then disarm, too. In fact, we have long been unilaterally disarming. Among other things, we have halved the size of our Navy—we now have 458 ships, against nearly 1000 ten years ago.

But the main reason we are in this fix is that during the 1960s, while the Soviets were working hard to develop the mightiest

military posture in world history, we were pouring our resources into the Vietnam war. We neglected our defenses, none more than our Naval component. By the end of the 1960s we were confronted with block obsolescence, large numbers of ships built in the 1940s and 1950s that were not worth expensive restoration.

Currently, our Navy is smaller than at any time since two years before Pearl Harbor. Yet the Carter Administration has just cut in half the Navy's five-year shipbuilding plan! Congress will be gravely risking our survival if it allows this to happen.

We simply must rebuild the Navy. That doesn't mean refurbishing obsolete ships. We need a modern, self-sufficient Navy that can operate in distant areas without having to rely on overseas bases.

Admiral Holloway has estimated that the balanced Naval force we need comes to about 600 ships. In preparing this force, we must understand that, from the time initial plans are prepared for Congressional approval, it takes eight years to get a Trident submarine to sea, ten years to float an aircraft carrier. And weapons technologies improve so rapidly that when we build certain new systems, we have to hope that they won't be obsolescent in ten years.

But we have no choice. We must understand that our freedom is not preordained, and that without a strong defense we won't be able to keep it. So much time has been lost already that, even if we start now, we are in for some rough and scary sailing in the years directly ahead.●

THE HILL'S MANGLING OF AN ERA ISSUE

● Mr. GARN. Mr. President, Prof. Walter Berns is an eminent scholar, and we are fortunate to have his abilities directed toward an issue as important as extension of a ratification period for a proposed constitutional amendment. Yesterday, the Washington Star ran an article by Professor Berns entitled "The Hill's Mangling of an ERA Issue." I recommend Dr. Bern's article to our colleagues and every person concerned with the processes of Constitutional law and American government. It is a fine piece of thinking and writing and both Professor Berns and the Star should be commended for their contribution to this vital debate.

The article follows:

THE HILL'S MANGLING OF AN ERA ISSUE

(By Walter Berns)

Unable to secure the approval of the constitutionally required three-fourths of the states during the congressionally stipulated seven-year period, the advocates of the Equal Rights Amendment are now engaged in the attempt to persuade the Congress to extend that period to 14 years. This proposed extension raises constitutional issues, involving fundamental principles of American government, that have never been decided—and can scarcely be said even to have been considered—by the Supreme Court. There is in fact very little constitutional law on the mode of amendment of the Constitution, and if the full House and then the Senate follow the disgraceful example of the House Judiciary Committee in its recent consideration of the extension resolution, there will be very little constitutional principle.

The reasons for the lack of constitutional law are not hard to identify.

First, there have been few cases to reach the courts. Prior to the ERA, 32 amendments had been proposed, and of these 26 were adopted, most of them quickly and without great argument. The first 10 amendments, for example, were ratified in a body by nine states within nine months of their submission by Congress in September 1789, and, after Virginia got around to acting, by the required three-fourths of the states by the end of 1791; and the 26th and most recent amendment (respecting 18-year-old voting) was ratified within a year.

Second, in the few cases to reach the courts, the Supreme Court has tended to say that the issues raised in them are political (hence to be decided with finality by the Congress) rather than justiciable; this has the effect of further reducing the number of cases. (This relative lack of law and dispute is reflected in the fact that in the annotated Constitution a mere five and a half pages of text are required to set forth the law of Article V, the amending article, whereas 236 pages are required to set forth the law of the 14th Amendment alone.)

Thus, the Court has never ruled directly on the questions of whether Congress may extend the ratifying period, whether a state may rescind its ratification of an amendment and whether a state (*viz.*, Illinois) may require an extraordinary legislative majority to pass a ratification proposal.

Nor has it ever addressed the fundamental question underlying these questions: Who are the people of the United States who, in principle, possess the sovereign power of the United States?

We do know that no state may rescind its ratification of the Constitution as a whole. South Carolina was the first to try to do this. Its Ordinance of Secession of Dec. 20, 1860, took the form of a declaration by the people of the state rescinding the ordinance adopted by "them" on the "23rd day of May, in the year of our Lord 1788, whereby the Constitution of the United States was ratified"; but Lincoln demonstrated the absurdity of this when, in his First Inaugural, he pointed out that if one state may secede from the others, the others, with the same propriety, may secede from the one. This would follow, he said, unless the seceders make the point that the one, because it is a minority, may rightfully do what the others, because they are a majority, may not rightfully do.

"These politicians are subtle and profound on the rights of minorities," he said. "They are not partial to that power which made the Constitution, and speaks from the Preamble, calling itself 'We, the People.'" Lincoln's view of this constitutional issue was upheld not by the Supreme Court (which, as it was then constituted, would probably have upheld South Carolina) but by the armies of Grant, Sherman, Thomas and others less famous.

Congress' lack of respect for constitutional principle is not so readily explained or condoned. A few weeks ago the House Judiciary Committee voted 19–15 to recommend adoption of what it was pleased to call a joint resolution extending, by some three years, the period during which the states may ratify the Equal Rights Amendment. The full House approved the extension last Tuesday by a 233–189 vote. This so-called House Joint Resolution 638 is not a concurrent resolution (for it would then have no binding effect); nor is it an act of Congress in the sense of Article I, section 7 (for it would then require the president's signature); nor is it, in the usual sense, a resolution adopted under the authority of Article V, authorizing Congress to propose amendments to the Constitution (for then it would require passage in both houses by two-thirds majorities). It is, instead—if it is anything that can be described in constitutional terms—an Article V resolution in an unusual sense, in fact, in an extraordinary and wholly unprecedented sense.

The power to enact this resolution was discovered in the fact that the time requirement, prescribing the period within which states may ratify the ERA, was placed not in the text of the amendment itself but in a separate clause, from which the committee jumped to the convenient conclusion that, whereas a two-thirds vote is needed to propose an amendment, only a simple majority is needed to change the time period for ratification of the amendment. Setting and changing the time period are "subsidiary matters of detail," the committee suggested.

This solved one of its problems, left unsolved the problem of the missing presidential signature, and opened up the possibility that the power could be used—or from the committee's point of view, misused—by others. For, if the power to set a time limit is one belonging exclusively to Congress, "to be disposed of by a simple majority of each House," and if "Congress retains authority to review the [time] limit should the circumstances so warrant," then it would seem to follow that Congress, by simple majorities, may extend the ratification period, or, "should the circumstances so warrant," contract or shorten it.

After all, some circumstances would warrant extensions and others contraction, and it is conceivable that, last year for example, a majority of the House and Senate, being disturbed by a possibility of street battles between the advocates and opponents of the ERA, could have concluded that domestic tranquility depended on a quick resolution of the issue and, therefore, that the time period should be shortened to six or even five years. This the committee could not allow; it had to find a formula that would permit Congress to extend but not to contract the time period.

To this end, it said, quoting Justice Department testimony, that the 92nd Congress had determined that "the States should have at least seven years within which to consider the equal rights amendment," and, again, that "the States should have at least seven years within which to consider ratification of this amendment." In saying this the committee was not telling the truth, but it was serving its partisan purpose.

A joint resolution shortening the time period would amount to a change of the original time clause, but a resolution extending the time period would not be a change; after all, a ratification period of 10 years and three months (but not one of five years or six) is "at least" seven years. So that was that, and we can conclude from it that, since every resolution resolves something, this new-order joint resolution was intended to be a handy device for resolving awkward constitutional doubts.

At one point in its report, the committee quotes Article V of the Constitution and then, quite gratuitously, says this: "The language of article V thus requires a two-thirds vote for action by Congress in proposing an amendment and in calling a convention in response to the applications of two-thirds of the State legislatures."

This is, of course, nonsense. Article V does not say that (two-thirds of the states having applied for a convention) a convention shall be called only if two-thirds of both houses of Congress agree; it says a convention shall be called. The Judiciary Committee apparently has its eye on the attempts now being made to have the states call for a convention to propose amendments putting limits on the taxing or spending powers or reversing the Supreme Court's decision in the abortion cases. Having broken the rules in its effort to promote the ERA, the committee seems to be serving notice that it stands ready to break them again when and if necessary.

The Judiciary Committee's performance should also serve to confirm the judgment that the Supreme Court has erred when it has suggested that the issues involved in amending the Constitution should be resolved mainly by the Congress. In fact, how-

ever, the Court has not abnegated in favor of Congress to the extent suggested by some members of Congress.

Contrary to the Judiciary Committee, the Court did not say that the question of what constitutes a reasonable time for ratification may be settled by Congress "in such a manner as 'the public interests and changing conditions may require.'". It did say this: "Of the power of Congress, *keeping within reasonable limits* to fix a definite period for the ratification we entertain no doubt." (*Dillon* v. *Gloss*, 256 U.S. at 375–6. Emphasis supplied.) And it did not suggest that Congress is completely free to determine what is a reasonable period.

The issue in this 1921 case (one of only two or three in which the Court has addressed itself to questions involving the mode of amending the Constitution) was simply whether Congress was entitled to impose a seven-year limit on state ratification of the 18th Amendment, and, in the course of upholding the power and this use of it, Justice Van Devanter, speaking for a unanimous Court, said this:

"We do not find anything in the Article which suggests that an amendment, once proposed, is to be open to ratification for all time, or that ratification in some of the states may be separated from that in others by many years and yet be effective. We do find that which strongly suggests the contrary. First, proposal and ratification are not treated as unrelated acts, but as succeeding steps in a single endeavor, the natural inference being that they are not to be widely separated in time. Secondly, it is only when there is deemed to be a necessity therefor that amendments are to be proposed, the reasonable implication being that when proposed they are to be considered and disposed of presently. Thirdly, as ratification is but the expression of the approbation of the people and is to be effective when had in three fourths of the states, there is a fair implication that it must be sufficiently contemporaneous in that number of states to reflect the will of the people in all sections at relatively the same period, which, of course, ratification scattered through a long series of years would not do."

This seems reasonable. To argue that an amendment once proposed "is to be open for ratification for all time" is to indicate a willingness to accept consequences that ought to be unacceptable. It would mean, for example, that the amendment, proposed in 1861, that would have forbidden the abolition of slavery is still viable and only awaits the ratification of three-fourths of the states to become the fundamental law of the land.

To argue in this fashion is, moreover, to be blind to the fact that the Constitution is made by us, the people; and that "we, the people," each of us possessing one vote, can only speak in the voice of the majority, and that the majority, because it is subject to changes over time, must be ascertained at a particular time.

The Constitution is fundamental law precisely because it arises out of the will of the people. This will is expressed when the people act in their constituting capacity; it is in this capacity that the people perform, in Hamilton's words, the "solemn and authoritative act" of writing or amending the Constitution. In this capacity, and only in this capacity, the people have the right to "alter or abolish the established Constitution whenever they find it inconsistent with their happiness." This, Hamilton says, is the "fundamental principle of republican government."

In a profound sense, "we, the people of the United States" are always the same people, possessing the same power today that we possessed and exercised in 1787–8, the power, as Hamilton puts it, to declare our will in a constitution. But this will can change from time to time, and whether it has changed can be ascertained only by eliciting the views of—or by attempting to gain the constitutional consent of—the individual Americans comprising the American people at any particular time.

On a question of constitutional amendment, it will not do to elicit the votes of James Madison, Jimmy Carter, and of persons who, because they have not yet been born or naturalized, are not part of this people. Jimmy Carter is, but the others are not. The interests of our future generations should be weighed and the counsel of our forebears should be considered, but their votes may not be counted simultaneously. "We, the people" are a continuing body whose membership is constantly changing. Because this is so, we can act constitutionally only at particular points of time. To ignore this is to presume the right to govern the people without the consent of the people.

Justice Van Devanter was also correct when he said that "proposal and ratification are not to be treated as unrelated acts, but as succeeding steps in a single endeavor." This was the mode of the Constitution's adoption and this mode should, to the extent possible (and within the limits prescribed by the people in Article V), serve as the model for its amendment.

Submission of the proposed Constitution was followed immediately by a vigorous debate between its advocates and its opponents, surely the most enlightened and still enlightening debate ever to engage the attention of and to involve a people. They were being asked to give their consent to a form of government, and the purpose of the debate was to foster an enlightened consent; or, stated otherwise, it was to ensure that the will of the people, to be embodied in a constitution, be an enlightened will, expressed after due deliberation.

The importance of this is obvious because, enlightened or unenlightened, the will of the people is the source of our fundamental law. Hamilton began the debate in the first *Federalist* by pointing out that it had been "reserved to the people of this country, by their conduct and example, to decide the important question, whether societies of men are really capable or not of establishing good government from reflection and choice, or whether they are forever destined to depend for their political constitutions on accident and force." Whether choice is made after reflection depends in part on whether ratification follows closely on proposal; the longer the period, the greater the possibility that, in Madison's words, "the passions [and] not the reason, of the public [will] sit in judgment."

These considerations lead to the following conclusions:

(1) A 14-year ratification period is too long; even a seven-year period allows too great a distance between proposal and ratification, reflection and choice.

(2) This objection can be met if, rather than extending the period, Congress again considers whether to propose an Equal Rights Amendment and, after deliberate debate, if it decides to do so, again submits it to the people.

(3) This necessarily means that the people of each state must again consider whether to accept or reject it; there is here no question of whether a state may rescind a previous ratification; until the proposed amendment is again submitted to a state there is (after the expiration of the original seven-year period) no constitutional business before it. Nothing could be more improper or, indeed, more unconstitutional, than to allow votes for ratification to be accumulated from the past and the future as well as from the present generations of the people. There is no way of knowing whether such an accumulation is the contemporaneous will of the people and, therefore, it is not the will of the people.

Finally, it would seem to be improper for any state to require extraordinary majorities to ratify a constitutional amendment. Constitutions arise properly out of the will of the people, each person possessing one vote, which leads ineluctably to the right of the majority to decide.

That majority may decide to limit its power to amend the Constitution. This is what the American majority ("We, the people") did in 1787–8 when (in Article I, section 9, for example) it placed limits on the legislative power, and, in Article V, out of respect for the federal system, it modified the right of the majority to amend the Constitution by assuring, by means of the three-fourths requirement, that the majority will be geographically or regionally distributed.

When, however, the majority does not itself modify the majority principle, that principle that must be respected. Thus, neither Congress nor the states may require extraordinary majorities to ratify an amendment, which means a federal court clearly erred in upholding a state requirement that the ERA needs a three-fifths majority for ratification in the Illinois legislature.

I hope it is clear that the Supreme Court has erred whenever it has suggested that the mode of constitutional amendment is not a subject to be governed by constitutional law. The right of the people to alter or abolish the established Constitution is, as Hamilton correctly says, the "fundamental principle of republican government," but that right may be exercised only in a "solemn and authoritative" manner; the principle governs both the right and the manner of its exercise.

The definition of fundamental principle is not among the powers of any legislative body. Indeed, the right of the Supreme Court to expound the fundamental law governing the American people—a right no longer in question among us—is at least as evident in the case of the amending article as in the case of any other provision of the Constitution, and not simply because legislatures, and especially the House Judiciary Committee have demonstrated their inability to act in a "solemn and authoritative manner." ●

THE SLIDING DOLLAR

● Mr. HARRY F. BYRD, JR. Mr. President, Hobert Rowen, Washington Post staff writer, had an excellent piece in Sunday's Post analyzing the decline in the value of the U.S. dollar.

In the past few years the dollar has lost about half of its value against the West German mark, 55–60 percent against the Swiss franc and 35–40 percent against the Japanese yen.

This is a staggering drop.

In the last several weeks, I have consulted with economists and others involved in international finance and most agree that the sharp drop in the value of the dollar results from a lack of confidence in the way the United States is handling its own financal affairs—its inability or its unwillingness to get a grip on inflation.

As Mr. Rowen points out "inflation remains the key to the dollar crisis."

I ask to have printed in the RECORD Mr. Rowen's piece, headined "The Dollar's Slide: What it Means".

The article follows:

THE DOLLAR'S SLIDE: WHAT IT MEANS

(By Hobert Rowen)

For months, headlines have been blaring the saga of the dizzying decline of the U.S. dollar: "Dollar Drops Again Against the Japanese Yen." Or, "Dollar Hits New Low

Against West German Mark: Gold Hit New High." Or, "Tourists on Holiday Find Their Dollars Buy Less and Less."

What has happened to the once almighty dollar to account for a loss in the past few years of about half of its value against the West German mark, 55 to 60 percent against the Swiss franc, and 35 to 40 percent against the Japanese yen?

The answer is relatively simply, and it's the same one that often applies to a decline in the price of any commodity; and oversupply. There are too many dollars in the hands of foreigners—or at least more than they want to hang on to.

Experts estimate that individuals and central banks of governments abroad hold about $600 million, much of it pumped abroad to pay for accumulated U.S. balance of payments deficits. Over the years, when this country has bought more goods and spent more money abroad than it takes in from foreign sales and investments, and the gap has been covered by printing additional dollars.

The United States has the advantage of being able to do this because the dollar has been not only the chief reserve currency but also the world's chief transactions currency.

As Britain's chief economics official in Washington, William Ryrie, said recently, "The United States does not have to find foreign currency to pay for a deficit in its balance of payments if it has one. The U.S. pays in dollars. The rest of us pay in dollars, too, but we cannot print them."

When there is too much of a currency outside the country that issued it, the people who hold it start to lose confidence.

"They naturally start to dump them," Henry Kaufman, chief economist of Salomon Bros., New York, said in an interview.

"All you have to do is to create some question marks or fears about the dollar, and if you loosen a fraction of that sum—say just 10 to 20 percent—you have enormous amounts of money that want to get out of dollars into other currencies," Kaufman said.

The situation has become increasingly tense in the past few weeks, with inflation rates in the United States soaring far over those of its major trading partners, West Germany and Japan.

Compared with a 10.4 percent U.S. rates in the first six months, the Japanese inflation rate is 4 percent, and the West German rate is less than 3 percent.

The failure of the economic summit meeting in Bonn in July to come directly to grips with the dollar problem was a great disappointment in financial circles.

In little more than a month since then, the dollar has drifted down 3 to 4 percent against major European currencies and 8 percent against the yen. Such changes over a relatively short time are characterized by veteran market observers as near-chaotic.

Interviews of officials, bankers, businessmen and others here and abroad indicate that the slide of the dollar has reached crisis proportions and that this carries with it a threat to the international monetary system and to world economic stability.

President Carter implicitly recognized that last week by directing Secretary of the Treasury W. Michal Blumenthal, working with Federal Reserve Bank Chairman G. William Miller, to recommend new actions to set the dollar on a steadier course.

But no one—here, in Bonn, Tokyo or New York—thinks that there are any simple solutions.

"Gauging when the critical point will come is beyond any of us," said Robert V. Roosa, partner of Brown Brothers Harriman, in New York.

In a strictly technical sense, it is clear that the dollar already has dropped too far too quickly, and hence is now undervalued. It would tend to rise naturally, economists say, if the U.S. government made a believable effort to control inflation and reduce its massive $30 billion trade deficit.

But the accumulation of worries, the panic psychology of markets "and the natural reaction of holders of assets to seek diversification in the face of steady decline," nonetheless is pushing the dollar further down, Roosa said.

It remains unclear whether the Carter administration, with an unsteady record so far of managing the U.S. economy, can do anything that will restore confidence. A boost in the Federal Reserve Board's discount rate on Friday was welcomed by the markets, but they are looking for much more.

Roosa, under secretary of the treasury in the Kennedy administration, confesses that a year ago he would have thought that if the dollar reached the low rate it is currently at, "we would already be in the midst of a great crisis. The fact that it has happened in wave-like spasms has in part conditioned the rest of the world to it."

The dollar has been in a steady decline for more than a year, but the Carter administration has been reluctant to take decisive action to stop it.

A cheaper dollar has some advantages for the United States. It makes American exports less costly. This not only helps reduce the staggering American trade deficit, but also stimulates U.S. production, sales and jobs.

But it also adds to inflationary pressures at home by boosting the price of foreign goods and making foreign travel more expensive—as tourists paying $3 for a cup of coffee in Japan or West Germany have found out.

Beyond that, however, there are serious problems of economic policy management created for the United States, and this has helped push Carter into seeking new solutions. These problems can be summarized this way:

To protect the dollar and stem the decline, the Federal Reserve is pushing interest rates higher. This provides incentive for dollar-holders abroad to keep their dollars rather than dump them. But such a policy threatens economic recovery at home.

A continued slide of the dollar could induce the Organization of Petroleum Exporting Countries (OPEC) to raise the price of oil again. This would be a new deflationary force and could trigger a world-wide recession.

If the dollar dips far enough, this would lower American prestige and political influence abroad. The dollar's role as an international "reserve currency" has already been challenged by others, and a new slide could accelerate the trend.

A dollar decline transfers wealth from the United States to foreign holders. Dollars accumulated abroad are a claim against U.S. wealth. Foreigners today hold about $120 billion in Treasury securities. This transfers $9 billion a year in interest to them.

The reasons for the dollar's difficult situation are many and complex. But most experts agree that the weakness stems from a combination of the rising U.S. rate of inflation and the enormous trade deficit, which last year added some $20 billion to the $600 billion already in foreign hands.

A subtle overlay to these basic reasons is the almost unanimous belief in European, Japanese and other financial centers that the Carter Administration has shown some incompetence in handling its economic problems. Its failure to mount a successful anti-inflation program and to persuade Congress to pass an energy conservation program are viewed with amazement and consternation in Europe.

A cheaper dollar, of course, means that other currencies, like the mark and the yen, become more expensive. This makes goods produced in the countries of the mark and the yen less competitive in world markets.

But if countries like West Germany and Japan choose to halt the decline of the dollar by intervening to prop it up, that action leads to a boost in their own domestic money supply—hence, a new inflationary threat to them.

So their demands have been for greater U.S. intervention, by which this country would assume the major burden of responsibility for protecting the value of the dollar.

Steadfastly, the Carter administration has refused the kind of massive intervention that would "peg" the dollar at any fixed rate or range. It believes that such an action would be useless in the face of $600 billion sloshing around in European hands.

Roosa flatly predicted that the dollar will continue to be "battered" in world currency markets because of the huge supply of dollars abroad. He said the dollar, which at the end of the week was worth only 1.65 Swiss francs, could decline to a 1-to-1 ratio, with additional but less spectacular declines against other currencies.

"Until there is a sustained, clear turn in the Japanese current account surplus, I don't see anything stopping [the appreciation] of the yen," Roosa said.

He suggested that the yen—which at the end of World War II and for many years later was 360 to the dollar—could move to 150 to the dollar. Less than three years ago, the yen was over 300 to the dollar.

Kaufman, one of the leading observers of financial markets, said in an interview that merely improving the trade position of the United States would not solve the dollar problem.

"It would help," Kaufman said, "but it won't solve it. The problem goes beyond the current account and relates to the capital account—the international financing role of the dollar."

In effect, Kaufman says, the United States has played the role of international banker and suddenly the international banker's currency doesn't appear to be very sound, eroding at a double-digit rate.

In the past, Kaufman pointed out, when a major reserve currency—like the pound sterling—appeared threatened, the central bank of that currency's country interest rates considerably, which quickly aborted any dumping.

"But that is very difficult to do in a modern society," Kaufman observed. The tradeoff for high interest rates is usually a depression of business activity and more unemployment at home.

He noted that Miller in the past few months had given markets the impression that the Fed would ease interest rates in the United States or at least not "overstay" tight money.

"The symbol of preserving the integrity of the dollar internationally tends to be in the discount rate," Kaufman observed. But Miller actually voted against the majority of his board in a July boost in the discount rate, from 7.0 to 7.25 percent, something that jarred the markets.

"It was an enormous disturbance in the foreign exchange markets," Kaufman said. Banker David Rockefeller confirmed this assessment, noting that "Miller's vote suggested that he didn't have control" of Federal Reserve policy.

Since then Miller has said that he made a mistake. He voted with the majority on Friday to raise the discount rate to 7.75 percent, citing international as well as domestic reasons.

There have also been signs that the administration was weak in controlling infla-

tion. In an effort to mollify AFL–CIO President George Meany, President Carter took an action widely interpreted as muzzling his wage-price aide, Barry Bosworth.

"There is no anti-inflation program in place," Kaufman said, "and foreigners recognize that."

What are the answers to the problem?

In groping for a response, the administration tends to fall back on its complaint that Congress has ignored the energy legislation, which it considers critical, interest rates, as the Federal Reserve action last week demonstrated, are moving higher. A more positive intervention policy, perhaps with greater U.S. resources marshaled for the day-to-day operations, is also possible. Other nations, like West Germany and Japan, although reluctant to do so, may take on more of the reserve currency responsibility.

But inflation remains the key to the dollar crisis. It remains to be seen whether the Carter administration can mount a stronger anti-inflation effort through traditional means like tighter control of budgets, or supplemental measures involving direct or indirect limits on wage and price increases.●

NOTICE CONCERNING NOMINATION BEFORE THE COMMITTEE ON THE JUDICIARY

● Mr. ROBERT C. BYRD. Mr. President, the following nomination has been referred to and is now pending before the Committee on the Judiciary:

Andrew L. Metcalf, Jr., of Michigan, to be U.S. marshal for the western district of Michigan for the term of 4 years vice Marvin G. Washington, term expired.

For Mr. EASTLAND, and on behalf of the Committee on the Judiciary, notice is hereby given to all persons interested in this nomination to file with the committee, in writing, on or before Monday, August 28, 1978, any representations or objections they may wish to present concerning the above nomination with a further statement whether it is their intention to appear at any hearing which may be scheduled.●

ROTH-KEMP TAX CUTS

● Mr. ROTH. Mr. President, with the tax debate shifting from the House to the Senate, Members of the Senate will soon be given the opportunity to vote on my proposal for substantial across-the-board tax rate reductions.

The $16 billion tax "cut" recently approved by the House is really not a tax cut at all. Because it fails to offset the new social security tax increases and the automatic tax increases caused by inflation, virtually every American taxpayer will face a tax increase next year if this bill is enacted.

I believe we need a real tax cut to offset these huge increases and reduce the total tax burden on the working men and women of this country. The Roth-Kemp tax rate reduction bill is just such a tax cut—one that can restore incentive to our stagnant economy, creating real economic growth and meaningful new jobs.

Mr. President. Mr. Jude Wanniski, a well-known political economic commentator, has produced a series of short papers discussing the Roth-Kemp bill and the Hansen-Steiger capital gains reduction bill. The first paper deals with the basic theory behind our tax cuts, while the second paper responds to some of the tax cuts critics, including Walter Heller.

These two papers are extremely relevant to the tax cut debate, and I urge my colleagues to study these two excellent papers. Mr. President, I ask that these two papers be printed in the RECORD following my remarks.

The material follows:

THE THEORY BEHIND TAX CUTS

INTRODUCTION: THE PROBLEM

In the last decade, the U.S. economy has experienced a combination of problems unique in our history: stagnation and inflation.

The productivity of the economy has fallen steadily since the late 1960s. The value of the U.S. capital stock, as measured by the stock market, is roughly one-third its value (in real, non-inflated terms) compared to February 1966. And the purchasing power of the U.S. dollar has fallen by roughly two-thirds in the 1970s.

Conventional economic wisdom has no solution to this malaise. It argues that inflation can only be decreased through austerity. Stagnation can only be overcome by inflation.

THE DIAGNOSIS AND WHY HANSEN-STEIGER, ROTH-KEMP

Consider the axiomatic phrase: "Inflation is too much money chasing too few goods." It is the key to understanding the twin problems of inflation and stagnation. Traditional political economists can end inflation by producing less money, but stagnation remains. Or they can end the stagnation problem by encouraging greater production of goods, but inflation remains as long as money is being created at a greater pace.

The challenge for the political economist is to find a way to both increase the supply of goods and restrain the creation of money. The Hansen-Steiger, Roth-Kemp tax cut amendments are part of that strategy.

TWO STEPS TO CONVENTIONAL ECONOMIC STRATEGY

I. Conventional economic strategy has been to attempt an increase in the supply of goods by:

(a) increasing government spending on goods, or by

(b) lowering "taxes" on the private sector, which leaves consumers more money to spend on goods.

These methods necessarily mean deficit financing by government and a consequent rise in interest rates.

II. The next conventional step is to increase the money supply in an attempt to drive down interest rates. But the increased supply of money leads to an increase in the general price level. Economic strategy, under both Democratic and Republican administrations, has been trapped by this paradox, unable to find a simultaneous solution to stagnation and inflation.

ENTER THE PROGRESSIVE TAX SYSTEM

I. To make this dilemma even more difficult, conventional economic strategy must also face up to the inherent problem of the progressive tax system.

II. Progressive income taxes came into being in the early part of this century. You can think of the progressive system simply as a sliding scale, with lower rates at one end progressing up to higher rates at the other. With tax progressions on both capital and labor, a rise then in the general price level induced by excessive money creation forces the price of both capital and labor to go, if you will, sliding up the progressive tax scale to higher rates of taxation.

III. Capital and labor then trade the same goods and services in the marketplace, but at the higher price level they must pay higher marginal tax rates, giving a greater share of their production to government.

IV. With capital and labor paying in more to government (keeping a smaller share of what they produce) they are discouraged from increasing, or sometimes even maintaining, their present levels of production. This is the linkage conventional economic theory is reluctant to face: an increase in the supply of money, intended to drive down interest rates, instead pushes capital and labor into higher tax progressions, eroding incentives to produce, and simultaneously giving us inflation and stagnation.

THE NIXON ECONOMICS AND THE NEED FOR HANSEN-STEIGER

This phenomenon of stagnation began to unfold in earnest in 1969, not because of excessive money creation, but through an explicit reduction of production incentives. In that year, President Nixon agreed to a sharp increase in the marginal tax rate on capital gains, to almost 50 percent from 25 percent. This sharp reduction in the rewards to capital for undertaking new, high-risk enterprise brought on the recession of 1969–70.

In 1971, the Nixon Administration attempted to pull out of the recession by encouraging sharp increases in the money supply. But this increased the pace at which both capital and labor have been driven into higher tax progressions.

Today, in 1978, the Hansen-Steiger bill would merely redress this primary error of economic policy by returning to the level of capital-gains tax rates of 1969.

A COMPLEMENT TO HANSEN-STEIGER

The Roth-Kemp bill merely complements this process; its tax cuts are meant largely to offset the adverse impact of inflation on the real rates of taxation paid by capital and labor. It does this by reducing marginal tax rates on personal incomes by one-third over a three year period.

The Roth-Kemp tax cuts are commonly described as a "drastic" measure. Yet to fully offset the adverse impact of the inflation of the 1970s would take an immediate and whopping increase of more than 60 percent in personal income thresholds, while leaving the tax rates themselves frozen. Compared to this, Roth-Kemp is merely a modest attempt to get back to a sense of reasonableness in Federal income taxation. And, of course, because the cuts are phased in over the next three years, the adjustment they make, all the while, would be offset by continuing inflation.

THE NATURE OF THE CRITICISM OF ROTH-KEMP

The critics of Roth-Kemp operate with at least one basic flaw: they fail to treat inflation as a special problem in an environment of progressive tax systems. As a result, they fail to distinguish between average taxes and marginal tax rates. For the conventional economic theorist, the world is made up of stable prices, and a given tax rate has no dynamic economic effect; therefore, the individual, in conventional thinking, cannot be inflated into higher tax brackets.

Let me illustrate this fallacy in thinking with the following:

An economy can thrive even with a marginal tax rate of 100 percent, if the income at which the rate is encountered is very high, say $1 million per day (in other words, government would confiscate 100 percent of any amount earned above $1 million per day). But if money loses so much of its value that $1 million can only purchase a loaf of bread, all production would stop after the baker had sold his first loaf each day; the government would confiscate all subsequent loaves as income tax. Average "taxes" collected by the government would collapse to near zero even as marginal tax rates climbed to near total confiscation.

THE LAFFER CURVE

The instrument we use to examine this dynamic effect is the Laffer Curve, which applies the law of diminishing returns to tax rate policy. The Laffer Curve merely enables us to think in dynamic, rather than static, terms when we consider the effects of inflation on marginal tax rates.

The Curve does not speak to "average" tax rates, which have no relevance in determining individual economic actions. The Curve applies to individual economic activity, in which each individual faces a different marginal tax rate.

In spite of this, critics of the Laffer Curve and of Roth-Kemp insist on speaking of average taxes, average savings rates, and average incomes in their economic analysis.

The foremost critic of Roth-Kemp, Prof. Walter Heller, makes what might seem to be a powerful case against the legislation by accepting, as all economists do, the validity of the Laffer Curve, and then arguing that the point of diminishing returns on the Curve has not been reached. He does so by focusing entirely on average taxes.

But remember, in the baker example, average taxes can drop toward zero as individuals are pushed toward the highest marginal rates. Clearly, it should not be an objective of economic policy to reduce average taxes, which can be done by impoverishing the economy via confiscatory marginal rates. Yet this is what Mr. Heller mistakenly believes to be the theory behind Roth-Kemp.

THE NATURE OF THE CRITICISM OF HANSEN-STEIGER

Criticisms of the Hansen-Steiger capital gains proposal are social, not economic. The Carter Administration opposes the measure on the grounds that it benefits the rich. Treasury follows this by asserting that the lower rates will cost $2 billion in revenue flow.

The response from the economics profession as a whole—liberal and conservative—has been to reject the Treasury prediction, which assumes lower rates will have zero impact on production incentives. Economists may disagree on how powerful an effect Hansen-Steiger would have in expanding the U.S. production and tax base, but literally all conservative economists—those associated with the Republican Party—agree the Hansen-Steiger tax rate reduction will finance itself in the first year by several times $2 billion by an increase in revenues from all sources.

And liberal economists, who may disagree with Hansen-Steiger on social grounds, by and large—publicly or privately—accept the potency of this measure on output and revenues.

ANALYSIS NUMBER TWO

My second paper for the Republican Conference (A Response to the Critics: Walter Heller, et al) will confront some of the specific criticisms Prof. Heller and others have raised about Roth-Kemp.

Again, the failure to distinguish between average and marginal tax rates distorts any economic analysis of Hansen-Steiger, Roth-Kemp. The criticisms are further flawed by being static rather than dynamic. That is, the critics assume the impact of a tax rate cut will come only on the demand side of the economy, by increasing consumption. A dynamic analysis would take into account the increase in the economy's incentives to expand capacity itself, either in quantity terms or quality terms—more goods or better goods.

A RESPONSE TO THE CRITICS

As mentioned in the concluison of Analysis Number One (The Theory Behind Tax Cuts), the foremost critic of Roth-Kemp, Prof. Walter Heller, makes what might seem to be a powerful case against the legislation by accepting, as all economists do, the validity of the Laffer Curve, and then arguing that the point of diminishing returns on the Curve has not been reached. He does this by focusing entirely on average taxes.

In his July 12 essay in the Wall Street Journal, Mr. Heller asks:

"Have the tax pressures increased sharply since the mid-1960s and perhaps brought us closer to the breaking point? Comparative figures assembled regularly by the OECD show total U.S. taxes at 27.3 percent of GNP in 1966 and 29.6 percent in 1976, hardly enough of an increase for tax cuts to trigger much bigger responses today than in the mid-60s. Besides, with top income tax rates at 50 percent and 70 percent instead of 91 percent, there is less tax disincentives to remove."

The confusion here is between averages and margins. Individuals do not face average tax rates, they face marginal rates (that is, the percent government will tax on any additional $1 earned). In fact, if progressive marginal rates are unnecessarily high, their lowering could produce higher average taxes to the benefit of everyone.

WEST GERMANY AND INDIA

This brings to mind the critics who continually ask why West Germany is now doing so much better economically than the United States and yet allows a greater percentage of its national income to flow through its government (*i.e.*, average taxes in West Germany are higher than in the U.S.).

The answer is that West Germany's marginal tax rates are lower than in the United States (50 percent at the top, no capital gains tax rate at all).

India is in almost the exact opposite position. India taxes at such an extraordinarily high marginal tax rate (67 percent at $12,000), only a dribble of revenues are available for state spending. Only 9 percent of India's GNP is spent by the national government. Marginal rates are high, average taxes very low.

HAVE DISINCENTIVES BEEN REMOVED?

Professor Heller's point that "there is less tax disincentives to remove" because tax rates were brought down since 1964 is only partly true. The tax burden today would probably be intolerable had rates not been brought down in 1964.

What Mr. Heller fails to recognize is that individuals pay "taxes" by calculating rates multiplied by income thresholds. Although tax rates have come down some since 1964, income thresholds during this time have more than doubled through inflation alone. Moreover, Mr. Heller fails to note the huge bite on capital gains added since 1964, which pushed effective marginal tax rates on investment income back toward the 91 percent level.

FAULTY VIEW OF SAVINGS

The propensity to view the economy as a collective, in which an "average" has meaning, extends to Prof. Heller's view of "savings." The supply-oriented economists, led by Laffer, argue that lower federal income tax rates will so expand production that a temporary fall in revenues, should one occur, would easily be financed through an expansion of savings.

Yet, in his June 28 testimony before the Joint Economic Committee of Congress, Mr. Heller asks:

"Why, in the face of Laffer's assertions, has 'Denison's law' held true through thick and thin for the past 100 years or so? Edward F. Denison of Brookings has found that U.S. gross private domestic saving has been virtually invariant year-in and year-out in the face of high taxes, low taxes, or virtually no taxes."

Again, Professor Heller fails to recognize that "average" saving rates need not increase at all in order that savings as a whole increase. He would agree that everything produced is either consumed now or saved for future consumption. If high marginal tax rates are discouraging production, both consumption and savings are held back. If those unnecessarily high tax rates are eased, inviting greater production, both consumption and savings incrase.

In other words, as the so-called economic pie increases, the slice saved for the future can remain the same proportionate size, in accordance with Denison's Law. But its absolute size increases.

Denison found that the savings rate has remained constant at 16 percent of the total pie. His "Law" is meaningless because it is a static tool, not a dynamic one. Observe that by increasing the radius of an 8-inch pie to 10 inches, a 25 percent increase, the slice that is 16 percent of the total expands to 50 square inches from 32, a 56 percent increase.

THE PROHIBITIVE RANGE

As a graphic depiction of the "law of diminishing returns," the Laffer Curve simply states an eternal verity. There is a point at which adding an extra straw will break the camel's back. Professor Heller appears to accept this notion, but then argues that the point has not been reached:

"And even if there was something to the Laffer thesis, who is to say that we are in a high enough tax zone to produce those dire effects of higher rates and delightful effects of lower rates that Laffer postulates?"

Having, in effect, accepted the Laffer Curve, Mr. Heller cannot logically argue that we are not in the prohibitive range (where tax cuts will yield additional revenues) unless he is also prepared to argue that we are in the productive range (where tax rates can be raised to produce dramatic revenue gains). Instead, Prof. Heller completes his remarks by recommending a "moderate cut of $15 or $20 billion (or even $25 billion if monetary policy tightens a lot) . . ."

In the demand-oriented world of Professor Heller, there is no need to specify where the $25 billion in tax cuts should be made, as long as there is an additional $25 billion that can go into consumer demand for goods and services. The quickest way to do this, which is the advice President Carter got last year, is through tax rebates, an idea the supply-oriented economists say is counter-productive, having no incentive effects at all.

LAFFER'S UNCERTAINTY

In his July 12 essay in the Wall Street Journal, Professor Heller quotes Professor Laffer as having told Newsweek: "There's more than a reasonable probability that I'm wrong." The statement does not accurately reflect Laffer's belief that there is a very high probability he is right, but that there is no way for a single mind to know precisely the optimum point on the Curve. Determining that point comes through competition in the political marketplace.

THE MELLON TAX CUTS

In the 1920s, Treasury Secretary Andrew Mellon found himself in a similar position of defending his proposals for sharp tax rate reductions. Mellon used an analogy which is as valid in today's environment as it was earlier this century.

Henry Ford, he said, could produce 1,000 automobiles and charge $1 million each, or he could product 1,000,000 automobiles and charge $1,000 each. Ford revenues would be the same in each instance. Ford, though, is pushed to finding the optimum point because he has competition. The result is the maximum number of units at the lowest possible price.

The public sector, Mellon continued, has the same range of alternatives in selecting the optimum tax rates, which is the "price" it charges for public goods and services. By its nature, though, the public sector has no competition, but is monopolistic. Political

leaders must find the optimum point on the Curve by internal competition. As in the economic marketplace, tension is between price and volume.

If the one political party stresses tax rate reduction when rates are in the prohibitive range of the curve, as was the case in Mellon's time, that party would be expected to win more elections. And vice versa. If another party goes in the opposite direction, ignoring the need for tax relief when tax rates are in the prohibitive range, that party would be expected to lose more elections.

The point is, it is inappropriate to ask Laffer or any other single economist where exactly we are on the Laffer Curve. That point is determined through political competition, based, of course, on the advice of political economists. And, today, virtually all supply-side economists have concluded there is a very high probability tax rates have been inflated into the prohibitive range, and can be reduced with no revenue loss or with self-financing.

IF LAFFER IS WRONG

Professor Heller concludes, in his July 12 essay in the Wall Street Journal, that if Laffer is wrong, he may be leading the Republican Party "over the cliff."

What will occur if Laffer is wrong?

Treasury estimates that Roth-Kemp has a first year cost of $20 billion in receipts. That combined total, notice, is lower than the $25 billion Professor Heller said he would accept if money were kept tight. Under absolutely static conditions, in which there is no supply response in the economy to the lower tax rates, the worst possible condition would be an increase in the federal deficit by $20 billion.

ROTH-KEMP AND INFLATION

With federal expenditures constant, this would mean the American people would finance $20 billion more in federal outlays with bonds and $20 billion less in taxes. Individuals, in aggregate, would produce and consume the same amount of goods and services in this static world, but interest rates would be marginally higher. This reflects the fact that the future economy would have to produce $20 billion more in goods and services that would have to be taxed out of the productive sector to pay off the additional bonds.

There is, even in this worst case, no direct "inflationary" effect. Inflation, which is a decline in the monetary standard (in this case the dollar), results from excessive money creation in the absence of restraint.

Professor Heller's further criticism of Roth-Kemp is as follows:

(1) Unlike the 1960s, we are now in an inflationary environment. Where the Kennedy tax rate reduction worked exactly as planned, a similar strategy today will not work.

(2) Roth-Kemp would quickly cause inflation by bringing about capacity bottlenecks. Utilization rates in today's economy are low, but only low enough to respond to a one-year tax cut, not the three-year reductions of Roth-Kemp.

Again, this is a static approach that assumes the impact of Roth-Kemp will come only on the demand side, increasing consumption, with no increase in the economy's incentives to expand capacity itself, either in quantity terms or quality terms.

THE SPENDING ISSUE

Roth-Kemp has attracted support from economists who are not supply-oriented. These theorists believe the proposal surely will lose revenues, but this will force government into greater prudence.

The difference here is a matter of intention and not final results. In the dynamic scenario envisioned by the supply-side economists, passage of Hansen-Steiger, Roth-Kemp will lead to sizeable reductions in public expenditures for social-support programs. But this would be a natural process that unfolds as a result of economic expansion.

In other words, individuals now being supported wholly or partly by the government "safety net" of welfare payments, food stamps, unemployment benefits, medicaid, etc., will be drawn into the expanding private sector from the attraction of lower marginal tax rates. They not only stop drawing resources from the productive economy through tax/spending transfer payments. They become contributors to the treasuries of federal, state and local governments.

THE ADMINISTRATION'S STATIC SPENDING PROJECTIONS

There is an implied forecast in the Carter Administration budget that nothing can be done to reverse the process by which American citizens are forced to turn to social-support transfers.

Indeed, the administration appears to make straight-line projections along an upward slope for social spending. The vision of the future is one or more people cramming into the safety net, fewer people in the productive sector. Thus, spending projections are as static as revenue projections.

Yet the Carter budget office plans on benefitting from inflation. The budget forecasters assume annual rates of inflation in excess of 6 percent in the next five years, and then calculate an increased revenue flow to the treasury as a result of an upward shift of the entire work force into higher tax brackets. Again, they give zero allowance for the continuing disincentive effects of this process.

If President Carter is wrong, as a result of the counsel he is getting, the 6 percent inflation he assumes over the next five years will accelerate the economic contraction of the last dozen years. Incentives to production will continue to collapse, the tax base will shrink, and revenues will decline in real terms even as they climb in inflated terms. The safety net will be crammed with even more numbers of Americans demanding transfer payments in order to survive.

THE DYNAMIC SCENARIO

On the other hand, supply-side economists expect the reverse situation to occur with passage of Hansen-Steiger and Roth-Kemp:

(1) an increase in real revenues through expansion of the tax/production base; and

(2) reduction in transfer payment expenditures at federal, state and local levels as individuals become ineligible for such payments by virtue of being elevated into more rewarding private sector employment.

CAN FEEDBACKS BE EXPECTED?

Excluding Social Security, social-support transfers at all levels of government are now roughly $220 billion. The number will, of course, continue to expand, if only nominally through inflation, with a high probability of expansion in real terms if tax bases are not adjusted downward to permit economic expansion. In three years, the phase-in of Roth-Kemp, the number would go to $260 billion merely by a 6 percent inflation and to $290 billion if there is also a 2 percent increase in real terms.

If Hansen-Steiger, Roth-Kemp bring about the expected economic expansion, government transfer payments would shrink.

If they shrink by one-third, government outlays are reduced by almost $100 billion per year.

If they are reduced by one-sixth, outlays fall by $50 billion.

If a tenth of transfers are eliminated, the number falls by $29 billion per year.

These are precisely the kinds of calculations made by liberal Keynesians in support of government spending programs, i.e., $100 billion "Marshall Plans" for urban renewal. The point, though, is that there are such feedback effects—in either spending programs or tax rate reductions—and it is reasonable to assume they will go a long way toward financing the Hansen-Steiger, Roth-Kemp measures.

TREASURY'S FALLACY

Treasury estimates Roth-Kemp would lose $98 billion in revenues over the three-year period. Treasury's argument is based on the fallacy that says the $20 billion cost of the first year's tax reduction can be set against current revenue projections, with the assumption that revenues will continue to expand in the second and third years, both nominally and in real terms, to reach $98 billion.

In other words, the government is inflating the work force into higher tax brackets in order to produce greater revenues, and then complaining that Roth-Kemp will cause a loss to Treasury from that inflated income stream.

IN CONCLUSION

The upshot is that the supply-side economists believe with absolute certainty that the Republican tax program will have a dynamic effect on both revenues and spending. That is, when Treasury so assertively concludes the measures would lose a hard $100 billion over three years, supply-side economists are certain this dire prediction will not be the case.

Almost no economist of any persuasion would disagree on this point. There would be some economic expansion that would both increase revenues above the projected Treasury path and there would also be a reduction in spending for social-support programs below the projected Treasury path.

Professor Laffer and the supply-side economists believe there is a high probability the combination of higher revenues and lower spending would finance the tax cuts entirely. And even if a short-term revenue shortfall should occur at the federal level, which remains a possibility, they believe the total increase in national savings will more than cover this amount. As a result, there would be no crowding-out of private capital by Treasury borrowings.

Insofar as this reduces pressure on the monetary authority to be excessive in its money creation, the effect of the Hansen-Steiger, Roth-Kemp amendments would be to retard inflationary forces. There would be less money chasing more goods, a simultaneous blow against the twin problems of stagnation and inflation.●

THE ROCKFORD AND DECATUR AND THE PEORIA TO QUINCY, ILL., CORRIDOR

Mr. PERCY. Mr. President, while the Senate is considering S. 3073, the Federal-Aid Highway Act of 1978, I want to bring to the attention of my colleagues a program which is of critical importance for the completion of two Illinois road projects—the priority primary program. Several years ago, Congress authorized the Secretary of Transportation to provide funds for the priority primary program which would include "projects of unusually high cost which require long periods of time for their construction."

H.R. 11733, the Surface Transportation Act of 1978, contains $125 million of the Federal-aid primary authorization for the priority primary program for fiscal year 1979–82. In addition, the House Public Works Committee's report on H.R. 11733 mentions several projects, including new four-lane highways between Rockford and Decatur and Peoria and Quincy, as being worthy of receiving these funds. However, S. 3073 as reported from the Committee on Environment

and Public Works eliminates this very important program. I believe this program should be continued.

The State of Illinois has been aggressive in dealing with its 11,000-mile primary road program by widening, repairing, and resurfacing whenever necessary and possible. Thus, the demands on the State's primary apportionment are of such magnitude that the State is unable to funnel significant sums into priority projects, such as the Rockford to Decatur and the Peoria to Quincy corridors, without curtailing work on other worthwhile and needed road projects. The priority primary program provides additional assistance to States to help finance their priority projects.

For ever 30 years, the Rockford to Decatur route, presently known as U.S. 51, has been the subject of discussion and study. For years, this route was considered part of the recommended Interstate System, only to be dropped from the system in the final analysis.

Cutting through the center of the State, this new four-lane highway would improve connections between several important communities: Bloomington to Decatur, South of LaSalle-Peru to Bloomington and Rockford to South LaSalle-Peru. In addition, Route 51, when completed, would also act as a connector for five existing interstate routes, I–90, I–80, I–44, I–74, and I–72. Over the next 15 years, traffic is expected to reach 20,000 vehicles per day on the Rockford to Decatur highway.

Although over $67 million has been spent on design, engineering, and construction work on this route, the remaining estimated cost to complete this 156-mile stretch of highway ranges from $360 to $415 million, depending on final design. And at the current pace of construction, the people living along this route have at least 10 more years in which to wait before this route will be completed. Clearly, this route meets the criteria for priority primary funding due to its high cost and lengthy construction time.

Frankly, the people living in the communities which this highway would affect, such as the city of Rockford, the second largest populace area in the State, are running out of patience, as I am. Mayor McGaw and residents of the area have expressed to me their frustration over the congestion caused by an inadequate highway system. The priority primary program would certainly help to accelerate work on this vital route.

One very important consideration is that a wide variety of commercial and industrial enterprises are located in and around these communities. Certainly, the early completion of this project will help to expand the market potential of the area, and would bolster the economies of the cities and surrounding rural areas.

Another project in Illinois in need of special priority primary funds is the Peoria to Quincy segment of the Chicago-Kansas City Highway. For over two decades, this freeway has been under discussion. Under the Federal-Aid Highway Act of 1973, the Department of Transportation was authorized to conduct a study of the feasibility of constructing this highway. Although the Department's report concluded that this route was feasible, special funding was not available. As recently as 1977, the Department of Defense called for upgrading of the Chicago-Kansas City corridor as a part of the Nation's strategic highway corridor network.

The critical Illinois segment of this highway is located between Quincy and Peoria. At the moment, these two cities are connected only by two-lane highways. The narrow pavement, the deficient bridges and the insufficient capacity of certain sections of these highways demands attention.

Although State and Federal funds for this project have amounted to $33 million, an additional $388 million will be needed to complete construction of this four-lane highway.

The proposed 172-mile highway will wind through areas which are rich in agricultural production and coal resources. Along or near the route are important communities, such as Peoria, Macomb, Canton, and Quincy, where numerous manufacturing companies are located.

As the economic resources of the area are further developed, employment is expected to increase 27 percent by the year 2000. The highways in the area are inadequate to meet the area's future growth potential. Without priority primary funding, it will be many years before this highway can be completed.

It is essential that sufficient funds be provided to expedite construction of these four-lane highways between Rockford and Decatur and between Peoria and Quincy. These projects are not only a priority to the State of Illinois, but also they are an important transaction link to all communities which the highways will connect.

The bottom line of the discussion is that Government must sometime induce economies to expand in ways that are tested safe and sure to provide help. Our investment in an interstate highway system bears out this philosophy. The highway improvements I have described, as well as others across this country, will provide a means for the economies of the cities and surrounding rural areas to expand and to be strengthened. Strong, expanding economies mean more jobs.

Because the priority primary program is contained in H.R. 11733 and not in S. 3073, I urge members of the House-Senate conference committee on the highway bills to include the priority primary program in the final bill reported from conference. This program would serve as an important additional source of funding for the two major Illinois highway projects. The conference can accomplish results satisfactory to Illinois and other States concerned with completing vital transportation routes. I will continue to work with members of the Illinois delegation, and will work with members of the House-Senate conference, to accomplish this end.

Today, I have talked with Senator RANDOLPH, the distinguished chairman of the Environment and Public Works Committee, regarding Illinois' primary highway needs. Most importantly, we discussed specifically the urgent need for new four-lane highways between Rockford and Decatur and Peoria and Quincy. Chairman RANDOLPH assured me that he will take our concerns to conference.

AERIAL BRIDGES TO ISRAEL OPENED

Mr. PERCY. Mr. President, on August 16, 1978, Israel and the United States signed a new aviation agreement that is of direct benefit to the citizens of both countries. It is a historic agreement because it will lead to lower fares, and facilitate travel between the United States and our most important ally in the Middle East by providing for direct service to Israel from four new U.S. cities, including Chicago in my own State of Illinois.

Signing the agreement was Warren Christopher, Deputy Secretary of State, and Simcha Dinitz, the Ambassador of Israel to the United States. Both were instrumental in reaching this agreement. I ask unanimous consent to include their remarks in the RECORD at the close of my statement.

As a result of this landmark agreement:

First. Air fares to Israel will drop 28 percent—to the lowest level ever in terms of consumer purchasing power. Citizens of the United States of every religious affiliation will now be able to comfortably afford a journey to the hallowed places of Judaism and Christianity. For Israeli citizens, trips to the United States will now be within their financial reach. Already El Al-Israel Airlines has received approval to offer a $545 roundtrip fare between New York and Tel Aviv, effective September 1, 1978. It is anticipated that the fare will be further reduced to between $449 and $499 beginning November 1, 1978.

Second. Tourism to Israel will increase: This agreement will help Israel achieve its goal to doubling by 1983 the current level of 1 million annual tourists. An anticipated 16,600 new hotel rooms will have to be constructed to meet the increased demand. These tourists will be contributing acutely needed hard currencies to the Israeli economy.

Third. Increased access to Israel: Wide-bodied direct service on El Al will now be available from Chicago, Los Angeles, Miami, and one additional U.S. city to be named later. Under the 1950 agreement which preceded this agreement, El Al could only serve New York. It is expected that service between Chicago's O'Hare International Airport and Tel Aviv and Los Angeles and Tel Aviv, will begin sometime in the spring of 1979, perhaps as early as April. The Chicago flights will probably operate twice a week and stop in Montreal en route to Tel Aviv, according to El Al officials.

Fourth. A new U.S. flag carrier to fly to Israel: On August 16, 1978, National Airlines filed an application with the Civil Aeronautics Board to begin flights three times a week from Miami to Tel Aviv beginning next April. TWA is currently the only U.S. flag carrier flying to

Israel. The National flights will operate through various intermediate points in Europe. The flights will operate between: Miami-Amsterdam-Tel Aviv, Miami-Paris-Tel Aviv, and Miami-Paris-Zurich-Tel Aviv. Service between Miami and the first European intermediate point will be via DC–10 jumbo jet. Passengers will deplane at the European point to make a convenient connection to a smaller National Boeing 727 for the final leg to Israel. National has proposed a $600 roundtrip advance purchase excursion fare during the off-peak season, which is $100 below the lowest fare offered before the signing of this agreement. The new service would also be less restrictive.

An aerial bridge has now been built from principal cities in the United States to Israel which will further cement the close people-to-people ties that bind our two nations.

Fifth. Unlimited charter flights: The agreement opens up Israel to unlimited charters from anywhere in the United States. Before the signing of the agreement, charters were only permitted by the Israeli Government to operate from California, Oregon, and Washington State. I am appending to my remarks a press release from the Civil Aeronautics Board announcing that, because of the agreement, it is dropping a requirement that El Al receive U.S. approval before conducting an on-route charter flight to the United States. The Board also added El Al to the list of 46 foreign airlines receiving blanket off-route charter authority. El Al will now be able to operate charters from any airport in the United States.

Sixth. Israel may purchase U.S.-built airplanes: Because of the increased service to the United States, El Al is now considering the purchase of additional U.S.-manufactured Boeing 747 jumbo jets and intermediate range aircraft for its European routes such as the Lockheed L–1011 or the McDonnell-Douglas DC–10.

By successfully negotiating this agreement, the executive branch and particularly President Carter should be commended for placing the interests of consumers as its top priority. The entire United States delegation merits the highest praise. I am grateful that our Government has forcefully indicated that it is just as interested in guaranteeing planes of peace flown by El Al, TWA, and National as in selling planes of war.

On the Israeli side, Ambassador Dinitz headed an extremely able Israeli negotiating team. Adding his personal support and good judgment to the making of this new procompetitive agreement was Mordechai Ben-Ari, executive chairman of El Al-Israel Airlines. Mr. Ben-Ari has been increasingly identified as an outspoken advocate of lower fares and lessened government regulation of international aviation. I am including in the RECORD an insightful article in the August 1978 issue of Airline Executive on Mr. Ben-Ari and Mr. Mordechai Hod, El Al president.

Even though Israel is a very small nation, it has taken a leadership role in international air pasenger and air freight operations. An example of this leadership was the creation in June 1976, of Cargo Air Lines, Ltd., by Mr. Hod. I am including for the RECORD an article on CAL that appeared in the July 17, 1978, issue of Aviation Week & Space Technology.

Also present at the signing was Secretary of Transportation Brock Adams who is the architect of new proconsumer guidelines for U.S. negotiators participating in bilateral air transportation negotiations. This policy is expected to be formally promulgated in the very near future. Secretary Adams was quoted as stating at the signing that—

What this (agreement) means to the traveler is more flights at lower costs from more cities. That is what the Carter Administration's international aviation policy is all about—and this agreement is an outstanding example of how it can benefit two great nations.

I would also like to underscore the role of my colleague, Senator DICK STONE, who was instrumental in bringing direct service to Miami and Israel by both El Al-Israel Airlines and Miami-based National Airlines. I am attaching his remarks on the occasion of the signing for the RECORD.

I would also particularly like to thank six outstanding and respected leaders of the Chicago Jewish community who, at my invitation, traveled at their own expense to Washington, D.C., to observe the signing. They include:

Mr. Ralph Bell, president, Zionist Organization of Chicago.

The Honorable Maurice Berlinsky, former mayor of Joliet, Ill.; with Ms. Stephanie Ann Krockey, his granddaughter;

Rabbi Seymour Cohen of the Anshe Emet Synagogue in Chicago;

Mr. Saul Silverstein, chairman of the Community Council of Jewish Organizations;

Ms. Lorel Pollack, chaiman, Chicago Action for Soviet Jewry; and

Mr. James P. Rice, executive vice president, Jewish United Fund and the Jewish Federation of Metropolitan Chicago.

Each of them is a credit to the State of Illinois because of their unremitting dedication to the State of Israel and because of their significant contributions to community and civic affairs.

Now that this historic agreement has been signed, I would like to relate an aspiration expressed by Mr. Ben-Ari for the time when peace comes between Israel and its Arab neighbors. At that time, Mr. Ben-Ari experessed the hope that El Al-Israel Airlines will join with the airlines of the neighboring Arab States to form the Middle East Airline System. Within the Middle East system, Tel Aviv might well serve as a connecting hub between intercontinental flights to the Middle East and short range flights within the region. It is my fondest hope that the day when Mr. Ben-Ari's dream might be realized is not too far off.

Mr. President, I ask unanimous consent that the material to which I referred be printed in the RECORD, together with other pertnent material.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CAB LIFTS RESTRICTIONS ON EL AL CHARTERS AS BILATERAL PROTOCOL IS SIGNED IN WASHINGTON

WASHINGTON, D.C. August 16.—The possibility of low-fare air transportation between the United States and Israel became a reality today as the Civil Aeronautics Board moved to implement a protocol signed between the two governments.

Between 1963 and 1976, the Israeli government refused to accept passenger charter flights from anywhere in the United States. In 1976, they relaxed their policy somewhat, allowing U.S.-originating charters from the west coast.

Under the protocol relating to the U.S.-Israel bilateral air services agreements signed today in Washington, the Israeli government accepts unlimited charter flights between any U.S. city and Israel. This opens to all American cities the possibility of low-cost charter flights to Israel.

The Board today therefore vacated a 1973 order (73–2–99) requiring El Al to apply to the Board for a statement of authorization to conduct any on-route passenger charters between Israel and the U.S. In addition, the CAB today added El Al to the list of 46 foreign airlines granted blanket off-route charter authority.

On-route charters are those which are conducted between cities named in a bilateral agreement. Off-route charters involve cities not specified in the agreement.

CAB Chairman Alfred E. Kahn hailed the protocol as another milestone in international aviation, "providing low-cost scheduled and charter service for travelers to Israel and the Middle East and new opportunities for our airlines."

The protocol adds four as-yet-unnamed American cities to El Al's foreign air carrier permit, expanding its scheduled service. Trans World Airlines currently is the only U.S. carrier offering scheduled air service between the United States and Israel. Under the terms of the protocol, the United States is free to designate other U.S. airlines to provide scheduled and charter service between the two countries.

After August 1, 1979, a fare filed by an airline for scheduled U.S.-Israel service can be disapproval only if both governments agree, thus allowing true price competition.

The original bilateral air services agreement between the United States and Israel was signed in 1950.

EL AL SEEKS CHANGES TO GROW AND COMPETE

(By Holly Saunders)

The former and current presidents of El Al are planning for extensive restructuring of Israel's flag carrier in order to face problems "coming from both sides of the ocean."

The current president, Mordechai Hod, was appointed in November 1977. Although new to the commercial airline business, the retired general is a veteran of aviation. Born in Israel in 1926, Hod became an Israel Air Force fighter pilot in 1950 and was a commanding officer during the Six-Day War and the War of Attrition. During the Yom Kippur War he was aviation advisor to Israeli commanding officers.

In 1973 Hod was appointed assistant to the Defense Minister and was in charge of security matters. He was instrumental in the formation of Carog Airlines Ltd., (C.A.L.), a company designed to transport agricultural produce in co-operation with the Israel Growers Association. C.A.L. became operational in June 1976 and Hod was appointed general manager. He held that post until he became president of El Al.

The former president, Mordechai Ben-Ari, now has extended his leadership of El Al to become executive chairman of the board. At this position he is responsible for the policies and direction of the entire corporate structure of the carrier and its subsidiaries.

Both Hod and Ben-Ari agree that the current international air transport system, as well as El Al, have to be restructured in order to respond to the economic and political problems that lie ahead.

"Complete freedom of the skies", at least on routes to the U.S., is Ben-Ari's answer to some of El Al's problems. Hod agrees.

Hod believes theoretically that increased competition and lower fares should generate more traffic and result in increased profitability. But the El Al president doesn't believe that the theory can apply to El Al on the North Atlantic unless current constraints are relaxed.

The carrier's New York-Tel Aviv route comprises about 40% of its total revenue. El Al carries 80% of all traffic that moves on the route but the carrier's yield on the North Atlantic is the lowest in the industry, partly because of its high costs. In addition, 95% of that traffic is pleasure oriented moving on group and discount fares. El Al's North Atlantic yield during the 1976/77 fiscal year was only 4.3 cents, compared to Trans World's 4.58 cents.

That situation, coupled with the fact that New York is El Al's only U.S. gateway, places the carrier at a competitive disadvantage under the current system. In addition, Hod argues that El Al has the burden of being its country's only international carrier. El Al must, for national commercial and political reasons, maintain service to many areas—such as Scandinavia and Mexico—even if the economics are questionable. This does not allow El Al to emphasize service on the North Atlantic the way it would like and therefore diminishes that route's possibilities for profitability.

"This is the first time we have faced such a situation," said Hod, who attributes the low yields to the Carter Administration's consumer mindedness which has allowed prices to go down while expenses continue to increase.

Ben-Ari is even more critical of the U.S. position. He said the U.S. operates under the "disguise of freedom," but in fact dictates terms to other countries on the basis of "country-of-origin" rules. He adds that the U.S. policy eventually could provide "new vistas if brought to its logical conclusion"—deregulation.

"International civil aviation is one of the most regulated international businesses," Ben-Ari said recently. "The rules are based on sovereignty of the skies and on the fact that each country regards its air traffic as a national treasure, like oil, like minerals."

El Al's 5-year performance

Year	Pass. flown	Pass./km. flown (millions)	AS Km (millions)	Load factor	Total rev.'s $U.S. (millions)
1973–74	756,888	3609.3	5449.9	66.2	166.6
1974–75	743,109	3556.4	5253.8	67.7	193.3
1975–76	767,745	3443.2	5286.1	65.1	195.0
1976–77	960,256	4496.1	6678.2	65.9	262.0
1977–78	1,098,852	4899.4	7097.1	69.0	360.0

The El Al chairman has come to the conclusion that the only way international carriers can continue to grow both in revenues and in traffic is through an open skies approach to international air transportation.

"Today, we have reached a stage of maturity where the current system no longer works," he argues. "The only alternative to complete regulation is deregulation."

When asked how the U.S. would compete in an open skies environment, Ben-Ari admitted that it may result in fewer U.S. carriers in the marketplace, especially U.S. supplements. He believes they would have to obtain scheduled rights, merge with a scheduled carrier or be forced out of business.

In recent negotiations with the U.S., the Israelis won four additional gateways—probably Miami, Los Angeles, Boston and Chicago. Two points will be awarded immediately and two a year from now when a new fares articles will be instituted prohibiting either country from taking unilateral action, and allowing third countries to match low fares. Blind sector beyond rights were given to El Al from all U.S. points to Asia and South America and from one U.S. point—probably Miami—to Mexico. Charter rules also were liberalized.

On other horizons, President Hod said negotiations are expected "in the near future" for routes to Brazil and Argentina. He also wants to extend routes to the far east to Bangkok via Teheran. An estimated 25,000 Israelis fly from Tel Aviv to Bangkok on Air France and Alitalia. The president says this traffic should belong to El Al. Bangkok represents a good future market for Israel as a direct route, a crossroads and an around the world point, especially if the carrier is given fifth and sixth freedom rights from the U.S. and Bangkok.

In an attempt to foil low-fare concepts such as the Laker Skytrain, Ben-Ari is proposing a new fare structure for the industry. It would be a three-tiered concept offering services tailored to how much the passenger pays.

"We are selling for the price of a Volkswagen, the service of a Cadillac," said Ben-Ari. The passengers paying Cadillac prices are being discriminated against because they must travel under the same conditions as passengers paying 25–50 percent less, he added.

The three-tiers would be deluxe, business and holiday. The deluxe class would offer service superior to current first class service and the fare would be increased. Business class would be based on a 34-inch pitch seating configuration with service features "identical" to those presently being offered in first class.

Holiday class would be offered to passengers at approximately 50% discounts off current economy class fares. Seat pitch would be reduced to 32 inches and there would be no-frills service.

"Our seeking of complete freedom of the skies and a new milieu of international air transportation coupled with this new concept of service in the aircraft, . . . will bring El Al into a new era of growth and future development," predicts the chairman.

El Al is considering the purchase of a medium range, widebody aircraft which represents a luxury that, until now, the airline could not afford. Front runners for selections are the Airbus Industrie A300 and the Lockheed L–1011–400.

Previously, all aircraft in the El Al fleet had to operate on all routes with reasonable efficiency. Departing from this philosophy, the new aircraft is being selected specifically to serve European routes, which contribute 50% of El Al's revenue.

The airline eventually will have three types of aircraft. Medium to short range widebodies for the European sector, long range 747s, which the chairman says are the best aircraft ever produced, and something in between which will solve the need for long and medium range routes with relatively low traffic density.

El Al also plans to expand its cargo operations, concentrating on agricultural produce. From September to May of this year, El Al flew 50,000 tons of agricultural produce. In the next two to three years, El Al plans to fly 200,000 tons of produce on what will become their "skytrain" operation. A large portion of the increased tonnage is expected to be diverted sea freight. If El Al is successful at diverting this sea traffic, in three years it is estimated the figure will rise to 400,000 tons per year.

To accommodate this projected growth, the airline has added a Boeing 747C, El Al's sixth 747, and has a 747F scheduled for delivery in March 1979.

Beginning in 1984, the airline will replace its ten 707–420s—some of which are eighteen years old—in two stages. The aircraft to replace the 707s is likely to be the Boeing 777. The existing El Al fleet is exclusively Boeing. Although the chairman says it is desirable to have a one-manufacturer fleet, it is not mandatory. Ben-Ari also said that if the Boeing 767 existed today, El Al would have no hesitation about choosing it for their European routes. And if a Boeing equivalent of the supersonic transport ever develops, El Al would be at the top of the waiting list, according to Arnold Sherman, former public relations director and now director of operations in Athens.

In 1977, the country's thirtieth year, Israel reached the one million tourists mark for the first time. Overall tourism has been increasing at an annual rate of between 22 percent-28 percent. A rapid decline in U.S. tourism occurred in 1977, dropping from an annual growth rate of 50 percent in 1976 to 32 percent in 1977, because of budget fares to other parts of the world. Currently, even charters in Israel can't compete with some international discount fares. Until the holiday class fare is in effect, the entire Israeli tourist package is still too expensive because of comparatively high air fares, even though land arrangement prices are reasonable.

TOURISM DOLLARS NEEDED

Economically, Israel needs the dollars generated from tourism, and is making an organized effort to expand and improve this industry. The Ministry of Commerce, Industry and Tourism is encouraging conventions and conferences to promote business traffic to Israel which currently accounts for only 5 percent of El Al's traffic. Israel accommodates approximately 70 conventions yearly, but with lower air fares, officials believe this figure could double within a few years.

The government has developed a package of incentives to encourage foreign and domestic inventors to develop business and hotels in Israel. With a 50 percent inflation rate, it is difficult to attract investors, but the government is offering tax exemptions, long-term, low interest rate loans and grants of up to 12 percent of investment cost to desired investors. The government will pick up 50 percent of the total research and development expenses and offers academic incentives as well. The average Israeli salary is $375 monthly which means labor costs are relatively low.

Hotel construction was frozen in the aftermath of the 1973 Yom Kippur War but is now being encouraged. By 1983 Israel plans to accommodate an anticipated two million tourists who will require 40,000 hotel rooms, an increase of 16,000 over the current 23,400. Under the holiday fare package, an individual passenger will receive a 24 percent discount off 5-star hotel rates and plans are underway to make more economy class hotels available.

One cannot mention tourism with respect

to Israel without addressing the seriousness of the political situation, which directs the country's economy. El Al's main national task is to provide a link to the outside world in times of war and peace—not to make a profit. While the outbreak of war has not stopped El Al from flying, it has of course lowered the profitability of the airline and decreased tourism. But in Israel, and at El Al, profitability is not a condition of operation—El Al planes will fly.

The economics of peace could mean an extreme shift in the national budget. Currently one-third of Israel's budget goes toward defense, one-third for paying back loans from other countries, and the other third is in the national reserve—used for such services as education, future investment and other social services.

Whatever political changes the country faces, economic changes are inevitable, and Israel wants to be in control. Israel is gearing up for expanding its influence in the international marketplace by increasing exports, expanding tourism and developing industry and productivity while at the same time it is trying to hold in check in "diseases of the western society," says Meir Amit, Minister of Industry, Commerce and Tourism.

El Al "did not cost the Israeli taxpayer one penny" last year, and it provided Israel with one of the most important economic entities in the country, according to Chairman Ben-Ari.

El Al is the second biggest exporter in the state of Israel, accounting for 6 percent of all exports and 3 percent of the gross national product. It employs over 5,000 people, and although just one-seventh the size of Pan Am and only six-sevenths of an airline (operations cease on the Sabbath from sundown Friday to sundown Saturday—operating only six days out of seven), El Al still broke even for 1977–78 and turned over $360 million revenue. Says Ben-Ari, "we are going to be an airline with $1 billion turnover by the end of the next decade."

This is not a small achievement and did not happen without problems, which unfortunately, still trouble the airline in 1978. Serious labor difficulties have plagued El Al in the past few years, and although talks are underway, a resolution is not in clear sight.

TRADE UNION CONFLICTS

There are conflicts of interest between the trade unions, resulting in the threats of strikes and wildcat strikes. Each work group has its own trade union and until recently negotiated contracts separately. Splinter groups refused to accept the discipline of the national labor union, the Histradrut, so the "will of the national interest has not been imposed," an El Al official said.

El Al management has made some progress by setting up an airline counsel where each trade union is represented. The counsel negotiates for all member unions with the management. El Al officials stressed the fact that they are "going forward" with these group negotiations. They added that a "proper solution . . . (would be found) . . . if possible with the consent and the agreement with our labor representation, if impossible, by other means."

International terrorism continues to represent a serious threat to the security of El Al and all international airlines, believes Ben-Ari. "We are mistaken when we think that the present silence is an end to terrorism in civil aviation," he said.

Ben-Ari has submitted detailed proposals to IATA in an attempt to alert airlines and governments to the "clear and present danger of international terrorism" and to achieve greater organization to combat this potential threat to "the very existence of civil air transport."

Ben-Ari's policy of "active defense" is based on two firm rules: foil the attack before it can take place and do not rely on only one method of security—such as baggage screening. These rules, along with his assertion that what has been done thus far is far from sufficient, is Ben-Ari's prescription for combating this crucial situation.

Ben-Ari was president of El Al during the first terrorism attacks and is painfully aware of the nature of the beast. El Al security probably the most thorough of any carrier in the world and it is the application of these policies that have made it so.

CONGLOMERATE STRUCTURE

The appointment of Mordechai Ben-Ari as executive chairman of the board allows him to oversee the entire infrastructure of El Al which has grown into a conglomerate.

The parts are:

Teshet: A wholly owned subsidiary of El Al specializing in aviation and tourist services including international hotel management, marketing outlets, ground handling services for passengers and cargo, and kosher food plants in the U.S., U.K. and Israel. The objectives of Teshet are to own and manage non-flight activities of El Al.

El Al Charter Services, Ltd.: A new wholly owned subsidiary specializing in marketing charters between Israel and Europe.

Arkia Inland Airlines: Owned 50% by El Al, and 50% by the national labor union, the Histradrut, Arkia is the country's domestic carrier, founded in January 1950, offering scheduled and charter service to all parts of Israel.

El Al is currently negotiating for an agreement with the Israel Agricultural Boards of Production and Marketing, the owners of Cargo Airlines Ltd., for 50% ownership of C.A.L.

C.A.L. is a non-scheduled, non-IATA cargo airline which carried 36,259 tons of agricultural and industrial exports and 22,260 tons of miscellaneous imports in 1977. Anticipated growth in 1978 is 58,000 tons of exports and 36,000 tons of imports. C.A.L. currently leases one 747F from El Al, one 747–100F from Flying Tiger Line and operates one 747B, one 707B, and one DC–8–63 leased from various international companies on a short-term basis. The fleet planned for 1979 consists of four 747Bs and other narrow body aircraft including DC–8s and 707s.

An interministerial committee has been developed to oversee El Al's operations to make certain that these potentially conflicting activities remain "kosher." This committee will submit recommendations regarding the advisability of expanding El Al's power to own subsidiaries. The committee serves as an impartial third-party in evaluating such issues as whether El Al or Arkia should serve certain charter routes. The ministries involved are the Ministry of Finance, the Ministry of Transportation and the Ministry of Commerce, Industry and Tourism.

"I am confident in the basic principle of efficiency, of economy, by having all the means in one hand, and exploiting them in a co-ordinated way," states Ben-Ari, ". . . Using on the other hand the specialization required for the various fields of activities, under central planning and co-ordination, is the milieu which gives . . . the possibility to every one of the components of this conglomerate to compete one with the other, but all of them against foreign countries, and at the same time to assure the lowest possible cost per production unit."

With this guiding philosophy and the restructuring plans, the Hod/Ben-Ari team is confident of El Al's future, in 1978 and beyond.

[From the Aviation Week and Space Technology, July 17, 1978]

C.A.L. BUILDS MIDEAST-EUROPE ROUTES

(By David A. Brown)

TEL AVIV.—Israeli all-cargo airline, C.A.L., is establishing a network for cargo routes between Europe and the Middle East with the expectation that Israel will become the area's major distribution and transshipment center if a Middle East peace agreement is reached.

In the meantime, the carrier, formed less than two years ago, is aggressively pioneering airborne export of Israeli agricultural produce and the import of European industrial goods.

At the same time, it has worked to solve the traditional air cargo problem of backhaul cargo and has reduced the nonproductive mileage flown by careful route selection.

C.A.L.—for the Cargo Air Lines Ltd.—was formed in June, 1976, by Gen. Mordechai Hod, retired air force chief of staff and now president of El Al Israel Airlines (AW&ST Dec. 2, 1977 p. 31). It began operation in November 1976.

The airline was formed in response to needs of the Israel Agricultural Boards of Production and Marketing for a way to transport perishable agricultural products from Israel to European markets quickly in order to eliminate the need for expensive refrigerator shipping.

This provided substantial, although seasonal, westbound traffic and it was hoped that by providing the capacity and frequent service, sufficient eastbound cargo could be attracted to cut freight costs by making full use of the capacity available and keeping utilization of the aircraft at a high level.

Since the export cargo volume is seasonal and C.A.L. has to adjust its capacity over a wide range to compensate for this, the carrier leases all of its aircraft.

Peak season is from mid-October through mid-May, when Israeli agricultural exports are heavy and it is during this period that C.A.L. carries about 70% of its annual volume of cargo. During the months from mid-May to October, the carrier drops its capacity to about a third that of the peak period.

In planning its routes, C.A.L. decided that the most efficient course to follow was to have one point in Europe to which most cargo could be trucked and processed through a central warehouse. This saved on flight costs to additional cities and permitted the carrier to work all its customers' cargoes together to insure a full load on every eastbound flight.

Site selected for this terminal was Cologne/Bonn airport in West Germany, where traffic was relatively light and where the airport administration was anxious to get additional business.

Airport officials have invested more than $5 million in cargo facilities for air carrier use and as a result have seen the total cargo moving through the airport rise to 70,000 tons in 1977, the majority of which was carried by C.A.L.

C.A.L. also uses Munich for about a fifth of its total eastbound traffic and operates occasionally on demand to Rome, Paris, Marseille, Amsterdam and Brussels.

The carrier established agreements with European trucking firms to distribute cargo from Cologne and Munich to the rest of Europe, since it is almost as fast—and about four times cheaper—to truck goods from Munich or Cologne as it is to fly them to a second destination.

Produce destined for Britain, for example, is flown to Cologne and trucked to London, resulting in one-day service from Israel.

During 1977, C.A.L.'s first full year of operation, the airline flew 240 million revenue ton/kilometers, carrying 58,000 tons of cargo in and out of Israel. Forecast for 1978 is 380 million revenue ton/kilometers with 58,000 tons being exported from Israel and 36,000 tons being imported.

C.A.L.'s fleet for 1977 consisted of a 747 leased from Flying Tiger, one leased from El Al, the cargo half of a 747 leased from El Al, a DC–8–63 leased from Trans International, a Boeing 707 leased from TAP of Portugal and a 707 leased from El Al.

All were wet leases except the Flying Tiger

aircraft, which was dry-leased and operated by El Al crews.

For the coming heavy season, beginning next October, the airline plans to lease two 747C combis from El Al and a 747F freighter from El Al after it is delivered in the early spring, a 747 from Flying Tiger and three smaller aircraft. El Al also will provide backup service with a 747F when needed.

C.A.L. plans to operate the 747s on a cargo shuttle basis to Cologne and Munich and the smaller aircraft to other destinations as needed.

In addition to serving the route between Europe and Israel, C.A.L. is engaged in planning and developing routes to other countries with the dual purpose of expanding its service now and establishing a network that will permit it to play a role in transshipment by air of goods from Europe to all the Middle East if an overall peace settlement is reached.

Initially, these efforts have centered on carrying agricultural produce from nearby nations, such as Greece, Turkey and Cyprus, to Europe and providing a backhaul cargo by carrying industrial goods from Europe to Iran. This leaves only the relatively short leg from Teheran to Tel Aviv as an unproductive route segment.

Future expansion is planned along a line from Europe to Hong Kong, via Israel, Iran, India and Thailand. Planning studies indicate that there should be sufficient cargo in both directions along this basic route to permit a high-capacity, low-rate cargo operation to be profitable.

C.A.L.'s future, however, is being pinned heavily on a peace settlement opening up virtually all of the Middle East to it and economic studies already show that transshipment of goods to Saudi Arabia via Tel Aviv could cut shipment costs by as much 50%.

As an example, to ship 100 tons from Europe to Riyadh at present requires about 48 hr. of 707 time. If this shipment could be combined with others, shipped to Tel Aviv on a 747 and transshipped to Riyadh by 707, large reductions in cost could be made by cutting to a minimum the distance the aircraft have to fly empty.

By routing goods from Europe to Saudi Arabia via Tel Aviv, for example, nonproductive flight time could be cut from the present Riyadh-Europe segment for a 707 to only the Riyadh-Tel Aviv segment, while at the same time taking advantage of the lower cost of shipping from Europe to Tel-Aviv on the more efficient 747.

At present, C.A.L. estimates that it has a constant backlog of 400–500 tons in its warehouse at Cologne bound for Israel, which permits continual high loads on the eastbound route. This is accomplished by concentrating all or at least most of the cargo from Europe to Israel at one or two points for onward shipment by air, according to Gilon Zohar, C.A.L. vice president-commerce.

The reverse situation also is possible in the Middle East, C.A.L. officials believe, by concentrating the cargo at Tel Aviv for onward shipment to Europe.

Cost advantages of this can be significant. C.A.L. estimates that it can carry aluminum from Europe to Tel Aviv for 13 cents per kilo. The lower deck of the 747 is well-suited for heavy material shipment, C.A.L. believes.

Such concentration also has other advantages. C.A.L. has an agreement with the Cologne/Bonn airport officials that provides a reduction in the operating costs of all flights out of the airport if the carrier flies more than 400 flights per year. This will permit C.A.L. to operate out of Cologne for only about one-third of the cost of operating from Amsterdam.

By leasing its aircraft, C.A.L. also has been able to operate with a relatively small staff. It has only about 60 employes, including those which are based in Cologne.

C.A.L. also is seeking to profit from sideline activities it has entered as a result of its airfreight needs.

Car carrier designed by C.A.L. is manufactured for it by Trans Equip Inc. of Los Angeles, with the airline receiving a royalty on carriers sold to other users.

Statement on the Signing of the US-Israel Civil Aviation Agreement

(By Senator Richard Stone)

As Chairman of the Senate Foreign Relations Subcommittee on Near Eastern and South Asian Affairs, it was a great pleasure to witness the signing of the newly revised United States-Israel Civil Aviation Agreement. This event ushers in an exciting new era of air transportation between our two countries.

I am particularly pleased that Miami, Florida, will be one of four additional gateway points for direct flights to and from Israel. The people of Florida have long sought this service and I want to congratulate this Administration for bringing this agreement to a successful conclusion.

On Wednesday afternoon (August 16), National Airlines formally filed an application with the Civil Aeronautics Board requesting permission to provide three flights a week between Miami and Tel Aviv, beginning in April 1979. National plans to offer low, discount fares on these flights.

I made repeated attempts with the previous Administration to secure this type of agreement but all those efforts were unsuccessful. On January 28, 1977, only one week after President Carter took office, I wrote him asking for the granting of additional landing rights in the United States and for Miami in particular. As you can tell, this Administration wanted to get the job done.

Significant fare reductions have already been announced and approved by both governments. Because United States domestic carriers have applied for service to Israel, the spirit of this long-needed revised agreement is taking shape. I want to congratulate President Carter, the State Department and the White House officials who worked tirelessly along with Ambassador Dinitz and his staff at the Embassy of Israel. This is a great breakthrough benefitting the people of both our countries. It was a long time coming, and will be appreciated for a long time.

National Airlines

MIAMI.—National Airlines requested authority today from the Civil Aeronautics Board to fly from Miami to Switzerland and Israel.

The airline proposed to serve Zurich and Tel Aviv as an extension of its nonstop flights to Paris and Amsterdam.

Present direct service from the U.S. to Israel is available only from New York, Chicago and Boston. The Miami flights would provide the first direct service from the South.

In a schedule proposed for the summer of 1979, National said it would operate one flight weekly each between Miami-Amsterdam-Tel Aviv, Miami-Paris-Tel Aviv, Miami-Paris-Zurich-Tel Aviv, and Miami-Paris-Zurich.

The airline said it will provide direct online connections at Miami for most of the Florida cities it serves, plus New Orleans, Houston, Los Angeles and San Francisco.

National pointed out that the U.S.-Israel and U.S.-Switzerland markets currently are served primarily by foreign flag airlines.

El Al, the Israeli airline, carries about 90 per cent of the U.S.-Israel traffic. Trans World Airlines, the only American carrier with authority to Zurich, currently does not schedule flights to that city, leaving Swissair with the only service from the U.S.

National believes there is tremendous potential for developing business and vacation travel from the Sun Belt states to Switzerland. Florida has emerged as a major banking center, for example, a factor which should contribute to strong business traffic on the route.

The airline also noted that it expects to participate in large group movements of passengers wishing to visit Israel as part of organized tours.

National reminded the CAB that it had initially proposed extension of European services to Tel Aviv and Zurich in the Transatlantic Route Proceeding nearly five years ago.

Another reason cited for the request was "radically improved air relations" with Israel. A more liberal aviation treaty between the U.S. and Israel is expected to be signed today.

The agreement will enable the U.S. to make multiple designations of U.S. airlines to Israel. Israel, in exchange, has been granted rights to four new U.S. cities. One of them—Miami—was prominently mentioned during the negotiations as a likely point for new services by El Al.

The filing noted that Miami/Fort Lauderdale contributed nearly 10,000 passengers to the Tel Aviv market in 1976, with other National points in Florida responsible for an additional 3,000. The airline's on-line Florida cities and across the southern tier of states accounted for 56,000 passengers between the U.S. and Tel Aviv-Zurich combined during the same period.

Remarks at Signing Ceremony for U.S.-Israel Aviation Agreement

(By Deputy Secretary of State Warren Christopher)

Mr. Ambassador, Members of Congress, Secretary Adams, and Distinguished Guests:

I am pleased to welcome you to the signing of the new aviation agreement between the U.S. and Israel.

This agreement is a major step forward in the U.S. Government's new pro-competitive aviation policy. The agreement includes three significant provisions designed to expand air service between our two countries and to make available to consumers the benefits of increased competition.

First, Israeli airlines will be able to serve four additional U.S. cities of their own choosing, and U.S. airlines are permitted to serve Israel from all cities in the U.S.

Second, unlimited charter service by airlines of both countries is permitted, subject only to the requirement that charter fights conform to the charter rules of the country in which they originate.

Third, airlines are permitted to compete freely in offering lower air fares, unless the governments of both countries disapprove the fare. This third provision requiring disapproval of both countries to block a lower fare is an innovation in international aviation agreements that we feel can be highly effective in stimulating new low fare offerings.

Taken together, these three provisions symbolize the new commitment to competition in U.S. Government aviation policy. I think it is fair to say that this agreement, and several others negotiated in the past year, are breaking new ground in international aviation.

We hope and believe airlines of both countries will take advantage of the opportunities offered by this agreement. We also hope that the principle of enhanced competition embodied in this agreement will be increasingly reflected in other international aviation agreements.

Remarks by His Excellency Simcha Dinitz

After long, difficult, but successful negotiations, the United States and Israel have finally reached an agreement which is the most liberal air agreement ever signed.

This agreement expresses the mutual desire of both countries to facilitate the expan-

sion of international air transportation by making it possible for airlines to offer the travelling and shipping public a variety of service options at the lowest and most competitive fares.

This agreement provides for unlimited rights for charter flights from both countries and gives Israel the right to operate through four additional cities in the United States.

Since 1950 when the bilateral air agreement between the United States and Israel went into effect, Israel has tried to expand its services in the United States. After 28 years we are now entering a complete new era in the aviation relations between our two countries.

For Israel the new agreement opens the gates for expansion of the air traffic between our two countries, thus promoting tourism and facilitating more intimate relations between the people of the United States and Israel. It will also provide El Al Israel Airlines with the opportunity and the challenge to expand its activities in this country.

The list of the people who took part in the efforts to achieve this agreement is very long and we are grateful to all of them. We would like to thank Mr. Styles, the chairman of the U.S. delegation, and all the members of his delegation who worked very hard to get this agreement. We would also like to thank Undersecretary Cooper and Assistant Secretary Katz who directed this effort.

To our many friends in the executive and legislative branch of the government who have been helpful in bringing about this agreement, our thanks and gratitude.

We are confident that the new opportunities created by this agreement will work for the benefit of our two countries and for the benefit of the individual traveler. This individual, is after all, the cornerstone upon which the bridge of friendship and understanding between our two countries is built, stretching over ocean and seas to unite people of common purpose and common destiny.

TRIBUTE TO EDWARD DURELL STONE

Mr. PERCY. Mr. President, on Sunday, August 6, 1978, Edward Durell Stone, one of the great American architects of the 20th century, died in New York. Few modern architects have had the influence of Mr. Stone, whose diverse projects included the Museum of Modern Art and the General Motors Building in New York, the U.S. Embassy in New Delhi, the Standard Oil Building in Chicago, and the Kennedy Center for the Performing Arts in Washington.

Mr. Stone felt that the desire of every good architect was "to imbue a building he designs with beauty." This desire was incorporated in all his works as he often used marble, ornate grilles, rich woods, and windows in creating elegant and effective structures. He took much pride in his works, particularly as he felt they were greatly enjoyed by the general public. He took pleasure in telling friends, when speaking of the General Motors Building in New York, that "every taxi driver in New York will tell you it's his favorite building."

One of Mr. Stone's most well-known projects is the Kennedy Center for the Performing Arts in Washington, D.C. As the Nation's center for the arts, the Kennedy Center is visited by millions of people each year. Many come to enjoy a symphony, opera, or play performed in one of the Kennedy Center's three beautiful theaters. Countless others visit the Center, one of the Capital's largest tourist attractions, to view its magnificent Halls of States and of Nations or to revel in its spectacular overlook of the Potomac. Mr. Stone was pleased to see the Center become, in his words, the "cultural focus for the city of Washington," saying that it gives him "great joy to see the throngs of people truly enjoying the facilities provided."

On August 11, 1978, the Washington Post published an editorial about Mr. Stone and his contributions to our American architectural heritage. Mr. President, I ask unanimous consent that the Washington Post's editorial on Edward Durell Stone be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

[From the Washington Post, Aug. 11, 1978]

EDWARD DURELL STONE

If Edward Stone had designed no building in Washington other than the John F. Kennedy Center for the Performing Arts, he still would be regarded as one of the city's important architects. As it is, Mr. Stone also designed the Georgetown University Law School and the National Geographic Building—a work architecturally superior to the Kennedy Center in most ways. But the Kennedy Center was his major effort here, and his major legacy. And the fact of its success as a place for art, if not as a thing of beauty, testifies to how fully Mr. Stone understood this city, and the arts as well.

The Kennedy Center is so much a part of Washington now that it's odd to think back to the late '50s and early '60s, when its existence was up for grabs. First the "national cultural center" was to consist of "several 300- to 400-seat rooms" in addition to three enormous main theaters. It was to be 900 feet long, and to cost $50, no $61, no $75 million. There was congressional clamor. Then the price was slashed to $30 million, and the architectural plans reduced accordingly—just in time, of course, for the price to more than double. At one point in 1962, Mr. Stone changed his design to a cluster of separate buildings. To top everything, there was a barrage of 11th-hour attacks on the proposed site of the center: It would overwhelm the city's memorials; it would be inaccessible to those without cars; it would be better located downtown.

Mention those arguments to those who led the attacks in 1964 and 1965, and the hackles rise even now. The most deep-seated worry was not that the cultural center would dwarf the national monuments, but rather that it would become a national monument in itself, and thus not be a place where a fluid culture thrives. Observe the center coldly today, and you understand the concern—which was shared by The Post at the time. There it squats—all 630′ x 300′ x 100′ of it—a short way from the Lincoln Memorial, which it imitates poorly.

Yet Mr. Stone understood what he was doing with the Kennedy Center, perhaps far better than anyone imagined. The building is colossal, but it is also clever. Its size is broken into manageable units for the eye. The grey and white marble on the terrace is patterned in squares and rectangles, so as not to shoot down in one infinite path. The doors are high as well as wide. The trees and fountains flourish in their own compartments. And there's the location itself. No cultural center in the country has a more beautiful view. Nor is there a more pleasant place to stand during intermission or after a performance than on that terrace below which the Potomac miraculously becomes the Thames.

The Kennedy Center is not a beautiful building, but as a place of performance it is a beautifully functional one. Mr. Stone did build beautiful buildings—notably the pavilion at the Brussels World's Fair, and New York's Museum of Modern Art—but the beautiful, the special buildings stopped after his famous American embassy in New Delhi (some say just before it), and, like Orson Welles, he became a celebrity at about the same time heset aside the original force of his talent. Yet he was always a serious artist. He spoke sincerely of the need to convey "courage" and "dignity" in buildings, and he condemned "the colossal mess we've made of this country" with true rage. As for the Kennedy Center, he undertook the task as a national trust and sought to create a place where one can enjoy the arts wholeheartedly. That he did.

LEAA AND THE COURTS

Mr. THURMOND. Mr. President, I bring to the attention of my colleagues certain observations by Mr. Ralph N. Kleps with regards to the U.S. Law Enforcement Assistance Administration (LEAA) grants in the area of federally financed court improvement projects.

Mr. Kleps is presently a judicial consultant since his retirement as court administrator of the California Supreme Court. Speaking before the Conference of State Chief Justices, he notes that LEAA grants have been the most important catalyst for improvement in the judicial system in the past decade. He points out that LEAA funds have been wisely used by the courts to institute organizational and management changes and also to promote education and research.

However, Mr. Kleps warns that Federal aid often leads to Federal dictation and bureaucracy and suggests that State courts be vigilant of this fact.

Later this week, the Senate Criminal Laws Subcommittee will resume its LEAA reauthorization hearings. One of the central issues will focus on whether LEAA aid to State courts can be effected without Federal domination or control of them. Mr. Kleps' survey will help build the record on this crucial point.

An account of Mr. Kleps' observation is included in the following article from the Barre, Vt., Times-Argus. Mr. President, I ask unanimous consent that this article be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Barre (Vt.) Times-Argus, Aug. 1, 1978]

COURTS "LAST BASTION" AGAINST BUREAUCRACY

(By Judy Polumbaum)

BURLIGTON.—Courts are "perhaps the last bastion" against the encroachment of federal power into state affairs, a former California court administrator declared Monday.

Judges nonetheless have reason to be wary of federal assistance to state court systems, Ralph N. Kleps told the Conference of Chief Justices at the Radison Hotel here.

Kleps, a freelance judicial consultant since retiring from the administrative job last year, has completed a survey of federally financed court improvement projects in all 50 states.

He said the study indicates U.S. Law Enforcement Assistance Act (LEAA) grants have been "the single most powerful impetus for improvement" in the past decade.

And while a few court projects were undertaken in response to pressure from Washington, "those isolated instances do not add up to federal domination," Kleps observed.

But programs like LEAA which are

"oriented toward accommodating change through the federal bureaucracy" contain the seeds of federal dictation, he suggested.

Kleps advised the justices, "Beware of the Trojan horse," and added: "Federal aid is acceptable, but federal financial coercion is not."

The Californian's remarks followed a two-hour discussion Monday afternoon concerning pending federal legislation to restructure the LEAA.

The chairman of the judicial gathering here, Ohio Chief Justice C. William O'Neill, said state judges fear the legislation would dilute their control over the use of federal funds for the courts.

In the past, said O'Neill after the session, justices criticized LEAA because courts had a hard time competing for funds over law enforcement agencies and other groups "with political muscle."

Their criticism of LEAA reforms advanced by the administration of President Carter and in Congress revolve around a provision to funnel federal money directly to large cities.

The measure is "in line with present trends" regarding financing for urban areas, O'Neill remarked. But it is worrisome to judges, who believe "the judicial system ought to be organized on a statewide basis, he said."

Details of proposed LEAA changes, contained in an administration-backed Senate bill called the Justice Systems Improvement Act of 1978, were presented to the chief justices Monday by Walter Fiederowicz, a deputy associate attorney general in the Justice Department.

The bill, introduced at a White House ceremony July 10, is expected to go through numerous amendments and changes as it travels through congressional committees. Another version is expected to surface in the House, and a third version has been introduced in both the House and Senate by the American Bar Association.

Fiederowicz said the Senate proposal would create a National Institute of Justice to consolidate research, and a Bureau of Justice Statistics to bring together data. A third agency would handle the allocation of LEAA funds.

For the first time, Fiederowicz said, cities of 100,000 or more and counties or jurisdictions of 250,000 or more would be able to apply for LEAA grants.

In the past, only states have been eligible to receive the money. The states in turn have allocated the funds to local law enforcement agencies and to the courts.

LEAA has provided states with $6 billion in the past 10 years. The new Senate's proposal would provide $3.3 billion over the next four years. During the past decade, Vermont has received almost $1 million.

Kreps noted police and sheriff's departments awarded LEAA money have "tended to go overboard on hardware," particularly on uncoordinated computer systems.

But in the courts, he said, LEAA funds "have gone into organizational and management changes, into education, and into research."

Suggesting that federal assistance will continue to be useful to state courts, Kreps urged the justices to help frame guidelines for federal participation in court reform.

He said he would favor pushing for demonstration grants, technical aid, establishment of an independent judicial research foundation and the assurance that all projects be negotiated through the leadership of the state court systems.

THE CALENDAR

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar orders Nos. 1043 and 1044.

Mr. BAKER. Mr. President, reserving the right to object.

The PRESIDING OFFICER. Reservation is heard.

The Senator from Tennessee.

Mr. BAKER. Mr. President, I will not object. Calendar orders Nos. 1043 and 1044 are clearly on our calendar. We have no objection to proceeding to their consideration and their adoption.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL DISTRICT COURT ORGANIZATION ACT OF 1978

The Senate proceeded to consider the bill (S. 3375) to amend title 28 of the United States Code to make certain changes in the places of holding Federal district courts, in the divisions within judicial districts, and in judicial district dividing lines, which had been reported from the Committee on the Judiciary with amendments as follows:

On page 2, line 11, strike "(b)" and insert "(c)";

On page 3, at the beginning of line 4, strike "and";

On page 3, line 4, after " "McHenry," " insert "and "Pierce,";

On page 5, line 15, strike "Tomkins" and insert "Tompkins";

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "Federal District Court Organization Act of 1978".

PLACES OF HOLDING COURT

SEC. 2. (a) The last sentence of section 97 (a) of title 28, United States Code, is amended to read as follows:

"Court for the Eastern District shall be held at Ashland, Catlettsburg, Covington, Frankfort, Jackson, Lexington, London, Pikeville, and Richmond.".

(b) The last sentence of section 104(a)(1) of title 28, United States Code, is amended to read as follows:

"Court for the eastern division shall be held at Aberdeen, Ackerman, and Corinth.".

DIVISIONS WITHIN JUDICIAL DISTRICTS

SEC. 3. (a) Section 98(c) of title 28, United States Code, is amended to read as follows:

"Western District

"(c) The Western District comprises the parishes of Acadia, Allen, Avoyelles, Beauregard, Bienville, Bossier, Caddo, Calcasieu, Caldwell, Cameron, Catahoula, Clairborne, Concordia, Jefferson Davis, De Soto, East Carroll, Evangeline, Franklin, Grant, Iberia, Jackson, Lafayette, La Salle, Lincoln, Madison, Morehouse, Natchitoches, Quachita, Rapides, Red River, Richland, Sabin, Saint Landry, Saint Martin, Saint Mary, Tensas, Union, Vermilion, Vernon, Webster, West Carroll, and Winn.

"Court for the Western District shall be held at Alexandria, Lafayette, Lake Charles, Monroe, Opelousas, and Shreveport.".

(b) Section 114 of title 28, United States Code, is amended—

(1) in paragraph (2), by striking out "Sheridan, Steele, Stutsman, and Wells" and inserting in lieu thereof "Steele, and Stutsman";

(2) in paragraph (3), by striking out "Bottineau," "McHenry," and "Pierce,"; and

(3) by amending paragraph (4) to read as follows:

"(4) The Northwestern Division comprises the counties of Bottineau, Burke, Divide, McHenry, McKenzie, Mountrail, Pierce, Renville, Sheridan, Ward, Wells, and Williams.".

JUDICIAL DISTRICT DIVIDING LINES

SEC. 4. (a) Section 89 of title 28, United States Code, is amended—

(1) in the first paragraph of subsection (a), by inserting "Madison," immediately after "Liberty,"; and

(2) in the first paragraph of subsection (b), by striking out "Madison,"

(b)(1) Section 93 of title 28, United States Code, is amended to read as follows:

"§ 93. Illinois.

"Illinois is divided into three judicial districts to be known as the Northern, Central, and Southern Districts of Illinois.

"Northern District

"(a) The Northern District comprises two divisions.

"(1) The Eastern District comprises the counties of Cook. De Kalb, Du Page, Grundy, Kane, Kankakee, Kendall, Lake, La Salle, McHenry, and Will. "Court for the Eastern Division shall be held at Chicago.

"(2) The Western Division comprises the counties of Boone, Carroll, Jo Daviess, Lee, Ogle, Stephenson. Whiteside, and Winnebago.

"Court for the Western Division shall be held at Freeport and Rockford.

"Central District

"(b) The Central District comprises the counties of Adams, Brown, Bureau, Cass, Champaign, Christian, Coles, De Witt, Douglas, Edgar, Ford, Fulton, Greene, Hancock, Henderson, Henry, Iroquois, Knox, Livingston, Logan, McDonough, McLean, Macon, Macoupin, Marshall, Mason, Menard, Mercer, Montgomery Morgan, Moultrie, Peoria, Piatt, Pike, Putnam, Rock Island, Sangamon, Schuyler, Scott, Shelby, Stark, Tazewell, Vermilion, Warren, and Woodford.

"Court for the Central District shall be held at Danville, Peoria, Quincy, Rock Island and Springfield.

"Southern District

"(c) The Southern District comprises the counties of Alexander, Bond, Calhoun, Clark Clay, Clinton, Crawford, Cumberland, Edwards, Effingham, Fayette, Franklin, Gallatin, Hamilton, Hardin, Jackson, Jasper, Jefferson, Jersey, Johnson, Lawrence, Madison, Marion, Massac, Monroe, Perry, Pope, Pulaski, Randolph, Richland, St. Clair, Saline, Union, Wabash, Washington, Wayne, White, and Williamson.

"Court for the Southern District shall be held at Alton, Benton, Cairo, and East Saint Louis.".

(2) Section 133 of title 28, United States Code, is amended by striking out the item relating to Illinois and inserting in lieu thereof the following:

"Illinois:	
"Northern	12
"Central	2
"Southern	2".

(c) Section 112 of title 28, United States Code, is amended—

(1) in the first paragraph of subsection (a), by inserting "Columbia," immediately after "Clinton,", by inserting "Greene," immediately after "Fulton.", and by inserting "Ulster," immediately after "Tompkins"; and

(2) in the first paragraph of subsection (b), by striking out "Columbia,", "Greene," and "Ulster,".

EFFECTIVE DATE

SEC. 5. (a) The amendments made by this Act shall take effect one hundred and eighty days after the date of this Act.

(b) Nothing in this Act shall affect the composition or preclude the service of any grand or petit juror summoned, empaneled, or actually serving in any judicial district on the effective date of this Act.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President,

I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1121), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE AMENDMENT

The purpose of the proposed legislation is to provide an additional place of holding court in the Eastern District of Kentucky and the Northern District of Mississippi; to change the divisions within the Western district of Louisiana and the District of North Dakota; and to change the judicial district dividing lines in Florida, Illinois, and New York. The changes made by this bill are intended to improve the effective administration of justice in the Federal courts in these States.

STATEMENT

The proposed legislation affecting the boundaries and places for holding court by Federal District courts is intended to promote the efficient and equitable administration of justice and to serve the needs of litigants, jurors, witnesses, lawyers, judges and other participants in the judicial process.

Kentucky

Section 2(a) of the bill adds Ashland as a designated place of holding court in the Eastern District of Kentucky. Ashland is approximately 10 miles away from Catlettsburg which is one of two places in the Eastern District of Kentucky where a U.S. judge and a full-time magistrate presently have their chambers. The courthouse at Catlettsburg dates from 1910–11. Its space and facilities are grossly inadequate to carry on the business of the court with efficiency, safety, and convenience to all litigants, witnesses, officials of the court and members of the public. Not only is there inadequate space for the judge's chambers, the magistrate's office, law clerks and secretaries, but there is no space where jurors can be sent to wait while proceedings are conducted in the courthouse out of their presence, there are no witness rooms and no space for counsel to consult with clients. In addition, the building presents serious fire safety hazards. It has no fire escapes and only a small elevator and narrow stairs at one end of the building for egress from the second, third, and fourth floors. The overcrowded conditions and the physical layout of the building also complicate security efforts. The U.S. marshal's holding cell is inadequate and there is no separate holdover space for women or juvenile prisoners.

Besides the courthouse, the town itself has insufficient support facilities. Catlettsburg is the county seat of Boyd County with a population of approximately 3,200. In contrast, Ashland has a population of approximately 30,500. Catlettsburg has no hotel or motel facilities available for witnesses, litigants, and jurors, nor does it have restaurant facilities which could be used for a sequestered jury. In fact, the prevailing practice today is for litigants, jurors and members of the bar who are attending sessions of court in Catlettsburg to spend the night in Ashland and travel each day to the court. For these reasons, the committee believes that the administration of justice and the convenience of parties and public would be better served by designating Ashland as a place for holding court.

Mississippi

Section 2(b) of the bill adds as an additional place for holding court in the Eastern Division of the Northern District of Mississippi. The State of Mississippi is divided into two judicial districts, denominated as the Northern and Southern Districts. The Eastern Division of the Northern District consists of 13 counties in the northeastern corner of the State of Mississippi and extends in a north-south direction of approximately 140 miles. The principal place of holding court for this division is Aberdeen, Miss., which is located approximately 60 miles from the southern boundary of the division. Ackerman, Miss., which is also designated as a statutory place of holding court in the eastern division, is approximately 91 miles southwest of Aberdeen. However, no trials are held at Ackerman, which was included in the statute primarily as a location where chambers are provided for a circuit court judge from the State of Mississippi. The designation of Ackerman was required since section 142 of title 28 of the United States Code specifies that the General Services Administration can provide court quarters only at places where regular terms of court are authorized by law to be held.

The city of Corinth is located in the extreme northern part of the Eastern District, approximately 85 miles north of Aberdeen. Corinth has a population of approximately 15,000 residents and is a principal commercial center in that part of the State. Litigants and counsel from 5 of the 13 counties can more conveniently attend court located at Corinth than at Aberdeen, which is the sole place of holding court. One of the judges of the court is a resident of Corinth. Since the closest Federal courthouse is at Aberdeen, 85 miles away, the judge must spend 4 hours of travel time for each trip from his residence to the court chambers at Aberdeen. If Corinth is designated as an official place for holding court, the Government Services Administration, pursuant to section 142 of title 28, United States Code, would be authorized to provide chambers for the judge at Corinth. It is not proposed to provide a courtroom at Corinth. The committee is advised that the Federal post office building at Corinth has vacant space on the second floor of the building which at relatively small expense can be remodeled to provide suitable chambers for the judge. These chambers will be used by the judge for study, research and preparation of orders and opinions. The judge will also hear motions and conduct certain pretrial and post-trial proceedings at Corinth in cases where the parties and their counsel are located closer to Corinth than they are to Aberdeen.

The change proposed by this bill was approved by the Judicial Conference of the United States on April 7, 1976.

Louisiana

The Western District of Louisiana is one of 36 judicial districts operating under a statutory division scheme. Section 98(c) of title 28 designates the parishes to be included within the six divisions of the Western District and the cities within the district where court is to be held. In contrast, in nonstatutory divisions, Congress designates the cities where court is to be held but leaves the geographical limits of each division to be determined by local rule, according to the workload generated by the several parishes and the problems peculiar to the area.

The committee believes the Western District of Louisiana is better suited to a nonstatutory division system. Caseloads in the existing statutory divisions vary significantly and in some cases the designated place of holding court is not convenient for the parishes which it serves. The problems cannot permanently be remedied by realining the parishes in the present statutory divisions since changes in population and caseload may require additional changes in the future.

The elimination of divisions provided for by section 3(a) is in conformity with the general policy of the Judicial Conference favoring consolidation of district court divisions, and has been approved by all interested parties.

North Dakota

The State of North Dakota constitutes a single Federal judicial district comprised of four divisions. The divisions approximate quadrants and are accordingly designated as the Northwestern, Northeastern, Southeastern, and Southwestern Divisions.

Bottineau, McHenry and Pierce Counties lie in the northcentral part of the State of North Dakota. They form the extreme western and northern part of the Northeastern Division of the judicial district in which court is held only in Grand Forks on the far eastern border. The distance from Bottineau, the county seat of Bottineau County, to Grand Forks is 192 miles. The corresponding distance from Towner, county seat of McHenry County, is 165 miles, and from Rugby, county seat of Pierce County 146 miles.

In the Northwestern Division court is held in Minot which lies near the eastern border of that division. All of the above mentioned counties are significantly closer to Minot than Grand Forks. Placing Bottineau, McHenry, and Pierce Counties in the Northwestern Division would reduce travel to the Federal courthouse from the county seat of each county by 113, 120 and 82 miles respectively.

Sheridan and Wells Counties lie in the central part of the State. They form the extreme northwestern part of the Southwestern Division. In the Southeastern Division court is held in Fargo on the far eastern border of the division. Consequently, it is necessary to travel 201 miles from McCluskey, county seat of Sheridan County, and 173 miles from Fessenden, county seat of Wells County, to the Federal courthouse in Fargo. Aligning Sheridan and Wells Counties with the Northwestern Division would reduce the mileage to the Federal courthouse by 117 miles when traveling from McCluskey and 83 miles when traveling from Fessenden.

The committee believes that the interest of the Government, litigants and members of the bar of the counties affected would be served by reduction in travel distance and time. There would also be a saving for the Government in the mileage fee paid to jurors who are called to jury service from these five counties.

The realinement set forth in section 3(b) of the bill has been approved by the lawyers in the counties affected, the Federal District judges for the District of North Dakota and the Judicial Conference of the United States.

Florida

Florida is divided into three judicial districts. Under present law, Madison County, Fla., is included in the Middle Judicial District of Florida, with Jacksonville as the place designated for holding court. On its eastern border, Madison County is 86 miles from Jacksonville and on its western border it is 133 miles from Jacksonville. Section 4(a) of the bill would amend title 28 of the United States Code by removing Madison County from the Middle Judicial District of Florida and including it in the Northern Judicial District. The effect of such an amendment would be to reduce the average distance which Madison County litigants, attorneys, jurors and witnesses must travel to the nearest federal district court. On its eastern border, Madison County is 66 miles from Tallahassee, the place designated for holding court in the Northern Judicial District. On its western border, it is only 29 miles from Tallahassee. Section 4(a) of this bill has met with no opposition, and would greatly benefit the citizenry of Madison by making the federal district court more accessible.

Illinois

The primary thrust of section 4(b) of the bill is directed at replacing the existing Eastern and Southern Districts of Illinois with new Central and Southern Districts which more accurately reflect the makeup of the State.

Under present law, Illinois has three judicial districts—one covering the northern quarter of the state and two covering the

eastern and western sections of the State. These latter two are deceptively called the Southern and Eastern Districts. Parts of the Eastern District are located south of the Southern District and the present Southern District encompasses the western part of Illinois and lies in the central, not the southern, portion of the state.

The present Southern and Eastern Districts run counter to the natural east-west flow of commerce in Illinois which imposes inconvenience and economic hardship upon those who use the courts. In addition, under the current district structure counties such as Madison and St. Clair which have nearly identical social, cultural, and economic ties and which are both essentially part of the East St. Louis metropolitan area, are placed in different judicial districts.

The proposed districts would divide the state of Illinois logically in an east-west manner, uniting areas of common economic activity and interest. These districts would take into account the flow of commerce in the state, the convenience of users of the courts, and the population of the included areas. The new districts would encompass all the counties now included in the existing Eastern and Southern Districts, except Kankakee County, which would be placed in the existing Northern District to more evenly distribute the population in each District.

The proposed changes would not involve the construction of any additional court facilities or other major expenditures. However, the changes will necessitate a conforming amendment to the omnibus judgeship bill. The judgeship bill which is currently pending in conference includes an additional judgehip approved by both the House and the Senate for the existing Eastern District. The Committee intends that the judgeship for the existing Eastern District be assigned to the new Central District created by this bill.

The reorganization of the three districts in Illinois has been endorsed by judges in all three districts as well as the Circuit Council for the Seventh Circuit.

New York

Under present law, the counties of Columbia, Greene, and Ulster are included within the Southern Judicial District of New York, with New York City the place designated for holding court. This creates a burden on those who must use the U.S. District Court. Geographically, Albany is situated much closer to these three counties. Accordingly, the people of Greene and Columbia counties have centered their lifestyles around Albany and not New York City. They work there, utilize services offered there, and are required to conduct state and other federal business in Albany.

Section 4(c) of this bill would place the counties of Columbia, Greene and Ulster in the Northern Judicial District of New York, having Albany as the place designated for holding court. The addition of these 3 counties has been approved by the judges of the Northern Judicial District of New York and lawyers in the counties affected have indicated their support of this legislation.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

TRANSPORTATION OF COAST GUARD EMPLOYEES

The bill (H.R. 185) to amend section 2632 of title 10, United States Code, to provide the Secretary of the department in which the Coast Guard is operating with the authority to transport Coast Guard employees to and from certain places of employment, was considered, ordered to a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95-422), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

PURPOSE OF THE LEGISLATION

The purpose of the bill is to provide the Secretary of the department in which the Coast Guard is operating with the authority to transport Coast Guard employees to and from their places of employment whenever the Secretary determines that it is necessary for the effective conduct of the affairs of his department. The bill would extend the authority, which presently exists for the Secretary of a military department, to the Secretary of the department in which the Coast Guard is operating.

BACKGROUND

One of the many missions with which the Coast Guard is charged involves the maintenance of a comprehensive aids to navigation network. That network includes the long-range radio and navigation (loran) system which is maintained to serve the navigation needs of the Armed Forces, as well as the needs of maritime and air commerce.

The problem to which the bill is addressed has arisen because of the construction of the loran stations necessary to operate the system. Because site selections are based upon a site's freedom from electromagnetic interference and upon a site's location with respect to the loran-C network, therefore, some sites are, and others necessarily will be, located in remote areas of the United States where adequate community support for Coast Guard personnel is not, or will not be, readily available. For example, one loran station is being constructed near Searchlight, Nev. However, the nearest town offering adequate community support for Coast Guard personnel accompanied by their families is Boulder City, Nev., which is 55 miles from the station site. Adequate public transportation is not available between the station site and Boulder City. Under current law, personnel would be required to drive their own vehicles 110 miles each working day. A similar situation exists at a loran station near Kodiak, Alaska.

The alternatives to providing transportation are to require personnel to drive their vehicles or to make the sites unaccompanied duty stations, which would work a hardship on the personnel and adversely affect crew morale. Providing transportation to and from the station sites is the most reasonable and cost-effective resolution of the problem. Although the cost of the proposed legislation will vary at each station, it is modest. The cost of operating a vehicle at any station would be approximately $10,000 for the first 5 fiscal years following enactment.

There is, therefore, a need to relieve the restrictions found in 31 U.S.C. 638a, which impose limitations on the use of federally owned passenger vehicles for home-to-work transportation of employees.

EXPLANATION OF THE LEGISLATION

This legislation would, by amending section 2632 of title 10, United States Code, specifically authorize the type of transportation authority desired. This, in turn, would nullify the restrictions of 31 U.S.C. 638a, by providing specific authority for the action.

Section 2632 of title 10 currently authorizes the Secretary of a military department to provide assured and adequate transportation for persons employed in his department to and from their places of employment whenever the Secretary determines that it is necessary for the effective conduct of the affairs of his department. Although the Coast Guard is an armed force, it is not a military department under the definition of section 101 of title 10. The bill would amend section 2632 of title 10 by including language affecting the Coast Guard and extending section 2632 authority to include the Secretary of the department in which the Coast Guard is operating.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

COMMITTEE MEETINGS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Constitution Subcommittee of the Committee on Judiciary be authorized to meet during the session of the Senate on Tuesday, August 22, 1978, to hold a hearing on the Citizens Privacy Protection Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Energy, Nuclear Proliferation and Federal Services Subcommittee of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, August 23, 1978, to hold a markup session on S. 1493, energy impact assistance and S. 3412, retirement benefits for GAO's Comptroller General.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Health and Scientific Research Subcommittee of the Committee on Human Resources be authorized to meet during the session of the Senate on Wednesday, August 23, 1978, from 4 p.m. until 6 p.m. and Thursday, August 24, 1978, from 3 p.m. until 5 p.m. to hold a markup session on S. 2755, the Drug Regulation Reform Act.

The PRESIDING OFFICER. Without objection, it is so ordered.

SPECIAL ORDERS FOR TOMORROW

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that on tomorrow, after the two leaders have been recognized under the standing order, Mr. LEAHY be recognized for not to exceed 15 minutes and that the Senate then resume consideration of the District of Columbia representation measure.

The PRESIDING OFFICER. Without objection, it is so ordered.

TIME LIMITATION AGREEMENT—S. 2570

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that at such time as Calendar Order No. 821, S. 2570, the CETA bill, is called up and made the pending business, there be a time agreement on it as follows: 4 hours on the bill, equally divided, between Mr. NELSON and Mr. JAVITS, 1 hour on any amendment in the first degree, 30 minutes on any amendment in the second degree, 20 minutes on any debatable motion, appeal, or point of order, if such is made to

the Senate for its consideration, with one exception, that there be a time limitation on an amendment by Mr. BELLMON of 2 hours, and that otherwise the agreement be in the usual form.

The PRESIDING OFFICER. Without objection, it is so ordered.

The text of the agreement follows:

Ordered, That when the Senate proceeds to the consideration of S. 2570 (Order No. 821), a bill to amend the Comprehensive Employment and Training Act of 1973 to provide improved employment and training services, to extend the authorization, and for other purposes, debate on any amendment in the first degree (except an amendment to be offered by the Senator from Oklahoma (Mr. BELLMON), on which there shall be two hours; shall be limited to one hour, to be equally divided and controlled by the mover of such and the manager of the bill; debate on any amendment in the second degree shall be limited to 30 minutes, to be equally divided and controlled by the mover of such and the manager of the bill; and debate on any debatable motion, appeal, or point of order which is submitted or on which the Chair entertains debate shall be limited to 20 minutes, to be equally divided and controlled by the mover of such and the manager of the bill: *Provided*, That in the event the manager of the bill is in favor of any such amendment or motion, the time in opposition thereto shall be controlled by the minority leader or his designee: *Provided further*. That no amendment that is not germane to the provisions of the said bill shall be received.

Ordered further, That on the question of final passage of the said bill, debate shall be limited to 4 hours, to be equally divided and controlled, respectively, by the Senator from Wisconsin (Mr. NELSON) and the Senator from New York (Mr. JAVITS): *Provided*, That the said Senators, or either of them, may, from the time under their control on the passage of the said bill, allot additional time to any Senator during the consideration of any amendment, debatable motion, appeal, or point of order.

ORDER OF PROCEDURE

UNANIMOUS-CONSENT AGREEMENT

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that upon the disposition of Calendar Order No. 686, House Joint Resolution 554, the D.C. voting representation joint resolution, the Senate proceed to the consideration of Calendar Order No. 821, S. 2570, the CETA bill, on which there is already a time agreement, and that several amendments by Senator DOMENICI be disposed of.

Following the disposition of the several Domenici amendments, that Mr. DOMENICI may lay down an amendment dealing with fraud, which would be disposed of on Wednesday morning, August 23; that following the disposition of that amendment, the CETA bill be temporarily laid aside and the Senate proceed to the consideration of Calendar Order No. 787, S. 1753, the Elementary and Secondary Education Act; that after the opening statements, Mr. DOMENICI be recognized to call up some amendments; that after those amendments and other amendments have been disposed of, the Senate, no later than 2 o'clock p.m. on Wednesday, proceed to the consideration of any of the following bills from the Finance Committee: Calendar Order Nos. 721, 728, 849, 1024, 1025, 1032, 1033, and 1034; and that upon disposition of these measures the Senate return to the consideration of either Calendar Order No. 787, the Elementary and Secondary Education Act, or Calendar Order No. 821, the CETA bill, whichever in the opinion of the majority leader should be taken up and resumed at that time.

Mr. BAKER. Mr. President, reserving the right to object, and I will not object, as our colleagues might infer, this schedule of events is a matter that has been discussed by the distinguished majority leader and myself and others and, of course, much of the day today.

I believe it is a good schedule and I will not object to it. On the contrary, I express my gratitude to the majority leader for arranging it in this way, much of the content of this request was at the request of the minority leader on behalf of the Members on this side of the aisle.

I would ask the majority leader if there is any intention to try to spell out the consideration of other items for the balance of this week after this consent order is entered?

Mr. ROBERT C. BYRD. I would like, if it is at all possible, to proceed, depending upon the progress made, at least, to lay down the civil service reform bill before we go out for the holiday and, of course, it is understood there is not a time agreement on that measure.

It is understood also, when we return from the holiday, the natural gas conference report will be called up, but not until after the second concurrent budget resolution has been disposed of, which under the law must be enacted by September 15.

Mr. PERCY. Mr. President, will the majority leader yield?

Mr. ROBERT C. BYRD. I yield.

Mr. PERCY. Mr. President, I have discussed this matter with Senator RIBICOFF. We express deep appreciation to the joint leadership, with whom we have discussed this matter earlier today, for the decision to lay down the civil service reform measure before we recess on Friday.

Mr. ROBERT C. BYRD. We may not recess on Friday.

Mr. PERCY. Either one or both of us will be prepared to give opening statements whenever we do recess, Friday or Saturday, whenever it may be.

Mr. ROBERT C. BYRD. Or Monday or Tuesday.

Mr. PERCY. Or Monday or Tuesday.

Subject, of course, to privileged conference reports, and so forth. I have talked, I believe, with everyone on the minority side of the aisle.

Certain Senators will not enter into time limitations, on principle, on any legislation now. They have assured the Senator from Illinois that there will be no undue delay in this case, unless Hatch Act reform is attempted to be tied to this legislation—and there they would expect extended conversation and discussion—or, with respect to the labor-management section, title VII, if an attempt is made in the Senate to move us closer toward the House provision, which gives greater power to unions and would take away what some of our colleagues on the minority side feel would be an infringement of the Government's right and to carry as a principle into the collective bargaining process certain things reserved for management prerogatives today. In that event, they would expect to oppose strongly such provisions.

But if the bill can be kept pretty much along the lines as reported by the Governmental Affairs Committee, Senator RIBICOFF and I would expect expeditious movement of that measure.

I thank the leadership and express deep appreciation for their scheduling this matter so that we can anticipate moving ahead with it.

Mr. ROBERT C. BYRD. I thank the Senator.

Mr. BAKER. Mr. President, I have no further reservation.

The PRESIDING OFFICER. Is there objection? The Chair hears none and the unanimous-consent request is agreed to.

ORDER FOR CONVENING OF THE SENATE AT 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, the hour for convening the Senate on tomorrow, I believe, already has been set, has it not?

The PRESIDING OFFICER. The hour already has been set at 9 a.m.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the hour be changed to 9:30 a.m.

The PRESIDING OFFICER. Without objection, it is so ordered.

RECESS UNTIL 9:30 A.M. TOMORROW

Mr. ROBERT C. BYRD. Mr. President, if there to be no further business to come before the Senate, I move, in accordance with the order previously entered, that the Senate stand in recess until 9:30 a.m. tomorrow.

The motion was agreed to; and at 8:25 p.m. the Senate recessed until tomorrow, Tuesday, August 22, 1978, at 9:30 a.m.

EXTENSIONS OF REMARKS

SENATE COMMITTEE MEETINGS

Title IV of the Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the

Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of all meetings when scheduled, and any cancellations or changes in meetings as they occur.

As an interim procedure until the computerization of this information becomes operational the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committees scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, August 22, 1978, may be found in Daily Digest of today's RECORD.

MEETINGS SCHEDULED

AUGUST 23

9:00 a.m.
Finance
To continue hearings on H.R. 13511, proposed legislation to reduce income taxes.
2221 Dirksen Building

Select on Indian Affairs
To hold a business meeting on pending calendar business.
5110 Dirksen Building

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To continue hearings on S. 3363, proposed International Air Transportation Competition Act
235 Russell Building

Energy and Natural Resources
To continue mark up of proposed legislation designating certain Alaska lands as national parkland.
3110 Dirksen Building

Environment and Public Works
To hold a business meeting on pending calendar business.
4200 Dirksen Building

Human Resources
To continue hearings on S. 2645, proposed National Art Bank Act.
4232 Dirksen Building

Judiciary
Administrative Practice and Procedure Subcommittee
To hold joint hearings with Select Small Business Committee on S. 1974 and S. 3330, to improve Federal rulemaking practices.
424 Russell Building

Select Small Business
See joint hearing with Committee on Judiciary Subcommittee on Administrative Practice and Procedure.

10:00 a.m.
Banking, Housing, and Urban Affairs
To hold joint hearings with the Committee on Governmental Affairs on S. 2750, proposed Consolidated Banking Regulation Act.
3302 Dirksen Building

Governmental Affairs
To resume joint hearings with Judiciary Subcommittee on Citizens and Shareholders Rights and Remedies on S. 3005, to broaden the rights of citizens to sue in Federal courts for unlawful governmental action.

Judiciary
Criminal Laws and Procedure Subcommittee
To resume hearings on S. 3270, proposed Justice System Improvement Act, and related bills.
2228 Dirksen Building

SENATE—*Tuesday, August 22, 1978*

(Legislative day of Wednesday, August 16, 1978)

The Senate met at 9:30 a.m., on the expiration of the recess, and was called to order by Hon. ROBERT MORGAN, a Senator from the State of North Carolina.

PRAYER

The Reverend Dr. Robert B. Harriman, director, the Presbyterian Council for Chaplains and Military Personnel, Washington, D.C., offered the following prayer:

Great Creator of the universe, we thank Thee for majestic mountains, fertile fields, and far-stretching forests. For the richness of the Earth and wealth of its waters, we are grateful. May we not be inept stewards of our wealth or inconsiderate of following generations. As the Members of this Senate are aware of our heritage, may they be led in all their deliberations to do those things which preserve our inheritance and insure, for all who shall follow, an even stronger and more fruitful nation. May Thy presence be felt whenever they are gathered in consultations and deliberations which affect this Nation, and other nations of the world. May theirs be a vision to see beyond these shores and beyond this day, for Thou dost will that all nations of the Earth should live together in peace and harmony.

May all who are engaged in the affairs of Government, from the President to the least conspicuous public servant, be blessed with Thy wisdom, warmed by Thy love, and led by Thy righteousness. So shall we know that "Blessed is that nation whose God is the Lord." In Thy name we pray. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. EASTLAND).

The assistant legislative clerk read the following letter:

U. S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 21, 1978.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable ROBERT MORGAN, a Senator from the State of North Carolina, to perform the duties of the Chair.

JAMES O. EASTLAND,
President pro tempore.

Mr. MORGAN thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The majority leader, the Senator from West Virginia, is recognized.

THE JOURNAL

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, I have no need for my time today, and I yield it back.

RECOGNITION OF LEADERSHIP

The ACTING PRESIDENT pro tempore. The Senator from Tennessee is recognized.

Mr. BAKER. Mr. President, I have no requirement for my time under the standing order and I yield it back.

ROUTINE MORNING BUSINESS

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that there be a brief period for the transaction of routine morning business, that Senators may be allowed to speak up to 5 minutes therein, and that the period not extend beyond 10 a.m. today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Is there morning business?

WHERE IS THE OPPOSITION TO THE GENOCIDE CONVENTION?

Mr. PROXMIRE. Mr. President, for 11 years, I have addressed the Senate about the United Nations Genocide Convention. Every day that we are in session, I urge my colleagues to ratify this important treaty.

Why? Because I believe the treaty is a crucial human rights document. It

protects the most fundamental of human rights—the right to live. The treaty upholds the moral and ethical values of our country. It is in the best interests of the American people, and it is in the best interests of humanity.

The Senate is well aware of my ardent support for the Genocide Convention. But what have we heard from the opposition? Where are the opponents to the Genocide Convention? Whose voice is calling upon us to reject the treaty?

Is there Presidential opposition to the treaty? Certainly not. Every President since Truman has supported the treaty. Truman, Eisenhower, Kennedy, Johnson, Nixon, Ford, and Carter have all urged the Senate to ratify the U.N. convention.

Are interest groups lobbying against the treaty? Hardly. The American Bar Association, the American Civil Liberties Union, the National Conference of Christians and Jews, the AFL–CIO, and many more organizations have all passed resolutions in favor of the treaty.

What about our allies? Eighty-three nations have acceded to the treaty. All of our major NATO and SEATO allies are parties to the convention. We stand alone among the free Western nations.

Has the Senate Foreign Relations Committee failed to report the convention? Just the opposite. The committee has favorably reported the convention four times: in 1970, 1971, 1973, and again in 1976.

Mr. President, it seems that the only opposition to the Genocide Convention is within the Senate itself. For 30 years we have debated the treaty, while across the country and around the world more and more people have recognized the treaty's importance and voiced their support. The time has come for the Senate to join them.

Mr. President, the opposition to the treaty is small and silent. The support is overwhelming. I call upon my colleagues to ratify the Genocide Convention.

EXIMBANK LOANS $66 MILLION TO TRINIDAD CORPORATION

Mr. PROXMIRE. Mr. President, I call to the attention of my colleagues a communication I have received from the Export-Import Bank pursuant to section 2(b)(3)(i) of the Export-Import Bank Act of 1945, as amended, notifying the Senate of a proposed Eximbank loan to assist in financing the export from the United States of goods and services to be used in the construction of a plant to manufacture anhydrous ammonia in Trinidad and Tobago. Section 2(b)(3)(i) of the act requires the Bank to notify the Congress of proposed loans or financial guarantees in an amount of $60 million or more at least 25 days of continuous session of Congress prior to taking final action on such proposals. Upon expiration of this period, the Bank may give final approval to the transaction unless the Congress adopts legislation to preclude such approval.

In this case, the Bank proposes to extend a direct credit of $66,170,000 to Fertilizers of Trinidad and Tobago, Ltd. (FERTRIN), which is a joint venture owned by the Government of Trinidad and Tobago and Amoco International Oil Co., to assist in the export from the United States of goods and services to be used in the construction of a plant to manufacture anhydrous ammonia to be located at Point Lisas in Trinidad and Tobago. The Eximbank credit will cover 42.5 percent of the total cost of U.S. goods and services to be exported from the United States. The Eximbank loan would bear interest at the rate of 8⅜ percent per annum and be repayable in semiannual installments over an 8-year period commencing January 5, 1982.

Mr. President, I ask unanimous consent that the letter from Eximbank pertaining to this transaction be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., August 15, 1978.

Hon. WALTER F. MONDALE,
President of the Senate,
U.S. Capitol,
Washington, D.C.

DEAR MR. PRESIDENT: Pursuant to Section 2(b)(3) of the Export-Import Bank Act of 1945, as amended, Eximbank hereby submits a statement to the United States Senate with respect to the following transaction involving U.S. exports to Trinidad and Tobago.

DESCRIPTION OF TRANSACTION

Purpose

Eximbank has received a request from Fertilizers of Trinidad and Tobago Limited (FERTRIN) to assist in financing the export from the United States of goods and services of U.S. manufacture or origin required by FERTRIN for the construction of a new plant to manufacture anhydrous ammonia (Plant). The Plant is to be constructed at Point Lisas in Trinidad and Tobago and is one of several projects being developed to take advantage of the extensive natural gas reserves in the area.

The Plant will consist of a two train, 2,086 metric ton per day ammonia plant, plus ancillary equipment and systems. Construction is expected to be completed by mid-1981. The total costs of the Plant are estimated to be $250,000,000 of which 75% will be provided in the form of borrowings and 25% will be provided by equity contributions to FERTRIN from its two owners, the Government of Trinidad and Tobago (GOTT) and Amoco International Oil Company (Amoco).

Of the total estimated costs of the plant, $155,700,000 represents the costs of U.S. goods and services. To meet the request of FERTRIN, Eximbank is prepared to extend a direct credit of $66,170,000 to FERTRIN to assist in financing the export from the United States of the U.S. goods and services required for the Plant. Additional financing will be provided by private lenders.

Identity of the parties

FERTRIN is a joint venture incorporated under the laws of Trinidad and Tobago for the purposes of the Plant and is owned 51% by GOTT and 49% by Amoco. Amoco is a subsidiary of Standard Oil Company of Indiana.

GOTT and Amoco will enter into a cash deficiency and completion agreement with FERTRIN and Eximbank and the other lenders to the Plant whereby GOTT and Amoco will undertake, in proportion to their respective ownership interests in FERTRIN, to make up all cash deficiencies of FERTRIN required to complete the Plant and to cover all cash deficiencies in the operating costs of the Plant, including debt service to the lenders, until such debt has been paid in full. The undertaking of Amoco will be supported by a back-up undertaking of its parent company, Standard Oil Company of Indiana.

Nature and use of goods and services

The principal U.S. goods and services to be exported from the United States for use in the construction and operation of the Plant will be piping and valves, tankage, piling, insulation, a boiler, heat exchangers, pumps and compressors, condensers, seawater pumps, refrigeration equipment, a demineralization plant, switchgear, transformers, instruments and engineering, design and construction services. It is anticipated that a wide range of suppliers located throughout the U.S. will provide the U.S. goods and services. The estimated value by category of the U.S. goods and services is set forth in Annex I to this letter.

The Pullman-Kellogg Division of Pullman Incorporated, Houston, Texas, has been designated as the prime contractor for design, engineering and construction. Technical leadership of the Plant will be provided by Amoco during the design, construction and start-up phases and for the first ten years of operation under a proposed technical assistance agreement.

EXPLANATION OF EXIMBANK FINANCING

Export financing support

The Eximbank credit of $66,170,000 will facilitate the export of $155,700,000 of United States goods and services. Although FERTRIN has indicated its preference to effect its procurement in the U.S., it has also made clear that, if Eximbank financing is not available, procurement can be accomplished from foreign sources. Any foreign procurement would be supported by the official export credit agencies of the exporting countries.

Impact of imports on the U.S. economy

The anhydrous ammonia to be manufactured by the Plant will be exported for agricultural and industrial use throughout the world. Approximately one-half of the anhydrous ammonia from the Plant is expected to be marketed in the United States. In evaluating the impact of these imports on the U.S. domestic economy, Eximbank has addressed itself to whether the net economic benefit to the United States resulting from Eximbank's financing of U.S. goods and services for the Plant is positive or negative. The net economic benefit measures the benefits gained by the U.S. from the jobs supported by the sale of U.S. goods and services to the Plant as well as any benefits gained from importing into the U.S. some of the output of the Plant, as compared to the potential costs to the U.S. of such imports. The economic analysis made in response to this issue strongly supports Eximbank assistance for the Plant.

U.S. suppliers estimate that the exports, excluding already manufactured components, would support the employment of some 2,200 American workers. Annual shipments of spare parts of approximately $5 to $7 million would support another 50 jobs a year (or a total of 400 jobs for the eight year repayment period of the Eximbank credit). The total favorable job impact should therefore, reach approximately 2,600 jobs. Given the potential competition for this order from Europe and Japan, these jobs would very probably be lost to the U.S. if Eximbank financing support were not available.

The potential for adverse economic impact depends on the state of the world food and fertilizer markets in the mid and late 1980's when the Plant's output is expected to come on to the market. There currently is a substantial amount of excess ammonia capacity worldwide. Absent unusual incidents such as a drought, both the U.S. and world surpluses are projected to last into the early 1980's.

In times of a surplus, high cost producers are forced either to lose money or to shut down production. In this environment, producers who receive gas at a cost-of-extraction price have a decisive advantage. Only those U.S. producers who have long-term gas-purchase contracts entered into before 1970 have access to such low-priced gas. Other U.S. producers generally must pay approximately $2.00 per 1,000 cubic feet of gas (MCF). The Plant, however, will be able to purchase natural gas at a cost of $.25 per MCF and therefore be able to produce and sell ammonia in the U.S. at a price substantially less than that feasible for the U.S. producers. If there is still a surplus of ammonia during the peak years for the Plant (1985 to 1990), the product from the Plant probably would displace U.S. production. The present consensus forecast by experts in the field, however, calls for balanced markets by the mid-1980's; hence, there should be little or no adverse impact from the Plant. In such a situation, the net economic benefit to the U.S. would be a favorable job impact of over 2,000 jobs.

In addition, even if one assumes the worst situation, that is, the world surplus will continue throughout the 1980's and each imported ton of ammonia from the Plant will displace a ton of U.S.-produced ammonia, Eximbank's support will provide a net economic benefit to the U.S. of approximately 500 jobs. In the worst situation, the Plant would displace some 350,000 tons of U.S. ammonia production, or approximately 1.0 to 1.5% of expected U.S. ammonia capacity in the mid-1980's. This volume approximates the annual production of one 1,000 ton/day ammonia plant, which generally employs some 115 workers. As very few plants can profitably operate below 50 to 60% capacity, 350,000 tons of imports would probably put the workforce of slightly more than two plants out of work. Hence, the worst-case annual adverse employment impact is about 250 jobs. Using the projected production figures for 1981–89 and assuming a worst-case situation for each year, the total potential jobs displaced could come to some 2,100. As indicated below, however, even assuming the worst case, Eximbank's support produces a net economic benefit to the U.S. of approximately 500 jobs:

Jobs Supported

Year:	
1979	1,100
1980	1,100
1981	0
1982	50
1983	50
1984	50
1985	50
1986	50
1987	50
1988	50
1989	50
Total	2,600

Jobs supported

Year:	
1979	0
1980	0
1981	125
1982	225
1983	250
1984	250
1985	250
1986	250
1987	250
1988	250
1989	250
Total	2,100

If one assumes more likely conditions prevailing in the 1980's, Eximbank financing assistance supports over 2,000 U.S. jobs and offers the following other potential benefits for the United States:

The 350,000 tons of product imports would free 13.5 billion cubic feet of natural gas in the United States for higher priority uses. This volume of gas would heat a Northern city of 100,000 people through an entire winter.

Lower cost fertilizer enhances the price competitiveness of U.S. agricultural exports without impairing the financial health of America's farmers.

Lower cost food inputs could help alleviate some domestic inflationary pressures.

In sum, even in the worst-case situation Eximbank financing for the Plant should produce a net employment benefit to the U.S. Assuming a more realistic case, the employment benefits to the U.S. improve markedly. In addition, irrespective of the employment situation, Eximbank financing for the Plant offers other significant economic benefits to the U.S.

With or without Eximbank support and with or without U.S. procurement, FERTRIN is determined to construct the Plant. If Eximbank refuses to provide support for the U.S. goods and services, the Plant will be supplied by foreign exporters who will be supported by the official export credit agencies of the exporting countries.

The financing plan

Commercial banks are prepared to extend financing for this transaction without an Eximbank guarantee for a term not to exceed 7 years. In this transaction, there is a total term of approximately 11 years consisting of a three-year construction period and an eight-year repayment period. Thus, private financing is inadequate to meet the total financial requirements of the transaction and the Eximbank credit is necessary in order to generate sufficient financing for the U.S. exports.

The financing plan for the total U.S. goods and services of $155,700,000 is as follows:

	Percent of U.S. costs	Totals
Cash payment	15.0	$23,360,000
Eximbank credit	42.5	66,170,000
Private credits not guaranteed by Eximbank	42.5	66,170,000
Total	100.0	155,700,000

The Eximbank credit will bear interest at the rate of 8⅜%, payable semiannually. A commitment fee of ½ of 1% per annum will be charged on the undisbursed portion of the Eximbank credit. The financing will be repaid in 16 semiannual installments beginning January 5, 1982. The first eight installments will be applied to repayment of the private financing and the final eight installments to repayment of the Eximbank credit.

Sincerely,

JOHN L. MOORE, Jr.

ANNEX I

FERTRIN—ESTIMATED COSTS OF U.S. GOODS AND SERVICES

Estimated U.S. costs including contingency and escalation

Major items:	(*In millions*)
Piping and valves	$12.14
Tankage	3.43
Piling	2.65
Insulation	3.11
Boiler	2.18
Heat exchangers	9.65
Plate type (exchangers)	4.67
Pumps and compressors	3.89
Condensers	0.78
Seawater pumps	5.92
Refrigerator equipment	1.56
Demineralization plant	3.42
Switchgear and transformers	3.11
Instruments	3.58
Engineering and design	28.86
U.S. supervision and construction technicians	15.54
Other	51.21
Total	155.70

EXIMBANK FINANCIAL ASSISTANCE—SPAIN

Mr. PROXMIRE. Mr. President, I call to the attention of my colleagues a communication which I have received from the Export-Import Bank pursuant to section 2(b)(3)(iii) of the Export-Import Bank Act of 1945, as amended, notifying the Senate of a proposed direct loan in the amount of $8,000,000 and a financial guarantee of $9,000,000 to assist the export of nuclear fuel enrichment services required for reloads 1 and 2 of the Lemoniz I nuclear powerplant in Iberduero, Spain. Section 2(b)(3)(iii) of the act required the Bank to notify the Congress of proposed loans or financial guarantees involving nuclear exports, at least 25 days of continuous session of the Congress prior to taking final action on the proposal. Upon expiration of this period, the Bank may give final approval to the transaction unless the Congress adopts legislation to preclude such approval.

In this case, the Bank proposes to extend a direct loan in the amount of $8,000,000 and a financial guarantee in the amount of $9,000,000 for a total of $17,000,000, to assist in the purchase of U.S. services to be used for nuclear fuel enrichment in conjunction with the operation of the Lemoniz I nuclear powerplant in Spain. The proposed credit will cover 85 percent of the total cost of U.S. goods and services for the project. The loan will bear interest at 8 percent per annum, and be repaid in five semiannual installments.

Mr. President, I ask unanimous consent that the letter from Eximbank pertaining to this transaction be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

EXPORT-IMPORT BANK
OF THE UNITED STATES,
Washington, D.C., August 15, 1978.

Hon. WALTER F. MONDALE,
President of the Senate, U.S. Capitol, Washington, D.C.

DEAR MR. PRESIDENT: Pursuant to Section 2(b)(3)(iii) of the Export-Import Act of 1945, as amended, Eximbank hereby submits a statement to the United States Senate with respect to the following transaction involving the export of U.S. services to Spain:

A. DESCRIPTION OF TRANSACTION

1. Purpose

On January 20, 1972, Eximbank authorized a direct credit of $143,614,000 to Iberduero, S.A. to facilitate Iberduero's purchase of goods and services from the United States for export to Spain for the construction and initial operations of Lemoniz I and II Nuclear Power Plants and the initial core fuel load located near Bilbao. On June 9, 1977, Eximbank also authorized a direct credit of $3,200,000 to Iberduero to facilitate financ-

ing the U.S. costs of fabrication services of nuclear fuel reloads for Iberduero's Lemoniz I Nuclear Power Plant (reloads one and two) and Lemoniz II Nuclear Power Plant (reload one). Iberduero has now requested and Eximbank is prepared to provide financial assistance of $17 million in the form of a credit of $8 million and a guarantee of private loans of $9 million for the purchase of nuclear fuel enrichment services required for reloads one and two of Lemoniz I Nuclear Power Plant.

Exports of the enrichment services will be made within the framework of the bilateral "Agreement on Atomic Energy: Cooperation for Civil Uses" between the United States and Spain, and the trilateral agreement among the U.S., Spain and the International Atomic Energy Agency, relating to application of IAEA Safeguards. Both of these Agreements became effective on June 28, 1974, following consideration by the Congress under the provisions of Section 123 of the Atomic Energy Act of 1954. Prior to export, licenses must be obtained from the Nuclear Regulatory Commission with respect to individual sales of the enrichment services.

The nuclear fuel enrichment will be provided by the Energy Research and Development Agency of the Department of Energy at ERDA's Oak Ridge, Tennessee, facility pursuant to a fixed commitment, long-term contract with DOE. Under the contract DOE is to provide enrichment services over the operating lifetime of the Lemoniz I Nuclear Power Plant. Since this nuclear power facility has suffered delay in completion. Iberduero would take delivery of the fuel reloads sometime before they are needed. However it is to Iberduero's advantage to take the enrichment services in accordance with the schedule of annual enrichment services in its contract with DOE in order to avoid very substantial cancellation penalties. Furthermore Iberduero will avoid an interruption of power generation by taking delivery of the reload fuel when available.

2. Executive branch approval

In accordance with established procedures, Eximbank requested through the Department of State the views of the Executive Branch on the proposed transaction. State's Bureau of Oceans and International Environmental and Scientific Affairs advised that the Executive Branch has no objection to Eximbank's proceeding with this transaction.

3. Identity of the borrower

Iberduero, S.A. was created in 1944 as a result of a merger of two electric utility companies. Headquartered in Bilbao, it is the largest electric utility and one of the largest privately owned industrial enterprises in Spain. The utility accounts for more than 20 percent of Spain's electricity sales.

B. EXPLANATION OF EXIMBANK FINANCING

1. Reasons

The Eximbank credit of $8 million and guarantee of $9 million will facilitate the export of $20 million of U.S. goods and services. Eximbank perceives no adverse impact on the U.S. economy from the export of these goods and services. This transaction will have a favorable impact on employment for United States workers, as well as on the United States balance of trade. The material to be exported is not in short supply in the United States.

2. The financing plan

The total cost of the United States goods and services to be purchased by Iberduero is $20 million which will be financed as follows:

	Amount	Percent of U.S. costs
Cash	$3,000,000	15
Eximbank credit	8,000,000	40
Private loans guaranteed by Eximbank	9,000,000	45
Total	20,000,000	100

(a) Eximbank charges

Disbursements under the Eximbank credit will bear interest at the rate of 8.0 percent per annum, payable semiannually. A commitment fee of .5 percent on the undisbursed portion of the Eximbank credit, a guarantee fee of .75 percent on the disbursed portion of the private loans guaranteed by Eximbank and a .125 percent guarantee commitment fee on the undisbursed portion of the private loans guaranteed by Eximbank will be charged, all fees payable semiannually.

(b) Repayment terms

The Eximbank credit and the private loan, which total $17 million, will be repaid by Iberduero in five semiannual installments on a pari passu basis.

Sincerely,

JOHN L. MOORE, Jr.

Mr. PROXMIRE. Mr. President, I yield the floor.

SPECIAL ORDER

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Vermont (Mr. LEAHY) is recognized for not to exceed 15 minutes.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield to me for a unanimous-consent request?

Mr. LEAHY. I yield.

SUSAN B. ANTHONY DOLLAR COIN ACT OF 1978

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Calendar Order No. 1042.

The ACTING PRESIDENT pro tempore. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 3036) to amend the Coinage Act of 1965 to change the size, weight, and design of the one-dollar coin, and for other purposes,

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Banking, Housing, and Urban Affairs with amendments as follows:

On page 1, line 9, strike "8.5" and insert "8.1";

On page 1, line 10, strike "(a)";

On page 2, line 2, after "Anthony" insert a comma and "and shall bear on the other side a design which is emblematic of the symbolic eagle of Apollo 11 landing on the moon";

On page 2, beginning with line 5, strike through and including line 10;

So as to make the bill read:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. This Act may be cited as the "Susan B. Anthony Dollar Coir Act of 1978".

SEC. 2. Section 101(c)(1) of the Coinage Act of 1965, as amended (31 U.S.C. 391(c)(1)), is amended by striking out "1.500" and inserting in lieu thereof "1.043" and by striking out "22.68" and inserting in lieu thereof "8.1".

SEC. 3. The one-dollar coin authorized by section 101(c) of the Coinage Act of 1965, as amended by section 2, shall bear on the obverse side the likeness of Susan B. Anthony, and shall bear on the other side a design which is emblematic of the symbolic eagle of Apollo 11 landing on the moon.

SEC. 4. Section 203 of the Act of December 31, 1970 (31 U.S.C. 324b), is amended by striking out "initially" and by inserting "(d)" after "section 101".

SEC. 5. Until January 1, 1979, the Secretary of the Treasury may continue to mint and issue one-dollar coins authorized under section 101(c)(1) of the Coinage Act of 1965, as such section was in effect immediately prior to the date of enactment of this Act.

● Mr. PROXMIRE. Mr. President, last week the Committee on Banking, Housing and Urban Affairs unanimously reported out the Susan B. Anthony Dollar Coin Act of 1978. This legislation is the result of a comprehensive review of our coinage system conducted during the previous administration by Research Triangle Institute. During the last days of the 94th Congress, former Secretary of the Treasury William E. Simon made a similar recommendation for a smaller dollar coin, based on the Institute's findings; however nothing was done by either branch of Government until early spring of this year.

S. 3036 is identical to the administration's draft legislative proposal submitted to the Congress with the exception of the design change, which I shall touch on shortly. First, attention should be paid to the bill's primary focus—namely the authorization of a newer, smaller dollar coin, one much smaller and lighter than the present one. Just as Ford Motors went back to the drawing board because of Edsel and subsequently developed the successful Mustang, the bill before us would permit the Treasury to take its "Edsel" off the market and come out with a better product for wider usage by the American public.

The present dollar coin has never had a significant role in our coinage system because of its cumbersome size and the ready availability of smaller substitutes. Since 1971, when the Treasury reissued the dollar coin into our coinage system after a production hiatus of approximately 35 years, public demand has averaged less than 1 percent of total coinage outflow. The basic rationale for a smaller, lighter coin is to increase the flexibility of consumer transactions and offer substantial cost savings to the U.S. Government. The current Eisenhower dollar coin costs about 8 cents each to produce by the U.S. Mint compared to the cost for the proposed Anthony coin which would be 3 cents each. This is a

savings of greater than 60 percent per coin compared to the existing coin. Based on the mint's current production volume of 90 million dollar coins annually, the Anthony coin would save $4.5 million per year. With increased production generated by successful circulation, the savings would multiply.

Finally, Mr. President, S. 3036 corrects a historical omission that is long overdue. For the first time in our history, the likeness of an American woman would be depicted on a U.S. circulating coin. All of our present coins now bear the likenesses of American Presidents; Eisenhower, dollar coin; Kennedy, half dollar; Washington, quarter; Roosevelt, dime, Jefferson, nickel; and Lincoln, penny.

The committee's decision to approve the Susan B. Anthony Dollar Coin Act is consistent with all similar legislation passed by the Congress during this century. What has changed in this instance is the tradition of a modern democracy honoring only its males on its circulating coinage. The administration's recommended return to the more traditional liberty head symbol because it could not decide on a suitable American woman to grace the coin is not only anachronistic but—in the committee's view—would shortchange more than one-half of the American electorate.

The Anthony Coin Act is supported by a coalition of major womens' organizations which, for the first time in my memory, endorse the same legislative issue wholeheartedly. I speak of the National Organization of Women, the League of Women Voters of the United States, and the Daughters of the American Revolution. Given the fact that the right to vote is the centerpiece of any democracy, and it was the 19th amendment to the U.S. Constitution (known as the Anthony amendment) which gave women that right, the committee concurred that the new coin should commemorate the American woman who made that right possible: namely, Susan B. Anthony.

Mr. President, I urge my colleagues to support this legislation.●

● Mr. WILLIAMS. Mr. President, I support S. 3036, the Susan B. Anthony Dollar Coin Act.

There are, of course, several important practical reasons for my support of S. 3036. The smaller, lighter coin which the bill calls for would be more convenient for consumers to use than the present dollar coin. Furthermore, if the Treasury Department projections are correct, the new coin will result in considerable production cost savings over both the present dollar coin and the dollar bill.

But beyond the convenience and cost factors involved, Mr. President, I strongly support the bill's commemoration of a great American woman, Susan B. Anthony's work for women's suffrage laid the foundation for passage of the 19th amendment to the Constitution. This was a necessary step toward the achievement of a society in which all Americans can join in the rights, as well as the responsibilities, of citizenship. Anthony's courage and perseverance on behalf of a just cause represent the best in our national character. Her impact on women's rights—and, in a larger sense, human rights—is still very much in evidence today.

Mr. Pesident, I urge my colleagues to give this bill their enthusiastic support.●

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. ROBERT C. BYRD. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent to have printed in the RECORD an excerpt from the report (No. 95–1120), explaining the purposes of the measure.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

HISTORY OF THE LEGISLATION

S. 3036 to authorize a new dollar coin was introduced in the Senate on May 3, 1978, by Senator William Proxmire, chairman of the Committee on Banking, Housing and Urban Affairs, and cosponsored by Senators Williams, Cranston, McIntyre, Morgan, Riegle, and Lugar of the committee. With the exception of section 3 requiring the likeness of Susan B. Anthony to appear on the face of the new coin, S. 3036 is identical to the administration's legislative recommendation submitted to the Congress on April 17, 1978. The design proposed in the administration's draft bill called for a stylized liberty head on the face of the coin and a soaring eagle design on its reverse side.

A hearing was held on July 17, 1978, to receive testimony from Hon. Mary Rose Oakar, Patricia Schroeder, and Jim Leach of the U.S. House of Representatives; Ms. Stella B. Hackel, Director, Bureau of the Mint; and representatives of the banking, retail, and vending machine industries.

The committee met in open markup session on August 1, 1978, and unanimously approved S. 3036, with two amendments which are herewith reported.

NATURE AND PURPOSE OF THE LEGISLATION

S. 3036 authorizes the minting and issuance of a new circulating dollar coin which would be slightly larger than a quarter and approximately one-third the weight of our present dollar coin. The legislation would also, for the first time in our history, provide for the likeness of an American woman to appear on the face of the coin.

The committee unanimously agreed to an amendment by Senator Garn to continue the Apollo Eleven design on the reverse side of the coin. This design presently appears on the current dollar coin and is emblematic of the symbolic eagle of the Apollo Eleven landing on the moon. The committee also unanimously agreed to a technical amendment, recommended by the administration, to change the size of the new coin from 8.5 grams to 8.1 grams. This change is to accommodate some of the leading coin equipment manufacturers who advised the Secretary of the Treasury that a slightly lower weight coin would facilitate high-speed coin handling.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator from Vermont, and I ask unanimous consent that the time that has been utilized not be charged against him.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. LEAHY. I thank the majority leaders.

THE FINAL CHAPTER ON ERNEST FITZGERALD'S WHISTLEBLOWING

Mr. LEAHY. Mr. President, later this morning the Senate will consider the nomination and promotion of over a hundred military officers. I will be supporting all of those nominations because I believe that all of the candidates in whom I had an interest are qualified for their promotions.

As many of my colleagues know, I had opposed earlier consideration of one of these nominees, Gen. Hans Driessnack, because I felt that serious allegations remained unresolved regarding his possible role in a reprisal campaign against our Nation's most famous whistleblower, A. Ernest Fitzgerald. I am now prepared to let the nomination go forward because of two developments. First, I know of no concrete evidence which proves that this individual participated in activity to discredit or smear Mr. Fitzgerald. The case is over 10 years old, people's memories have faded, important principals in the case have died and, of course, the Air Force never kept a record of who was coordinating which aspects of the improper, if not illegal, anti-Fitzgerald activity which followed his disclosure of the C5–A cost overruns.

Second, I now believe that 10 years and four administrations after Fitzgerald's original C5–A testimony, we now have an administration prepared to come to Fitzgerald's assistance. I have received assurances from the White House that beginning immediately, the White House Personnel Office will meet with Mr. Fitzgerald in a sincere and sustained effort to find an appropriate position in the Government where his extensive and unique abilities can be effectively used.

This means that the final chapter on Ernest Fitzgerald's whistleblowing case may have been reached. Even after the Civil Service Commission ruled that Mr. Fitzgerald had been removed improperly from his position and forced the Air Force to reinstate him, Fitzgerald never received assignments commenserate with his ability. I now believe, based on the commitment of the Carter administration to find an appropriate position for Fitzgerald, that he will secure a challenging job which will call for his special talents for protecting against the wasteful expenditure of tax dollars.

It is time for Mr. Fitzgerald to get on with his career I believe that the Carter administration is committed to see that happen. I would also like to point out that this is the fourth administration, two Democratic and two Republican, to be involved in the Fitzgerald case. This is, however, the first administration which has finally taken the action to restore justice and equity and to redress

the mistreatment Fitzgerald has received from the Federal Government.

President Carter should be commended for recognizing that the rights and needs of a single Federal employee deserve strong support and protection. There has been some criticism expressed that the President's comprehensive Civil Service Reform Act which is currently pending before the Congress is an "anti-employee" package. This is not true. The decision to search for a useful job for Mr. Fitzgerald is indicative of this administration's very sincere, very real commitment to all competent, hard-working, dedicated Federal employees.

I share in President Carter's goal of an effective and efficient Federal bureaucracy. Passage of the President's civil service reform proposal is a critical step toward achieving that goal. Finding Mr. Fitzgerald a position commensurate with his abilities is another.

Justice has been a long time coming for Ernest Fitzgerald. It has been nearly a decade since he last held an important job. His legal fees to defend against the Government's improper attempt—I emphasize that, Mr. President, the Government's improper attempt—to fire and discredit him are approaching $500,000. And although I believe that the attention he will now receive from the White House is something he deserved 10 years ago, I am pleased to see that it has finally come.

I would also like to speak for a moment about other whistleblowers in the Federal Government and about those who take reprisal actions against them. Just as I felt it was absolutely necessary to withhold consideration of one of the nominations we will vote on today because of "whistleblower" overtones, so shall I continue to act in the future. Federal employees should know that if they are subjected to reprisals or harassment for coming forward and disclosing acts of governmental waste, mismanagement, corruption or abuse, they can count on my support. And to any Federal employee—civilian, military, executive appointee, or whomever—who takes part in a reprisal or harassment campaign against a whistleblower, I have a message for you, too. I will use whatever means are at my disposal to insure that no one who acts against a whistleblower benefits from such action. I will still be interested long after the original publicity of a whistleblowing event has faded from the public's limelight.

For too long, one of the most serious problems confronting a whistleblower was the reprisal which waited many months or years down the road. When it finally came, there was no one there to help the Federal employee. The press, the Congress, and the public had all moved on to other issues and other stories. No one was interested in putting the time or trouble into protecting the employee who was finally hearing "the other shoe" fall. Well, I do intend to be here and I do intend to help.

Just as some Federal employees have made life difficult for whistleblowers, I will make life difficult for those who take illegal or improper action against an employee who has exposed improper governmental actions. The difference will be that my action will be public, it will be loud, it will be legal, and it will be proper and, I hope, it will be effective.

A. Ernest Fitzgerald will get a new job. Those who were responsible for coordinating the reprisal action against him will probably go unpunished. But I promise Mr. Fitzgerald and I promise all other Federal employees that those responsible for reprisals will not be forgotten and that they will have to contend with one angry, albeit junior, U.S. Senator if they or anyone else takes similar action in the future.

Mr. President, I yield back the remainder of my time. I yield to the majority leader.

EXECUTIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished Senator.

I believe the Executive Calendar is now clear. The hold on my side of the aisle on one of the nominees has been lifted. I ask unanimous consent that the Senate proceed to the consideration in executive session of nominations beginning with U.S. Air Force and going through page 12.

Mr. BAKER. Mr. President, reserving the right to object—and I will not object—the items identified by the majority leader are cleared on our Executive Calendar, which include those nominations for the Air Force, the Army, the Navy, and one nomination for the Department of Justice, which are all of the nominations from page 2 through page 12 of the Executive Calendar, and we have no objection to proceeding to their considerations and their confirmation.

U.S. AIR FORCE

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Air Force.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER (Mr. LEAHY). Without objection, the nominations are considered and confirmed en bloc.

NOMINATION OF GEN. WINFIELD SCOTT, JR.

Mr. STEVENS. Mr. President, as in executive session, one of the nominations that the Senate has considered today is that of Maj. Gen. Winfield Scott, Jr., USAF to become Lieutenant General.

General Scott is the new commander of the Alaskan Air Command and I support the confirmation of his nomination. At this time I would like to have printed in the RECORD correspondence with the Department of Defense on this matter.

I am most pleased to thank the distinguished Secretary of Defense and his deputy for carrying out the commitment that was made to Alaska that the commander of the Alaska Air Command will, in fact, be a three-star general.

I ask unanimous consent that the two letters be printed in the RECORD at the conclusion of my remarks.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE SECRETARY OF DEFENSE,
Washington, D.C., January 5, 1978.

Hon. TED STEVENS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR STEVENS: Thank you for your letter of November 22, 1977, concerning the Alaskan Air Command reorganization.

The reorganization referred to in your letter consists of a realignment of certain functions and personnel from the Headquarters to the 21st Composite Wing. Concurrently, the 21st Composite Wing will assume management responsibilities for 13 Airborne Control and Warning Squadrons. Both the Alaskan Air Command and the 21st Composite Wing will continue to be headquartered at Elmendorf Air Force Base. This reorganization will not result in a reduction of the total number of United States Air Force military or civilian personnel authorizations in Alaska or at Elemendorf Air Force Base.

I wish to assure you that the reorganization will not in any way diminish the authority of the Alaskan Air Command. Lieutenant General Boswell will continue as Commander and current plans are for his eventual replacement to also be a Three Star General.

I trust this information will provide you with the reassurance you have requested. Should you desire more information, please let me know.

Sincerely,

C. W. DUNCAN, Jr.,
Deputy.

NOVEMBER 22, 1977.

Hon. HAROLD BROWN,
Secretary of Defense, U.S. Department of Defense, Washington, D.C.

DEAR MR. SECRETARY: As you may know, I requested a United States Air Force briefing on the reorganization of the Alaskan Air Command. Attending the meeting in my Washington, D.C. office were the head of the Alaskan Air Command, Lt. General Marion Boswell; the Deputy Director of Air Force Legislative Liaison, Brigadier General William Mullins; and the Chief of Air Force Senate Liaison, Colonel Eugene Poe.

As outlined to me during the briefing, the reorganization of the Alaskan Air Command consists of a restructuring of the Headquarters into a strictly managerial organization with its support personnel being reassigned to the 21st Composite Wing. Additionally, both of these units will continue to be headquartered at Elmendorf Air Force Base, Alaska, under the command of Lt. General Boswell. I was also told that General Boswell's eventual replacement would also be a Three Star General.

I have also been assured that these changes will not diminish the authority of the Alaskan Air Command. Nor will these actions result in reduction of the total number of United States Air Force military or civilian personnel in Alaska. It is my understanding that Alaskan Air Command officials believe that the reorganization of the 21st Composite Wing can be accomplished by the reassignment of the Headquarters' support personnel. I was also reassured that this reorganization will serve to enhance the management posture of the Alaskan Air Command.

I was reassured that those stars would stay there when the Alaska Command was disestablished. Without 3 stars, the contingency plans are meaningless.

Based on these assurances from the Air Force, I have not opposed the reorganization. However, during the briefing, I stressed the importance of the Alaskan Air Command to my State and my strong objection to any attempts to curtail its authority. Our strategic location demands an effective air defense force.

Please let me know if my understanding of this reorganization is accurate. I look forward to hearing from you on this important matter. Thank you for your assistance.

With best wishes,

Cordially,

TED STEVENS,
U.S. Senator.

U.S. ARMY

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Army.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

U.S. NAVY

The assistant legislative clerk proceeded to read sundry nominations in the U.S. Navy.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the nominations be considered and confirmed en bloc.

The PRESIDING OFFICER. Without objection, the nominations are considered and confirmed en bloc.

DEPARTMENT OF JUSTICE

The assistant legislative clerk read the nomination of William E. Pitt, of Utah, to be U.S. marshal for the district of Utah for the term of 4 years.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that it be in order to move en bloc to reconsider the vote by which all the nominations were confirmed.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. I make that motion.

Mr. BAKER. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. ROBERT C. BYRD. Mr. President, I ask that the President be immediately notified of the confirmation of the nominees.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. ROBERT C. BYRD. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ROBERT C. BYRD. Mr. President, is the Senate still in the period for the transaction of routine morning business?

The PRESIDING OFFICER. Yes, the Senate is.

Mr. ROBERT C. BYRD. I thank the Chair, and I yield the floor.

S. 3441—INDEPENDENT LOCAL NEWSPAPER ACT OF 1978

Mr. MORGAN. Mr. President, I desire to introduce a bill.

The PRESIDING OFFICER. The bill will be received and appropriately referred.

Mr. MORGAN. Mr. President, I am pleased today to be introducing the "Independent Local Newspaper Act of 1978," a proposal which I believe will go a long way toward assisting in the preservation of independent newspapers in this country. This will be accomplished by providing tax relief to certain newspapers and thereby an incentive for independent, local newspapers to remain community papers.

Congressman MORRIS UDALL has introduced and hearings have been held on a companion bill in the House of Representatives. Some 75 cosponsors have joined Congressman UDALL and they represent every area of the country and every political persuasion. It is a good bill and has attracted much support among Members of the House and from the newspaper community. It is a bill which has been subjected to review and adapted to meet criticisms. It is a bill which can assist independent papers.

Let me say a few words about the reasons this bill is needed and about the mechanics of the proposal.

A few years ago, newspapers were considered primarily as a community service. Now, as we all know, there is money to be made in newspapers and much emphasis is being placed on the business end of the enterprise. The "chain" approach to ownership, where one newspaper buys out another and eventually a string is owned and controlled by one person or one company has been around for some time. It is only in recent years that the impact of newspaper acquisitions come to our attention. Today, there are about 1,775 daily newspapers in this country.

Only 650—I repeat, 650—are independent locally owned. The rest of the papers are parts of chains.

With 72 percent of all daily circulation and 78 percent of all Sunday circulation controlled by chain-owned papers, the chances are very good that when you pick up a newspaper in my own State, in the city of Wilmington, N.C., or Hendersonville, N.C., or Lexington, N.C., there is a good chance that there will be quite a bit of news and editorial comment from New York City or the New York City area. The reason is simple. The New York Times owns all of these papers, plus others.

Now, I am not suggesting that there is anything sinister in the works and I am cognizant that the chain newspapers, by pooling resources, are able to provide some valuable services. Many small local papers are not up to snuff and are not a pride to the industry. There is something to be considered, however, in the concentration of the printed media that we are witnessing today.

In the last few years, newspaper acquisitions have averaged 40 or 50 a year. With this type of trend, in about 10 years, we could be facing a situation where 15 or 20 chains control most of the newspaper circulation in this country.

Mr. President, for myself, and I believe that others share my concern, I am afraid of what can happen. We must maintain a free and independent press in this country. Of all the industries and businesses in this country, only one is mentioned by name in the Constitution—the press. It is the right to a free press which I believe can quickly become threatened by corporate acquisition and concentration.

The ability of a local editor to express his anger or pride, free from any publisher, whether he be right or wrong from our perspective is a precious thing indeed. The political process which we enjoy in this country is very much founded on the freedom of the press to disagree, to debate and to take different sides on an issue. The public must be informed and to my mind the newspapers of the United States have done an admirable job in providing information and generating opinion. There must also be freedom of information, a freedom from concentrated editorial supervision and from a controlled press.

I do not want to go on too long with my reasons for desiring a preservation of a free and American press, which is not dominated by domestic chains or foreign investments. I do want to note that one reason that so many papers have been sold to chains and transferred from community control to editors from other cities or other States is our current estate tax laws.

At present, one of the major problems for independent papers which are run by one individual or by a small group of individuals is the payment of estate taxes. Simply put, when someone dies owning a share in a newspaper, that interest must be valued by the Internal Revenue Service. At present most newspapers calculate their worth at 15 times their yearly income. If a paper brings in $500,000 a year, then it should be worth $7.5 million.

The problem has been that with chains willing to pay 40 or 50 or even 60 times yearly earnings for a paper, the IRS has been valuing newspapers at a level which prohibits the payment of estate taxes. The result is that when an owner dies, or before his death, there is every incentive to sell the paper, make a profit and put his estate in order. The result has been a dramatic reduction in the number of independent newspapers.

What I am proposing today is a tax measure to assist—and I repeat, assist—independent newspapers in remaining independent. There is no cure-all in this proposal and since it is voluntary there is no guarantee that every independent paper will take advantage of this new tax mechanism.

The "Independent Local Newspaper Act of 1978" would allow independent newspapers to establish a trust for the payment of their estate taxes. A newspaper could establish a trust into which 50 percent of the paper's income could be placed annually, for the sole purpose of paying estate taxes which accrue on the

transfer on death of the newspaper owner. There is no reduction in the estate tax burden under this bill.

Independent newspapers are defined as publications which are not part of a chain and which have all of their publishing offices in a single city, community or metropolitan area, or as of October 31, 1977, had all its publishing offices within one State. The exception representing an in-State chain in operation before October 31, 1977, a classification which represents some 178 papers or 10 percent of all the dailies in the United States. No stock may be traded on the securities market for a paper to qualify.

The bill is divided into two parts. The first permits the creation of a trust by an independent paper for the purpose of paying the estate tax attributable to the owner's interest in the business. The trust must have an independent trustee and be invested only in U.S. obligations. The value of the trust cannot exceed 70 percent of the value of the owner's interest in the business. The newspaper income diverted to the trust is deductible from income of the paper and the owner—a form of relaxation on the double taxation on corporation dividends that we now have. On death the trust is excluded from the gross estate of the owner. Deductions for transfers from the business to the trust are limited to 50 percent of the business profits.

The second part of the bill provides for a deferral of the estate tax liability, if elected by the heir, to pay for tax liability not covered by the trust. Interest would be charged on the tax liability, while the coverage of section 6166 of the current code would be extended to cover estates which involve newspaper trusts.

I would like to briefly address some of the potential criticisms of this bill. I feel that this may assist in our consideration of this measure.

It is true that there are certain departures from existing laws and certain innovative provisions in this bill. This I do not deny. There is some deal of complexity represented by the independent newspaper bill and there is always resistance to newness, but I personally feel that this bill is needed and that it should be favorably considered by the Senate. While tax consequence may be difficult to calculate, I think it is a fairly simple matter to understand this bill—it sets forth the option for local newspaper to set up trust to prepay their estate taxes.

Next, I have heard it said that there are some benefits here that are extraordinary and create too great an inequality in the law. I think on reflection that this is not the case. There are certainly benefits to this proposal. Deducting 50 percent of income derived from a newspaper business is a definite attraction, just as I hope it will be. There must be some incentive to divert 50 percent of your income to a trust in order to pay estate taxes and I believe that the deduction is warranted.

There is also a penalty in the bill to deter abuse. The newspapers do deserve some special attention. I am afraid that those who may cry special interest legislation may be rudely awakened one day if they find that we have no independent press in which they may place their charges. Yes, there is some special attention for newspapers here and our Constitution approves just such attention for the press.

There may be concern that the heir is receiving a benefit that normally would be treated as income; that is, the discharge of an obligation to the Internal Revenue Service. Again, I plead guilty and I remain convinced that this is mandated by conditions that exist today.

If there is concern that a trust can be set up by any paper which meets the test of "independent local newspaper" and that some of the largest daily papers in this country will be allowed to establish a trust, then I believe that the focus is being drawn away from the key issue—maintaining some degree of independence among the press. In addition, while revenue loss is difficult to calculate, a rough estimate which I have received is that we are talking about some $10 million a year. This is just a preliminary figure and I am naturally concerned about any revenue loss, but in this case, I feel that it is in line with my basic views on fiscal conservatism to advocate this optional tax relief for local papers.

Finally, some have suggested that eventually every business interest would seek an option of prepaying taxes and because of this we should give careful review to comprehensive reform. My answer is simply this. The press stands alone in both the history and in the laws and in the fabric of this Nation. This tax relief is limited to this special institution and we should not be afraid to protect it. I would favor a comprehensive review but that should not prevent the enactment of this bill into law.

Let me say, Mr. President, that the need for this legislation is pressing. Newspaper acquisitions are continuing and I ask unanimous consent to have printed in the RECORD an article from last year which appeared in U.S. News & World Report, for the review of the Senators of the concentration in the newspaper business. I could go on detailing my concerns and explaining the technicalities of this bill, but I want to cut this short and allow the Senators to review the bill, to study its provisions, and consider the policy that it embraces. In the legislative session, I recognize that time is short; I am confident that many community-based, independent newspapers feel the very same way. I am confident that this bill can be taken up this session and enacted into law and I thank the Senate for considering it at this late date.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From U.S. News & World Report, Aug. 15, 1978]

AMERICA'S PRESS TOO MUCH POWER FOR TOO FEW?

Far-reaching changes are under way in America's once-unchallenged empires of the printed word—newspapers, magazines and books—as they seek their niche in the electronic age.

Great and venerable publishing houses are under pressures of many kinds to give up their independence and join chains or conglomerates for a safer existence alongside goods and services ranging from rental cars to rugs.

Inroads are becoming apparent in quality, too.

Many publishers, in trying to keep up with changes in reader tastes and interests, are turning more to gossip, shock and scandal—often at the expense of solid information.

There is growing concern that the publishing business, long considered essential to an informed citizenry, is losing its diversity and that growth of corporate empires in publishing is making "the bottom line" of profit margins the supreme factor in the industry—to the detriment of excellence and responsibility to the public.

What will happen ultimately to the quality of opinion and factual information reaching American readers cannot yet be foretold. This, however, is becoming clear:

Chains, whose holdings are rooted in one field of publishing, and conglomerates, whose business interests run the industrial gamut, will continue to grow. A broker specializing in newspaper stocks says: "Further concentration of ownership is inevitable. The trend in the communications business is no different than in any other."

The wave of publishing acquisitions, which began in the early 1960s, continues with such instances as these:

CBS, Inc., recently added a second paperback-publishing house—Fawcett—to its TV, magazine and book-publishing enterprises.

Time, Inc., publisher of magazines and books, and owner of a TV station, a TV production company, a film-distribution and production company and a cable-television system, has announced it is buying the Book-of-the-Month Club.

Capital Cities Communications, Inc., which owns newspapers, television stations and specialty newspapers such as Women's Wear Daily, added the Kansas City Star and Morning Times to its holdings.

The tens of millions paid for these and other publishing properties generate optimism about the economic future of the print media. That, however, is tempered by concern about the social consequences of such transactions.

Says James Hoge, editor-in-chief of the Chicago Sun-Times and the Chicago Daily News: "All the good will in the world by conglomerates who say they will establish op-ed pages (pages of diverse opinions opposite the editorial page), and run a lot of letters to the editor is just not the same as a number of different voices owned by different groups."

Some students of U.S. publishing fear that the day will come when a few giant corporations dominate the printed word—much as the three major networks reign over TV.

Already some newspaper chains have begun to absorb others, and papers like the New York Times and the Washington Post, both part of communications conglomerates, are exercising tremendous influence on the news judgment of editors everywhere. This, in turn, shapes public opinion around the nation. The influence of the Times and Post is multiplied by their supplementary news services, which many papers use.

These developments, say some critics, could degenerate eventually into Orwellian control by a handful of powerful magnates over what Americans read and think.

Against that frightening conjecture stand other factors.

Corporations in print communications don't want to risk Government intervention—and the merger trend has already attracted the attention of some in Congress. Representative Morris Udall (Dem.), of Arizona, wants to include book and newspaper publishing in a proposed study of industrial concentration by a blue-ribbon commission.

An even more significant factor is working

against the specter of media magnates exercising almost absolute control over information: Publishing corporations are less interested in political power than in profits.

As some students of America's media see things, however, it is precisely this emphasis on the bottom line that should be of greatest concern because it can lead to putting profits ahead of both quality and public service.

George Gerbner, dean of the Annenberg School of Communications at the University of Pennsylvania, notes: "There is a more rigorously market-oriented editorial climate today than in the past. The concern with sales used to be tempered by a personal commitment by an independent owner to what he wanted to say or do with the publication."

That commitment, he says, now is less and less in evidence.

Even among persons involved in conglomerates, a few are uneasy about the trend. One is Arthur Ochs Sulzberger, chairman and president of the New York Times Company.

Sulzberger feels that purchase by the Times can improve the quality of a newspaper, but he adds: "I like little, independent papers. I think it's a strength of America. . . . If somebody were to blow the whistle on newspaper acquisitions and say that it's going to be the rules of the game, I'm going to keep the New York Times in the newspaper-acquisition business."

Most people in the chain and conglomerate businesses express no such qualms. They feel that their growth is a good—and necessary—development. John R. Purcell, president of the CBS/Publishing Group and formerly a top executive in the Gannett newspaper chain, says: "Fragmentation of the media plays into the hands of big government. As long as there is a centralized big government, there is a need for a powerful and financially able free press."

But Washington Post media critic Charles Seib takes a different point of view. In a recent column, he asked this question: "Just how firmly can the executives of the communications empires exert control over the news and editorial product before the concept of a free press, as it was understood by the writers of the First Amendment, disappears?"

NEWSPAPERS: PROFITS—AND QUALITY, TOO?

Chains and conglomerates are the most powerful forces in the newspaper business.

Some chains are improving the quality of the papers they buy—adding staff and additional news services. Knight-Ridder, for example, has turned the Philadelphia Inquirer into one of the nation's well-rated newspapers. And some of the foremost newspapers in the country—the New York Times, the Washington Post, and the Los Angeles Times—are flagships of communications conglomerates.

But the high quality these newspapers achieve is rooted largely in family tradition—in some cases going back almost a century. And critics fret that chains and conglomerates lacking such a tradition can homogenize a product to the point of removing it from local concerns and controls.

These worries center mostly on the daily newspapers—the segment of the publishing industry most directly affected by the enormous growth of audience and revenues for television, the twentieth-century "wonder child."

Between 1973 and 1976, weekday circulation for dailies fell from 63.1 to 60.9 million, through a slight rise is now visible. A survey by the University of Chicago's national opinion research center shows a 7 per cent dip since 1972 in the number of people who say they read a paper daily.

Most editors see TV as the primary cause of the circulation dip. But Leo Bogart, executive vice president and general manager of the Newspaper Advertising Bureau, believes that the key reasons lie elsewhere—the changing composition of central cities, an upheaval in the mores of youth, and suburbanization. The fact that suburban dailes and weeklies are doing well while many urban dailies struggle for readership lends some credence to Bogart's argument.

New approaches. Against that broad background of U.S. social change, newspaper editors and publishers are looking for new formulas to counteract declining circulation. The readership problem is particularly acute among young adults who were raised on TV. They are reading magazines and books in larger numbers than their share of the population, but not newspapers.

To reach nonreaders, editors are consciously moving toward more entertainment—human-interest stories, gossip and even "soap opera" fiction. There's also a trend toward more service features, such as consumer tips and advice on taxes and investments. These changes are often made at the expense of national and international news that many newspapers now regulate—except for a few of the most important stories—to two or three-paragraph summaries.

In seeking readers who are absorbed in their inner selves rather than in the life of the external community, newspapers are also adding features dealing with such topics as psychology, self-improvement and dream analysis.

Many papers are segmenting their audiences with zoned editions aimed especially at covering suburban news once seldom found in a metropolitan daily.

More capital is going into making newspapers visually attractive to a generation used to television's imagery. Says Chicago Tribune Editor Clayton Kirkpatrick: "A newspaper to be successful must be dedicated to . . . not only print content, but graphics as well." Publisher Otis Chandler of the Los Angeles Times and Executive Editor Benjamin Bradlee of the Washington Post see their newspapers becoming more like newsmagazines, offering depth and variety in a visually attractive package.

The 10 biggest chains in the newspaper business

Of 1,762 daily newspapers in the U.S., 1,047 are part of group-ownership arrangements. Here are the 10 largest newspaper chains, ranked by circulation.

Group	Number of papers	Circulation [1]
Knight-Ridder Newspapers, Miami	32	3,598,562
Newhouse Newspapers, New York City	29	3,300,757
Tribune Co., Chicago	8	[2] 3,099,120
Gannett Newspapers, Rochester	73	2,850,000
Scripps-Howard Newspapers, Cincinnati	17	1,911,791
Dow Jones & Co., New York City	14	1,856,667
Times Mirror Co., Los Angeles	4	1,767,798
Hearst Newspapers, New York City	8	1,503,000
Cox Newspapers, Atlanta	14	1,201,370
New York Times Co., New York City	10	1,040,198
Total		22,129,263

[1] Daily except Sunday; latest available figures supplied by companies.

[2] Editor and Publisher, July 1977.

NOTE.—With a total circulation exceeding 22 million, these 10 chains comprise more than one-third of total daily newspaper circulation in the U.S.

The New York Times, whose daily circulation fell from 884,000 to 828,000 between 1970 and 1975, is publishing three magazine-style sections—Weekend, Living and Home—in a drive to increase weekday circulation and advertising. Circulation has risen to about 866,000.

Some critics contend these sections diminish the quality of Times news coverage, but Executive Editor A. M. Rosenthal says the space given to coverage of news events has increased by 7.5 per cent since the "new" New York Times was launched. He insists that "we have added tomatoes to the Times's soup" though, he says, many other papers are adding water to their soup, diluting its quality.

The current leader of the trend away from conventional coverage of the news is Rupert Murdoch, the Australian publisher who purchased the New York Post several months ago and is busily converting it into an American version of his successful papers in Australia and Britain, which offer a racy melange of some "hard news"—and lots of shock, gossip, human-interest features and sex.

Murdoch has gone further than most, but he is not alone. Many papers have instituted "people" columns containing gossipy tidbits about the famous and not-so-famous. Some journalists are writing more intimately about the private lives of public figures, in what some critics see as journalistic voyeurism. The Washington Star prominently features a gossip column that is the first thing many readers in the nation's capital turn to.

Wrong direction? Such moves are generating worry within the profession and on the outside. Erwin Knoll, a former reporter and now editor of the Progressive, a political magazine, warns: "If newspapers keep on the current track, they risk self-destructing as useful vehicles of information and analysis. What they're doing to hold on to readers is trivialize the news." Contrarily, George Reedy, Nieman professor of journalism at Marquette University and press secretary to President Lyndon Johnson, says: "The purpose of papers is to carry on a dialogue, not to perform an educational function. Too many in the press forget that."

Whatever judgment is passed on newspaper trends, they are paying off—circulation problems notwithstanding.

Chains and conglomerates whose stock is publicly traded averaged after-tax profits of 10 per cent last year, a figure many industries would envy. And increasingly these groups, along with a few privately owned publishing houses, are dominating the newspaper industry.

In 1960, chains and conglomerates controlled 30 per cent of the nation's newspapers and had 46 per cent of its newspaper readership. Today they own 59 per cent of the newspapers, accounting for 71 per cent of readership.

Furthermore, about 97 per cent of the 1,544 cities in which dailies are printed are one-owner towns—and critics make the point that a monopoly publisher can put out an inferior product if so inclined. Murdoch, who is branching out with his own U.S. print conglomerate built around the Post and New York magazine, describes a newspaper monopoly as "a license to steal money forever."

Many owners of newspaper monopolies also own local TV stations, but a recent court ruling—being appealed to the Supreme Court—could force them to divest themselves of their television stations.

The pressure on independent owners to sell to chains can be unrelenting. Barry Bingham, Jr., editor and publisher of the family-owned Louisville papers, says he is contacted so often by would-be buyers that his secretary made up a stamp that says "Nothing for sale" for response to such inquiries.

But independent owners like the Binghams are a vanishing breed. In many family-owned newspapers, the younger generation is uninterested in the paper, so the owner sells to a chain. Or he sells because he lacks

the capital for computerization and other new technology to slash production costs. Encouragement to sell also comes from tax laws that allow the new owner to depreciate the plant and equipment from scratch, while also allowing the seller to avoid the problem of estate taxes that might force his heirs to sell anyway.

Unwittingly, Congress may have made it even more difficult to maintain family-owned businesses in passing the Tax Reform Act of 1976. Or so says Bingham, who adds: It means that family businesses will have to go public because there is no way to turn them over. If the person who owns the controlling interest dies, you have to scrape together a fantastic amount of money to pay the taxes."

Going public. Some publishers are getting more capital by selling stock publicly. This, some fear, will make them more vulnerable to "bottom line" pressure in order to pay the dividends that stockholders look for.

New York Times President Sulzberger, however, insists that a family can control a newspaper if it wants to, even though the stock is publicly traded. The Times keeps a majority of voting stock in family hands; publicly traded nonvoting stock can be sold by heirs to pay estates taxes and still keep control of the Times in the family.

Publishers like Sulzberger and Bingham feel that maintaining family control is the best way to make sure that quality does not become secondary to profits. Bingham says that if a chain took over his papers, which have an after-tax profit of only 3 per cent, it would likely turn first to the newsroom as a place to cut costs—hurting the quality.

John Seigenthaler, publisher of the independently owned Nashville Tennessean, stated the problem of publicly owned stock recently: "Does anybody think that our industry won't ultimately suffer setbacks which will require cutbacks, and won't stockholders insist on cutbacks in non-income-producing areas, which means news and editorial expenditures?"

Opinions differ on the magnitude of a more subtle problem—maintaining local editorial control in a newspaper belonging to a chain or conglomerate.

While the best chains do not dictate editorial policy, some critics insist that local executives are under subtle pressure to conform to what top management expects. Against that view, heads of chains say that only weak editors operate that way. Yet they acknowledge that a desire to please the boss can make a newspaper unduly bland and cautious. And homogenization, some admit, can creep in simply because of the tendency in a large corporation to try in one operation what has worked in another.

Says Sidney Gruson, executive vice president in charge of affiliated companies of the New York Times Company: "I think there is a tendency to sameness of coverage by people in a newspaper chain." Disagreeing, Allen H. Neuharth, president and chief executive of the Gannett chain, states that "a paper must be tailored to fit its community." But he concedes that a chain-owned newspaper can lose touch with its community if publishers are shuttled in and out. He adds: "I happen to think publishers and editors who move are the ones who do a good job. I would rather have a good person in a community for three years than a hack for 30."

MAGAZINES: THE SPECIALIZATION GAME

Trivia, gossip, sex and leisure currently make up the "hot" subjects for today's magazines—and many are including material that would have shocked the sensibilities of average readers a few years ago.

Such publications as *People* and sex-oriented *Hustler* have grown at a spectacular rate. In just a few years the circulation of *People*, which is long on photos of celebrities and short on text, has exceeded the 2-million mark and continues to climb. That success story has prompted the New York Times company to launch an imitation, *US*. Explained Gruson: "The magazine was conceived by the head of our magazine division as appealing to the TV generation."

Looking at it more bluntly, Editor Robert Stein of *McCall's*, says that such magazines reflect what television has done to people's attention spans and reading habits.

The example of *People* is only one measure of the magazine industry's flourishing state, over all.

Between 1950 and 1976, circulation of major magazines jumped from 147.3 million to almost 255 million. Between 1975 and 1976, their advertising pages, increased 17 per cent. Last year alone, 336 new magazines were started, according to *Folio*, the industry's magazine.

Not all is rosy. Lewis H. Lapham, editor of *Harper's* magazine, says: "It is hard to get people to read a general magazine and to a lot of people, especially the affluent, that is threatening." *Harper's*, along with some other serious journals, has experienced a circulation decline in recent years.

Many magazines, however, think they have found the magic formula for success. While newspapers continue to strive to reach audiences with a wide range of interests, magazines are aiming increasingly at specialized audiences. Whether a person is a devotee of golf, tennis, UFO's, psychology or CB's, there is something for him—or her—on the magazine rack.

General-interest and mass-circulation magazines like *Collier's* and *Look*, to take just two examples, are defunct—items of nostalgia from a time when magazines had huge audiences across the nation almost to themselves. Now TV has assumed that role, and magazines are tending to narrow, not enlarge, their focus.

While magazines are going in diverse directions to find their own audiences, all are waging a vigorous fight against a common problem: soaring costs of production.

Postal rates have skyrocketed in recent years. Paper costs are way up, too. In that cost squeeze, magazine publishers increasingly are turning to their readers to foot a growing share of the burden. According to the Magazine Publishers Association, only 30 per cent of magazine revenue came from circulation in 1966. Ten years later that figure had jumped to 45 per cent. It soon will reach 50 per cent.

Magazine editors regard this as healthy. They feel that it makes them more stable financially and less subject to fluctuations in advertising. The readers who have remained with them through price increases are regarded as committed to their product—a selling point with advertisers.

Today, however, some magazines are shifting emphasis from subscription to newsstand sales—though gradually—thereby circumventing the troublesome postal system and bringing in more circulation revenue. This is putting a premium on magazine covers featuring celebrities or "hyped up" stories to promote sales in such outlets as supermarkets.

If postal rates keep increasing, magazines can be expected to put even more emphasis on newsstand sales, and perhaps move toward developing alternative means of delivery. Some magazines already are experimenting with new methods—such as delivery by newspaper carriers.

Of the three major print media, magazines appear to be moving toward conglomerates the least, perhaps because there are so many magazines. At last count over 10,000.

Nonetheless, the magazine industry has been affected by the chain and conglomerate trend. CBS owns more than 60 magazines catering to specialized interests. The New York Times Company produces seven, including three abroad. Time, Inc. publishes five, including one of the three major newsmagazines. Of the other major newsmagazines, *Newsweek* is owned by the Washington Post Comany, which also owns TV stations and other newspapers. *U.S. News & World Report*, which also has newsletter and book divisions, is employe-owned.

The president of one independent magazine, the New Yorker's George J. Green, says he fears that the freedom his magazine gives writers and editors would suffer if it were absorbed into a large corporate structure. His view: "You can't maintain your character if you become part of a conglomerate."

BOOKS: BOOM AND TAKEOVER

The book business, once regarded as a cottage industry, is a big business, and getting bigger.

Hardback publishers are buying paperback firms. Companies with movie and TV interests are buying both hard and paperback houses. As a result, the number of major independent book companies is in decline, although there are still many small publishers around.

The acquisition trend is generating concern among some in publishing, who fear that quality is becoming less important than whatever the public will buy in volume.

Says literary agent Georges Borchardt: "Corporate publishing is very much run by people with balance sheets. They think of a book as something to balance out. . . . If you go to a young editor with a manuscript, he might feel like publishing it, but he won't because he's afraid of losing his job."

Borchardt and other critics acknowledge that good books do eventually get published but, says one observer of the industry: "The quality of editing goes down as pressure builds to get products into the market quickly."

Roger W. Straus, Jr., president and chief executive officer of Farrar, Straus & Giroux—an independent publisher of hardcover books—bemoans the publication of "phony books" to turn a quick profit.

Says he: "I cry for the trees that have been chopped down to make the paper for these books." He sees a "loss of quality" in book publishing because big corporate publishers are reluctant to take on a book that might sell only several thousand copies.

The heads of publishing firms owned by conglomerates deny this. Richard Snyder, president of Simon & Schuster, which is owned by Gulf & Western, says that the additional money from a large conglomerate enables him to take more risks. Gulf & Western's sales last year totaled 3.39 billion dollars. Its holdings include Paramount Pictures, Consolidated Cigar, Schrafft Candy and Madison Square Garden.

Writers' lament. The Authors Guild, an organization that represents 5,000 writers, is concerned about the acquisition of independent publishers by large firms like Gulf & Western, fearing it will reduce the market for writers. The Authors Guild has called for Government action.

The Antitrust Division of the Justice Department, however, sees no immediate threat to competition from the mergers, except in the case of mass-market paperbacks, where concentration of ownership is increasing markedly.

The Department is looking into the recent CBS, Inc. purchase of Fawcett, which has two paperback lines, Crest and Gold Medal. CBS already owned Popular Library. Justice was also interested in the desire of the Times Mirror Company, parent firm of the Los Angeles Times, to acquire the Random House publishing division of RCA. If the deal had gone through, Times Mirror, which already owns New American Library paperbacks, would have added Ballantine paperbacks. Franklin Murphy, chairman of the board of Times Mirror, says money differences killed

the deal, but that the antitrust issue was a potential cause of concern.

The interest of movie makers and TV corporations in book publishing is, quite simply, economic. In itself, publishing "trade" hardbacks for the general public is not very profitable. Pretax profits in the industry averaged only 1.7 per cent last year. But the sale of paperback rights and possible movie-book tie-ins or a TV series-book package could prove highly profitable. Also, movie scripts could easily be turned into books, reversing the traditional pattern of making books into movies. A novelized version of the movie "Star Wars" is now a successful paperback.

Hardback houses are also interested in acquiring paperback companies because of the economic advantages. While a hardback may lose money, that loss can be recouped through paperback sales.

Publisher Straus says that an independent hard-cover publisher is at a disadvantage in negotiating with an author if he has no paperback subsidiary. An integrated company can easily come up with the money to make an offer on both the hard and softcover rights to a book. An independent publisher has to find a paperback partner in such a venture.

TV has had a substantial effect on the book industry, and most of those in publishing feel that the results are positive. Television increases reader interest in books. Series like "Roots" and "Rich Man, Poor Man" boost sales of the books on which the series were based.

Television talk shows are major vehicles for promoting books, although some editors are not enthusiastic about the kinds of books that lend themselves to such promotion. They tend to be "how to" books and some nonfiction, rather than serious literary works.

Book clubs, mail-order sales and textbooks are less visible, but highly lucrative, parts of the book industry, which has had a steady increase in dollar volume in recent years. The number of books sold has remained relatively constant, but few publishers express concern about this development.

Just how big a business books have become is demonstrated by the large sums of money paid for rights to some best sellers. Bantam Books, for example, paid $1,850,000 for paperback rights to "Ragtime." This reflects the need for paperback houses to have a "big book" on the stands every month—thereby enabling them to get book distributors to carry other, less-attractive titles they publish.

As paperback publishers become bigger, they have begun to initiate book projects rather than simply buying the rights to hardcover books. The day may be coming, some in the business say, when paperbacks virtually replace hardbacks, with only libraries and a few bibliophiles buying the more expensive editions.

THE LARGEST BOOK PUBLISHERS

Ranked by annual revenues (latest available figures)—

*Hard-cover**

Random House (owned by RCA).
Doubleday.
Harper & Row.
Simon & Schuster (Gulf & Western).
Little, Brown (Time, Inc.).

Paperback

Bantam (owned by IFI International).
Dell (Doubleday).
Fawcett (CBS).
Pocket Books (Gulf & Western).
New American Library (Times Mirror).
Avon (Hearst).

THE FUTURE: OPTIMISM, BUT . . .

Book publishers and others in publishing generally are optimistic in foreseeing the future of the print media.

Lee Hills, board chairman of the Knight-Ridder chain, observes: "Print is referable, it is there to reread at your convenience. Print is preservable; you can clip, save and file it. Print is convenient, so you may read what you want, at the speed you want, and when you want it. Print is portable. . . . With print, the reader is in control. He can skip. He can go back. He can observe, he can turn the page or section. It is intimate communication."

As critics see it, print does, indeed, have a special role to play as a disseminator of serious information. But they ask many questions:

Will publishing play that role or will it—as some fear—focus more and more on entertainment at the expense of solid information in an attempt to rival television? Will the quest for profits by ever-larger and more-powerful chains and conglomerates lead publishers to try to appeal to the lowest common denominator? Or will a reasonable balance be struck between profits and quality?

Some analysts of the publishing industry argue that print must carve out a role different from that of TV to remain vigorous—but they ask whether conglomerates and chains concentrating on short-term profits see the industry's problems from that perspective.

Looking ahead, sociologist Richard Maisel has concluded that in a postindustrial society, those communications media that appeal to a mass audience will decline while "specialized communications directed to a smaller, more homogenous audience" will grow.

There are signs that this is happening in the print media, as some general-interest newspapers struggle while specialized magazines thrive. Yet many in publishing see a serious implication in this: If the U.S. becomes a society getting its information from fragmented and specialized sources, where is the information glue coming from to hold the broad society together? And they point out this:

Historically, the nation's writers, editors and publishers have been able to transmit information relatively free of Government pressure. Now, as costs keep going up in a technological age, they are increasingly under another kind of pressure: for bigger profit margins—at the expense, in some instances, of quality and their primary mandate to keep the public informed.

In that developing situation, the content of the nation's newspapers, magazines and books in the years ahead will say much about the condition of the publishing industry—and of American society as well.

(This special report was compiled and written by Associate Editor Alvin P. Sanoff.)

TV NETWORKS: CENTERS OF NEWS POWER

The concentration of power that so many fear lies ahead in publishing already is the norm in television. Three networks dominate the entertainment and information medium that has reshaped American society.

TV is the primary source of news for many Americans whose view of the world is shaped by the networks, ABC, CBS and NBC, all divisions of major conglomerates. The responsibility that falls on network shoulders is awesome, considering that 64 per cent of Americans say they get most of their news from TV and a majority find it the most believable news medium, according to a study for the Television Information Office conducted by The Roper Organization.

The networks as a whole spend about 10 per cent of their revenues on news and public affairs—218 million dollars last year out of net revenue of 2.1 billion, according to figures compiled by the Federal Communications Commission.

News is a smaller part still of the three conglomerates of which the networks are a part: RCA—owner of NBC; CBS, Inc., and the American Broadcasting Companies, Inc. Revenues of the three conglomerates came to almost 9 billion dollars last year. The firms rank 31, 102 and 170 respectively in the Fortune 500 list of the largest U.S. industrial firms.

The three conglomerates earned a total of 822.7 million dollars last year, before taxes, and network earnings accounted for about 36 per cent of that sum.

In addition to their network interests, all three conglomerates own TV stations and AM and FM radio stations, many of which are located in the largest and most influential markets in the country.

They are also in a variety of other businesses. RCA's holdings include Hertz car rentals, Banquet frozen foods, Coronet carpets, defense contracts, television manufacturing and Random House book publishers.

CBS is involved in everything from toys to tools. Its holdings include: Creative Playthings, X-acto tools, Steinway pianos, Holt, Rinehart & Winston book publishers, three paperback-book lines, Columbia Records and a number of magazines.

American Broadcasting Companies, Inc., owns amusement parks, more than 250 movie theaters, ABC records, leisure magazines such as High Fidelity and Modern Photography, and Word, Inc., a religious music and book-publishing firm.

The wide-ranging business interests of the networks' parent corporations has raised some concern about whether economic interests might come into conflict with network news coverage.

But John R. Purcell, president of the CBS/Publishing Group, says news coverage is unaffected by his employer's other interests.

PLAYING IT STRAIGHT

He points out that CBS ran "The Guns of Autumn," a documentary critical of hunting that proved financially damaging to the company because some angry advertisers pulled their ads out of Field & Stream magazine, which is owned by CBS.

Purcell also said that a recent CBS television-news segment took a critical look at the educational-publishing industry, mentioning CBS's Holt, Rinehart & Winston by name.

Says Purcell: "I thought the segment was poor investigate reporting. . . . It made me mad as the head of a major publishing group. But it made me proud to work for a company with two divergent opinions."

Mr. PERCY. Mr. President, I am pleased to join my colleague from North Carolina (Mr. MORGAN) in introducing the Independent Local Newspaper Act of 1978.

I have been concerned by the growing trend toward concentrated ownership in the news reporting field. Independent local newspapers are a strong American tradition. They provide independence of thought, recognition of local interests and healthy competition which must be allowed to continue.

Between 1954 and 1974 the number of daily newspapers remained at approximately 1,770, but during that period the percentage of dailys that were part of chains increased from 27 percent to 55 percent. Furthermore, during this period the number of U.S. cities with competitive daily newspapers fell from 117 to 55.

Regrettably, the impact of estate taxes on independently owned newspapers has been in large part responsible for this trend. Faced with substantial estate tax bills, which may be based on an inflated potential resale value, heirs to the owners of independent papers are

*Excludes textbooks.

often forced to sell their interest to pay the taxes due.

The estate tax changes we enacted in the 1976 Tax Reform Act have been of some assistance, but not enough. At that time we extended the period for payment of estate taxes from a maximum of 10 years to a maximum of 15 years and reduced the interest rate of the taxes due from 7 to 4 percent. However, to qualify for this relief, the business must meet both the test of being closely held and account for a set percentage of the decedent's estate. Those that do not meet these strict tests remain subject to the pre-1976 rules. A forced sale is often the result.

The legislation we are introducing today expands the relief provided by the 1976 act. Many of us had hoped and worked to make the 1976 estate taxes broader—for family farms as well as family businesses—and this legislation is a first step in that direction.

Briefly, the bill allows a local newspaper business to establish an estate tax payment trust, the assets of which are invested in U.S. obligations, for the purpose of funding the estate tax attributable to the interest of the individual owners in the newspaper. The trust assets would be limited to the amount necessary to pay the estate tax. Contributions, disbursements, and the assets of the trust would be free from taxation as long as the trust conformed to the requirements set out. In addition, in those cases where the trust funds are not sufficient to pay the estate tax due, the existing 15-year period during which some estate taxes must be paid is broadened by repealing the percentage restrictions.

This legislation does not prevent the acquisition of an independent newspaper by a chain. It leaves the decision to sell in the hands of the owners of such papers and their heirs. It protects them from being forced into a decision to sell by Government tax policy. It is unquestionably in the national interest that the tradition of the independent press be preserved. Federal tax law should not be allowed to create a result contrary to this national interest.

COMMITTEE MEETINGS

(The following proceedings occurred later in the day.)

Mr. LEAHY. Madam President (Mrs. HUMPHREY). I ask unanimous consent that the Commerce, Science, and Transportation Committee be authorized to meet during the session of the Senate today to conduct hearings on the International Air Transportation Competition Act of 1978.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. Madam President, I ask unanimous consent that the Permanent Subcommittee on Investigations of the Governmental Affairs Committee be authorized to meet during the sessions of the Senate on Wednesday, August 23, and Thursday, August 24, to conduct hearings on "arson for profit" legislation.

Mr. SCOTT. Madam President, reserving the right to object, has this been cleared on our side of the aisle? I am not familiar with these matters. I do not want to object to any unanimous-consent requests, but I think they should be cleared.

Mr. LEAHY. I assumed that they had. It was handed to me.

Mr. SCOTT. I withdraw my reservation.

Mr. LEAHY. Senator BAKER has initialed them.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETING DURING SESSION OF THE SENATE ON THURSDAY, AUGUST 24, 1978

Mr. LEAHY. Mr. President, I ask unanimous consent that the Foreign Relations Committee be authorized to meet during the session of the Senate on Thursday, August 24, to mark up S. 2053, deep seabed bill, and to consider Senate Joint Resolution 154, concerning U.S. invitation for nations to participate in the international petroleum exposition to be held in Oklahoma.

Mr. SCOTT. Mr. President, reserving the right to object——

Mr. LEAHY. Mr. President, this has been cleared on both sides.

Mr. SCOTT. With the assurance of the distinguished Senator from Vermont that it has been cleared on our side, I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

COMMITTEE MEETING DURING SESSION OF THE SENATE ON WEDNESDAY, AUGUST 23, 1978

Mr. LEAHY. Mr. President, I ask unanimous consent that the Committee on Rules and Administration be authorized to meet during the session of the Senate on Wednesday, August 23, 1978, to hold a hearing on John Warren McGarry as a member on the Federal Election Commission.

I advise the Senator from Virginia that this has been initialed by the distinguished minority leader.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. LEAHY. I thank the Senator from Virginia.

(Routine morning business transacted and additional statements submitted are printed later in today's RECORD.)

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

REPRESENTATION OF THE DISTRICT OF COLUMBIA IN CONGRESS

The ACTING PRESIDENT pro tempore (Mr. MORGAN). Under the previous order, the Senate will now resume the consideration of House Joint Resolution 554, which the clerk will report.

The assistant legislative clerk read as follows:

A joint resolution (H.J. Res. 554) proposing an amendment to the Constitution to provide for representation of the District of Columbia in Congress.

Mr. ROBERT C. BYRD. Mr. President, I believe that Senators were expecting to start on this measure at 10 o'clock a.m.

I yield the floor. I believe Mr. MCCLURE is going to proceed to call up an amendment.

The ACTING PRESIDENT pro tempore. The Senator from Idaho is recognized.

UP AMENDMENT NO. 1704

(Purpose: To permit the people of the District of Columbia to vote for Senators from Maryland)

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

If the clerk will withhold, I have sent the wrong amendment.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Idaho (Mr. MCCLURE) proposes an unprinted amendment numbered 1704.

On page 2, line 3, strike out "Congress" and insert "House of Representatives".

On page 2, line 6, after the period insert the following: "For purposes of representation in the Senate, the District constituting the seat of the government of the United States shall be treated as though it were part of the State of Maryland.".

Mr. LEAHY. Mr. President, will the Senator yield for a unanimous-consent request?

Mr. McCLURE. I am happy to yield to the Senator from Vermont.

Mr. LEAHY. Mr. President, I ask unanimous consent that Martin Franks of my staff be given the privileges of the floor during all debate and votes today.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, yesterday the Senate considered several possible alternatives to the pending joint resolution with respect to representation of the people of the District of Columbia in the Congress of the United States. The Senator from Montana (Mr. MELCHER) earlier offered an amendment that was a combination of different adjustments which would have permitted representation for the District, and that amendment was turned down by the Senate on a motion to lay on the table.

Yesterday I offered an amendment which would have granted full retrocession, thus giving the people of the District full civil rights in all of their ramifications, entirely equal with those of every other citizen of the United States, by ceding the area which was first ceded to the United States by the State of Maryland for the seat of government back to the State of Maryland, so that the residents of this area could enjoy full representation and full civil rights; and that measure was also rejected by the Senate on a motion to lay on the table.

There are only two ways by which the people of the District of Columbia can have full voting representation and equal rights with every other citizen of the United States. One is by allowing

them to again be citizens of a State of the Union by receding the area to the State of Maryland. The Senate said no. The other of the two methods which might give the citizens of the District full and complete civil rights, as every other citizen of the United States enjoys them, would be to create a new State within the territory now encompassed by the District of Columbia. I offered that amendment yesterday after the retrocession amendment had failed. Again, the Senate turned that proposition down.

So the Senate has clearly, on those occasions, said it is not the intention of the Senate to grant full civil rights to the people of the District of Columbia. It was interesting to note that the Senator from Massachusetts (Mr. KENNEDY), in arguing against the first of the amendments, said that Congress must retain some authority, thereby denying to the people of the District of Columbia their full rights.

It was interesting to note that the other managers of the bill in regard to statehood said that the people of the District of Columbia were not entitled to exercise their full civil rights, but somehow, as the Senator from Indiana had indicated in his debate on these matters, the people of Indiana have such a right in the Nation's Capital that the people of the District must enjoy less than full civil rights, that there must be a limitation on their right to exercise the powers and duties of citizenship that other citizens of this country enjoy.

The Senate agreed with Senator KENNEDY and Senator BAYH in those instances, and repudiated the amendment which would have, in effect, negated that argument and granted to the people of the District of Columbia all of the rights that every other citizen of the United States enjoys.

This amendment which I now offer is a sincere attempt to find a way by which the people of the District can have the rights which they should enjoy, which the Senate has said is the limit of the rights that the Senate will grant to them, at the same time receiving the essential character of representation in the Congress of the United States that was established in the Constitution when the Constitution was formed.

I do not need to belabor the subject of the big State-small State compromise that was the foundation of this Republic—a union of sovereign States with each State having its rights protected by equal representation in one body of the Congress, and the protection of individual rights by granting equal representation in the other body of the Congress of the United States.

The pending joint resolution would trample that constitutional principle into the dust. It would, for the first time, break what has been heretofore an unbroken chain of support for the concept that we are in this body representatives of the States whose people have given us the honor of representing those States in this body of Congress, and it would, for the first time, say that a city is entitled to such representation—not a State, but a city.

I have another amendment which I shall offer later that will attempt to make equal for other cities what is being done for this city. Suffice it to say for the purpose of this amendment that the sponsors of the joint resolution are saying that this city alone, among all other cities of the United States, should be treated differently—should be treated differently by giving them more representation in the Congress of the United States than any other city in the United States.

Mr. President, the difficulty that many of us have with the proposal before us is simply that, the destruction of the constitutional principle of State representation within this body.

There are a lot of ramifications that flow from the destruction of that principle. I do not want to get back into the old arguments of States rights versus Federal rights, but certainly if there are such things as States rights to be protected, then we do not want to destroy the principle that States and States alone as entities are represented in this body, the States and their people are represented in this body, as State entities. It is not individuals who are represented but the individuals as a State, as a group of people comprising a political unity called a State.

Now we are asked to destroy that constitutional principle in one instance.

The sponsors of the resolution indicate that only in this one instance, and only because of special circumstances, do they intend to destroy that principle, or to bend that principle, to the expediency of this moment.

There have been those who tried to characterize the motives of those of us who oppose the pending joint resolution as saying that we do not want the people of the District to have representation. I think it should be abundantly clear by this time that at least the junior Senator from Idaho, who does oppose the pending joint resolution, does want full, equal representation for the people who live here in the District of Columbia. We have traced the evolution of the restriction on the exercise of full political rights by the people resident within this District upon several occasions in this body in this debate, but it might be instructive to just visit that for a moment again.

When the Nation was formed they decided that they ought to have some neutral ground for the Nation's Capital. The people who were sitting in Constitutional Convention were confronted with breaches of the peace and threats against their security as they deliberated what should be done with the formation of this union.

They decided because of that it was necessary to have neutral ground so that the Federal Government, the Federal Government alone, not hostage to the desire of the State in which they might be meeting, could maintain the security of the Nation's Government, not dependent upon the State or city government but dependent upon their own resources to guarantee the security of the deliberations of the national legislative body.

They therefore decided to try to create a district out of some area of the United States where the Nation's Capital could be founded.

Again in the kind of compromise that led to the large State-small State compromise in the representation in two Houses of the Congress, they sought to avoid the question of whether or not that Nation's Capital would be located in a Northern State or a Southern State and compromised that by putting it across the State boundaries of a Northern State and a Southern State, putting part of it in the State of Maryland and part in the State of Virginia, or perhaps I should properly say by taking some of the territory from each of those States to create the District of Columbia.

It was in that manner that the District of Columbia was formed and the States of Virginia and Maryland ceded that property to the Federal Government for the seat of the Federal Government.

Because it was to be neutral ground, not subservient to any State, not dependent upon any State to provide the security for the Nation's legislative body, and because they distrusted the influences upon the Federal Government by those who might work for the Federal Government thus rendering the climate less than completely objective, they decided at a later date to deny to the people of the District of Columbia the right to vote for President, Vice President, Senators, and Representatives in the Congress. That was done some time after the constitutional act which created the District of Columbia in the first place.

It should be noted that for several years after the District was created, the residents of the District voted in the States from which that territory had been ceded.

I have noted, as several others have, that over a 100 years ago the State of Virginia came to the Federal Government and said, in effect:

> You are not using the territory we ceded to you. There is no prospect that you are going to use the territory that was ceded to the Federal Government. We want it back.

The Congress of the United States agreed with that proposal and ceded the portion of the District of Columbia, which was in the State of Virginia originally back to that State.

I might more technically and properly say that from the high water mark on the Virginia side of the Potomac it was ceded back to Virginia, thus not completely ceding back that which had been ceded by the State of Virginia to the Federal Government for the seat of government.

Let me remind those who may be interested in what is happening here that the right of voting within the District of Columbia was not removed by the Constitution; it was removed by statutory enactment several years after the District had been created. I reiterate that the people who resided in the territories that had been ceded by Virginia and Maryland voted in their respective States for

some time after the District was created.

We are told now that Maryland does not want the District back; that it would upset their political balances in the State of Maryland if indeed this block of voters was inserted back into their voting territory.

Well, I understand their concern. But is that concern of the politicians in Maryland to control what is done with respect to a constitutional principle? Are we to destroy or bend or adapt a constitutional principle to the mere political expediency of a group of politicians in Maryland? I think the other 49 States have a right to resent that kind of a trampling of the Constitution to conform to the narrow political desires of one State.

I ordinarily try to cooperate in protecting what a State wants done within their territory. I believe very strongly in the concept of States rights. I believe very strongly in the concept of protecting the States against the encroachment of the Federal Government into what is their rightful domain. The Federal Government should be carefully limited to the exercise of those powers specifically delegated to the Federal Government under the Constitution, the Federal Government not rightfully exercising any other, because all the rest of the powers were, under the Constitution, reserved to the States and to the people.

But in this instance the correction that was sought in ceding the territory back to Maryland was no more than putting it back as it was at the time the Constitution was passed, and before it had been changed not by the constitutional amendment but by statutory enactment.

Mr. President, I think it is quite likely that if this Congress passes no constitutional amendment dealing with representation, that the people of the District might well go to court to assert their right to vote. If they go to court to assert their right to vote, there is precedent that would say the court would uphold that right to vote and they would be allowed the right to vote in the State of Maryland, as they did before the change was made in the early 1800's that denied them that right to vote in the State of Maryland.

I have already offered an amendment which would strike the existing proposal in House Joint Resolution 554 and substitute for it the retrocession, a full retrocession of the areas not occupied by the Federal Government back to the State of Maryland for all purposes. The people of the District then would be permitted to vote for a Governor, to vote for legislative members in the State legislature, to vote for Members of the House of Representatives, and Members of the Senate, as every other citizen of the United States can do within any of the 50 States.

They would vote for the President and presidential electors as every other citizen of the United States is allowed to do within the 50 States. But that was rejected by the Senate—again on narrow political grounds. Political expediency is controlling the action of the Senate, not principle; because if the principle is to give the people of the District the opportunity to vote and to give them the full exercise of civil rights, we would have adopted either full retrocession to Maryland or, in the alternative, confronted the problem squarely by granting statehood to the District, rather than doing what is being proposed in this resolution.

The pending amendment, Mr. President, would attempt to take us from where we are and do the best we can now do with a situation that the Senate has not already considered and rejected. I would have much preferred it had full retrocession passed. But the Senate, in its judgment, turned that proposal down.

The amendment which I have now offered is a partial retrocession in an effort to give to the people of the District as much right as we can under the situation which remains before us for consideration without destroying the constitutional principle of State representation in the Senate. This amendment, Mr. President, would simply retrocede—excuse me, I should not use that term. It does not retrocede the territory to Maryland; it would allow the people in the District of Columbia to vote for Senators as though they were voting citizens of the State of Maryland.

In all other respects, the situation would be as it exists now or as is otherwise provided under the pending resolution. They would vote for representatives within the District of Columbia to represent them in the House of Representatives. They would, under my amendment, vote for the Senators of their choice in the State of Maryland, and the State of Maryland would have jurisdiction over that voting process so far as the Senators were concerned. In all other respects, they would be granted the representation that the pending resolution gives them; they would retain all other rights as citizens of the District, as now provided under the Constitution and other statutes of the State of Maryland.

Mr. President, may I inquire of the Chair how much time I have remaining?

The ACTING PRESIDENT pro tempore. The Senator has 1 minute remaining.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

Mr. President, I suggest the absence of a quorum, to be taken from the time of the opposition to the amendment.

The ACTING PRESIDENT pro tempore. Is there objection? If not, the clerk will call the roll.

The second assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that Senator MORGAN may be added as a cosponsor of my amendment.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

The ACTING PRESIDENT pro tempore. Who yields time?

Mr. LEAHY. Mr. President, first, I appreciate the courtesy of the Senator from Idaho in calling a quorum and luring me back onto the floor.

Mr. President, the matter before us is really another variation of the amendment offered yesterday on retrocession. I think the distinguished Senator from Massachusetts (Mr. KENNEDY) made the argument very, very well and very properly on that. D.C. has not been a part of Maryland since 1790, when it was ceded to the District of Columbia. Virginia was retroceded in 1846, but had never been used for the Federal city.

If you look at precedents, look at the precedent of the 23d amendment, approved in 1961, which gave the District of Columbia the right to vote in Presidential elections, three electoral votes on its own right—not as part of Maryland, not as part of Virginia, not as part of any other area—but three electoral votes for the District of Columbia as one proud, independent entity. The legislative history never even suggested that the District of Columbia should vote through Maryland and I think the two Senators from Maryland have made very, very clear their own feelings here.

This issue was never raised in the House. I really think it would make about as much sense to let the District of Columbia vote in the State of Vermont, and quite frankly, Mr. President, I am not overly eager to have that particular sword of Damocles hanging over not so much the Green Mountains but my own head. I think that that would not make sense. For that reason, I move to lay the amendment on the table.

I ask for the yeas and nays.

The ACTING PRESIDENT pro tempore. Does the Senator yield back all of his time?

Mr. McCLURE. Mr. President, before that, I think I have a little less than a minute remaining.

The ACTING PRESIDENT pro tempore. The Senator is correct.

Mr. McCLURE. Mr. President, the amendment that I have offered would grant to the residents of the District the rights of citizenship and representation available to other Americans while avoiding the insurmountable constitutional hurdles associated with House Joint Resolution 554 and other proposed remedies.

In all other respects the District would retain its unique status as a Federal enclave subject to exclusive congressional control under article I, section 8, clause 17. The purpose of the framers in establishing the seat of National Government in an independent Federal entity would not be altered by this proposal.

Mr. President, I hope the amendment is adopted.

Mr. LEAHY. Mr. President, I stand here, in a way, feeling that I am in a unique position. I represent the most rural State in the United States, the State of Vermont. We do not have one single urban area, by Federal standards. Yet I am here arguing to give this identity to a virtually exclusively urban area. I can state a number of reasons. The

charts show the District of Columbia has more people than 7 States, pays more taxes than 11 States, had more deaths in Vietnam than 10 States. It is a matter of simple justice, Mr. President.

I cannot imagine any Vermonter, denied this type of basic representation, who would not be prepared to lead a revolution against such a situation. Certainly, this Vermonter, at least, would help, in a surrogate fashion, that kind of revolution for the people of the District of Columbia. It is absolutely essential that they be given the same rights as Vermonters, or North or South Carolinians, or Virginians, Marylanders, or people from Rhode Island or people from California, or anywhere else.

Mr. President, I will be making a motion to table. I will be asking for the yeas and nays. But I would hope we could get a few Senators on the floor prior to doing that.

Mr. President, I suggest the absence of a quorum, but I ask unanimous consent it be on my time on this amendment.

The PRESIDING OFFICER (Mr. RIEGLE). Under the precedents of the Senate, the Chair advises that the Senator no longer has sufficient time.

Mr. LEAHY. How much time do I have?

The PRESIDING OFFICER. If the Senator will yield back his time and suggest the absence of a quorum——

Mr. LEAHY. Then, Mr. President, I make a motion to table the amendment of the Senator from Idaho and I ask for the yeas and nays.

The PRESIDING OFFICER. Does the Senator yield back his time?

Mr. LEAHY. I yield back my time.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the motion to lay on the table UP amendment No. 1704 of the Senator from Idaho. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. CRANSTON. I announce that the Senator from South Dakota (Mr. ABOUREZK), the Senator from Alabama (Mrs. ALLEN), the Senator from Minnesota (Mr. ANDERSON), the Senator from Arkansas (Mr. BUMPERS), the Senator from Mississippi (Mr. EASTLAND), the Senator from Colorado (Mr. HART), the Senator from Montana (Mr. HATFIELD), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Hawaii (Mr. INOUYE), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Hawaii (Mr. MATSUNAGA), the Senator from Ohio (Mr. METZENBAUM), the Senator from Tennessee (Mr. SASSER), the Senator from Mississippi (Mr. STENNIS), and the Senator from Georgia (Mr. TALMADGE) are necessarily absent.

Mr. STEVENS. I announce that the Senator from New Jersey (Mr. CASE), the Senator from Kansas (Mr. DOLE), and the Senator from California (Mr. HAYAKAWA) are necessarily absent.

The result was announced—yeas 46, nays 36, as follows:

[Rollcall Vote No. 341 Leg.]

YEAS—46

Bayh	Haskell	Muskie
Biden	Hatfield,	Nelson
Brooke	Mark O.	Packwood
Byrd, Robert C.	Hathaway	Pearson
Chafee	Heinz	Percy
Chiles	Hollings	Randolph
Church	Humphrey	Ribicoff
Clark	Jackson	Riegle
Cranston	Javits	Sarbanes
Culver	Kennedy	Sparkman
Danforth	Leahy	Stafford
Durkin	Magnuson	Stevenson
Eagleton	Mathias	Stone
Ford	McGovern	Thurmond
Glenn	McIntyre	Williams
Griffin	Moynihan	

NAYS—36

Baker	Gravel	Proxmire
Bartlett	Hansen	Roth
Bellmon	Hatch	Schmitt
Bentsen	Helms	Schweiker
Burdick	Hodges	Scott
Byrd,	Laxalt	Stevens
Harry F., Jr.	Long	Tower
Cannon	Lugar	Wallop
Curtis	McClure	Weicker
DeConcini	Melcher	Young
Domenici	Morgan	Zorinsky
Garn	Nunn	
Goldwater	Pell	

NOT VOTING—18

Abourezk	Hart	Matsunaga
Allen	Hatfield,	Metzenbaum
Anderson	Paul G.	Sasser
Bumpers	Hayakawa	Stennis
Case	Huddleston	Talmadge
Dole	Inouye	
Eastland	Johnston	

So the motion to lay on the table UP amendment No. 1704 of the Senator from Idaho was agreed to.

Mr. LEAHY. Mr. President, I move to reconsider the vote by which the motion to lay on the table UP amendment No. 1704 was agreed to.

Mr. KENNEDY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 1705

(Purpose: To grant the same rights and powers to cities having a population greater than the District of Columbia)

Mr. McCLURE. Mr. President, I have an amendment I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The second assistant legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 1705.

On page 2, line 5, strike out "shall" and insert "and the cities of New York, New York, Chicago, Illinois, Los Angeles, California, Philadelphia, Pennsylvania, Houston, Texas, Detroit, Michigan, Baltimore, Maryland, Dallas, Texas, San Diego, California, San Antonio, Texas, and Indianapolis, Indiana, shall each".

On page 2, line 9, after "government" insert "and of the cities enumerated in section 1".

Amend the title so as to read: "Joint Resolution proposing an amendment to the Constitution to provide representation in the Congress for the District of Columbia and certain cities.".

Mr. McCLURE. Mr. President, I ask unanimous consent that it be in order to request the yeas and nays on the amendment.

Mr. KENNEDY. Mr. President, I ask unanimous consent that it be in order to ask for the yeas and nays on a tabling motion.

The PRESIDING OFFICER. Is there objection to the requests of the Senator from Idaho and the Senator from Massachusetts?

Without objection, it is so ordered.

Mr. McCLURE. I ask for the yeas and nays.

Mr. KENNEDY. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays are ordered on both the amendment and the motion to table should there be one.

Mr. LUGAR. Mr. President, will the Senator yield?

Mr. McCLURE. I yield to the Senator from Indiana for a unanimous-consent request.

Mr. LUGAR. I thank the Senator from Idaho.

Mr. President, I ask unanimous consent that the privilege of the floor be accorded to David Gogol, of my staff, during debate on this resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, this amendment may be regarded by some as simply frivolous, and I will confess that this is not the approach which I would have preferred to take.

But this amendment, Mr. President, would establish for other cities in this country the same degree of representation which the Senate seems bent upon voting for this city.

Mr. President, I offer an amendment which would grant the same rights and powers to cities having a population greater than Washington, D.C., as House Joint Resolution 554 would provide to the District of Columbia.

This amendment would grant to the residents of New York City, Chicago, Los Angeles, Philadelphia, Houston, Detroit, Baltimore, Dallas, San Diego, San Antonio, and Indianapolis full voting representation in the Congress and the right to participate in the amendment ratification process as if each of these cities were a State.

Mr. President, I wonder if we could have order.
